A third example that occurs immediately is our attitude toward the fighting in the Horn of Africa. Certainly the Somalia-Ethiopian conflict is a thorny problem, and I am not suggesting that the United States should have intervened. Ethiopia, now acting as the agent of the Soviet Union, has not always been so. For years we had healthy relations with Ethiopia, and it is likely that we will again. On the other hand, it has not been long since the Somalis expelled the Soviets, and I think it would be premature to cast our lot there.

At the same time, is it too much to suggest that we are well aware that the Soviet Union is promoting instability in the Horn? Is it too much to suggest that we take a dim view of those who promote instability? And that we might have some difficulty negotiating in other areas with such people? Specifically, might we not suggest that the course of strategic arms limitation talks could well be affected by continued Soviet adventurism in Africa? Everyone knows that one of the stickiest issues involved in SALT is the question of verification. To a large extent, verification problems depend on good will and trustworthiness, and the refusal of the Soviet Union to moderate its actions does nothing to increase my confidence in the good will and trustworthiness of the Soviet Union.

Of course all this brings up the word "linkage," and I have to admit that the administration, a week or so ago did suggest to the Soviet Union that there might be a link between SALT and Africa, but the immediate backtracking after Soviet objections was positively embarrassing. We appeared to cave in so fast to a moderate Soviet reaction that it

was painfully obvious that we had no conviction whatever, that our only interest was in avoiding conflicts with the Soviet Union. Clearly our policy was not informed by any strength of its own, but only by what was applied to it by external forces or by external powers.

The last example I would like to mention is the most recent, and the most blatant. It is this administration's appalling performance surrounding the Rhodesian negotiations. Last week Senator DOLE introduced a resolution expressing support for the efforts to reach a peaceful settlement of procedures for a transition to black majority rule in Rhodesia. I joined in supporting that resolution, and outlined at that time some of my feelings. It is incredible to me that the United States refuses to give its support to those who have come peaceably and peacefully to the negotiating table, working for a compromise which will solve a difficult situation. Instead, we stand carping on the sidelines, entertaining those whose avowed goal is to overturn any negotiated agreement, apparently in favor of a settlement negotiated by a bayonet.

After some extremely ill-advised overtures to the terrorist leader of the Palestine Liberation Organization, Yassir Arafat, President Carter has since recognized that a man who refuses to negotiate ought to be ignored. He has so stated with respect to the Mideast situation. Apparently, however, that rule of elementary common sense does not apply to Rhodesia. In Rhodesia we have a situation where two black leaders, representing no one but a few thousand ragtag terrorists, who have never stood for any election, refuse to lay down their arms and come to the negotiating table. Applying the Yassir Arafat rule, President Carter should have nothing to do with them. Instead, he and his administration can only find fault with the peaceful negotiations and their result, and by implication approve the continuation of terrorism.

Why? Who benefits? Whose favor are we currying by refusing to give the negotiators even the benefit of our good will? The answer can only be the Soviet Union. It is true that some of the other African States—by no means all of them, as is often alleged—have condemned the settlement, though from what vantage point it is hard to understand. Among the lot of them they do not have enough democracy to elect a single selectman. These African leaders claim that the settlement will not stop the fighting, and they may even be right. But they are not making any contribution to that fighting. Beyond some minimal territory used by the terrorists as staging areas, the surrounding states give precious little aid and comfort to the "troops" of Robert Mugabe and Joshua Nkomo. In fact, these nations have fairly comfortable relations with the existing white government in Rhodesia, though it is impolitic for them to say so.

Why will the fighting go on then? There is only one reason. Because the Soviet Union wants it to go on. Who supplies the arms to the terrorists? Who has promised to increase its support if Prime Minister Ian Smith is able to reach an agreement satisfactory to Bishop Muzorewe, Mr. Sithole, and Mr. Chirau? The Soviet Union and its puppet, Cuba.

Apparently, that threat is intolerable to us. Apparently, we are willing to permit the outbreak of a broad-based, Soviet-financed civil war in Rhodesia, rather than attempt some form of diplomatic isolation of the nation most interested in spreading terror and bloodshed across the world: the Soviet Union. And I find that fascinating, Mr. President. I wish someone could explain to me why that is, so I could make some feeble attempt to explain it to my constituents. Because I will tell you, Mr. President, they do not understand it.

What should we do? We could return to some form of "linkage." We could close our recently opened mission in Havana. We could tell Castro that we will not deal with a country whose No. 1 export is no longer sugar, but revolution. We could employ the international forums available to us to point out to the world the actual impact of the actions of the Soviet Union. For once in our lives, we could use "world opinion" for us instead of against us. And we could let it be clearly known that the interests of the parties to the Mideast conflict are primary and not the interests of the Soviet Union and Cuba.

Above all, we could develop a foreign policy of our own, instead of a foreign policy constructed exclusively as a reaction to the opinion of the Soviet Union.

Shortly after taking office, the Soviets expressed disapproval of our reaction to some SALT proposals. The State Department and the editorial writers of the Washington Post were horrified. Mr. Carter, to his great credit, remained calm. We do not need to jump, he said, every time the Kremlin sneezes.

That was a credible and a creditable position to take, and I applauded Mr. Carter for it at that time. Unfortunately, he appears to have forgotten it. Now, whenever the Kremlin sneezes, Mr. Carter takes pneumonia, and the State Department retires to Florida to recover from severe upper respiratory ailments. We will have no foreign policy of our own until our leaders develop some idea of where we are going and why, and the courage to lead us there. I have said before on the floor of the Senate that foreign policy is largely a matter of psychology, of self-image. Our self-image is poor, and our understanding of the psychology of nations even worse.

And so, Mr. President, I return to the point of original departure: What impact will the failure of the treaties have on the ability of the President to conduct foreign policy? The answer depends entirely on the kind of foreign policy he is trying to conduct. If he tries to conduct a foreign policy based on no more than a vague desire to avoid offending the Soviet Union, it is quite likely that the failure of the treaties will impair his ability. On the other hand, if he tries to devise and conduct a foreign policy based on the interests of this nation, and in support of freedom around the world, I am inclined to think that failure of the treaties will help him. Certainly it will demonstrate to the world that the Senate of the United States has some sense of proper foreign policy, and is not in accord with what has gone on to date in the Carter administration. That should help the President, should strengthen him in his resolve to protect human rights, to strike a fair bargain in the SALT talks, to speak firmly to Cuba and other nations dedicated to the overthrow of legitimate governments around the world, to strengthen our resolve, if these treaties are defeated, that we go back to the negotiating table with Panama and come up with treaties which are fair and reasonable to both sides.

It is fine for my distinguished colleague (Mr. LONG) to argue that it is morally right to do so. It may be. I disagree with that position, but it may be morally right, to return sovereignty of the canal to the Republic of Panama. But the treaties are militarily wrong. They do not give us the ability to defend the canal after the year 2000. They are a ripoff of the American taxpayer. They are overwhelmingly in favor of the Republic of Panama to the detriment of the American people and the American taxpayer.

So if it is right that we give them back, which again I disagree with, let us defeat these treaties and go back and negotiate and achieve treaties which are fair to both the United States and the Republic of Panama.

At this time I am very happy to yield to my distinguished junior colleague from Utah (Mr. HATCH) who has really done a great job, in my opinion, working against ratification of these treaties.

Mr. HATCH. I thank my distinguished senior colleague (Mr. GARN) for yielding, Mr. President.

Mr. President, my good friend and senior colleague has stated very strong and valid points. I, too, have heard the speculation that we would be handicapping the administration in its efforts to conduct foreign policy should we fail to ratify these treaties. Senator GARN has pointed out the problems the administration is having in many places in the world and how they have apparently decided that all efforts must be made to appease the Soviet Union.

I am concerned that this trend is causing irreparable damage to the American image abroad.

Senator GARN mentioned the "Human Rights" issue at the Belgrade Conference on European Security and Cooperation that completed its work last week. He pointed out that the conference failed to mention human rights in their declaration. The Carter administration has made human rights one of the major focal points of its foreign policy. Why then did the United States not insist that something be declared with respect to human rights? The answer was given by Senator GARN. It is because the White House was afraid that the Soviets would not sign the declaration. In describing the American campaign on human rights, the chief delegate to the Belgrade Conference, Yuli Voronstov, called it "a political campaign conducted for specific

political reasons. Like other such campaigns, it is bound to fail." The only reason that it is bound to fail is the failure of the administration to challenge the Soviets on the issues. For this same reason the administration has failed to challenge Omar Torrijos on the human rights violations that have occurred in Panama.

Senator GARN tells us why we have failed so miserably on the Middle East peace settlement. It is because we have insisted that the Soviet Union be included in any peace negotiations. At least, that is one of the reasons. My colleague from Utah has shown why we have bungled the situation in the Horn of Africa. Let me further indicate some of the problems that we have allowed to slip by in this crucial area. The Horn of Africa is probably one of the most sensitive areas in the world today. Prior to the outbreak of war in this region, the Soviet Union was a staunch ally of Somalia and maintained a large naval base at Berbera. When the Soviets sensed a chance to also extend their influence into Ethiopia, a longtime ally of the United States, they quickly began to send arms and advisors to the new government in Ethiopia. As can be expected, President Siad Barre of Somalia was concerned that the Soviets were arming his enemy so he asked the Russians to leave his country. This meant that the Soviet Union lost the important base they had occupied at Berbera. In the face of this action, and in spite of the fact that a number of us have known that this was likely to occur, the administration has continued to negotiate an Indian Ocean pact that would for all intents and purposes demilitarize the Indian Ocean.

We continue to do this when the Soviets have lost their secure position on the littoral and the United States has a strong and secure position at Diego Garcia.

Incidentally, the Soviets were absolutely terrified about our base at Diego Garcia, because it is right there near the soft under-belly of the Soviet Union, one of the great deterrent bases on the face of the Earth, and certainly important to the United States of America and to freedom in the world. Nevertheless, it looks as though we have a President, or at least a State Department policy, which is going to force us out of Diego Garcia, or at least would like to, when there is no quid pro quo, again, from the Russians. Even if there were, I think we should be well aware that we would leave Diego Garcia at the peril of the world.

In order to avoid a confrontation with the Soviet Union, the United States has permitted this concept to grow and gain a measure of acceptance within the international policymaking community.

I have obtained information from the Department of the Navy that indicates that the administration is deliberately slowing down the construction of facilities on Diego Garcia as they anticipate some sort of agreement with the Soviets on this issue and fear that further construction of needed facilities would hamper such an agreement. I point out to my colleagues that there is some doubt that the Soviets will be permanently barred from the base at Berbera, or elsewhere in the Indian Ocean, and should they return, then their ardor for an agreement on the Indian Ocean will be somewhat cooled. I reach that conclusion by realizing that Somalia is a leftist state and there is a definite possibility that it may return to the influence of the Soviet Union after the conflict in the area has cooled down. By that time, the Government of Ethiopia will have become dependent upon the Soviet aid that they are now in receipt of and they will find it hard to break away from the Soviet hegemony.

Because the United States has endeavored to avoid a confrontation with the Soviet Union in this crucial area, we will end up with very little influence in the area. I am talking about an area that is important to the oil supply of the Western World. Some have said that, on a clear day, you can look out over the sea lanes along the eastern coast of Africa and it looks like Shirley Highway here, in Washington, at the peak of rush hour. The great oil tankers coming out of the Persian Gulf all use this passageway to traverse their way to the ports in Europe and the United States. In a time of crisis, this is one of the first places that the Soviet Union will "close down" in its future actions against the Western nations.

Senator GARN has explained the debacle that we find ourselves in with respect to the Rhodesian problems as a result of our lack of decisiveness and kowtowing to the Soviet wishes. But there are many more places where we have backed down. Look at the present situation in Cuba. This issue is somewhat related to the developments in the Horn of Africa. As a result of the large amount of aid Cuba has sent to Ethiopia and other African nations, both in terms of equipment and men, the Soviet Union has provided Cuba with pilots to fly what are termed "defense missions" for the island nation. I can remember a time when the Soviet Union attempted to place missiles in Cuba and the American President, John F. Kennedy, stepped in and ordered the Soviet Union to immediately cease and desist from such activity and to further dismantle the missiles that had been emplaced on the island. With a great deal of reluctance, the Soviet Union complied, for they knew that the United States meant business and they feared a confrontation. I say again, it was they who sought to avoid a confrontation with the United States.

In view of the recent reports of the Soviet pilots flying missions for their Cuban comrades who are fighting in Africa, there has been a failure of the White House and the State Department to register any complaints about such activity. I think that it is within reason to ask why this has been the case. I think that it is within reason to ask the White House what the position of the administration is on this issue and other issues.

My distinguished colleague (Mr. GARN) mentioned briefly the problems of the new SALT agreement. It is hard to describe what is really going on in the SALT negotiations in Geneva; but, if you think that the United States is making damaging concessions, concessions that will affect our national security for many years to come, in the Panama Canal Treaties, then you should examine the proposals that are coming back from Switzerland. Since the 1960's, the United States has gone from a position of clear superiority in the arena of strategic weapons to a position of what is described by many as "rough equivalence," and I suggest that we are rapidly heading toward a position of inferiority. The SALT II Treaty will permit the Soviet Union to not only catch up in the few areas where we still maintain an edge, but will also allow them to extend the advantages that they now possess in the areas of modern "heavy" ICBM's and total throw weight. We have permitted them to force us to reconsider whether we will hold firm on the issue of transfer of technology to our European allies, an issue that threatens to put a chink in the armor of our NATO alliance, the single most important alliance in the Western World. The range restrictions on the cruise missile have all but rendered the weapon useless. It does not do us much good to have the most accurate system in the world if it is unable to reach its target. We have canceled the B–1 bomber, the most sophisticated bomber in the history of the world, nuclear hardened and generally superior.

But at the same time, we are willing to exempt its Soviet counterpart, the Backfire bomber, from the strategic talks because the Soviets have promised us that they will not employ the Backfire bomber strategically. That should give every American a lot of confidence, since we know how well the Soviets live up to agreements.

Keep in mind that our intelligence tells us that with one refueling, the Soviet Backfire bomber has a range that exceeds the B–52. Once again, the administration is willing to accept this in order to avoid a confrontation with the Russians.

This posture of foreign policy has continued in other critical decisions. The administration now proposes that we withdraw our ground troops from Korea. Many have said that the situation in Korea is a powder keg just waiting to explode. In the last few years, there have been several incidents involving the North Korean Government and the United States that should be sufficient to demonstrate that the North Koreans have no intention of abandoning their goal of forcing North and South Korea under one government, a Communist government, similar to the form of government now in existence in Vietnam. The late Senator Hubert Humphrey, in a report made public after his death, cautioned the administration to proceed with the utmost caution on this proposed withdrawal. Senator Humphrey saw the dangers of removing ground forces, for this would be an open invitation to the North Koreans to swarm across the border in a surprise attack. Once accomplishing this, the United States would be faced with the agonizing decision of whether or not to intervene and use American troops to push the invaders from the north back across the border.

As long as U.S. ground forces remain, our ground forces will act as a deterrent against such an attack. Once again our foreign policy seems to be a reaction to the intentions of the Soviet Union. The information that was made public concerning Presidential review memorandum-10 brought to light the fact that the administration was reconsidering its commitment to NATO defense. This has resulted in the administration scrambling to assure the other nations of NATO that the United States does indeed intend to maintain a strong commitment to NATO. What PRM–10 said in fact was that the United States was willing to concede one-third of West Germany in a Warsaw pact invasion and then wait for world opinion to force the aggressors to return to the original borders before the invasion. This is the same world opinion that stopped the Soviet intervention in Hungary in 1956.

These are only a few examples of the disarray into which our foreign policy has fallen; I could cite more, such as the imbalance that now exists in conventional forces that the administration is trying to correct, without much success I might add, at the mutual and balanced force reduction talks (MBFR); the situation concerning the recognition of Red China and what to do about Taiwan; the administration's proposal to sell warplanes to both Israel and Arab nations, and the list goes on, but I think that the point is adequately made. The Carter administration has shown a definite reluctance to take any stand which may force a Soviet/U.S. confrontation. I think that it would be a correct observation if I were to use the term "avoidance" as one that describes the Carter foreign policy. To actually describe the administration's foreign policy is no easy task, for the media has been trying to decide what Carter's foreign policy is for more than a year.

Returning to the original questions, that being whether the failure of the treaties concerning the Panama Canal will destroy the ability of the President to conduct foreign policy; I think that it has become a moot point for we have no clear direction of foreign policy. If we have no policy, then we cannot harm the position of the Presidency by failing to ratify these treaties. While on this subject, let me set one point clear. I am not adopting a position that the United States should force confrontations with the Soviet Union. What I am saying is that we should not base our foreign policy decisions on a determination to avoid such a confrontation. Our foreign policy should be independent of these matters and should be done with what is best for the United States being uppermost in mind. I do not think that the Carter administration has done this, but rather we have seen a knee-jerking response to Soviet reactions. This administration has failed to grasp the importance of international affairs. I point out the depth of the Carter foreign policy by reminding you of the fiasco the President involved himself in while visiting Poland. His interpreter lacked the proper knowledge of the Polish language to adequately translate for the President, resulting in an embarrassment to the Polish officials and the President.

Of course, I do not blame President Carter for that, but it does, I think, tend to back up some of our assertions that maybe at least some members of the State Department are not doing their jobs with respect to some of the things that are going on, and I would certainly include the Panama Canal treaties as blatantly important examples.

Last week the President's policymakers allowed him to demonstrate the administration's grasp of the fullness of international diplomacy.

In his welcoming remarks to President Tito of Yugoslavia, President Carter described Tito as a "great world leader" and as a "friend and associate of Prime Minister Churchill, President Roosevelt, and General de Gaulle." The Washington Post pointed out that—

> Tito, 85, had never met Franklin D. Roosevelt, who died before Tito seized control of Yugoslavia. Nor did he meet Charles de Gaulle, who remained hostile toward Tito throughout his life, deGaulle having supported an opponent of Tito, General Draza Mihajlovic, who was executed by Tito after the war. Mihajlovic and deGaulle were classmates at the St. Cyr Military Academy. Tito did meet Churchill in 1944. But after the initial warmth, the two men became political enemies in the postwar period.

Mr. President, the one thing that we here in the Senate must remember is that we have a constitutional mandate of "advice and consent" with respect to treaties entered into by the executive branch of the Government.

That is one of the great checks that the Founding Fathers put into the Constitution so that we do not have Presidents going out and abdicating responsibilities that we owe to the United States of America and to its citizens. For us to even consider that we might ratify a treaty just to allow the President of the United States more leeway to act in foreign affairs, when we have seen such a display of ineptness, inaction, and avoidance by the administration would be an abandonment of our own duties, as representatives of all the people of the United States of America.

I compliment my senior Senator from Utah, because I think he has pointed out a number of things that all Americans have to be very much concerned about. I think that it is important that when we consider statesmanship that we consider the American people first. I think it is pretty important when we consider statesmanship that we consider our own selves and our own protection and put it foremost. I think it is important when we talk about statesmanship that we read these documents and we do not get up and just talk in generalities. I am not suggesting that anybody has talked in generalities today, but I think we should read these documents and I think we ought to make them as good and profound as they can be possibly, if we are going to have these treaties.

What I have seen is an abdication of that responsibility by the stonewalling that has gone on with regard to good and decent amendments, which would have corrected and made these treaties better, and I think which would have been necessarily acceptable to Mr. Torrijos. I have seen more regard for Mr. Torrijos on the floor of the Senate during these debates than he deserves, and I have seen less regard for, I think, the majority of the American people than they deserve.

I might mention that what is important to me is that we have all kinds of polls in this area. I think the most significant is probably the Princeton research poll out of Princeton, N.J., because the questions were fair, but if the administration is saying the American people are turning in favor of these treaties, which, of course, I rebut and know is wrong, then I think everybody ought to reconsider. Maybe what we ought to do is review, rephrase, and straighten out these treaties for the protection of those very same people. That is what we have tried to do in the last number of weeks.

I think, as a matter of fact, there have been some marvelous amendments which would have made those treaties much better. I just want to say, in closing, that I appreciate the work done by my colleague in the Senate. I appreciate his leadership on this particular issue. I appreciate the fact that he has made extensive and very definitive studies of foreign policy, and especially with regard to our military preparedness, the SALT II agreement, and a variety of other issues which are, in my opinion, perhaps even more important than the Panama Canal treaties, which, as everybody must know who has listened to these debates, is very important in my eyes.

Mr. President, I would just like to close by suggesting that I would like to support the President in every way I can. I cannot do so with regard to these treaties because of my analysis of them, my reading of them, because of the visit I made, and because of a great number of other reasons.

I also will not support the President merely because his own personal prestige may be damaged if these treaties are not ratified. I do not think that is a valid reason. I think that any man, no matter what the mistakes of the past, can change his life and go forward and do better, and I suspect that there is lots of room for our President to go forward and do better.

Thank you, Mr. President.

The PRESIDING OFFICER. Will the Senator from Utah yield to the Senator from Mississippi for a short time?

Mr. DOLE subsequently said: Mr. President, I share the concerns expressed by my colleagues Mr. GARN and Mr. HATCH regarding the direction which this adminstration's foreign policy is taking. At the same time, I agree with them that defeat of the Panama Canal treaties, or even their modification, would not seriously hinder the President's ability to conduct our foreign policy.

It is ridiculous to suggest that treaty amendments or reservations—beyond those specifically approved by the administration—would be a crushing blow to the President's ability to conduct our foreign policy in the months ahead. Instead, I think the enactment by this body

of treaty modifications should be viewed in the proper perspective: As a new stage in canal treaty negotiations.

The Senate enjoys a clearly defined constitutional responsibility to "advise and consent" on executive treaties submitted by the President of the United States. I believe the distinguished Senator from Michigan (Mr. GRIFFIN) has set forth a persuasive argument that the Senate should express its "advice" but withhold its "consent" on these proposed treaties. I have said all along that the Senate has a responsibility to perform this constitutionally designated advisory role to the President, as a part of the international treaty-making process. As it does so, further talks with the Panamanians on critical points may be necessary and should be welcomed.

But let us not overdramatize the consequences. Amendment of the canal treaties will not spell disaster for this administration's foreign policy program, and it should not, for it is not accomplished in a narrow partisan sense, or as a vote of "no confidence" for the President.

If we do our work as we should do our work, and as I think every Member of this body will do his work, it will be viewed by most thinking Americans as a conscientious effort by this body to preserve what we see as nonnegotiable interests.

RHODESIAN RESOLUTION

Mr. President, on March 7, I introduced Senate Concurrent Resolution No. 69, expressing support for the recent settlement of internal differences within Rhodesia by the ruling government and moderate black leaders. I was joined in that endorsement by several of my colleagues: Mr. GARN, Mr. HATCH, Mr. LUGAR, Mr. HAYAKAWA, Mr. TOWER, Mr. ALLEN, Mr. HARRY F. BYRD, Mr. GRIFFIN, Mr. WALLOP, Mr. LAXALT, and Mr. BARTLETT. It is simply our feeling that the United States and Britain, who have long encouraged just such a peaceful resolution of the Rhodesian problem, should now do their part to insure that radical, Communist-supported factions do not disrupt this unique chance for peace. We should now take the initiative to fully endorse the multifaction agreement and to encourage the support of other nations as well.

Thus far, however, the Carter administration has not seen fit to embrace this momentous accomplishment. The administration continues to insist that radical leftist leaders be accommodated by the settlement, despite the fact that the parties in agreement had already rolled out the red carpet to resisting black leaders. They have had every opportunity to participate in the settlement, yet they threaten further warfare. The principal leader of the so-called "patriotic front" has declared that "voting booths will become military targets" if the one-man, one-vote settlement signed on March 3 comes into force.

PATTERN OF POLICY RETREATS

Mr. President, I strongly suspect that many Americans today are concerned, as we are, about the emerging pattern in the administration's long string of foreign policy concessions. There are disturbing parallels between President Carter's misguided Middle East maneuvers, his defective Panama Canal treaty proposal, and his initiatives in South Korea, Cuba, Vietnam and elsewhere. The list reads like a roadmap of retreats by this administration in its policies toward the rest of the world.

It used to be commonly recognized that the Soviet Union would carefully monitor the actions of a new and unknown U.S. President to determine his mettle. It used to be an accepted concept that the Soviet Union better understood strength than weakness. I believe both of these concepts still hold true.

I have no doubt that the Soviet leaders have closely followed the policies of President Carter in the international arena. They have noted the lack of a timely and appropriate response to Soviet-Cuban provocations in the Horn of Africa. They are watching his response to the Rhodesian settlement.

In general, what the Soviets have observed is a steady series of U.S. withdrawals and submissions on nearly every foreign policy front. In matters directly affecting our two governments, they have found this administration only too willing to make concession after concession.

I submit that a minimum amount of "backbone" might have done far more to gain and retain Soviet respect, as well as to protect American interests. It would be a serious mistake to sell ourselves short, and to sell our friends down the river in a clumsy and misguided effort to shore up this administration's sagging profile on the international scene.

For that reason, Mr. President, I trust that we in the Senate will have the willpower and the determination to take whatever action is necessary with regard to the Panama Canal treaties. I trust, further, that the administration will listen to our concerns with respect to the situations in Rhodesia, Cuba, South Korea, and elsewhere during the coming months.

Mr. GARN. I am happy to yield to the Senator from Mississippi.

Mr. EASTLAND. Mr. President, we are engaged in one of the most important foreign relations debates since World War II. The Panama Canal treaties, perhaps more than any other international issue in recent years, have grasped the attention of the American people. The extensive hearings and the number of days of informed debate which have already occurred on the floor of the Senate, with the unprecedented radio broadcast of the proceedings, attests to the great interest of the country in the matter.

This interest exists because of the vital role which this canal long has played, and continues to play, regarding this Nation's economic and military well-being. The treaties before us represent the current stage of negotiations which have been carried on over a decade, by which the United States would drastically alter its 75-year-old agreement with Panama concerning the canal through that country.

These treaties would, quite simply, relinquish American ownership and control of the canal. At the outset, Mr. President, I wish to state my opposition to their ratification and to briefly outline my objections thereto.

First, Panama has no resources of any sort except the canal and related industry and municipalities in its periphery. It has no other resources upon which it can support the operation of this canal as a worldwide commercial establishment. The United States has maintained this canal for more than 60 years on a nonprofit basis, thereby benefiting the commerce of the entire world. Panama cannot do this. The mere fact that we are offering to subsidize operation of the canal in the future is indicative of the cold economic facts.

Second, the treaties do not give the United States clear authority to intervene if the neutrality of the canal is violated by a hostile power. This is a most outrageous circumstance in view of the fact that recent history has shown that where American presence is withdrawn around the globe, the Soviets and their troublemaking satellites move in.

Third, Mr. President, this treaty not only requires that the United States surrender the ownership of the canal, but contains the unbelievable provision which gives the little nation of Panama, and whatever governments may hereafter rule it, an absolute veto over the power of the United States, with its 250 million people carrying the world's greatest share of commerce, to build another canal in a third country.

Fourth, I find it incredible that it may cost the United States upwards of $3 billion to give away this very valuable piece of real estate. Panama will receive yearly over the next 22 years fixed fees of $20 million plus percentages of the tonnage shipped, which will amount to approximately $40 million a year, and the United States may still find itself liable for an additional $220 million in 1999 if sufficient surplus is not available from tolls. At the same time the United States will be required to maintain the upkeep on the canal until 1999. With all this giveaway to Panama, the upkeep may well have to come out of the U. S. Treasury.

Fifth, it seems equally beyond belief that American negotiators made no effort to include provisions to fix the amounts of tolls which Panama can charge on world commerce after 1999. Nor did the American negotiators attempt to provide that such revenues should be used to maintain the canal.

Mr. President, it may be that the United States, in the operation of the canal, has purposely kept the tolls low to encourage commerce. Panama may justly argue that it is entitled to a greater share of earnings. Perhaps tolls should be increased to accommodate this end. If Panama had suggested a procedure of a greater share of the tolls, I think a pretty strong case could be made out in behalf of such an agreement. Further, if Panama had asked for a voice in the operation of the canal, again I would not resist such accommodation, but never the surrender of the canal itself. As an individual, I would not necessarily object

to giving the nations on the western slopes of the Andes a voice in the operation of the canal, as well as other nations of Latin America who have a vital stake in the canal and its operations.

But again, I say "never" to the relinquishment of the canal itself and the Canal Zone.

Mr. President, I would most emphatically deny, as some have suggested, that the Panama Canal was born out of the womb of imperialism. It was conceived and developed, rather, in response to a great trade necessity of the Western Hemisphere. It so happened that the United States was the only country at the time with the know-how and capital to construct the facility.

The canal, historically, and to this day, has had a major impact on the trade not only of the Western Hemisphere but of the entire world. It has been aptly described by Adm. Thomas Moorer, former Chairman of the U.S. Joint Chiefs of Staff, as one of the four major water passages of the world on a par with the Gibraltar Straits, the Suez Canal, and the Malacca Straits.

This canal, which was built by American ingenuity and effort, has been maintained and operated by this country for more than 60 years on a fair, efficient, and nonprofit basis for the benefit of all the world.

We are asked now, Mr. President, to drasticaly change our relationship to this canal; specifically the treaties before us, if ratified, would require the United States to give up ownership of this property within 6 months and by a phased-out withdrawal remove all of its military forces and personnel prior to the year 2000. In reaching our decisions on these treaties, I believe we must first determine whether the national interest is best served by yielding our sovereign control of this canal, and second, whether the treaties properly protect important U.S. rights if we do so decide to yield our control.

Mr. President, in weighing these factors, I have had the benefit of studying the hearings and reports of various committees and subcommittees of both bodies of Congress which have examined the canal question. In the Senate, extensive review of this matter has been had by both the Foreign Relations Committee and the Armed Services Committee as well as the Subcommittee on the Separation of Powers of the Committee on the Judiciary upon which I serve. In addition to the long debate which has already occurred on the floor of the Senate this month, I have recently visited the Canal Zone for a firsthand view of the situation.

As is the case generally with other lesser legislative matters, the burden of proof or justification for the action lies with the proponents of a given measure, so it is with the treaties before us. The treaties before us, however, are no mere legislative matters, which can be undone by subsequent legislation should they not prove workable. Rather, we must expect to be permanently bound by them should they be ratified.

Because of this fact, and because of the sizable military and economic effects on the United States and the Western Hemisphere that these treaties may set in motion, I submit, Mr. President, that the proponents of these measures have an extraordinarily high burden in showing to the Senate, as well as to the American people, that ratification is indeed in the best interests of this country.

To my mind, Mr. President, this burden has not been met. The arguments proposed in favor do not overcome the serious defects in the treaties, as drafted, which could seriously compromise the economic and military well-being of this country. I, therefore, do not favor ratification of these treaties and would urge my colleagues to oppose them.

It is with some regret that I must oppose these treaties. I believe that in the conduct of foreign affairs the President deserves the greatest of support and the benefit of every doubt. This belief I have steadfastly followed during my senatorial career. The Constitution provides for Executive leadership in international matters and with all the powers of his office he is well equipped to make judgments in this area. The Constitution, however, also grants to the Congress the right and duty to "advise and consent" to foreign treaties. In fulfilling this duty, the Senate has well informed itself of facts surrounding the treaties before us. It is my hope that during the course of this debate the Senate, should it withhold its consent, will be able sufficiently to advise the President as to the basis upon which a satisfactory accord can be reached with Panama.

The rejection of these treaties should not necessarily be construed, therefore, as a rejection of attempts to come to a better understanding with the Government of Panama. Rejection should not mean the end to further negotiations. Rather, further talks should be had with our southern neighbor in order to attempt to best accommodate their interests while at the same time guaranteeing, in less ambiguous terms, the interests of this country and the rest of the world's users of the canal.

Mr. President, although many words have been spoken and written on this subject, it appears that the arguments in favor of ratification center on three bases:

We are told that the canal is becoming obsolete and, therefore, not of much importance; that it is incapable of being defended; and, lastly, that our Nation would be held in higher worldwide regard if we stripped ourselves of one of the last vestiges of "colonialism."

As to the first point, regarding obsolescence, while it is true that the new supertankers are too large to pass through the canal, such vessels represent only a small percentage of total shipping tonnage. It further should be pointed out that now these large tankers are not able to use existing harbors in the United States. More important is the fact that currently the canal can accommodate 93 percent of the world fleet and 96 percent of U.S. merchant ships. The same argument of inadequate size is used by proponents of the treaty regarding naval warships. The fact is, however, that virtually all of the U.S. Navy's fleet, with the exception of 13 of its largest carriers, can navigate the canal.

In the last 30 years the shipping which has moved through the canal has increased greatly, some 400 percent. This trend continued this past year and forecasts indicate no decrease.

Although it is not easy accurately to determine the nature of our naval forces over the next three or four decades, some informed observers believe that the nuclear age will foster the development of relatively small, highly mobile warships. Continued use of the canal in such a situation is obvious.

There are those favoring the treaties who argue that the United States cannot successfully defend the canal from the sabotage of terrorists or guerrillas. This argument I submit, Mr. President, which amounts to approval of making concessions under threat of harm, does not provide good basis for a just accord. Rather, an agreement reached under such conditions may further whet the appetite of aggressors in this area as well as other places on the globe where American interests exist.

As an aside, Mr. President, it should be noted that terrorists attacks are difficult to prevent anywhere, including within this country. We can all recall the bombing of the U.S. Capitol and the violence which occurred in and around some college campuses earlier this decade.

The United States' continued military presence in the Canal Zone in fact does act as a deterrent to aggression. It is, of course, much easier to defend property with troops already on the ground than with a treaty agreement granting us the right to return when such trouble arises after we have completed our withdrawal.

It should be noted that U.S. forces have defended the canal against sabotage successfully throughout four wars. The U.S. forces have been trained and equipped for this activity and clearly would be able to resist any attack better than any other forces.

Regarding the threat of domestically inspired guerrilla forces, Admiral Moorer, testifying before the Armed Services Committee, had this comment:

> The proponents of these treaties proclaim again and again that the only way to handle the internal threat is to ratify the treaties and give up the Canal. It is repeated over and over again that we are not interested in ownership, only continued use, which can be acquired only with the help of the Panamanians. Otherwise, they say, 100,000 troops will be required to defend the canal and we will immediately be plunged into another Vietnam. I do not accept any of these scare statements. In the first place, a major part of the income of Panama is due directly to the existence of an operating canal. If the Panamanians make an effort to sabotage the canal they are the ones that will be harmed. Most of them know this.

The notion that we are agreeing to these accords because of the fear of violence from certain elements within Panama seems to me dangerous. Under the terms of the treaties in question, Panama would not gain control of the canal for another 22 years. Could not the ratification of these treaties be inter-

preted as a signal by those extremists that more threats or actual sabotage would result in an even quicker departure of all U.S. forces?

The third major reason advanced by treaty proponents, that our world respect would soar if only we would give up our "colony" in Panama, is based, I believe, upon a misreading of history and current world politics.

Prior to the canal treaty with Panama in 1903, the United States studied several possible alternative canal routes. Had Panama not revolted and declared independence from Colombia the canal very well may have been constructed in Nicaragua. Some have contended that the powerful United States forced Panama to accept less than favorable terms. It should be noted that the terms of the 1903 treaty were mutually beneficial to both parties. Panama was particularly interested in obtaining the good will of the United States in order to gain protection from Colombia and other countries. The split from Colombia came after six prior attempts on the part of Panama and after the Colombian Senate refused to agree to a treaty with the United States for a canal through the territory of Panama. The local independence movement which followed was for the purpose of insuring that the canal did go through Panama rather than Nicaragua.

The original treaty, signed in 1903, was ratified by both the Panamanian and U.S. Governments. This treaty granted to the United States "in perpetuity" the use, occupation, and control of a 10-mile wide zone with "all rights, power and authority within the zone * * * which the United States would possess and exercise if it were the sovereign * * * to the entire exclusion of the exercise by the Republic of Panama of any sovereign rights, power or authority."

In return the Government of Panama was paid $10 million. In addition, the U.S. Government paid all the private holders of property for land which was within the boundary of the zone. The United States also built sanitation systems for the Panamanian cities as well as bridges and highways. With the completion of the canal and eradication of yellow fever by means of U.S. technology and medical knowledge, the country of Panama has prospered. As a result the people of Panama presently enjoy one of the highest standards of living in Latin America.

Our investment in Panama, which has brought about this prosperity, runs in the billions of dollars. There has been no commercial exploitation of Panama by this country. No mineral has been mined, crop harvested, or resource exported as is the case in colonial operations. Rather, the United States has efficiently and fairly operated the canal for the benefit of all nations—on a nonprofit basis. The tolls for ship passage are kept low and income is used for maintenance and improvements to the canal.

Other Latin American countries benefit greatly from the existence of the canal. The continued efficient operation and security of the canal is of extreme importance to these countries. There are government leaders and businessmen in Latin America who are concerned that the turning over of the canal to a small and politically unstable nation may jeopardize its continued efficient existence. Because many of the South American countries have difficult east-west land transportation, the Panama Canal assumes an even far greater commercial importance to them than it does to this country.

The Latin American governments are, therefore, extremely anxious that we act responsibly in guaranteeing the canal's future. They are of the hope that we can continue to assure the continuation of low rates and proper upkeep of the facility. Last year the Organization of American States unanimously adopted a resolution against excessive rate increases. Panama abstained in this vote. The treaties in question, however, contain payment guarantees to Panama which will require toll increases of as much as 40 percent.

Therefore, world praise will not be automatically heaped upon this country, as some have suggested, for ratifying these treaties. The esteem of Latin America and much of the world which relies on the canal will be granted only if the United States acts responsibly in guaranteeing the continued well-being of the canal. Regrettably the proposed treaties do not properly achieve this goal.

If it is world opinion with which we are concerned, Mr. President, I believe that with the proposed treaties we run the unnecessary risk of appearing to our allies as having weakened their interests and to our opponents as foolish.

It is my further belief, Mr. President, that the United States can rightfully hold its head high in the court of world opinion. This country has always acted honorably in its dealings with Panama. Through its scientific and technical ability, it realized the centuries-old dream of joining the Atlantic and Pacific Oceans and by its fair and capable operations of the canal has brought prosperity to Panama and immensely benefited world commerce.

Mr. President, to this point I have been discussing the three major arguments that have been advanced by proponents of the treaties. Although I find these arguments unconvincing, I wish to state again that I am not unalterably opposed to any or all possible modifications of the existing treaty between Panama and this country which may be worked out between these two countries.

My opposition is to the terms of the two proposed treaties now before the Senate. I wish now to turn my attention to the specifics of these measures.

The first of the two treaties before us, the "Canal Treaty," pertains to the transfer of the total ownership, control and operation of the canal to Panama, effective December 31, 1999. The "primary responsibility" of the United States to protect the Panama Canal would cease upon the expiration of the Canal Treaty on that date. After that date, the second treaty, the "Neutrality Treaty" would be the only one in effect.

Ratification of the new treaties would immediately cancel the present treaty of 1903 which grants the exercise of sovereignty to the United States in the Canal Zone. The Canal Zone as such would cease to exist. This country would in effect be simply a foreign power with property located in Panama.

Although the United States could continue to operate and defend the canal until the end of the century, all of its employees, including U.S. citizens, would come under the jurisdiction of Panamanian laws.

Concern has been voiced as to the desire of many U.S. citizens now living in the zone, who provide much of the essential technical expertise for running the canal, to remain on the job given such circumstances.

Further concern has been raised about the prospect that with the removal of the U.S. sovereignty in the Canal Zone, nothing could prevent the Government of Panama from expropriating the property and nationalizing the canal. As international law permits expropriation by governments of foreign-owned property within its boundaries, the United States could be forced into an unseemly departure should the passions of nationalism find that 22 years was too long to wait to get rid of the American presence.

My greatest concern, Mr. President, pertains to the application of the provisions of the Neutrality Treaty after the U.S. forces depart the Canal Zone at the end of the century. These concerns are particularly heightened because of differences of interpretations which already have been placed upon these provisions by officials of Panama and our country. Conflicts exist now at this early state. They are bound to become greatly magnified should the treaty actually be implemented.

Specifically, the treaty on its face is ambiguous and contradictory as to the role which the United States could exercise to intervene and defend the neutrality of the canal after the year 2000. The terms of the treaty are unclear as to whether the United States could intervene if the neutrality of the canal was jeopardized without first being so requested by Panama.

Because of the ambiguities, President Carter and General Torrijos issued a Joint Statement of Understanding on October 14, 1977. This agreement purports to permit the United States to unilaterally enter Panama, upon its own discretion, to counter any threats or aggression toward the canal. The terms of the agreement have now been incorporated into amendments offered by the leadership and accepted by the Senate.

The difficulty with these amendments, however, stems from the fact that the documents from which they were derived, the Joint Statement of Understanding, was given different interpretations by President Carter and General Torrijos. Torrijos and other Panamanian officials still maintain that Panamanian approval must be given prior to entry by the United States.

Further unresolved is the United States right to intervene should threats to the neutrality of the canal come from domestic sources within Panama.

Of equal concern are the treaty provi-

sions which preclude the option of this country to construct another canal in a country other than Panama. Even though the existing canal is adequate, new technology may make a second canal feasible and economically desirable. However, under the terms of the treaty the United States "shall not negotiate with third states" regarding construction of a new canal "except as the two parties may otherwise agree."

Mr. President, it would seem that this provision throws away a possible bargaining chip that could prove beneficial in future relations with Panama. A second canal or the suggestion of such construction would insure that Panama keep its tolls competitive.

Under the rule of Panama's current leader, that country's indebtedness has grown from $167 million to $1.5 billion, and the interest alone on that debt increased 75 percent in the 2 years from 1975 to 1977. Since nowhere in the treaty does Panama commit to maintaining the canal, future Panamanian governments may decide to use tolls for domestic programs rather than for costs of maintenance.

The costs to the United States over the next 28 years in terminating its presence, relocating personnel, guaranteeing revenues to Panama has been estimated to be in the range of $3 billion. Exact figures are regrettably not available because the implementing legislation containing many of the financial arrangements between the two countries has yet to be submitted to Congress by the executive branch. Therefore, we find ourselves in the difficult position of making a determination of what the exact cost will be. This unsatisfactory position is worsened by the disagreeable fact that we will be expending these considerable sums in order to give an extremely valuable piece of property, worth nearly $10 billion, to another country.

Mr. President, in the event of a war, control of the canal is of utmost importance. This is particularly true today, as our Navy is now one-half of its 1968 strength. Quick and easy access to both oceans is, therefore, of more importance than ever before.

The geographic and psychological value of the canal in time of hostilities is well summed up in a letter to President Carter of June 7, 1977, from former U.S. Navy Admirals Arleigh Burke, Robert B. Carney, George Anderson, and Thomas Moorer as follows:

> Our experience has been that as each crisis developed during our active service—World War II, Korea, Vietnam and the Cuban missile crisis—the value of the Canal was forcefully emphasized by emergency transits of our naval units and massive logistic support for the Armed Forces. The Canal provided operational flexibility and rapid mobility. In addition, there are the psychological advantages of this power potential. As Commander-in-Chief, you will find the ownership and sovereign control of the Canal indispensable during period of tension and conflict.

Mr. President, whether we like it or not we have been engaged in a cold war of varying nature and degree with the Soviets and other Communist influences since the end of World War II. This conflict or competition, as some would call it, has ranged from overt acts of hostility and aggression to subtle attempts to gain influence in the free world. We have all personally witnessed such activity just 90 miles off our shores—in Cuba. Such activity is presently ongoing in Latin America. It is no secret that the Communist forces would leap at the chance to extend its influence with Panama.

The Soviet Navy has shown a marked increase in size in the past decade, at the same time which ours has declined. We have observed that in areas of the world where United States or British naval presence has slackened the Soviets have eagerly pushed to attempt to take up the gap.

Under the terms of the treaties before us the United States will be required to immediately reduce its bases in Panama and by 2000 withdrawn altogether.

We are today fortunate that Panama is a friendly government and that we are strong allies. However, I am in no position, nor do I believe are any of my colleagues, to predict what the disposition of that government will be in the year 2000. As our presence in Panama withers in the next 22 years and finally comes to an end in 2000, it is my most sincere hope that our "competitors" for world influence will not move in to fill the vacuum. It should be noted that we need not look around the world for such a threat. Cuba, which has already cast around in its backyard in past adventures, will surely eye the possibilities of its neighbor's altered status. Once Cuba's troops are freed from their excursion in Africa, they and their Soviet colleagues may well consider possibilities in Panama.

This is not to say that the United States is by any means helpless in the face of such a threat. Rather, we should reflect whether our actions to remove our presence in this area of the globe would encourage the reckless ambitions of others.

Mr. President, we are blessed by the fact that we are a rich and powerful nation. It has not been my intention to suggest in my remarks that our country will necessarily be fatally weakened should we give the Canal Zone to Panama. Rather, it has been my purpose to question just what are the reasons for such action and whether they are valid.

I am frankly puzzled, Mr. President, at the lack of strong reasons which have been put forth to date to justify ratifying the treaties before us. I do not really believe we seriously think that the security and neutrality of the canal can be best had by the departure of a benevolent superpower. And I do not think that a simple good-neighbor policy justifies the yielding of an important piece of real estate which has such important strategic and economic implications.

It is perhaps because we are so rich and strong that some of us feel compelled to share our wealth. This may be fine except when it affects the taxpayer and in this case where it could directly affect the military and economic well-being of the Nation.

As I have indicated earlier, Mr. President, this country has no need to atone for past sins in dealing with Panama; the Canal Zone was not gained by war, aggression or devious action on our part. Rather, we bought the land, were granted sovereignty, and developed the raw jungle and have thereby greatly benefited Panama as well as the world.

To my mind, Mr. President, the situation which we are facing is one of high risk and low yield.

Mr. President, in conclusion, I find that the case has not been made to support ratification of the treaties, as drafted before us and further believe that their ratification would not be in the best interest of the United States.

The PRESIDING OFFICER (Mr. HASKELL). The time of the Senator from Utah has expired.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I thank the Chair.

Mr. President, who was to be recognized under the order?

The PRESIDING OFFICER. Senator BARTLETT, under the order, was to be recognized for 30 minutes.

Mr. SARBANES. Will the Senator yield for a unanimous-consent request?

Mr. ROBERT C. BYRD. Yes.

Mr. President, I ask unanimous consent that I may be given control of that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator from Maryland.

Mr. SARBANES. Mr. President, I ask unanimous consent that Judith Davison of my staff be granted privilege of the floor during the debate and vote on the pending treaties.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, the time to come out of the time under my control.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of the amendment to the resolution of ratification that will be called up by Mr. RANDOLPH, Mr. CRANSTON, and others, Mr. LONG be recognized to call up his amendment to the resolution of ratification, and that following the disposition of his amendment, the distinguished Senator from Oklahoma (Mr. BARTLETT) be recognized to call up his amendment to the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I believe Mr. BROOKE is to be recognized following the running of the order for the recognition of Mr. BARTLETT. It is my understanding that Mr. BROOKE is on his way and that Mr. BARTLETT will not need the time allotted to him under the order

previously entered. Therefore, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged against the order for Mr. BARTLETT.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I inquire now of the distinguished Senator from Massachusetts (Mr. BROOKE) if he is ready to proceed.

Mr. BROOKE. Yes, I am.

Mr. ROBERT C. BYRD. Mr. President, the distinguished Senator from Massachusetts is now ready to proceed. Therefore, I yield back the time that was given to my control under the order for the recognition of Mr. BARTLETT.

The PRESIDING OFFICER (Mr. CULVER). The Senator from Massachusetts is recognized.

Mr. BROOKE. Mr. President, for many years I have believed, and I still believe, that our country's relations with Panama should be revised and modernized. It is in both our self-interest and in the best of our traditions to seek equity and fairness in our relations with other countries.

The Panama Canal Treaties submitted to the Senate in September 1977, were widely believed to be a means to accomplish that goal. However, after an initial examination I came to the conclusion that the specific treaties submitted by the President were likely to be an inadequate basis for establishing that relationship.

The ambiguous nature of many of the key articles raised substantive doubts in my mind as to their workability. Significant differences between American and Panamanian interpretations of key provisions appear to me to be an ominous portent of increasing rather than diminishing tensions. The lack of the true domestic consensus in the United States and possibly in Panama as well, as to the wisdom of the specific treaties seemed to create an inhospitable environment for the achievement of that desired new start for the American and Panamanian peoples. Moreover, I was troubled by the constant use of the fear of violence in Panama as a rationale for an American foreign policy decision.

I was deeply concerned that passage of those inadequate treaties would have been a short-term palliative at best. Yet, I understood the temptation in the minds of some to do so in order to avoid immediate unpleasant events. But I also feared that in the longer term, the superficial edifice of cooperation created by the treaties would crumble under the constant buffetings of the pressures generated by their inadequacies. In time I thought we might come to regret that we had perpetrated, unintentionally to be sure, a cruel hoax on ourselves and our Panamanian partners.

It was my hope that action by both the administration and the Senate would result in the treaties being amended or qualified to a degree sufficient to make them more in tune with our legitimate national interests and the sensibilities of the American people. But it became apparent to me fairly early in the process that the administration and treaty proponents in the Senate, controlling the simple majority, had decided that the "advice and consent" function of the Senate would not be a truly operating principle in this instance. For many months they refused to give serious consideration to responsible efforts to strengthen the treaties by amendment. It is only recently that some flexibility has surfaced. Whether it will be adequate remains to be seen.

Mr. President, let me now discuss each of these concerns in more detail.

In a democracy, the success of any long-term undertaking, be it in domestic or foreign affairs, is based on the sustained support or, at a minimum, the tolerance of the overwhelming majority of its citizens. This is a fundamental reality that has been painfully brought home to the people of this country in the last decade and a half.

Our presence in the Canal Zone and the protection of our interests there has been, is, and will be a long-term undertaking. Modernization of our relationship with Panama must be achieved in such a way as to elicit the necessary sustained level of support from the American people.

One of the fundamental weaknesses of the approach of those favoring the treaties submitted by the President is the relative indifference they have shown to the legitimate concerns of a large segment of the American public. Rightly or wrongly, millions of responsible Americans who deeply love their country and desire what is best for it believe that on this issue their Government has put the sensitivities and interests of the Panamanian Government first.

I have a great deal of empathy for those who have such a perception. In my conversations with administration officials and in the arguments of many of the treaty proponents, I have detected a cavalier attitude regarding the views of this large segment of the American populace.

One example should suffice to illustrate the point I am trying to make. The argument has been voiced with increasing frequency that the fundamental reason that substantive responsible amendments to the treaties could not be accepted is that such changes would require that the present Government of Panama resubmit the treaties to its constituents for a new plebiscite. Indeed, there has been an inordinate fixation in the Senate these past few weeks on avoiding anything that would inconvenience the Government of Panama. I find this approach specious and devoid of merit. Its actual effect has been to give the leader of the Panamanian Government a de facto veto over the deliberations of the U.S. Senate.

I cannot conceive of what fears, what motivations have led to this state of affairs. We cannot, we must not allow our power of advice and consent to be emasculated.

Mr. President, it is our fundamental responsibility to act in the interest of the United States and to be responsive to the legitimate concerns of the American people. Little wonder that a sizable number of them feel further alienated as a result of this perceived indifference of their Government.

I believe the failure to achieve a sufficient domestic consensus for an action of the magnitude of a decision to alter fundamentally our role regarding the Panama Canal will come back to haunt us. It may not have its most dire effects in the immediate aftermath of a decision to ratify these treaties. But, it will have the long-term debilitating effect that will deepen the disillusion felt by many with their Government. Down in the nerves and sinews of our society we will have encouraged a festering sore that will not be easily exorcised.

I am equally if not more disturbed by arguments that insist that we must ratify these treaties or else there will be violence directed against Americans in the Canal Zone and perhaps elsewhere. I abhor violence as only one can who has seen it at first hand. But I just cannot accept the view that these treaties must be ratified because the threat of violence explicitly or implicitly exists. Our decision one way or the other must not be affected by such threats.

Mr. President, the American people will support a justified effort to achieve a more stable and equitable relationship with Panama. But they will never accept a decision that is tantamount to a capitulation when confronted with the threat of force. I do not say this to be jingoistic or provocative. But I do state it without equivocation so that those who may be tempted to threaten us with violence will be under no illusions that they will succeed in their designs.

Should we ever appear to be susceptible to such pressures, tremendous harm would be done to our capacity to protect our interests in the world and to conduct an effective foreign policy. And, without question, the maintenance of that capacity has to be an important consideration in any of our decisions.

Let me now turn to the treaties themselves. In September of 1977 the President submitted two treaties relating to the future of the Panama Canal. For the past 5 weeks the Senate has devoted most of its time and attention to a debate on the merits and defects of the Neutrality Treaty. This treaty outlines general conditions we anticipate will or should exist after the year 2000. If the main Panama Canal Treaty were to pass, then I believe the Senate as a body would agree that the Neutrality Treaty must also be passed.

Early last fall I found the Neutrality Treaty unacceptable as submitted. With others, I advocated strengthening provisions which I thought would improve its text. One such recommendation would have provided the legal basis for the United States to act, unilaterally if necessary, to maintain the regime of neutrality and preserve our interests in the canal. Another called for stronger provisions

regarding the right of U.S. vessels of war and auxiliary vessels to proceed to the head of the line in times of emergency, the United States having the right to determine what constitutes an emergency, on a unilateral basis if necessary. These two proposals were eventually embodied in provisions now known as the "leadership" amendments which I have sponsored. Both of these proposals in the form of amendments were finally accepted by the administration and have been adopted overwhelmingly by the Senate.

Article V of the Neutrality Treaty by implication, excludes the United States and Panama from jointly agreeing to a continued U.S. military presence in Panama after the year 2000 even if such a presence would be crucial to the maintenance of the regime of neutrality. I find this implicit prohibition unacceptable.

Thus, in a meeting with the President I urged him to accept a reservation that would allow negotiations on a continued U.S. military presence after the year 2000 to take place. Since then I have sponsored such a resolution with Senator NUNN and others and it is now the pending business before the Senate. If it is included in the instrument of ratification this will resolve my problems with article V. Moreover, I believe that the reservation could ultimately have a deterrent effect, disabusing potential or actual foes from trying to obtain an advantage on the assumption that a U.S. military presence in Panama after the year 2000 was clearly out of the question.

Since the leadership amendments are now a part of the Neutrality Treaty and if the Senate adopts the reservation related to article V, I believe a reasonable basis will exist for the protection of our interests in the canal after the year 2000. I therefore intend to vote for the Neutrality Treaty. However, I must emphasize that the adoption of the reservation is a condition precedent for such a vote. As the possibility still exists that the Panama Canal Treaty may be strengthened to the degree necessary to obtain its passage, it seems sensible to me to pass the Neutrality Treaty at this time.

So that there is no misunderstanding, let me state clearly that I do not believe that the Panama Canal Treaty, in its present form, should be passed. If I had to vote on it tomorrow I would vote no. It is imperfect. It is flawed. It sorely needs revision or qualification.

I have indicated to the President and the leadership several areas of concern regarding the Panama Canal Treaty, because I believe that ambiguities in the financial arrangements contemplated in the Panama Canal Treaty are built-in tension producers. The following areas of potential disagreement amply illustrate the problem.

First. The 30 cents per canal ton payment to Panama gives the Panamanians a strong motive for keeping tolls low in order to keep traffic high. The United States, which for 22 years will have primary administrative responsibility, will have the exact opposite incentive in order to avoid deficits.

Second. In the case of a deficit, a likely development especially after 1984, there is bound to be controversy over which items should be given priority in terms of their payment. Panama seems bound to insist that the 30 cents per canal ton and the fixed annual annuity payment of $10 million to it must be met regardless of a shortfall in revenues. This would mean, in essence, that the United States would have to cover any deficit.

Third. The ambiguities surrounding the contingent annual $10 million surplus payment to Panama have not been cleared up. There is no evident meeting of the minds on how revenues and costs are to be calculated in order to determine whether such a payment will be made. No formal exchange of notes between the two parties has taken place to establish, beyond a doubt, that the United States has no obligation to pay any accumulated carryover of this contingent payment at the termination of the Panama Canal Treaty. There has been no definitive determination as to whether the contingent payment is to be included in the toll base.

Fourth. No agreement has been reached that will insure that the Government of Panama will not profit unjustly from the payments it is to receive for services rendered in the area to be administered by the Panama Canal Commission. Nor, is there any arrangement to insure the quality of those services.

Fifth. It is likely, should the treaties pass, that the Congress will insist that present interest payments from canal revenues to the Treasury continue. I certainly intend to advocate such an approach. There is insufficient information as to what effect this will have on the toll rate and, thus, on canal traffic. At a minimum, we must assume that Panama will be opposed to these interest payments. Their continuance would increase Commission costs, tolls would go up, traffic would marginally diminish and, thus, the level of financial benefits to Panama would be decreased.

Sixth. A similar problem would arise if the Commission, controlled by the 5 to 4 ratio of Americans to Panamanians, increased depreciation rates or created a new reserve for capital improvements. These two actions, likely to be undertaken for prudent management reasons, would also reduce the level of Panamanian financial benefits. Given what I believe to be the excessive Panamanian expectations of a financial windfall resulting from these treaties, it is not hard to imagine what the effect of the deflation of these expectations will be.

To this list I would add two more items. First, there is a great deal of uncertainty regarding the actual cost of the services to be provided by Panama to the Commission. One estimate places the figure as low as $4.4 million annually for the first 3 years. The estimate contained in the treaty is an annual payment of $10 million. With this wide variance in figures, it is self-evident that the possibility for corruption exists if no provisions were made to account for any excess of payment over actual cost of services. I am sure that neither the Panamanian Government nor our own wish to leave this problem unaddressed. Therefore, I am today introducing an understanding to the Panama Canal Treaty in an effort to remedy this defect.

Second, it is also clear that a clarifying understanding is needed indicating that the United States assumes no obligation, as a result of the treaties, associated documents or the negotiations, to provide any foreign assistance to Panama. I believe that the question of aid should be handled independently of the treaties, and I have already introduced understandings to that effect.

The likely antagonistic pressures arising from the financial arrangements will be compounded by the nature of the Commission established by the Panama Canal Treaty to administer the canal for the next 22 years. Administration by committee is difficult at best. This inherent problem of the Commission will be exacerbated by the division in national priorities of its members. It would take an act of faith to believe a high probability exists for effective management under this arrangement.

I would be willing, nevertheless, to accept the risks inherent in the Commission concept if all the debilitating ambiguities and problems in interpretation I have outlined here were ironed out prior to ratification. I hope that they will be for if they are not, I see very little likelihood of anything but a troubled future for the United States and Panama over the next 22 years. Faced with that prospect serious consideration will have to be given to advising the President to renew negotiations in order to correct the debilitating deficiencies of the present Panama Canal Treaty.

Therefore, for the reasons I have outlined, I shall vote for the Neutrality Treaty subject to adoption of the military presence reservation. And I shall reserve judgment on the Panama Canal Treaty.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. NUNN be recognized very shortly to call off the quorum, which I will suggest, and at that time, Mr. President, the debate on the amendment by Mr. NUNN will resume. I shall not seek a unanimous-consent agreement at this point seeking a time to vote, but it appears from my discussion with Senators that it will not take too long for that debate.

So I now suggest the absence of a quorum, if the Chair has put the question on the recognition of Mr. NUNN already.

The PRESIDING OFFICER. Yes. Without objection, it is so ordered.

The clerk will call the roll.

Mr. ROBERT C. BYRD. I thank the Chair.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to proceed for 1 minute as in legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

GOVERNMENT WASTE

Mr. ROBERT C. BYRD. Mr. President, the Senator from Wisconsin (Mr. PROXMIRE) has made a reputation as a watchdog of the Senate over wasteful spending. For years he has ferreted out overruns in the military, called for more competitive bidding, and aimed his investigative abilities at civilian areas of the Government as well. In the course of this, he authored two books, "Report From Wasteland," on waste in the military, and "Uncle Sam, the Last of the Big Time Spenders," which examined profligate spending in the civilian agencies.

More recently he initiated the "Fleece of the Month Award" for what he considers the biggest, most ridiculous, or most ironical example of waste in the Federal Government.

Now the Senator from Wisconsin has authored an article on questionable Government spending which appeared in the March issue of the Reader's Digest.

I ask unanimous consent that the article entitled "The Devastating Truth About Government Giveaways," published in the March 1978 Reader's Digest, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE DEVASTATING TRUTH ABOUT GOVERNMENT GIVEAWAYS

(By Senator WILLIAM PROXMIRE)

Government spending will soar to a record $460 billion this year. At the same time, the national debt is growing at the rate of $1 billion every week, and interest on that debt is today the third-largest item in the federal budget. What's responsible for this escalating extravagance? Can we ever bring federal spending under control?

Some of the villians are obvious: huge cost overruns, social programs that balloon through mismanagement, ever-increasing outlays for health and education. Less easily identified are the individual expenditures tucked away in nooks and crannies of literally every agency of government.

As Chairman of the Subcommittee on Priorities and Economy in Government of the Joint Economic Committee, I have investigated thousands of wasteful projects over the years. Recently, for instance, I reported to the Senate that the Department of Transportation had squandered $225,000 on a study forecasting transportation needs in the year 2025. But for the fact that the public's funds had been thrown away, the study's findings would be laughable.

If there is a new Ice Age, "very large numbers of people" will be forced to move to the South or Southwest.

If a population surge develops because people "missed having children around," there would be "in general, increased demand for transportation services of all kinds."

If urban guerrilla warfare breaks out, automobile use in afflicted regions would become risky.

Granted, $225,000 is only a drop in a total budget bucket of nearly half a trillion dollars. Yet that one "study" ate up the entire federal tax payments of more than 120 of my Wisconsin constituents—dairy farmers, mailmen, secretaries, owners of small grocery stores. And there are thousands of projects like these!

Three years ago, the U.S. Department of Agriculture spent $46,000 to determine how long it takes to cook breakfast. Not content with using hours, minutes and seconds, researchers devised something called "time measurement units," or TMUs. Each TMU, they decided, would equal .036 seconds. Thus they were able to tell us that it takes 838 TMUs to fry two eggs, 960 TMUs to prepare French toast and 1222 TMUs to cook a six-ounce order of hash. Lest the average housewife admit to confusion over TMUs, it's important to note that the study wasn't conducted for her benefit. It was intended to help the food-service industry. But if that industry can use this information, then it should pay. Hard-pressed taxpayers shouldn't have to foot the bill.

The USDA is involved in a multitude of equally ludicrous projects. A few years ago, it produced a 113-page report, at a cost of $113,417, entitled "Mothers' Attitudes Toward Cotton and Other Fibers in Children's Lightweight Clothing." Among other things, the report concluded—surprise!—that mothers prefer wrinkle-free garments for their children.

The USDA has no monopoly on waste in government. In 1976 the National Endowment for the Arts awarded $6025 to a Pittsburgh woman to produce a film depicting the dropping of crepe paper from a small airplane. The Federal Aviation Administration shelled out $20,000 for a study of the body measurements of would-be airline stewardesses. The National Science Foundation, whose $861-million-a-year budget enables thousands of researchers to look into such weighty matters as "the socio-sexual behavior of the dabbling African black duck," recently gave $25,000 to the University of Washington for a series of experiments, one of which was to gauge the reactions of people shown a picture of an octopus in a barnyard. Ridiculous? Not at all, replied the scientists. Such a study could show how people perceive the unusual—and this might be helpful in designing aircraft instruments or creating advertisements.

Other agencies are just as adept at rationalizing worthless projects. The Smithsonian Institution spent $88,000 to compile a dictionary of an obscure and unwritten Mayan dialect spoken by 10,000 corn-farming peasants in southern Mexico. In the dictionary's introduction, this justification is offered: "If language is a 'mirror for man,' the pragmatic and semantic investigation of man's socially patterned linguistic habits is surely relevant."

Billions of dollars are squandered each year simply because existing programs are inadequately monitored. Since the end of World War II, for instance, the Veterans Administration has maintained benefit programs in the Philippines for Filipinos who served with the U.S. Armed Forces. One veteran, shot by a Filipino guard when he was AWOL, has received a 100-percent disability rating. Since incurring that "disability," he has fathered 26 children—11 by his wife and 15 by his wife's sister—which entitles him to $831 a month in VA benefits. So far, he has gleaned more than $89,000 from the U.S. Treasury. All told, the Philippine disability program has cost U.S. taxpayers more than $2 billion since 1946 and is now running at $87 million a year. The VA has done nothing to curb massive fraud and abuse in the program.

The budgets of other agencies are bloated through what can only be described as a misguided sense of priorities. The Consumer Product Safety Commission—which spends $40 million a year—is supposed to identify and then remedy products in the marketplace which can cause injury or death. In 1975 the CPSC conducted a study of the dangers of swimming-pool slides, only to conclude that reckless swimmers—not slides—were responsible for the injuries reported. Last year the agency focused on the "hazards" of miniature Christmas-tree lights, despite the fact that all tree lights—big and small—accounted for a grand total of 23 injuries in one recent year.

The transportation bill for government officials has now reached the staggering total of $2.7 billion a year. The House Government Operations Committee calculates that as much as $375 million in travel costs may be wasted on trips of little or no useful purpose. In 1976, reports UPI investigative reporter Donald Lambo, 203 World Bank officials were permitted to charge off $503,000 in travel bills for their spouses. A World Bank spokesman says the practice is necessary to boost "employe morale."

Government officials and their mates are not the only ones benefiting at government expense. During the summer of 1976, the National Endowment for the Humanities provided grants to doctors, lawyers and school administrators to attend tuition-free, month-long seminars "to broaden and sharpen their humanistic perspectives." These sessions were attended by some 300 professionals at a cost to the taxpayer of at least $750,000. Projects like these are impossible to defend at a time when the federal government is running a $46-billion-a-year deficit.

But merely to expose wasteful government spending isn't enough. Something must be done to stop the spiraling growth of government giveaways. Here's what I propose:

Tens of millions of tax dollars are squandered each year on research projects that are at best dubious and all too often ridiculous.

Two easily implemented procedures would save millions. First, each proposal should be evaluated within the originating agency (but by a different group than those who proposed it) to make sure that the benefits are greater than the cost. And second, to avoid duplication, we must establish a government-wide listing of all studies—past, present and projected. Even assuming a proposed study has value, the right hand of government often does not know—or even try to find out—what the left hand is studying, has studied or is proposing to study.

The General Accounting Office and the Office of Management and Budget (OMB) should redouble their efforts to ride herd on those agencies and departments financing projects that are wasteful, duplicative and counterproductive. Currently, the budget is reviewed in secret by OMB and the agency seeking its appropriation. It would better serve the public interest if the agencies were required to defend their projects publicly against responsible critics, in an adversary environment.

The government must stop spending taxpayers money on projects which benefit a particular industry. Nor should government "compete" with the private sector when private efforts can do the job.

Finally, Congress itself must begin exercising a real oversight capacity. All too often, we on Capitol Hill toss millions or billions of dollars at a problem, then make no effort to see how the money is spent.

The battle to purge waste from the federal budget will not be won overnight. But it will not be won at all unless it is begun today.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, Mr. NUNN is on his way to the floor, so I renew my suggestion of the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RADIO COVERAGE OF SENATE DEBATES

Mr. ROBERT C. BYRD. Mr. President, I hope I am not exceeding the bounds of propriety in stating that the national public radio is doing an exceedingly fine job of reporting these debates to the listening audience throughout the country. Not only does the public radio broadcast give to the people the blow-by-blow account of what is going on during the debates, but also there is an excellent wrapup in the evening on the highlights and significant happenings of the day. Linda Wertheimer is doing an excellent job in that respect, and I note that she is assisted today by Gary Henderson, who, by the way, emcees an excellent bluegrass program on the FM dial at 88.5 on Tuesday evenings and Thursday evenings beginning at 10 o'clock and lasting until midnight, and on Saturday mornings beginning at 8 o'clock and lasting until 12 noon.

I happen to be one of the stalwart fans of Gary Henderson and that program. He does an exceedingly fine job of taking calls from listeners and playing their requests. He has a good library of bluegrass music. If he does not have the request immediately available for listeners, he will make it a point to find that record somewhere in the library at his home and play it on the air later. He has done this for me on a few occasions. Even though I like the tune, "Pig in a Pen," and I do not like to be a hog about making requests, I do exercise my privilege of making a request now and then.

While we are awaiting Mr. NUNN's arrival on the floor, I want to take this occasion to thank Gary Henderson and the American University FM station for presenting to the American people these excellent programs on bluegrass music. Old-time music is part of our heritage and I think more people ought to listen to bluegrass and old-time music. I think we would all be friendlier with one another and we would smile more often; we would get up in the mornings with a better disposition; we would sleep better at nights. To paraphrase Shakespeare: "Sleep knits up the ravell'd sleave of care," after listening to Gary Henderson play a few tunes like "Fox on the Run," one will sleep better. MARK HATFIELD is evidently a fan of bluegrass music, because he has just reminded me of "Turkey in the Straw." It will not be long until Gary Henderson has my own album to play on his programs.

[Laughter.]

May I say that among those tunes which are in my own album are "Turkey in the Straw," "The Roving Gambler," "Come Sundown She'll Be Gone," "There's More Pretty Girls Than One," "Going Up Cripple Creek," "The Cumberland Gap," "Rye Whiskey," "Old Joe Clark," "I Wished I Had Stayed in the Wagon Yard," and others.

There is a number of fine old-time tunes, some going back to the days of the Civil War and the Revolution, some even having their history in antiquity back in the British Isles. I will give each Senator one of these albums. But then I want them to listen to Gary Henderson on Tuesday nights, Thursday nights, and Saturday mornings, who, with his inimitable personality, presents to his listening audience the jewels of bluegrass music. With that, I now yield the floor to the distinguished Senator from Georgia (Mr. NUNN).

Mr. ALLEN. Will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. ALLEN. I want to commend the National Public Radio for their coverage of the debate on the Panama Canal treaties. I feel that their coverage of debate possibly has changed the contest here in the Senate with respect to the treaties from something of a runaway in favor of the treaties to the point where now it is a very close issue, a very close vote, as the distinguished majority leader knows.

I commend the distinguished majority leader for arranging for this public broadcast. I was somewhat skeptical, though in the Rules Committee I did vote for the resolution. I believe the distinguished majority leader has rendered the country a great service, along with the National Public Radio, in scheduling coverage of these debates. I believe as the country finds out more about the treaties, we are going to find more people making their views known to their representatives here in the Senate. I look for even a closer vote on the next treaty, if, in fact, there be a next treaty to come before the Senate. I would think that if tomorrow this treaty is defeated here in the Senate, the leadership will not schedule the second treaty. But that remains to be seen.

I do believe a great public service has been rendered in having this coverage of each session from gavel to gavel. The media generally is too prone to present only one side of a question, the side that they favor. It has been my observation that the media, both electronic and the printed word, has been strong in support of these treaties. It is refreshing that we do have an opportunity to have the whole discussion placed before the country.

So I feel the distinguished Senator and the national public broadcasting have made a great contribution.

The distinguished Senator said something about we ought to treat each other better and have a general feeling of goodwill, and so forth, here in the Senate. I certainly endorse that concept. It has certainly been my position to exude that spirit of friendship—certainly, friendship with the distinguished majority leader, whom I admire so much.

I might state along the same line of promoting goodwill, good fellowship, good neighborliness, I did prepare an amendment somewhat in jest which I thought seriously of offering to the Neutrality Treaty. But then I knew that no amendment would be accepted by the leadership. I did not want to put the leadership in the position of voting down this amendment that I did draft with a possible view of presenting it to the Senate to have a vote. It read something like this:

Since it is hoped that this treaty and the Panama Canal Treaty will usher in an era of good feeling and good neighborliness between Panama and the United States, it is hereby stipulated that in the relations between the parties hereto the parties shall apply and observe the principles of brotherly love and high moral concepts and standards enunciated in the Sermon On The Mount as set forth in God's holy word in the book of Matthew, Chapters 5, 6 and 8.

As I state, I did not introduce that because I did not want to put the leadership in the position of voting against this concept of good neighborliness and brotherly love, and the good feeling of one for the other.

Mr. ROBERT C. BYRD. Mr. President, the distinguished Senator from Alabama has been very tender in his solicitude for the leadership. He is very kind and has never at any time laid the heavy wood on the leadership. I want to say at this time, because I may not have the opportunity, that I am exceedingly grateful for his generous comments and for his thoughtfulness in this regard.

I am glad he did not offer the amendment, especially in view of the fact that its offerer exemplifies the principles enunciated in the sermon on the mount every day in his dealings with other Senators—I say this seriously—it would have been difficult to vote the amendment down. But, for his own good reasons, he chose not to offer it. I have listened with great interest to his comments concerning the services that have been rendered by National Public Radio. But not one word did he say about bluegrass music. I wonder if he would care to comment on my earlier statement concerning the love of bluegrass music. I am sure, that people in his part of the country love it as the people in mine love it. I would be interested to know if he joins me in urging more people to listen to bluegrass music.

Mr. ALLEN. I have to confess to the distinguished Senator that I am not familiar with this program to which he alludes. I am sure that the distinguished Senator, being an accomplished musician himself, has better knowledge of the value of music, which has charms to soothe the savage breast and all those qualities. I am sure, based on the recommendations of the distinguished Senator from West Virginia, that it would be beneficial to listen to this program. If the Senator will tell me where I may listen to it, I shall be glad to listen on occasion. I assume it is on the Public Broadcasting System. While I have not listened to the debates on the radio, because I have been in the Chamber most of the time, I will make it a point to come under the influence of the music

that the distinguished Senator from West Virginia heartily recommends. I thank the Senator for the suggestion.

Mr. ROBERT C. BYRD. The Senator is very kind. I like to mix it up. I like to listen also to some of the other stations late in the evenings as they play classical music, especially the renditions of Mozart and Beethoven and Schubert and others. Suffice it for now, we have had a good day for bluegrass music in the Senate.

Mr. ALLEN. I will say I have enjoyed the Senator's rendition of old "Rye Whiskey." I have enjoyed that and I thank the Senator for his accomplishment.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. President, I yield the floor. Senator Nunn is ready to speak.

Mr. NUNN. Mr. President, I shall yield the floor to the Senator from Oregon. I think I have it. If not, I shall wait until I get it and then yield to the distinguished Senator from Oregon.

The PRESIDING OFFICER. The Senator from Georgia has the floor.

Mr. NUNN. I yield to the Senator from Oregon.

TERROR IN THE MIDDLE EAST

Mr. MARK O. HATFIELD. Mr. President, as in legislative session, I thank the Senator from Georgia (Mr. NUNN) for his kindness in yielding.

Mr. President, the murderous, terrorist raid on an Israeli tour bus last week comes as the latest shock to a world that grows increasingly tired and fearful of the mindless violence that has brutalized and attacked the very foundations of civilized life in the Middle East. Estimates now place at 37 the number of innocent men, women, and children who were murdered in the worst terrorist attack in Israel's history. Seventy-two others were injured as well. Once again, the most innocent have been lost to the passions and hatreds that have burned white-hot for thousands of years. This endless, maddening cycle of terror and despair continues.

It is difficult to describe the emptiness and limitless sense of frustration that one feels following this most recent outbreak of violence in the Middle East. I would, of course, like to believe that words spoken in chambers of government throughout the world against this kind of action will have a positive influence in stopping them. But modern history seems to dwell on the ineffectiveness of such pleas. It is only through the settling of ancient differences through negotiations that a lasting peace in the Middle East can be achieved. And yet, how often have we approached such discussions only to see the consuming powers of terror and war rip all sense of civility apart, and tear again at the fabric of civilized life.

The purpose of the PLO attack seems clear: it was an attempt to disrupt the process of peace which was begun by President Sadat and Prime Minister Begin only a short while ago. The purpose of the terrorism is to further erode the voices of moderation. The purpose is to quiet the voices of those whose sense of outrage over continuous war and calculated violence has finally overwhelmed ancient differences. The purpose is to cause the disposition of those who would discuss the outlines of peace.

The point of the PLO attack, Mr. President, was to mount an assault against not only the state and people of Israel, but against Mr. Sadat and all others who would presume to believe that, in an age shadowed by the threat of nuclear war, the hope of the world still rests with understanding, not fanaticism. The point of the attack is to heighten the world's sense of hatred and fear, to flaunt the smug assumptions of terrorism: that violence will beget violence, that the trip to the United States by Prime Minister Begin would be postponed, that all sides of the Middle East conflict would immediately move to either condemn the attack as senseless, or hail it, with whatever twisted and macabre logic, as an act of heroism that should be emulated.

The attack has also served to suppress in the mind's eye of the world community the moderate, legitimate forces within the Palestinian people, and to herald the reemergence of radical elements within the Palestinian cause. With this single radical act of violence, the hopes of peace and the trend toward moderation among all sides which was emerging some months ago have been damaged. The questions of Israel's security is of prime consideration in our country's relations with that nation. It is one essential factor in any long-term settlement. By this raid, the terrorists have reinforced Israel's worst fears for her safety and, at the same time, helped to set back the Palestinian cause for independence and recognition as a responsible organization.

The point of the attack is, in short, to insure the victory of violence over the forces and sentiments of peace. Our frustration and sense of outrage comes first from the act of violence itself, and second, from the possibility that the ultimate purpose of this terrorism may be realized, and that the most volatile region of the world can again be shoved toward the abyss of war.

Mr. President, from the depth of my spirit, I condemn this act of terror. I condemn equally this move toward retaliatory violence which can only serve to further exacerbate a seriously deteriorating situation in the Middle East. Every concerned party in the conflict must understand that the spread of future violence in the region might well unleash a reign of murder and bloodshed that will be most difficult to describe, and even more impossible to stop. As we move with limited visions toward arming that region of the globe with technology's most sophisticated weapons of war, we must understand that we are setting the Mideast, and all of civilization, on a hair-trigger. It can no longer be safely predicted that violence in the Middle East will not spread like a modern Sarajevo to engulf the allies and powers of the world. I believe, therefore, that it is incumbent on all nations of the world to condemn the murderous PLO raid. To do otherwise, or to remain silent, is to quietly accept and condone these atrocities.

Because the raid was clearly a provocative action, prompting a return to the retaliatory cycle of violence in the Middle East, the weight of world condemnation should rightly fall upon the perpetrators. It should be made as clear that—as every Israeli citizen must know—the present military action of Israel can never guarantee that nation's long-term security. Such security can only be accomplished through the difficult but essential processes of peace. At this moment of tension, therefore, all nations in the Middle East must act with reason and restraint. Any actions which would continue and prolong the cycle of terror and thus fracture the tenuous bonds which have been established between Israel and moderate Arab nations in recent months will be condemned by a watchful world.

Mr. President, thousands of years ago, near the clear waters of the Tigres and Euphrates Rivers, there began quietly and nearly unnoticed a process of human interaction which turned primitive man into a civilized being. It was at this uncharted, remarkable moment in history that the seeds of human hope were born. Even then, within the dim, unfolding intelligence of the human mind, it was understood that the continuation of war, the death of women and children, the murdering of the youngest and strongest men within the tribe, would ultimately destroy the tribe itself in a suicidal conflagration. Within this dawning of human understanding, there crystallized a belief that has lived within the spirit of mankind since that time. It is the unspoken knowledge that we seek the destruction of all we have achieved if we do not renounce terror and hatred and, instead, seek to embrace the limitless potential of peace.

We have come then to a point in history where the struggle between the forces of peace and those of terror are again in convergence. There are those who will say that the fight has been waged before and that the world has survived. There will be those who, as before, will scream their solutions and call for war. There will be those who somehow find a terrible triumph and solace in the murdering of innocents. It is these people that I condemn today.

Mr. President, it is not my purpose to emerge from this last week's savage attack, and the present Israeli response, with a senseof doom or hopelessness. I am an optimist. I believe that the positive, inner forces of man will prevail. But I feel as strongly compelled at this moment to say to—and plead with—my colleagues and all others who will listen not to abandon the difficult and frustrating path toward peace. I would ask that we not succumb to the forces of hatred and terrorism whose purpose is only to lead the Middle East—and inevitably the world—back toward the path and morass of war.

To embrace terror and vengeance means ultimately that we abandon hope. For as history marches on and technology improves, the potential for war

becomes darker and far more ominous than at any time in the past. The forces of hatred—as powerful as they are—can and must be met by an equal resolve to overcome these acts of vengeance. Within the outcome of this continuous struggle rests the future of civilized life, both within the region of the world where civilization began and for the balance of mankind.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. I would just like to say, Mr. President, before discussing the reservation, which I understand is now the pending business, that I commend my colleague and friend from Oregon for his remarks. He has expressed a hope for peace, even amidst all the troubles that we now are witnessing daily in the Middle East. I certainly share that hope for peace, and I share with the Senator's optimism, even though there are dark clouds on the horizon. I commend him for his statement.

TREATY CONCERNING THE PERMANENT NEUTRALITY AND OPERATION OF THE PANAMA CANAL

The Senate continued with the consideration of the treaty.

Mr. NUNN. Mr. President, I will not take long. I discussed this reservation in some length yesterday afternoon. It is coauthored by Messrs. BELLMON, DECONCINI, BROOKE, TALMADGE, HEINZ, RANDOLPH, CHILES, JACKSON, ZORINSKY, and BAYH. I have been requested, and I ask unanimous consent to add the names of Senators PAUL G. HATFIELD, BUMPERS, and SASSER as cosponsors of this reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I would like to read the reservation, because it is not very long, and I did add four words into the reservation yesterday which are now in the printed version, but were not part of the original amendment as submitted:

Strike out the period at the end of the resolution of ratification and insert in lieu thereof a comma and the following: "subject to the condition that the instruments of ratification of the Treaty shall be exchanged only upon the conclusion of a Protocol of Exchange, to be signed by authorized representatives of both Governments, which shall constitute an integral part of the Treaty documents and which shall include the following: "that nothing in this Treaty shall preclude Panama and the United States from making, in accordance with their respective arrangement between the two countries to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the Treaty, including agreements or arrangements for the stationing of any United States military forces or maintenance of defense sites after that date in the Republic of Panama that Panama and the United States may deem necessary or appropriate.".

Mr. President, that is the reservation. I shall not repeat some of my comments about the reservation from yesterday, but to me this is a very important part of the treaty we have before us. While I think everyone should understand that U.S. base rights will not be guaranteed after the year 1999 by this change, it does permit such rights to be negotiated by the parties. I believe that a maturing relationship between Panama and the United States and between the people of Panama and the United States, based on a true partnership in the canal, will change public opinion in Panama prior to the year 2000. I also believe that the Panamanian people will see the great advantage of a small but meaningful military presence to assist them in protecting the canal.

Mr. President, I have other Senators who may want to appear who have coauthored this reservation to speak on behalf of the reservation, but at this point if anyone has questions I will be glad to try to answer them. If not, I am sure the Senator from Alabama (Mr. ALLEN) would like to make some comment.

And if there are not questions, I would be prepared to yield the floor.

Mr. ALLEN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Georgia yield the floor for questioning, or yield the floor?

Mr. NUNN. I yield the floor.

Mr. DOLE. Would the Senator like to respond to a question first?

Mr KENNEDY. I would just like to address a question to the Senator from Georgia, if it is—I have just a few questions but I am glad to withhold and yield the floor to the distinguished Senator from Kansas.

Mr. DOLE. I have one question.

Mr. KENNEDY. Fine.

Mr. NUNN. I yield to the Senator from Kansas for a question.

Mr. DOLE. I guess the question is, what if the Senate approves the ratification and Panama rejects? What if the Senate wants to establish this treaty and the Panamanian people refuse to conclude a protocol and the change called for in this reservation, would the ratification of the treaty thereby be vitiated?

Mr. NUNN. The Senator from Georgia stated very clearly that legally, as the reservation itself expressed, unless Panama agreed to this reservation the instruments of ratification of the treaty would not be exchanged. This reservation also specifies that it has to be done by the conclusion by protocol of exchange to be signed by the authorized representatives of both governments. So, the Senator from Georgia understands that unless this reservation is accepted by the Government of Panama, there will be no treaty.

Mr. DOLE. I thank the Senator.

Mr. NUNN. If the floor manager has any different interpretation, I would certainly think he should make it known now because that is my understanding.

Mr. SARBANES. Will the Senator yield?

Mr. NUNN. I yield.

Mr. SARBANES. No; I do not differ with the response which the able Senator from Georgia has given. The text of the reservation which he has submitted provides, and I now quote:

Subject to the condition that the instruments of ratification of the treaty shall be exchanged only upon the conclusion of a protocol of exchange, to be signed by authorized representatives of both governments, which shall constitute an integral part of the treaty documents and which shall include the following: that nothing in this treaty shall preclude Panama and the United States from making, in accordance with their respective constitutional processes, any agreement or arrangement between the two countries to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the treaty, including agreements or arrangements for the stationing of any United States forces or maintenance of defense sites after that date in the Republic of Panama that Panama and the United States may deem necessary or appropriate.

The language of the reservation makes it clear that this is a condition precedent to the exchange of the instruments of ratification and therefore is a prior condition that has to be met before you can proceed to the conclusion of the treaty arrangement between the two nations.

The reservation, incidentally, as was indicated in yesterday's debate, does have binding effect and therefore it is a matter of consequence. To quote from an international law text with respect to the term "reservation"; from Whiteman in the Digest of International Law, page 137:

The term "reservation" in treaty making, according to general international usage, means a formal declaration by a State when signing, ratifying, or adhering to a treaty, which modifies or limits the substantive effect of one or more of the treaty provisions as between the reserving State and other States party to the treaty.

Mr. President, I must say that the explanation of the very able Senator from Georgia of this reservation, which he has taken the lead in proposing and which others have joined as cosponsors; that his explanation of this reservation, both in terms of his opening statement and his responses to questions which have been asked of him, has been as clear and lucid as any presentation we have had in the course of this debate. I think he has made an extremely clear, understandable, and comprehensive explanation of what his reservation would accomplish and he has been very careful to set out exactly what it would do and what it would not do.

The able Senator has also pointed out what his own position is, in terms of his preferences as reflected by his earlier affirmative votes for certain amendments. The reservation he has offered does provide the opportunity through agreement between the two countries for a continued American defense presence in Panama after the end of the century. It does open up an opportunity that would be to some extent closed under the existing language of the treaty because then to accomplish this objective you would have to have actual amendments to this treaty or a new treaty; whereas, the reservation which the Senator from Georgia has offered would make it possible to act by mutual agreement other than a treaty arrangement.

Also, while I have the floor, I want to commend the very able Senator from Georgia for his suggestion that a cooperative relationship can be developed

with the people of Panama. We ought not to lose sights of that opportunity. I understand that we have to analyze these treaties, in terms of the worst that can happen and make our judgment accordingly. But we ought not completely to forget that a good relationship can develop.

The able Senator from Georgia in the course of speaking on this matter did point out that there is an opportunity to develop a relationship over the next 22 years between the United States and Panama that may bring an entirely different sense of cooperation and accommodation between the two countries. Therefore, the prospect which his reservation holds out may, in fact, indeed prove possible.

In that sense, his reservation may lay the basis for an important development that would be responsive to many concerns that have been expressed here on the floor of the Senate.

Mr. NUNN. I thank my colleague from Maryland.

I might say that point of emphasis he has given is certainly the hope of the Senator from Georgia.

I think that too many times in this debate we have talked, perhaps, about the leadership in Panama as it now exists there, talked about the leadership in the Senate, the leadership in the executive branch as it now exists, without really focusing on the important feature of this treaty, of both treaties we are talking about, that it will be 22 years, really, before American military forces are removed from Panama, even if this agreement is entered into between Panama and the United States, and at that time we will have a different group of leaders in both countries. Very few leaders that are Members of this Congress will be in office at that time and very few in the executive branch.

I think the important facet of this reservation is that it encourages the people of Panama and the people of the United States to begin thinking in terms not of the past, but in terms of the future, in terms of what is in the best interests of both nations, of the people of those nations, by the year 2000.

I certainly do not anticipate there would be any agreement tomorrow, or next week, or next year, or perhaps not even 10 years from now, but 15 years from now, between the year 1995 and the year 2000. I believe and I hope that by that time there will be the kind of mutual trust and mutual respect between people of our Nation, regardless of who the leaders are, so that we will be looking in a nonemotional, objective fashion as to how we can best protect the canal for all the people of the world who will be using the canal.

Does the Senator from Kansas have another question?

Mr. DOLE. Just briefly, as a matter of information.

Will the protocol come back to the Senate for debate and approval or rejection? How is that handled?

Maybe the floor manager can advise me.

Mr. NUNN. I would defer to the Senator from Maryland (Mr. SARBANES) on this question. He has studied it more than I have.

Mr. SARBANES. No. The protocol of exchange would not come back to the Senate. But the condition we have attached is that the instruments of ratification shall not be exchanged, except upon the conclusion of such a protocol of exchange which shall include, amongst other things, the reservation offered here by the Senator from Georgia.

Mr. GRIFFIN. Will the floor manager yield?

The PRESIDING OFFICER (Mr. DURKIN). The Senator from Georgia has the floor.

Mr. NUNN. I yield.

Mr. GRIFFIN. I find it interesting in the language of the Nunn amendment that it talks about an agreement which would include these provisions and, obviously, why it suggests it would include other things.

What would the answer be if the protocol to be negotiated included other things besides the language of the Nunn amendment, would it then come back to the Senate for consideration and ratification?

Mr. NUNN. It is my understanding that this reservation requires the protocol of exchange, which would be signed by the authorized representatives of both our Government and the Panamanian Government—if both parties do not accept this language, then there will be no instruments of ratification and exchange. Therefore, we would have no treaty.

But there is nothing in this reservation that would prevent another reservation from being added by the Senate. That is something we will be considering as we wind down the consideration of this treaty. We will be considering other reservations which also can be part of a protocol of exchange.

This reservation simply specifies the language that would have to be in the protocol of exchange to be signed by the authorized representatives of both governments.

Mr. SARBANES. Will the Senator yield?

Mr. NUNN. Yes.

Mr. SARBANES. The protocol of exchange is a procedural device for concluding the exchange of the instruments of ratification. The contents of the resolution of advice and consent will be transmitted to the other party, and would require their acquiescence in the changes which the Senate has adopted.

For instance, in a protocol of exchange, and this is just by way of example, between the United States and New Zealand, it is provided, amongst other things:

> The text of the said reservation was communicated by the Government of the United States of America to the Government of New Zealand. The Government of New Zealand has accepted the said reservation. Accordingly, it is understood by the two governments that the convention aforesaid, upon entry into force in accordance with its provisions, is modified in accordance with the said reservation.

So that, in other words, the actions we take here are then transmitted to the other party and they have to agree to them, which, of course, was the initial response of the Senator from Georgia to the question that was asked by the Senator from Kansas when I originally rose to say that I agreed with the response he had made.

Mr. DOLE. I thank the Senator.

Mr. NUNN. I yield to the Senator from Massachusetts.

Mr. KENNEDY. If I could have the attention of both the Senator from Georgia and the Senator from Maryland, is it my understanding that, if Panama does not accept this reservation, the treaty itself will fail?

Mr. NUNN. As I understand it, the execution of this protocol of exchange which would contain this reservation is a condition precedent to the effectiveness of the treaty.

Mr. KENNEDY. And that is the understanding of the Senator from Maryland, as well?

Mr. SARBANES. Yes.

Will the Senator yield?

Mr. NUNN. I am glad to yield.

Mr. SARBANES. I am now quoting from Charles G. Fenwick, International Law:

> Since the signature of a treaty represents a meeting of minds of the several parties upon specific provisions involving reciprocal obligations, any changes or amendments inserted by one party as a condition of ratification must be accepted by the other party if the treaty is to come into legal effect.

I ought to point out that ever since 1922, the technique which the Senate has used to alter the legal effect of provisions contained in a treaty, in exercising its advise-and-consent function, or the primary technique, has been through amendments to the articles of ratification as reflected in reservations. Those, of course, then have to be agreed to, or accepted by the other party to the treaty if, in fact, there is to be a treaty.

Mr. KENNEDY. May I ask the Senator, again the floor manager, whether there has been any indication from the Panamanian Government as to the acceptability of this particular reservation?

Mr. SARBANES. I would have to say to the Senator in response to that question that we have no definitive indication.

Mr. KENNEDY. But it is the Senator's position that this reservation is completely consistent with the other provisions of the treaty and with the understandings and negotiations which have taken place between the United States and Panama?

Mr. SARBANES. I respond to that in the affirmative, by underscoring the point, as the Senator from Georgia has made it clear both in his statement and in response to questions, that if there is to be a continued American defense presence in Panama after the year 2000, it must be according to an agreement between the two countries. In other words, there is not the unilateral imposition of such an arrangement. The reservation of the Senator from Georgia provides the opportunity to reach such an arrangement through an agreement to be mutually arrived at by the parties.

As the Senator from Georgia states in the resolution:

Nothing in this treaty shall preclude Panama and the United States from making, in accordance with their respective constitutional processes, any agreement or arrangement between the two countries to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the treaty.

Mr. KENNEDY. In the amendment of the Senator from Georgia, it is very clear that the purpose is to maintain the regime of neutrality established in the treaties. Those words have great weight in terms of establishing both the purpose and the tone of this reservation.

As I understand from the debate yesterday and from the statements today, that is the purpose of this reservation. Without this particular reservation, without other treaty arrangements—even with the agreement of the Panamanian Government and the United States—this treaty would preclude the opportunity for joint agreement to U.S. military presence for the purpose of maintaining the neutrality of the canal. This is really the purpose and the focus of this reservation.

Do I understand the Senator from Georgia correctly?

Mr. NUNN. The Senator from Massachusetts is correct.

Mr. KENNEDY. There may be those who try to infer a different purpose for this reservation, but I think the statement of the Senator from Georgia, supported by the Senator from Maryland, is quite clear on this point.

There is another point on which I should like clarification—and, again, perhaps the Senator from Georgia referred to it in his presentation yesterday. There is nothing in this reservation which would derogate from the defense rights of the United States as spelled out in article IV of the Neutrality Treaty, referring to the preservation of the neutrality of the canal and its defense against any aggression or threat, directed against the canal or against the peaceful transit of vessels through the canal. As I understand, there is nothing in this reservation which in any way will reflect on that particular article in the Neutrality Treaty, which spells out very clearly the responsibilities and the legitimate interests and rights of the United States in terms of the preservation of the neutrality of the canal itself.

Mr. NUNN. The Senator is correct. The wording of this reservation is very particular in stating that "nothing in this treaty shall preclude"—and this certainly could not in any way be interpreted to diminish the rights of the United States as contained in the treaty and the leadership amendment.

Mr. KENNEDY. I thank the Senator from Georgia for those comments.

Mr. President, tomorrow the U.S. Senate will finally vote on the Neutrality Treaty, one of the two Panama Canal treaties negotiated and presented to the Senate for advice and consent.

I firmly hope and believe that both treaties will be ratified by the United States. I am convinced that, in their present form, they meet our fundamental interests:

Our interest in full and permanent access to and use of the Panama Canal by both our commercial and military ships;

Our interest in a new era of relationships with Panama and Latin America, based on equality and fairness instead of domination and injustice;

Our interest in a demonstration of national strength and will, not only to do what is of direct benefit to our nation, but to do what is right.

We have seen amendment after amendment, understanding after understanding, reservation after reservation—all ostensibly designed to prolong or to strengthen our rights to defend or to use the canal.

But these rights are already in this treaty: The "Treaty concerning the permanent neutrality and operation of the Panama Canal."

These rights are of permanent duration.

These rights enable either party to "act against any aggression or threat directed against the canal" or transit through the canal.

These rights assure expeditious passage of United States and Panamanian warships "as quickly as possible, without any impediment, with expedited treatment," going to the head of the line "in the case of need or emergency."

The treaty itself establishes the responsibility of the United States and Panama for the permanent neutrality of the canal. This it defines as the assurance of an open, accessible, secure, and efficient canal.

I hope that I will be excused, Mr. President, when I ask why we are subjected to amendments, understandings, and reservations providing for unending rights to use force and unending rights to go to the head of the line. That was the whole point from the very start:

With the treaties as negotiated last summer,

With the statement of understanding as agreed between President Carter and General Torrijos last fall;

With the amendments already proposed by the Senate leadership and already adopted by this body earlier this year.

And so I would ask my colleagues to carefully consider whether any more specific language clarifies or impedes. Some language may clarify, and helpfully so, without undermining the treaties. But other language is designed to appear reasonable while actually sabotaging the treaties. This language we must both expose for what it is and defeat for what it is intended to accomplish: The demise of 14 years of negotiations, under four Presidents, to which this Nation has pledged its good name and its good will.

And finally I would ask us all to bear in mind that we are speaking not only to ourselves and to our constituents, but to the people of Panama and Latin America as a whole.

Panama is not a colony but a sovereign state which we should treat with dignity and fairness. Yet some of the statements on this floor do precisely the opposite. They impugn the good faith of the Panamanian Government. They dictate to Panama how it is to conduct its own ratification process. They call for American rights of intervention and occupation which we would never tolerate ourselves—not in our early years of relative weakness and certainly not in our present period of relative strength.

So when we speak, let us ask ourselves whether we would like to hear the same words applied to us. When we act, let us shed the colonialist mentality of the past. Let us decisively adopt a treaty which recognizes equal rights and responsibilities to defend and to use the canal. By choosing equality instead of domination, fairness instead of injustice, we are true to what is best in ourselves and to what the United States has always represented for the world.

Mr. NUNN. I thank the Senator from Massachusetts.

Unless the Senator from Maryland has a question or other comment, I yield to the Senator from Arizona.

Mr. DECONCINI. I thank the Senator from Georgia.

Mr. President, I support the Senator's reservation or amendment.

Mr. NUNN. Before the Senator starts, let me say that the Senator from Arizona (Mr. DECONCINI), who is about to speak, has played a vital role in conceiving and drafting this reservation. In fact, the Senator from Arizona had a reservation very similar to this. We really merged the two, and he coauthored this reservation; I appreciate his assistance very much.

Mr. DECONCINI. I thank the Senator from Georgia. It is a pleasure to cosponsor the resolution with him. Knowing his deep concern about the possibility of our need to have military presence there after the year 2000 has prompted me to rise in support of this reservation or amendment to the Resolution of Ratification.

I have had a strong feeling, since the treaties have been presented to the Senate, that we should not bar ourselves from negotiating with Panama as a sovereign, as we have the right to deal with any other country as a sovereign; and I could find no precedents whatsoever to do such an act. That is why my feelings are so strong that this type of amendment was proper at this time.

It may be in the best interests of the United States to attempt to negotiate a meaningful arrangement with the Republic of Panama for military presence after the year 2000, maybe starting the year 2000, maybe not in that year, maybe 10 years after the year 2000.

We have military arrangements throughout the world that do shift and move, depending upon what our vital interests are. I am advised that we have more than four military bases—that I know of—on the Mediterranean, for the national security of this country, and perhaps more.

Certainly, it is crucial that we be able to maintain military presence in Central America. If we decide that we can work an arrangement with Panama, that certainly would be a logical place, at least by today's standards. If we cannot, we are not barred by any other arrange-

ment I know of, treaty or otherwise, from dealing with another country.

It does make a lot of sense to me that by the year 2000, the United States still will need military presence in Central America. Nothing would lead me stronger to support this amendment than to think that because of the military bases that are there now—and there is no reason to think they will be totally antiquated—that would be the logical place for us to continue our military presence. The amendment of the Senator from Georgia does just that. It does not guarantee that we will be there, but it takes out what I think is a very onerous and a very objectionable provision in the treaty, in article V, which would prohibit the United States from having any military presence there, without amending this treaty and having to go through this exercise once again when we have decided that we needed a military presence and we could persuade the Panamanians that we should have it.

I compliment the Senators who have offered this amendment and those Senators who believe that it is important that it becomes a binding part of the arrangements we are today to set with Panama.

It is important, in dealing as the U.S. Senate is doing here, that we be fair with the Panamanians, and I think we have been fair with the Panamanians. It is also just as important that we be fair with the American people. I believe this amendment does just that. It does not preclude us from a right we should have, something that is fair for the United States, to be able to deal with another sovereign country.

I am very pleased that this amendment is before the Senate. I am glad to be a coauthor, a cosponsor of it. I commend it to the Senate. I cannot imagine anybody not voting for this. Although I have supported numerous other amendments to the treaties and will support numerous amendments to the resolution of ratification, only a few of those have been agreed to. There have been some improvements by the amendments, and we still have an opportunity to make this treaty arrangement with Panama, if it is ratified by the Senate, a meaningful agreement that, in fact, is binding internationally and will protect the best interests of the United States and the people of this country.

I thank the Senator from Georgia.

Mr. NUNN. I thank my colleague, I thank him for his able assistance. He is due a large measure of the credit for the reservation we have before us.

Unless someone has a further question, I yield the floor, or I yield to the Senator from Alabama.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. NUNN. I yield.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. Mr. President, first, I commend the distinguished Senator from Georgia for his patriotism and his expertise, his dedication, for his stand for a strong defense of our Nation, for his general excellence as a Senator, and certainly there exists a warm bond of friendship between the distinguished Senator from Georgia (Mr. NUNN) and myself.

I remember several years ago a sentence that has stuck with me, I will say to the distinguished Senator from Georgia. Someone in one of the local newspapers was writing an article on him and the first sentence in the article has always stuck with me. It had to do with Mr. NUNN'S trip to Europe, talking with some of our NATO allies and assessing our defense potential in NATO, and then coming back and translating that information into action here on the floor. And this sentence said, "Yesterday SAM NUNN saved NATO."

So I felt that that was a great tribute wrapped up in that sentence, because he did stand up for our NATO alliance, feeling that it was in the best interest of our country and the best interest of world peace that the NATO alliance be supported.

So when I differ with my distinguished colleague, the distinguished Senator from Georgia, I differ just in a matter of judgment and certainly do not cast any reflection at all upon his patriotism, dedication, or his sincerity. I admire the distinguished Senator from Georgia.

Mr. NUNN. Mr. President, if the Senator will yield, I thank him very much for his complimentary remarks and I assure him that the feeling he has expressed is mutual. I have great admiration for the Senator from Alabama. We agree on many issues and it is unusual when we do not agree.

Mr. ALLEN. I thank the distinguished Senator.

I also comment on the remarks of the distinguished Senator from Massachusetts (Mr. BROOKE).

He made one of the greatest speeches in opposition to the Neutrality Treaty that has been made on the Senate floor.

He gave a scathing denunciation of the provisions of the Neutrality Treaty, pointing out that it did not protect our national interests. But yet in conclusion, he ended up by saying that—

> With the addition of the Nunn reservation I am going to support the treaty.

So certainly it was only a little patch on a tremendous gaping wound and certainly does not answer the criticisms that he leveled at the treaty.

What does the reservation do? In the judgment of the Senator from Alabama it does from little down to none. That is what it accomplishes.

This reservation was offered while we had the treaty under consideration, not the resolution of ratification, as an amendment by the Senator from Alabama joined in by the Senator from Georgia (Mr. NUNN), which was almost exactly the same. It was exactly the same until the Senator added four words "between the two countries" here to his reservation.

That was voted down by recommendation of the leadership, because it was an amendment and not a reservation. What is the difference between the two? Why would the leadership vote down an amendment embodying the very same phrases and yet enthusiastically support a reservation with the same words?

The answer, Mr. President, is quite obvious. Even though the words do not accomplish anything, it is possible that the amendment might have required another plebiscite in Panama. What is wrong with another plebiscite? Should we not have a compact with the people rather than just a compact with a dictator and his dictatorial regime?

So that is the reason they voted down the amendment embodying the very same words. Now they come forward with a reservation and say "This has to be accepted before it is any good." Accepted by whom? Whereas now, under the treaties before the Senate, if we accept them, they are the treaties that have been approved in a plebiscite, supposedly, in Panama, with the addition now of the so-called leadership amendments. At least we had some sort of compact with the people of Panama. One of the reasons that they say baldly and plainly that they did not want amendments was because it would result in a new plebiscite and they want a reservation, because Dictator Torrijos can merely accept that and then enter into a note of ratification to the treaty with President Carter.

But then we will not have a compact with the people of Panama. We will merely have an agreement with Dictator Torrijos. That is the reason, it would seem to me, that the amendment route would have been much better.

Mr. President, this debate has been most interesting to me, and I am sure it has been interesting to every Member of the Senate. To me it has been a study in human nature, a study in human frailty, and a study in human strength.

So with acceptance that is envisioned of this reservation and on the outside chance that it might accomplish something, I plan to vote for the reservation. I supported his amendment. And I am going to support it as a reservation on the slight chance that it might possibly do some good. Actually, as I see it, the reservation accomplishes practically nothing—and I will say nothing—that is not already authorized. It gives the United States absolutely no unilateral right. Not one single unilateral right does it give us.

Article V of the Neutrality Treaty says that after the termination of the Panama Canal Treaty—that is the treaty giving the canal away—after termination of that treaty, 22 years from now, only the Republic of Panama can maintain troops and bases in Panama.

This reservation says that the United States and Panama may agree that we might have a military presence in Panama. We may agree. Why do we need this amendment to say that Panama and the United States may agree? They say it will take another treaty. If Panama and the United States want to enter into a protocol or even a revision of a treaty, it can be accomplished in only a matter of days on this right. It could be accomplished by a status of forces agreement. It could be accomplished by an executive agreement. So, when we say the United States and Panama may enter into an

agreement that gives Panama the right, of course, to refuse to enter into that agreement, it does not give the United States a single right that it does not already have. The treaty says we cannot do it. They can enter into agreement any time they want to, as we all know.

But what right it does give, if any, is limited to trying to work out an agreement with Panama. If Panama says "No," that ends it, no right at all. So what right does it give?

Why could not Panama have the United States, in the absence of this reservation, agree on the United States coming in to defend the canal?

In the first place, if there are any rights, supposedly given under the reservation, why was it not put in its best form, that of an amendment? Well, we got 41 votes to about 53, I believe, in putting it in an amendment. But they did not want to give us the best right or chance. They turned it down as an amendment and said:

Well, we will give you a reservation.

Mr. President, it seems obvious to me that reservations are a dime a dozen here in the closing hours of this debate. If the Senator needs a reservation he gets a reservation. And why? Because, in the final analysis, it does not have to have the approval of the people of Panama.

Torrijos is not going to be there forever, we know that. Sometime possibly a democratic government will take over in Panama as they had at the time Torrijos executed his coup d'etat and took over the Government of Panama at the point of a gun.

Would not the democratic government have a right to say, "These reservations were never approved by the people of Panama. This is an agreement between Dictator Torrijos and your Government, and we disallow it."

So what is the use of putting this on? Well, the Senators say:

If this is adopted, if this is agreed to, I can see my way clear to support the treaty.

They are accepting mighty little, it seems to me, if they have got all of the objections to the treaty, to end up by saying, "If you adopt this thing saying Panama and the United States can negotiate on keeping troops there, I will support the treaties." What are we getting under this reservation? The right to ask Panama if we can put soldiers there to defend the canal. Suppose Panama says "No"? That ends it. That ends it, Mr. President, no right at all. So we are still at Panama's mercy.

Now, Mr. President, we all recall that when the treaties were first submitted, the objections raised by many, now active in support of the treaties, were that there was no unilateral right of the United States to defend the canal, and they say they fixed that with the leadership amendment. I question whether that was done, whether the leadership amendment, has accomplished that or not.

But that was the criticism of the treaties as submitted, that they did not give us any unilateral right.

Well, we have no unilateral rights under this reservation. Say this reservation is absolutely binding on the Government of Panama and the people of Panama, say it has the highest possible level of agreement between the Government of Panama and the United States. What is here? the right of the United States to go hat-in-hand to Panama and say, "Will you please give us an agreement to keep soldiers in Panama, keep bases there." What sort of right is that? If Panama says, "No," we have no further rights. Is that right or is that just something I am drawing out of the air? Let us see.

I read from the reservation:

That nothing in this treaty shall preclude Panama and the United States from making, in accordance with their respective constitutional processes, any agreement or arrangement between the two countries to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the Treaty. . . .

And so forth, and it gives the right to make an agreement with Panama, if we can; and they are so jealous of their prerogatives, so anxious to get us out of the Canal Zone, can you feature them opening up their arms to troops of the United States?

If the leadership had wanted an effective provision they could well have accepted an amendment that they turned down here in the Senate that would have given the President of the United States the right to maintain a military presence in the Canal Zone after December 31, 1999 if, in his judgment, the judgment of the President of the United States, it would be necessary to have that military presence to defend the canal from sabotage. That would have had some teeth in it. That would have given us the right of unilateral action.

The reservation, even if it were an amendment, which I tried to get adopted, and the distinguished Senator from Georgia, indicating his preference for an amendment, joined as a cosponsor of that amendment, would merely give the right to ask Panama's permission.

Mr. President, this great Republic would be precluded from asking Panama's permission right now or in the year 2000. That is the only right it gives us, as I have read. No requirement that Panama do it, no requirement that they enter into this agreement. It is permissive only. This is offered, Mr. President, as the excuse of some Senators to support these treaties or this treaty.

There is an interesting consideration, Mr. President, with respect to this treaty, and it is going to be voted on sometime around 4 o'clock tomorrow. It looks like there is an excellent chance that the administration has put together a winning combination, although we will not know until the final vote.

Mr. President, this treaty that we are going to be acting on tomorrow is absolutely worthless and without binding effect until the Panama Canal Treaty is approved by the Senate. So we will just be a part of the way along on the approval of the treaties if the Neutrality Treaty is approved by the Senate.

What do I base that on? The very last sentence in the treaty before the date line:

This treaty shall enter into force, simultaneously with the Panama Canal Treaty, six calendar months from the date of the exchange of the instruments of ratification.

So, Mr. President, if the Panama Canal Treay never enters into force, then this treaty would never go into force. Even though the Senate should, on tomorrow, approve this treaty—and that is entirely doubtful at this time—we would not have anything accomplished in the way of a treaty until the other treaty is agreed to. They are part and parcel of each other.

Possibly the canal treaty could have gone into effect by itself. I am not sure. Let us check that. I do not see any such provision in that treaty, I do not believe, so maybe the leadership made a mistake in not scheduling the Panama Canal Treaty first, because the Neutrality Treaty cannot become effective until the Panama Canal Treaty becomes effective, and we will still have the battle going on, even if we should lose the first skirmish on tomorrow.

(Mr. MELCHER assumed the chair.)

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield at that point?

Mr. ALLEN. Yes.

Mr. ROBERT C. BYRD. The battle would go on regardless of the outcome tomorrow, may I assure the Senator.

Mr. ALLEN. I thank the Senator for that information. I have asked that question before, and the Senator declined to give me an answer.

Mr. ROBERT C. BYRD. Oh? I am sorry, I do not recall that.

Mr. ALLEN. Oh, yes. I have asked the distinguished majority leader here on the floor, if the Neutrality Treaty should be defeated, whether he would withdraw the other one, and he was noncommittal on the subject.

Mr. ROBERT C. BYRD. No; I did not commit myself to withdraw the other one. But I say here today, after very careful contemplation and prayerful meditation, that regardless of the outcome tomorrow the Senate will proceed to the consideration of the next treaty.

Mr. ALLEN. I thank the majority leader for that information. I will certainly say that if we are able to defeat the Neutrality Treaty on tomorrow it would seem to me to presage the likely defeat of the other treaty, because if we are not willing to act on a treaty providing for the defense of the canal in the year 2000, are unwilling to act favorably on that, there would seem to me to be less likelihood of acting favorably on a treaty that would give the canal away.

But I thank the majority leader for giving me this information. It will allow me to consider that fact in connection with such action as we might be required to take with respect to this vote and the vote on the other treaty. I thank the distinguished majority leader.

Mr. ROBERT C. BYRD. I thank the Senator from Alabama.

Mr. ALLEN. That is interesting information, and it shows this, Mr. President: It shows the great power of the leadership. And that is as it should be; I recognize that, and I respect the rights of the leadership to schedule the order of consideration of treaties, subject, of course, to asking the Senate to take the contrary

view; but we recognize that the leadership can bring up measures or fail to bring them up.

I would have hoped that had we been successful in defeating the Neutrality Treaty, that would have been the end of it, but the distinguished majority leader will continue on with the canal treaty, even though we have many domestic problems that require consideration, and despite our hope that we would return to some of those if we succeed in defeating the Neutrality Treaty.

Well, that is a comfortable position to be in. I have never been in that position, of having been at the head of a monolithic bloc, here in the Senate, of a sizable majority of Senators. It must be comfortable to be at the head of such a bloc of Senators. It makes it easy for concessions to be made in language and for reservations to be accepted. Those of us who oppose the treaties have no power whatsoever except to appeal to the reason and the logic of other Senators, and seeking to show that these treaties are not in the best interests of the people of the United States.

But obviously the leadership is able to give its support to reservations as Senators ask for reservation to be made, handing out a reservation here, a reservation there, and a reservation somewhere else.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield at that point?

Mr. ALLEN. The opposition has no such right.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. ALLEN. Yes.

Mr. ROBERT C. BYRD. I hope the audience to which the distinguished Senator appeals will not take at face value some of the suggestions that are being made here, to wit, that the leadership "hands out a reservation here," and "hands out a reservation there," to pick up a vote here and a vote there.

These reservations—let us take the one we are on right now. This reservation was not handed out by the leadership to Mr. NUNN.

Mr. ALLEN. The Senator is a cosponsor of it, though.

Mr. ROBERT C. BYRD. I beg the Senator's pardon.

Mr. ALLEN. The Senator stated yesterday or the day before that he was a cosponsor.

Mr. ROBERT C. BYRD. The Senator has pointed to my human frailty. I am not a cosponsor of it.

Mr. ALLEN. I understood the Senator to say that Senator NUNN had asked him to be a cosponsor, and that he had consented. If I am in error, I apologize.

Mr. ROBERT C. BYRD. No; the Senator owes no apology. He is absolutely correct, preeminently correct. I was preeminently wrong. I was not a cosponsor, I am not a cosponsor, and I do not know why I said that. I think I got excited. The Senator from Alabama is such an able debater that I think he caught me on the crest of confusion, and I answered "Yes" when I should have said "No."

But I am not a cosponsor, and the leadership did not hand that resolution to Senator NUNN. The leadership did not think of it. Here a few days ago I was extolling the virtues of article V, when there was a hole in article V big enough to drive a moving van through. Senator NUNN, Senator TALMADGE, and Senator BELLMON saw the loophole, and they suggested the reservation. But the leadership cannot lay claim to this, and I hope the Senator will not attempt to load upon the leadership more attributes, compliments, and commendations than the leadership is entitled to.

Mr. ALLEN. Would the Senator mind telling how many of these reservations he has agreed to support?

Mr. ROBERT C. BYRD. Let me see. If the distinguished Senator is cross-examining——

Mr. ALLEN. No, sir.

Mr. ROBERT C. BYRD. Allow me just a moment to reflect. I believe I have indicated my support of only the reservation Mr. NUNN is offering. I said I would keep an open mind on the others. I have not made up my mind.

Mr. ALLEN. It is going to be interesting to see how the distinguished majority leader votes. I know how he voted on the amendments.

Mr. ROBERT C. BYRD. Yes, I voted against the amendments. I have no qualms or apologies for that.

Mr. ALLEN. I thank the distinguished Senator.

Mr. ROBERT C. BYRD. I thank the distinguished Senator for yielding.

Mr. ALLEN. As I have stated, Mr. President, I do plan to support this reservation in the unlikely event that it might possibly accomplish something. I do not think that it will, but in the unlikely event that it does, I will cast my vote for the reservation. I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. GRIFFIN. Mr. President, I would like to address a few questions to the distinguished Senator from Georgia about this reservation.

First of all, if he contends that the resolution has some meaning, and I will argue that it does not but assuming that it does for a moment, has some substance, what does the Senator from Georgia say in response to the question as to whether or not this will have to be approved by the people of Panama in a plebiscite in accordance with their constitution?

Mr. NUNN. I might say to my good friend from Michigan first of all this reservation would put before us the substance of the amendment the Senator from Alabama proposed yesterday—not exactly but virtually the same language—which the Senator from Georgia cosponsored and the Senator from Michigan, I believe, voted for.

Mr. GRIFFIN. The Senator is incorrect.

Mr. NUNN. The Senator from Michigan did not vote on that?

Mr. GRIFFIN. That is correct. There was no vote on the merits. There was a vote on a motion to table. The Senator from Michigan voted against the motion to table on the theory that we should be voting on these amendments on their merits.

Mr. NUNN. Well, it does have whatever meaning the Senator from Alabama proposed it to have. I would say that the Senator from Georgia made it clear in his original statement that this does not guarantee the United States a military base after the year 2000. It does not. But it does move that situation from impossible to possible. It is possible under this reservation that we can have a military base by agreement of the parties. If we left it like it was, we would be in a situation where only by another treaty or by an amendment to the treaty could we secure military bases, even if the Panamanian Government and the U.S. Government in the year 1998 decided that such was necessary.

That is the interpretation of the Senator from Georgia concerning what this does, no more and no less.

As to the second question the Senator from Michigan proposed, as to whether there would have to be another plebiscite or another referendum, the Senator from Georgia has not claimed to be an expert on U.S. constitutional law let alone the Panamanian constitutional law. That would have to be decided by the Government and the people of Panama. Whatever is decided on this reservation, if it is not accepted by Panama or is not accepted here, we will really not have a treaty. If it is accepted, then it will be binding on both the United States and Panama as it is written.

Mr. GRIFFIN. If it is accepted by General Torrijos, whether or not it is accepted by the people of Panma.

Mr. NUNN. If it is accepted by the Government of Panama, that is right.

Mr. CURTIS. Will the distinguished Senator yield so I might ask a question?

Mr. GRIFFIN. I yield.

Mr. CURTIS. I commend the distinguished Senator from Georgia for his concern about the defense of our country. If the language proposed by the distinguished Senator is not included in this treaty, would the United States and Panama have a right at any time within 6 months from now, 6 years from now, or 10 years from now, to enter into a new agreement?

Would the sovereign governments of the two nations have a right at any time in the near future to make a new agreement if they wanted to?

Mr. NUNN. The Senator used the word "agreement." Under this, no, if this resolution is adopted, there would be no right for the U.S. Government or the Panamanian Government, by agreement, to allow the military presence in Panama. If the Senator used the word "agreement" in the broadest sense, which would include this treaty, the answer would be "yes". The Senator would have to define what he means by "agreement".

Mr. CURTIS. I mean an agreement in the nature or the status of a treaty. My point is this: As I read this, this grants no right that the U.S. Government does not have now. If we turn this language down it would not for an instant say that the two sovereign governments at any time in the future could enter into any kind of an agreement they wanted to.

Mr. NUNN. I disagree with that. It depends on how the word "agreement" is used. There would have to be an

amendment to the treaty, without this reservation, if the United States and Panama were to do that. I would say that the history of this treaty demonstrates pretty well the time it takes to negotiate a treaty beween the two countries. We have been negotiating this treaty 14 years. We have had four Presidents, two Democrats and two Republicans working on it. We have been debating this matter on the floor of the Senate for several weeks. The Panamanian people have had a referendum. Anyone interested in this process——

The PRESIDING OFFICER. The Senator from Michigan has the floor.

Mr. NUNN. I would like to complete my answer.

Mr. GRIFFIN. I yield for that purpose.

Mr. NUNN. The observers of this process should be the first to realize that there is a difference between a treaty and an agreement.

Mr. GRIFFIN. Now, Mr. President, if I may comment at this point, and I will give the Senator from Georgia an opportunity to respond further, I do not understand what he seeks to suggest. I would guess he is perhaps speaking in terms of an executive agreement which would not have to be submitted to the Senate later on. That is an interesting position for the Senate to be engaged in, if that is the purpose. I would like to read for a moment from the treatise on international law by Dr. Oppenheim, a recognized authority. At one point he says:

> International compacts which take the form of written contracts are sometimes termed not only agreements or treaties but acts, conventions, declarations, protocols and the like. But there is no essential difference between them, and their binding force upon the contracting parties is the same whatever their name.

All of which can be said as well about amendments, reservations, or understandings. Whatever we label them does not matter. The question is, what are they, what do they do?

For the Senator from Georgia to have a reservation, so-called, which gives the parties the right to enter into an agreement, which he is somehow, I understand, thinking to distinguish from a treaty, is asking the Senate to accept something I do not understand. If an agreement modifies a treaty in some way, then it must be handled in the same way as the treaty itself.

May I ask the Senator from Georgia, does he have in mind that, by the adoption of his reservation, later on the Executive, without consent of the Senate, would be able to enter into some kind of an executive agreement? Is that the purpose?

Mr. NUNN. I think if the Senator from Michigan would review our base agreements with other nations, most of them are handled by executive agreements rather than treaties. That is a very complex subject, differing between the executive agreements and treaties. There has been a lot of discussion among constitutional lawyers. But there is clearly a difference at some point. It is the intention of the Senator from Georgia to provide by this reservation——

Mr. GRIFFIN. To bypass the Senate?

Mr. NUNN. The Senator sits on the Foreign Relations Committee, does he not?

Mr. GRIFFIN. Yes; and I do not approve of executive agreements. I think we should insist that executive agreements in most instances come before the Senate for advice and consent.

Mr. NUNN. Then the Senator really should oppose this amendment in the nature of a reservation.

Mr. GRIFFIN. The Senator from Michigan is opposing it.

Mr. NUNN. If the Senator from Michigan thinks we should have no base in any country in the world except by treaty, then the Senator from Michigan should not vote for this.

Mr. NUNN. If the Senator from Georgia can rest assured that is the intention of the Senator from Michigan.

Mr. President, do I still have the floor?

The PRESIDING OFFICER. The Senator from Michigan has the floor.

Mr. GRIFFIN. Mr. President, I shall vote against it for another and more basic reason. That is that I do not, as a lawyer—and I respect the legal ability of the Senator from Georgia very much, as well—but as a lawyer, I find that this language is meaningless. Nothing in this treaty shall preclude Panama and the United States from making any agreement between the two countries.

Well, exactly what is it in the treaty that would preclude us from making an agreement, I ask the Senator from Georgia?

Mr. MATHIAS. Will the Senator yield?

Mr. NUNN. Article V states it very clearly, if the Senator will read that.

Mr. GRIFFIN. The Senator from Michigan has read it and there is nothing in there that does preclude the United States and Panama from negotiating and concluding another agreement. I find it very difficult to understand how the Senator from Georgia can find something.

Mr. NUNN. I would think it would be very clear that the only way that can be done is by another treaty, because the treaty itself precludes anybody but Panama from having a military presence in Panama.

Mr. GRIFFIN. Another treaty, I concede.

Mr. NUNN. Then we agree; we do not differ.

Mr. GRIFFIN. My point is that, without the reservation of the Senator from Georgia, the United States and the Republic of Panama would be free, able, and competent to negotiate another treaty next month, next year, 10 years from now. This language is meaningless. I cannot understand how anyone would change his vote by having this reservation adopted.

I yield to the Senator from Maryland.

Mr. NUNN. I think the Senator from Michigan should have voted to table the Allen amendment yesterday.

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Georgia?

Mr. GRIFFIN. I yield now to the Senator from Maryland.

Mr. MATHIAS. I appreciate the Senator from Michigan's yielding for me to give a very brief observation, because I listened with great attention and great interest to the comments of the Senator from Alabama, which are similar to those now being made by the Senator from Michigan, that this language does not give to the United States any power, any authority, any options, any privileges that it would not have under the treaty itself. In other words, the two parties could come together and make a new agreement with respect to base rights.

I think there is some force to that. But I think the value of the reservation proposed by the Senator from Georgia goes beyond the question of what the United States and the Republic of Panama may be able to do. This is notice to the world.

After all, there are other people who have an interest in this situation than just the United States and the Republic of Panama. The canal, if it is to pay its own way and is to be economically feasible, is used by all the maritime nations of the world. They have some concern. They have some interest. I think the reservation—and if I am wrong, I am sure the Senator from Georgia will say that I am wrong—I think the reservation he is proposing is not only making it clear between the United States and the Republic of Panama that we may wish to come together and arrange for the stationing of some U.S. military forces within the territorial Republic of Panama—as we have in many other nations around the world—but that is notice to all the world that that is our intention so that no other nation can come around later and raise any third-party objections. This makes it clear that that is within the contemplation of the parties at this time. I hope that the Senator from Georgia will confirm that understanding.

Mr. NUNN. I agree with the Senator from Maryland. I think it is clear.

Mr. GRIFFIN. I guess I am left to concede that it is a declaration of the fact that the United States and the Republic of Panama can negotiate in the future for some new and different agreement. I cannot imagine that anyone does not already know that.

I mean, that is a fact of international life. We are going to be negotiating with the Republic of Panama on other things as well, including how much money they are going to receive, and related to the cost of living. It is a fact that we will be able to negotiate with them. That does not mean we are going to get an agreement with them, does it?

Mr. MATHIAS. No, I think the Senator from Michigan is exactly right. But within that fact, I think, if we take the treaty on its face, there is a kind of aura of what is very nearly a demilitarized area, in which no country—no great power, certainly—would be allowed to have a military base in the country. If we do not have the reservation of the Senator from Georgia, we are at least opening ourselves up and exposing ourselves to a charge that we are not obeying our own rules, because we say in the treaty that there will be no military bases of any foreign power within the territory of the Republic of Panama.

Fine. But does that mean that we are going to abide by this same rule? We are making it clear that our situation may be different from that of the Soviet Union or the People's Republic of China, or any other power that may have an interest in some sort of military installation in Panama.

Mr. GRIFFIN. With all due respect, I think we are saying we are going to continue to abide by it until some new treaty is negotiated and that will be exactly the case if we adopt the Nunn reservation. We will be in exactly the same situation whether we adopt it or not. Because that is the case, it will be very easy, of course, for General Torrijos to accept this and perhaps it will not have to go to a plebiscite of the people, because it does not do anything. As long as we do not change the treaty in any way, there is no problem. Yet the Senator from Georgia would like to have us believe that some major, significant change is being made in this treaty.

Hogwash. We are exactly where we were and would have been if this reservation had never been adopted.

I yield to the Senator from Alaska.

Mr. STEVENS. I was going to make the same comment to the Senator from Michigan. It seems to me that this reservation, on its face, changes nothing in the treaty.

Mr. GRIFFIN. Not a thing.

Mr. STEVENS. I wonder if those people who think it preserves a right for us in the future to be there would be willing to add to this reservation a prohibition against the Soviets or the Cubans from discussing coming there? That would be a change. That would change the treaty.

Mr. NUNN. Will the Senator from Alaska yield to me?

Mr. STEVENS. I do not have the floor.

Mr. NUNN. Will the Senator from Michigan yield?

Mr. GRIFFIN. I shall as soon as the Senator from Alaska has completed.

Mr. STEVENS. If we can get into this a little later, I would like to discuss this a bit in terms of the impact on the Panamanians. It is clear that the Panamanians, at their plebiscite, approved the documents that were presented to them prior to that date. If there is any change made by the Senate in the treaties as they understood them then—and I shall go into that in greater detail if anybody would like to go into it—it is clear to me that there would be required an additional plebiscite. That is what all the fencing has been about, an unwillingness to take any amendments that would require that plebiscite. If this reservation changed anything, it would not be accepted here. I am sure the Senator from Michigan would agree with that?

Mr. GRIFFIN. I certainly would. That has been very obvious all the way through.

Mr. STEVENS. This reservation is a nullity. It is a smokescreen to let people believe that somehow or other there is a greater protection here for a U.S. military presence in Panama in the future, and nothing in this gives us any greater right than we have now.

Mr. GRIFFIN. It gives us no right except to go and talk with them and hope they will agree to something in the future, which we are always in a position to do anyway, whether this is in here or not.

Mr. STEVENS. I ask the distinguished Senator from Michigan whether they had any such reservation in any treaty to support the executive agreements that we disagreed with.

Mr. GRIFFIN. I have not seen any.

Mr. STEVENS. You and I have opposed these executive agreements, as have many of us in the past, concerning bases. We think they ought to be treaties and as a consequence we have a series of disagreements dealing with military activity throughout the world. The disagreements result from accords reached on an executive-to-executive basis, without our approval.

Mr. NUNN. Will the distinguished Senators from Michigan or Alaska yield?

Mr. GRIFFIN. I used some strong and colorful language, because I feel very strongly.

But, first, I wanted to yield to the Senator from Georgia.

Mr. NUNN. I will say it very simply, and that is that article V says, "after the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the canal and maintain military forces, defense sites and military installations within its national territory."

Now I will certainly, as I have said many times, agree with both the distinguished Senator from Michigan and the distinguished Senator from Alaska that this reservation does not guarantee U.S. military bases in Panama. It just does not do that. I never claimed that it did, and if the Senators from Michigan and Alaska would like to assure that in the next 22 years the United States would be in exactly the same position vis-a-vis military bases in Panama after the year of 2000, that Russia, that Red China, and Cuba, along with all the other nations in the world, then the thing for them to do is to vote against this reservation because that would be the exact status we would be in. We would not be in any different position than every other nation in the world.

If the Senators from Michigan and Alaska would care to put us in a little bit better position, in terms of the future possibility of base sites, in terms of the overall observation of third countries, and in terms of the future expectations the Panamanian people, then they should vote for this reservation. It just depends on whether you want us to be in exactly the same position as every other country in the world or whether you would prefer to create a different type of climate and a different kind of expectation, in terms of both Panamanian opinion and world opinion, as we complete the treaties.

Mr. STEVENS. Will the distinguished Senator yield?

Mr. GRIFFIN. If I could just make one statement at this point before I yield.

The Senator from Georgia keeps referring to article V of the Neutrality Treaty and that is very interesting. It does provide that only Panama can have forces in Panama while this treaty is in effect, but the Senator from Georgia would like to have us believe as to this treaty we are bound by it in perpetuity and it could never be changed by agreement between the two parties.

The fact of the matter is that is not the case, as can be illustrated by pointing to the 1903 treaty, which was a treaty that attempted to give to the United States in perpetuity all the rights, privileges, and authorities within the Panama Canal.

We are here now considering and about to vote on a treaty that will abrogate and vitiate the treaty of 1903 and put a new treaty in its place. What better evidence do you need than that, that it can be done? Now if we agree to this Neutrality Treaty, I am sure its provisions are applicable as long as the thing is in effect, but there is nothing to prevent the United States and the Republic of Panama next week, next month, next year, 5 years from now from negotiating a different treaty, something that modifies it. That is all I am saying.

The reservation of the Senator from Georgia says nothing more than that. It only says in the treaty that we can do it and we are already able to do it. Well, of course we can do it. Nobody disputes it, but so what? How can anybody change his vote if he has any serious objections to this Neutrality Treaty by accepting this meaningless reservation.

I yield now to the Senator from Nebraska.

Mr. CURTIS. I thank my distinguished friend. In my first remarks, I am going to try to be precise.

My first question is, if we do not abrogate the 1903 treaty, can we keep the necessary troops in the Panama Canal Zone to defend the canal any time in the future, if we do not abrogate the 1903 treaty, assuming that we do nothing to prevent its full force and effect as of now.

Is that right?

Mr. GRIFFIN. Obviously, under the 1903 treaty the United States not only has jurisdiction and control, as if we were sovereign in the Panama Canal Zone, but, of course, we have the right to maintain troops there.

Is that what the Senator is asking?

Mr. CURTIS. Yes.

And only the United States decides that under the 1903 treaty?

Mr. GRIFFIN. That is true.

Mr. CURTIS. Now, if we adopt this language proposed by the distinguished Senator from Georgia, can the United States any time after 1999 station troops in the Panama Canal Zone without the consent of Panama?

Mr. GRIFFIN. Absolutely not.

That is what——

Mr. CURTIS. It grants no right to us to defend that canal and all it is is a promise that we can talk, but it is no commitment?

Mr. GRIFFIN. It says nothing in the treaty that shall preclude the two countries from reaching an agreement if they can agree in the future.

Well, that is great.

Mr. CURTIS. Yes.

In other words. the very right of sovereign governments to enter into agree-

ments and modify treaties or write new treaties exists now and the language of the distinguished Senator from Georgia does not add anything to it?

Mr. GRIFFIN. Not a thing.

Now the Senator from Maryland contends that it somehow serves a notice on the world that maybe we might want to negotiate for such rights in the future.

Well, maybe it does. I would not argue with that. We could do that by the President making a statement or we could pass a resolution saying that we would like at some time in the future to ask the Republic of Panama to sit down with us and we would like to talk about this subject and hope that maybe we could reach an agreement. You know, that is about what it does and nothing else.

For the life of me, I cannot understand how Senators could change their position with respect to the treaty. Now, you know, I can understand why they would not be against this, perhaps, but I do not understand how they could change their position if they were otherwise opposed to the treaty by the inclusion of something like this which is meaningless.

Mr. CURTIS. In other words, you are saying if they are demanding more protection for the United States as a condition to vote for the treaty, that this does not give them that assurance or any possibility of it; is that not correct?

Mr. GRIFFIN. Not a bit.

Mr. President, I yield the floor.

Mr. STEVENS and Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the distinguished Senator from New York (Mr. MOYNIHAN).

Mr. MOYNIHAN. Mr. President, I would like to introduce into this matter, with respect to the points made by the distinguished Senator from Michigan and his not less distinguished colleague from Alaska, the question of what change this reservation proposed by my friend the Senator from Georgia will make.

I would like to ask the Senators who have not yet presented themselves to support it to consider the impact that this will have from the Panamanian side of any future agreement.

As the Senators know, and I am sure the Senator from Georgia knows, canal treaties have a special status in Panama. That is not surprising. They are not agreed to by the procedures that are ordinary to other treaties. They make a much greater claim on the intention and the concern of the Government.

Mr. GRIFFIN. Would the Senator at this point indeed agree that there is, as I specifically pointed out, a requirement that the treaties with respect to the canal must be approved in a different way?

Mr. MOYNIHAN. That is quite correct.

Mr. GRIFFIN. By a plebiscite of the people of Panama?

Mr. MOYNIHAN. That is quite correct.

Now this reservation, which is not an amendment—a reservation, why is it essential and what does it add?

What it adds is, among other things, things such as the Senator from Maryland has pointed out. It makes it possible for a future Government of Panama to enter a status of force agreement and executive agreement of the kind that will provide for American forces to be in the Canal Zone, a kind of agreement which the United States negotiated.

As the Senator from Georgia well knows there are probably four agreements in effect around the world.

Are there?

Mr. NUNN. There are.

Mr. MOYNIHAN. They are very common. They are almost routine, but under this treaty that is presently before us, without the reservation a question could seriously arise in Panama as to whether a future government would have the right to enter such an executive agreement and for the very reason that this reservation, which it states clearly is part of the regime of the treaty, does not change the treaty as such but it is part of the integral part of the treaty document. It makes clear on a future occasion that a Government of Panama can enter such an agreement with us and only with the United States because the treaty precludes any such agreement with any other country and it adds to the point that the Senator from Maryland addressed when he said, what will be the world expectations of the nature of this canal of the regime in this isthmus. It makes very clear that if in the course of a friendly and creative relationship between the United States and Panama, the Government of Panama, after the year of 2000, in the 21st century, in the name of heaven, wishes to have an agreement to station American forces of some kind or other it is free to do so that such an agreement has been contemplated, in no sense agreed to, but the possibility is clearly contemplated. Indeed, it is provided for without in any way amending the treaty. It provides the Government of Panama with a clear right to act in a way that it would find conducive to its interest and we would find conducive to ours.

This reservation adds to the regime of this treaty. It makes clear the matter which, in all candor, the Senator from Georgia is much to be congratulated for having brought forward. Some shadow would have fallen over the possibility of such a future agreement.

Mr. STEVENS. Will the Senator yield?

Mr. MOYNIHAN. Now, none does.

We do no more than retain the perfect right of each government to enter equally into an agreement, but no government has precluded itself from doing so.

We must recognize that there are governments which in one form or another, and sometimes by treaty—Japan is a good example—have indeed precluded certain actions.

This carries great consequence in the internal politics of such countries and, in consequence, is an inhibition as if it were, in fact, statutory.

Several Senators addressed the Chair.

Mr. MOYNIHAN. I am happy to yield for a question to the Senator from Michigan, my distinguished friend, and then to the distinguished Senator from Alaska who has also asked.

Mr. GRIFFIN. I thank the Senator from New York.

The Senator has made some very important points. The first of which is that a canal treaty has a very special status in Panama and that any treaty relating thereto has to be ratified in a special way now by a vote of the people of Panama.

Then the Senator from New York, as I understand his argument, is suggesting that if we adopt this reservation, that a leader of Panama in the future will be able to enter into an agreement with the United States to allow the United States to station forces in that area after the year 2000 without a vote of the Panamanian people.

If he is contending that that is what we are trying to do, is he also contending that we would do that without allowing the people of Panama to vote now on this question?

Are we circumventing the constitution of the Republic of Panama?

Mr. MOYNIHAN. The Senator is quite correct. An agreement, executive agreement, on the stationing of forces is not a canal treaty, not a treaty at all. It is an agreement between two governments of a rather ordinary kind which has become quite common in the interdependent world. It is a sort of agreement we will find, as I suggested, that we probably have with some 40 different countries.

They can be agreements for 6 months, or 6 weeks, or 6 years. They are limited in their character, and we make clear by this act, which I am sure we are going to adopt, this reservation, that we contemplate the possibility of such future agreements.

Mr. GRIFFIN. These forces would not be unrelated to the canal. They are specifically for the purpose of protecting the neutrality of the canal. So I do not think the Senator from New York took the position they would be unrelated to the canal.

Mr. MOYNIHAN. They certainly would not be unrelated, neither would they be a canal treaty.

Mr. GRIFFIN. I find it very interestin. I am sure it must be interesting down in Panama where they are listening to this debate that, on the one hand, we are admitting and conceding, and I certainly have not only conceded but pointed out over and over again to the Senate, that anything of substance which is added to these treaties must be submitted to tht people of Panama in a new plebiscite under their constitution.

I have heard some Senators on the floor here say, "Well, now, that is up to them. We don't have to worry about that."

I do not believe that. We do have to worry, I believe, because we do not want an agreement that is just with Mr. Torrijos. We do not want an agreement that his successor can say is invalid.

As I understand the argument of the Senator from New York, apparently, he is making the point that we will circumvent the right of the peopleof Panama to approve this by doing it in this way.

I cannot believe that he really is arguing that.

Mr. STEVENS. Will the Senator yield?

Mr. MOYNIHAN. The Senator from Michigan should be very clear that he has heard me.

He said he does not believe I am arguing what he said I was arguing. He is right. I am not.

Mr. GRIFFIN. I am glad to hear that.

Mr. MOYNIHAN. I am saying, in the most straightforward and simple manner, with respect to the free right of the Government of Panama at some future time, a time after the year 2000, to make, in accordance with its own constitutional processes, any agreement or arrangement with the United States, and of course, only with the United States, for the stationing of U.S. military forces on the maintenance or defense sites in the Republic of Panama, that such agreements are contemplated and clearly are in no way precluded by this treaty.

This clarifies what it is. In any event, the Senator from Alabama has suggested, this does not add anything to the existing rights of the governments.

No. Perhaps it does not in that sense, inasmuch as two governments may agree to anything they wish between themselves. But this contemplates the continued possibility of American support of the Government of Panama as requested by and agreeable to the Government of Panama.

The nature of our continued relationship with the canal, to the maintenance of a regime of neutrality, to free access and free transit, is further confirmed. The United States is telling the world that it is not walking away from the Panama Canal, making no invidious comparison with other canals and other circumstances. We are not abandoning the responsibility which we incurred when we built this canal, and we make it clear to the world we have no such intention. We leave a clear avenue for the Government and the people of Panama—the Government of Panama—freely to associate with us for such purposes.

The Senator from Alaska had a question.

Mr. STEVENS. My question to my good friend—and we know the Senator from New York's diplomatic background—I would ask him just a simple question.

Does he feel that the reservation that is before us now is in any way an expansion of the interpretation of the basic document—the treaty of neutrality and operation of the Panama Canal?

Mr. MOYNIHAN. I can only speak for myself that it does not change the basic document one bit. It adds clearly to the expectations of American commitment to the continued regime of neutrality of the canal.

It strengthens and enhances the purpose which forms every article of this treaty, which is that the United States, while turning over the property, the facilities, the returning to full sovereignty Panama's possession of the canal, nonetheless means to maintain, and in perpetuity—although perpetuity is a long term—for a very long time we mean to be there, we mean to see that the regime which we helped create there continues to exist. That is our purpose.

Mr. STEVENS. Will the distinguished Senator from New York answer just one more question? Then I will seek the floor in my own right, when he is finished.

Does the Senator believe there is anything in this resolution that is before the Senate now which provides that in the protocol of exchange, as signed by the representatives of the governments, which includes this reservation—that there is anything in this that we, at a later date, or our sons or their sons, could tell the Republic of Panama's officials at the time that Panama was led to believe that we had an understanding that we could negotiate for future use of our military bases in the canal zone—in other words, that they had made us any commitment at all beyond just the willingness to talk? Is there anything in this that means that they are committing to do anything other than talk about this in the future?

Mr. MOYNIHAN. The Senator asks a good question, to which, it seems to me, a dual reply is in order.

First of all, on the strict terms of the question of the Senator from Alaska, no, nothing whatever has been added; no commitment is made; no undertaking is adumbrated, even.

However, here I wonder if those who could not yet bring themselves to the support of these treaties would stop thinking for a moment of the people and the Government of Panama as adversaries, as presumed antagonists, as competitors, and as opponents in some way. We have had, in truth, an extraordinary relationship with this small Republic. It is a relationship which is simply unique, in the origins of the nation, in the culture of the zone and the country that surrounds it, in the institutions of that nation.

There is not the least reason to think that that closeness is going to change. To the contrary, when these treaties have been ratified, we will see a relationship with Panama that is as secure and trusting and complementary as any we know in the world. We must go forward in consoling our hopes in these matters and our fair expectations.

The point about this is that Panama will look to us in the future, as it has done in the past; and we want to make clear that we are not cutting the painter, letting it adrift, that our reservation here clearly envisions the possibility that Panama will come to us or we to them, and that we will act in concert in the future, as we have done in the past.

This is notice not only to our respective peoples but also to the world, which is observing what kind of regime now takes over in the canal. Is it something the Americans have abandoned, or is it a situation to which the small resources of a small country will be wholly committed and there will be no alternative, or is this greatest economy and greatest military power in the world going to continue its protective and responsible concern for this transportation facility? The answer is, "Yes."

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. MOYNIHAN. The Senator will yield for a question.

Mr. MELCHER. Of course, I agree with the Senator from New York (Mr. MOYNIHAN) that the people of Panama are friendly toward the United States. They have demonstrated that many times in the past, and I hope they continue to do so in the future. But if that friendliness is to the extent of wanting or allowing or agreeing to our presence in any way in the year 2000 with a military base in their country, why would article V, which consists of only one sentence in the neutrality treaty, prevent us from accomplishing that, prevent us from doing that, and why would we be prevented to amend that article because an amendment of that nature would force a new plebiscite in Panama and a possible loss in that plebiscite of the agreement of the treaty?

Mr. MOYNIHAN. That is a very clear question, to which I think there is an equally clear answer, I say to my friend from Montana.

The rights of sovereign nations to enter agreements with each other are absolute. They cannot be diminished by statute. You have a relationship with some other power which is a dependent one, to a greater or lesser degree.

The purpose of these treaties is, inter alia, as the lawyers say—among other things—to make clear and perfect the sovereignty of the people of Panama in their own nationhood. In that clear and perfect sovereignty, they are free to enter into any agreement they wish with the United States.

However, it is also our purpose, and a purpose which informs every article of this treaty, to say we are not walking away; we are not abandoning it. We are not leaving east of Suez. This is not a contraction of the U.S. interests or responsibilities in the world. To the contrary, it is a mature acceptance of responsibility.

There could be many people in this Chamber—I have not heard it—but there easily could have been persons in this Chamber to rise and say, "Why in the name of heaven do we want to continue any commitment to this small waterway in the Isthmus of Panama?" Is this a kind of thing that a modern nation, in the age of supertankers and missiles and nuclear submarines, really wants to saddle itself with? You might ask that question, but if you are a mature power and a responsible one, you maintain your responsibilities. You say, "Yes, we will be there. Yes, as you need us, you can count on us. Not absolutely. You have to win our agreement to these things."

We are not abandoning Panama. We are not abandoning this enormous achievement which we brought about, which is one of the great public works of the world. The world does not have many world public works. This is one. Somebody has to see that it continues to function, and the United States is not abandoning that responsibility which is its by virtue of having been the progenitor of the existing enterprise.

Mr. STEVENS. Mr. President, will the Senator yield to me for a moment?

Mr. MOYNIHAN. I will yield for a question to the Senator from Alaska.

Mr. STEVENS. Will the Senator yield for a few minutes, so that I may make a statement? I have another appointment, and I wish to make a clarification.

Mr. MOYNIHAN. I yield for that purpose, but with the understanding that I retain the floor.

Mr. SARBANES. Mr. President, will the Senator yield, so that I may ask a

question of the Senator from Alaska, since he is going to leave the floor?

Mr. MOYNIHAN. I yield.

Mr. SARBANES. As I understood the debate earlier—and I hope the Senator from Alaska will clarify this—I understood him to say that there was nothing in the treaty that precluded or prevented the Soviet Union—and he used that as an example, and I think he also mentioned China——

Mr. STEVENS. I mentioned Cuba, and I said to the Senator before, informally, and I will say it again, that I did not make the statement the Senator said I made. I said to the Senator from Georgia that I assume if he interprets this reservation to mean that we have the right to negotiate with the Panamanians in the future for our military presence in Panama, he would not object to putting something in this reservation which prohibits Cuba or Russia from negotiating with Panama. I see nothing in the treaty that prohibits them from negotiating. There is a provision that prohibits them from having troops in the Canal Zone—in Panama—but there is nothing I see that prohibits them from negotiating.

My point is that I do not think there is anything in here that does not give us any rights we do not have now; and there is nothing in here that prevents Russia or Cuba from negotiating with Panama in a similar way to have their troops there.

Mr. SARBANES. I think the point the Senator just made needs to be responded to, because if these treaties are ratified, I do not want the Soviet Union or Cuba picking up the CONGRESSIONAL RECORD for the debate in the Senate of the United States on Wednesday, March 15, and citing the point which the Senator from Alaska has just made.

The fact is that article V of the neutrality treaty says that after the year 2000, after the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the canal and maintain military forces, defense sites, and military installations within its national territory.

Mr. STEVENS. The Senator from Maryland——

Mr. SARBANES. If I may finish——

Mr. STEVENS. The Senator from Maryland again is misquoting the Senator from Alaska. If the Senator from New York has yielded to me, I do not want to be misquoted.

The PRESIDING OFFICER. The Chair advises that the Senator from New York has the floor and has yielded to the Senator from Maryland.

Mr. MOYNIHAN. The Senator from New York will yield, and I am sure we will clear the matters up.

Mr. SARBANES. I think if the Senator from Alaska will allow me to make the point we can clarify this.

That prohibition on any other country having military forces in Panama is contained in the Neutrality Treaty between the United States and Panama. It is a term of the regime of neutrality between our two countries, and the United States under the Neutrality Treaty can take whatever action is necessary to maintain the regime of neutrality. Panama cannot on its own abrogate, abridge, limit, curtail, or alter the regime of neutrality without the concurrence of the United States and the prohibition——

Mr. STEVENS. As I say to the Senator from New York, I do have to leave, and I wish to end this if I could. I asked for permission to make a short statement. I am happy to do it. The Senator from Maryland insists on misquoting me. I have said nothing contradictory. I understand the treaty says in article V that after the termination of the Panama Canal Treaty only the Republic of Panama shall operate the canal, maintain military forces, defense sites, military installations on national territory. I did not say that. What I said was if the Senator from Georgia and the proponents of this treaty say this reservation gives us any greater standing after it is adopted, then why not put into the reservation that Panamanians cannot talk to, negotiate with Cuba or Russia?

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. STEVENS. I hope he understands what I am saying. I am not saying that there is anything in the reservation that changes the treaty. My point is just the contrary. If the Senator would want to put into the reservation a provision that they can talk to us about military forces but they cannot talk to anyone else, then the Senator would get my point. I am not saying that there is any change. The point is it makes no change and that was the point I was trying to make.

Mr. MOYNIHAN. The Senator from New York must say he is surprised that after 5 weeks of debate such a misunderstanding could exist, but I know the Senator from Maryland wants to clear it up immediately, promptly, and forcefully.

Mr. STEVENS. Will the Senator allow me to make my short statement?

Mr. SARBANES. I appreciate the Senator yielding. I want to underscore the fact that article V of the Neutrality Treaty which prohibits any forces in Panama other than Panamanian after the end of the century, not only precludes Russian and Cuban troops but precludes Panama from entering into an agreement with Russia or Cuba for such troops unless the United States is prepared to allow the Neutrality Treaty to be changed.

The Neutrality Treaty is a treaty between the United States and Panama which prohibits foreign troops in Panama. It is part of the regime of neutrality which we have the right to maintain and it cannot be abrogated or changed by one of the two parties to the treaty. It requires both parties to the treaty. Therefore, the United States is in a position pursuant to article V to preclude such troops.

So the possibility that the Senator has referred to is precluded except with American concurrence because we are the other party to this treaty, and this treaty protects us and it is part of the regime of neutrality.

Mr. STEVENS. The Senator can argue if he wants to. The Senator from Alaska tried to clarify his statement, which has been misinterpreted twice or three times now. Again I will tell my friend that the article he just read prohibits the United States from having troops there. This resolution purports to say that we can discuss and make agreements to have troops there. If this reservation had any force and effect it would change article V. That was the point I was making. We are not changing article V for the United States any more than we are changing it for Cuba and Russia.

Again I plead with my friend from New York. I have a 3:30 p.m. appointment in my office. I very much wish to make a statement. Will the Senator from New York yield to me a few minutes to make my statement? If not, I will leave.

Mr. MOYNIHAN. The Senator from Maryland asked to reply first. Then the Senator from Alaska.

Mr. SARBANES. Mr. President, I want to reply because we do not want to leave the record unclear. The fact of the matter is that article V of the Neutrality Treaty between the United States and Panama says there will be no troops other than those of Panama in Panama. We can renegotiate that treaty with Panama, because it is between the two of us, in order to have American troops. The reservation of the Senator from Georgia opens a broader option, and that is that we can do it without a treaty; we can do it by some other form of agreement which is mutually arrived at by the two parties—the United States and Panama.

But in any event, no other nation can put troops into Panama contrary to article V unless the two parties, the United States and Panama, which have entered into this treaty, agree that should be the case. It is very important that this be understood.

I thank the Senator from New York.

Mr. MOYNIHAN. I thank the Senator from Maryland for making so clear what ought never to have been in doubt.

One begins to wonder about the purposes of those who have not yet supported these treaties. We are into our fifth week of debate and we seem not to have been able to persuade some Members of the Senate as to what is the meaning of neutrality and what is the object of this singular regime. It is that no other nation for any purpose and for any reason shall be involved with the defense of the Panama Canal save only the United States and Panama, the two nations whose joint efforts brought the canal into existence. This is a trust. We have responsibility to the world, and this treaty pursues that responsibility and clearly anticipates that it will be met.

The idea that somehow the Soviet Union or Cuba or Botswana or in the name of heaven what will be the name of the Falkland Islands in the year 2005 when they attain their sovereign independence and their seat on the Security Council and the United Nations, I do not know, but they are not going to have anything to do with this canal. This canal is to stay as long as it serves any purpose in the transportation of the world or the defense of the United States a matter of our responsibility jointly held with the Republic of Panama and we are going to do that.

It must be observed that without any question the most striking treaty this

body has ever been asked to confirm was the North Atlantic Treaty of 1949. Mr. President, that treaty was the first permanent alliance the United States ever entered. Certainly there was no other alliance which we had ever contemplated in the 19th or 20th century. It spoke to the very opposite of those cautions which George Washington left us in his farewell address, about permanent and entangling alliances. It involved the stationing of the forces of the United States on the continent of Europe in peacetime, a most extraordinary commitment and without limit of time or indeed of extent of commitment. And that debate took 12 days in this Chamber. Twelve days was sufficient to make the commitment to what has since been a quarter century of military involvement in Europe.

And here we are in our fifth week and scarcely halfway through a set of treaties that are open and clear whose purpose is transparent to maintain the existing regime of neutrality, and at this late moment we find persons introducing questions and objections which could only arise from a profound misunderstanding of what the treaties say, a misunderstanding which is not shared by the world and somehow seems to have found its locus in the Senate of the United States, a curious process at the very least.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. MOYNIHAN. If the Senator from Montana wishes to ask a question, I am very happy to yield for the purpose to my friend and freshman colleague.

Mr. MELCHER. I thank the Senator very much for yielding.

The Senator has described in previous statements a few moments ago friendliness of Panama toward the United States, which has been true in the past. I hope it is true now and will be true in the future.

There is no misunderstanding in my mind whatsoever that article V of the Neutrality Treaty allows only Panamanian military in Panama. Article V does not permit American military in Panama, period.

Mr. MOYNIHAN. That is clear. I never suggested and I hope the Senator from Montana does not think I associated him with that evident misunderstanding because his own experience in the world would preclude that kind of misunderstanding.

Mr. MELCHER. I not only do not misunderstand it, I do not think the people of America misunderstand that point.

My question to the Senator from New York, a profound authority on U.S. relationships with other nations of the world, is this: Due to the friendly past history of the people of Panama and the expectations of continued friendliness with them, would not the Senator from New York agree that if article V were amended to state that after the year 2000 our two countries would have the opportunity to consider a mutual arrangement for continuation of a military presence for mutual defense, would he not agree that that would carry out the feeling we have had with Panama based on past history?

Mr. MOYNIHAN. Let me be altogether open in this matter. It seems to me that such an article, although tautological—it basically is tautological, it says free countries can act in a free country, free countries may do those things which are done by free countries—you could have written such a provision and it would not have bothered me, I would have voted for this treaty with just as much enthusiasm.

I think, however, sir, that we have got to remember that these treaties began in an atmosphere of very great sensibility in the Republic of Panama about what was taken to have been, and was, an insult to the flag of Panama and, in a sense, to the people of Panama that took place in the zone.

The Senator was a member of a party led by the Senator from Vermont and the Senator from California which visited the canal area, and I accompanied them, and there appeared in the press in Panama that weekend a letter from a U.S. naval commander which described the way in which the Panamanian flag was desecrated and Panamanian students were very badly beat upon in the period that led to the riots of 1964, which led to President Johnson's move to negotiate these treaties.

In that atmosphere no such details were appropriate because we are asserting the free and perfect sovereignty of the people and state of Panama. That sovereignty enables them to enter any agreement they wish, including this one which, in a sense, we contemplate although we do not anticipate because hopefully it will not be necessary.

The Senator from Montana will forgive me, but I believe the time has arrived when the Senator from Idaho thinks we have spoken sufficiently, and we might do that which we do with even greater authority, which is to vote. Although what we say here rarely has definitive consequences, how we vote here does.

Is it the wish of the manager of the legislation that we now proceed to exercise that responsibility?

Mr. CHURCH. The Senator has made a very persuasive case. I believe this matter has been debated so extensively, I might even say exhaustively, that we ought now to proceed to vote, and I hope the Senate will do so.

Mr. MOYNIHAN. In that case, Mr. President, I yield the floor.

Mr. GRIFFIN. Mr. President, I will not detain the Senate long because I am willing to vote, too.

I just want to be sure, however, that everybody understands what this amendment is. I have been trying to think of the right kind of a name for it. Call it the dipsy-doodle amendment or some—there must be an appropriate characterization for a meaningless amendment that will put the administration over the top and give them that one extra vote they are going to need tomorrow to carry the day on the neutrality treaty, because that is what this amendment does.

Maybe by one vote, perhaps by two, but a number of Senators have grabbed hold of this amendment as the reason why they are going to vote now for the treaty.

I do not know whether it will appear in the paper, I hope it will, I am sure reporters are going to tell the people what this amendment is, but at least we do have public radio so that anybody who is listening now will be able to understand what this amendment is, the reservation, as it is called, and it says:

> Nothing in this Treaty shall preclude Panama and the United States from making any agreement between the two countries to facilitate performance at any time after December 31, 1999, of their responsibilities to maintain the regime of neutrality established in the treaty, including agreements or arrangements for the stationing of any United States military forces or maintenance of defense sites after that date in the Republic of Panama that Panama and the United States may deem necessary or appropriate.

Mr. LEAHY. Mr. President, will the Senator from Michigan yield?

Mr. GRIFFIN. I would like to proceed a little bit and—

Mr. LEAHY. I tend to agree with the Senator from Michigan.

Mr. GRIFFIN. I would still like to proceed, if I may.

This is a recitation, called a reservation, that says that the two countries may negotiate in the future, and if they agree to something then they will have an agreement.

How ridiculous can you get? How could anyone contend that this is a matter of substance or changes in any way the treaty we are about to vote on tomorrow?

Now either it means something or it does not. If it does not mean anything, of course, then it will be very simple for General Torrijos to accept it. After all, it is not changing the treaty in any way, and if it did change the treaty, if there were any substance to it, which there is not, then you would have to submit this to the people of Panama in a plebiscite for their approval.

But the Carter administration does not want any changes in the treaty that would have to be submitted to the people of Panama for approval in a plebiscite. That is known, that is what the stonewalling here has been all about throughout the debate on this treaty.

This does not do it either, and I think everybody ought to know that, that is all. If everybody understands this is a dipsy-doodle, meaningless reservation, then go ahead and vote for it. This Senator is going to vote against it because it, to me, is frivolous; it is absurd, it is ridiculous. To me it is an insult to the intelligence of the Senate to suggest that anything meaningful is to be accomplished by the adoption of this reservation.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, very briefly, I feel that everything that is in this amendment is already inherent in the treaty. I will vote for the amendment only so that a nay vote would not be interpreted to mean, on my part, that I felt that these rights were not already in the treaty. But I think it is a waste of time, and I really would hope that neither myself nor any other Senator, at any time in the future, would claim that there had been some major change in the treaty, and that that was what enabled us to vote for these treaties. The treaties should be voted for or against on their

merits, and not because of this amendment.

Mr. GRIFFIN. I thank the Senator from Vermont.

The PRESIDING OFFICER (Mr. SASSER). The question is on agreeing to the reservation.

Mr. GRIFFIN. Have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK) is necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE) is necessarily absent.

The result was announced—yeas 82, nays 16, as follows:

[Rollcall Vote No. 59 Ex.]

YEAS—82

Allen	Hart	Muskie
Anderson	Haskell	Nelson
Baker	Hatfield,	Nunn

NOT VOTING—2

Abourezk	Case

So Mr. NUNN's reservation (No. 8), was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the reservation was agreed to.

Mr. SARBANES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. SASSER). Under the previous order, the Chair now recognizes the Senator from West Virginia (Mr. RANDOLPH).

The Senate is not in order. The Senate will be in order.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. CRANSTON. Mr. President, I ask unanimous consent that Jon Steinberg and Janice Orr may have the privilege of the floor during the consideration of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, if the Senator will yield further, I ask unanimous consent that Gary Crawford be granted the privileges of the floor during the consideration of the pending treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I also ask unanimous consent that Senator DURKIN may be added as a cosponsor of the Randolph reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield further?

Mr. RANDOLPH. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may be added as a cosponsor to his reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. EAGLETON. Mr. President, I ask unanimous consent that Ann Proctor be granted the privileges of the floor during the pendency of the consideration of this treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

Would the Senator from West Virginia like to call up the reservation?

RESERVATION NO. 7

Mr. RANDOLPH. Mr. President, I send a reservation to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The reservation will be stated.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. RANDOLPH) for himself, Mr. CRANSTON, Mr. ROBERT C. BYRD, Mr. TALMADGE, Mr. DURKIN, Mr. THURMOND, Mr. SASSER, Mr. STAFFORD, Mr. MATSUNAGA, Mr. HATCH, Mr. DOLE, and Mr. HART, proposes reservation number 7:

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the reservations—

"(1) that, before the date of entry into force of the Treaty, the two Parties shall begin to negotiate for an agreement under which the American Battle Monuments Commission would, upon the date of entry into force of such agreement and thereafter, administer, in accordance with the practices, privileges, and immunities associated with the administration of cemeteries outside the United States by the American Battle Monuments Commission, including the display of the flag of the United States, such part of Corozal Cemetery in the former Canal Zone as encompasses the remains of citizens of the United States;

"(2) that the flag of the United States may be displayed, pursuant to the provisions of paragraph 3 of Article VII of the Panama Canal Treaty, at such part of Corozal Cemetery in the former Canal Zone as encompasses the remains of citizens of the United States; and

"(3) that the President—

"(A) shall have announced, before the date of entry into force of the Treaty, his intention to transfer, consistent with an agreement with the Republic of Panama, and before the date of termination of the Panama Canal Treaty, to the American Battle Monuments Commission the administration of such part of Corozal Cemetery as encompasses the remains of citizens of the United States; and

"(B) shall have announced, immediately after the date of exchange of the instruments of ratification, plans, to be carried out at the expense of the United States Government, for—

"(i) removing, before the date of entry into force of the Treaty; the remains of citizens of the United States from Mount Hope Cemetery to such part of Corozal Cemetery as encompasses such remains, except that the remains of any citzen whose next of kin objects in writing to the Secretary of the Army not later than three months after the date of exchange of the instruments of ratification of the Treaty shall not be removed; and

"(ii) transporting to the United States for reinterment, if the next of kin so requests, not later than thirty months after the date of entry into force of the Treaty, any such remains encompassed by Corozal Cemetery and, before the date of entry into force of the Treaty, any remains removed from Mount Hope Cemetery pursuant to subclause (i); and

"(C) shall have fully advised, before the date of entry into force of the Treaty, the next of kin objecting under clause (B)(i) of all available options and their implications".

Mr. RANDOLPH. Mr. President, I ask unanimous consent that Senators CHURCH, CANNON, and BAYH be added as cosponsors.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. TALMADGE. I ask unanimous consent that I may be added as a cosponsor, also.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. I am very grateful to the Senator from Georgia that he wishes to be added.

Mr. President, I send a modification of the amendment to the desk.

The PRESIDING OFFICER. The amendment will be so modified.

Mr. RANDOLPH. The language is acceptable, is that correct, that I have just sent clarifying it?

The PRESIDING OFFICER. The modification has been accepted.

Mr. RANDOLPH. I thank the Chair.

The modification is as follows:

In the first paragraph, before "in accordance with the practices, privileges, and immunities" insert "free of all taxes and other charges and without compensation to the Republic of Panama and".

Mr. RANDOLPH. Mr. President, we are considering reservation 7 to the resolution of ratification of the treaty concerning the permanent neutrality and operation of the Panama Canal. I have introduced this reservation, first presenting it on Monday with our concerned colleagues ROBERT C. BYRD, TALMADGE, and CRANSTON, who believe that it will, perhaps, resolve the problem arising from the fact that 909 U.S. veterans and 1,332 other U.S. citizens are buried in the 2 cemeteries in the Canal Zone. These 2 cemeteries are Mount Hope, east of the canal, with the bodies of 1,509 U.S. citizens; 175 veterans, and Corozal west of the canal, with the bodies of 734 U.S. veterans buried in the American sector.

Both of these cemeteries are presently operated by the Canal Enterprise. Mount Hope is being used activiely by Panama for its nationals and if the treaties are ratified, it would revert to Panamanian control 6 months after ratification.

However, under the treaties, the cemetery at Corozal would continue under U.S. control until the canal is completely turned over to Panamanian control in 1999.

As you know, Tuesday the Senate tabled our able Veterans' Affairs Committee colleague, STROM THURMOND'S amendment to the treaties requiring that part of the Corozal Cemetery be operated by the U.S. Government through the American Battle Monuments Commission.

Mr. President, I believe that the Senators, regardless of their position on the treaty, realize that we can agree that the bodies of these Americans must be dealt with in a realistic, compassionate, fair, and dignified manner before the Neutrality Treaty takes effect.

The alternative, which the Veterans' Affairs Committee chairman (Mr. CRANSTON) and I have closely worked on, as other Senators have worked on, is to amend the resolution of ratification to express three reservations in connection with the Senate's giving advice and consent to the neutrality treaties.

The first is to call for the governments of both countries to negotiate an executive agreement for the operation of the American sector of the Corozal Cemetery by the American Battle Monuments Commission. On the normal terms under which the ABMC operates the cemeteries overseas. That is, I say to my colleagues, in effect, that sovereignty remain with the host country, which grants the United States free use of the land for a cemetery or memorial in perpetuity, without charge or taxation.

The State Department has agreed, and we have a letter to that effect, which I shall place in the RECORD if there is no objection, to proceed with these negotiations immediately if and when the treaties are ratified.

The understanding, as so expressed in the ratification resolution, would bind the Government of Panama to negotiate for such an executive agreement. This is the standard method for securing the right to administer an AMBC cemetery overseas.

The resolution amendment would also express an "understanding"—to use that word—that, pursuant to article 7, paragraph 3, of the Panama Canal Treaty, providing that the U.S. flag may be displayed at other places as agreed to by the parties, the ABMC would be authorized to fly the U.S. flag over the Corozal Cemetery American sector once such an Executive agreement were executed. Such an understanding would constitute, on acceptance of the ratified treaty by the Government of Panama, an agreement within the terms of article 7, paragraph 3. Since such an agreement is expressly provided for in the treaty itself, no plebiscite would be required.

The resolution amendment would further express the sense of the Senate that the executive branch shall arrange for the orderly removal of all American bodies from Mount Hope Cemetery to Corozal during the 6 months following ratification in anticipation of the execution of such an Executive agreement for the continuous operation of the Corozal Cemetery American sector by the ABMC. The executive branch will make public announcement and notice to next of kin of the disinterment/reinterment plan so that next of kin could have the option of removal to either Corozal or a U.S. national cemetery—all at Government expense.

I believe that the alternative to the earlier amendment offered by the able Senator from South Carolina, which I supported him in and that we are presenting, is a program which can be successful as a solution to this potential problem. This proposal is not made with any partisanship, as we know, but with the hope of understanding, as we provide care and dignity that these honored dead deserve. I am hopeful that we can agree.

Mr. STAFFORD. Mr. President, will the Senator yield very briefly to me?

Mr. RANDOLPH. Yes, I am happy to yield.

Mr. STAFFORD. Mr. President, I wonder if the distinguished Senator would care to add me as a cosponsor to the resolution.

Mr. RANDOLPH. I would appreciate very much having the able Senator from Vermont as a cosponsor.

Mr. STAFFORD. I thank the distinguished Senator. I ask unanimous consent that that be done.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. TALMADGE. I compliment my distiguished friend from West Virginia on offering this amendment. I am a cosponsor and I vigorously support it. I have heard not only from the veterans service officer of my State, Mr. Pete Wheeler, but quite a number of veterans concerned about the cemeteries, to which the reservation is addressed, and I support the Senator's position. I am sure that the veterans of this country support the Senator's position. I hope the Senate will overwhelmingly agree to the reservation that the distinguished Senator from West Virginia has proposed.

Mr. RANDOLPH. Mr. President, I appreciate——

Mr. THURMOND. Will the Senator yield?

Mr. RANDOLPH (continuing). The comment of the Senator from Georgia and what he says about the contacts made to him are helpful. I am sure other Members have had the opportunity through their associates in the veterans organizations to know how they feel on this matter.

Our veteran's organizations are to be commended for being so alert and right in their judgment that inadequate attention was given to the cemetery problem during the treaty negotiations conducted by both governments, and, Congressman RAY ROBERTS, chairman, House Veterans' Affairs Committee, was most helpful in bringing the issue to congressional hearings on March 1.

I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in support of this reservation. On yesterday I offered an amendment to the treaty which I think was far superior to this procedure today but the Senate voted that down. I think that is the next best alternative. Under the circumstance, I am pleased to support and join the able Senator from West Virginia in this matter.

Mr. ROBERT C. BYRD. Will the distinguished Senator yield?

Mr. RANDOLPH. Yes, I yield.

Mr. ROBERT C. BYRD. I would like to ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

Mr. ROBERT C. BYRD. Mr. President, could we get a unanimous-consent vote not to exceed 10 minutes?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I make that request.

Mr. GRIFFIN. Mr. President, I object.

Mr. RANDOLPH. Before yielding, I ask unanimous consent that the Senators HOLLINGS, GOLDWATER, and BURDICK be added as cosponsors.

Mr. CRANSTON. Mr. President.

The PRESIDING OFFICER. The distinguished Senator from California.

Mr. CRANSTON. I want to compliment the Senator from West Virginia on the leadership he has shown in this matter. It has been a pleasure to work with him on it. He has found a way to the approach that he has offered the Senate to achieve the goals that we all share without requiring a plebiscite on Panama, which is totally unnecessary to achieve the goals, and the Senator has performed an extremely valuable service to the country and to the veterans in particular, and indeed to the entire country.

I will not go into detail on the significance and the meaning of the provisions of the amendment. I think that the distinguished Senator has spelled them out very, very clearly himself in presenting the amendment.

I once again thank him for the pleasure of working with him and for a very fine job.

There are a few comments, however, Mr. President, that I wish to add at this time.

First, Mr. President, I wish to express my gratitude and the gratitude of the many next of kin and the veterans organizations who are so deeply concerned about this issue, to the distinguished Senator from West Virginia (Mr. RANDOLPH) for his outstanding leadership in this matter. As always, he has displayed a keen perception of the issues involved and a compassionate commitment to the best interest of our veterans and the Nation as a whole. It has been a great privilege to work closely with both of my colleagues from West Virginia as well as the distinguished Senator from Georgia (Mr. TALMADGE) on this issue.

Second, Mr. President, I want also to congratulate the ranking minority member of our Committee on Veterans' Affairs, the Senator from South Carolina (Mr. THURMOND), for his very effective work in bringing this important issue to prominence during our consideration of the treaties. Although I felt constrained yesterday to urge the Senate not to accept his amendment dealing with the same subject matter in the form of an amendment to the Neutrality Treaty it-

self, I stressed at that time our complete agreement on the goals involved—an agreement which extends to the administration as well. Senator THURMOND has exhibited great dedication to the best interests of our Nation's veterans in this matter as he does in so many matters. He has made a major contribution to what I believe will be a very effective resolution of this complicated matter. His nonpartisan commitment to obtaining the best possible arrangement is clearly demonstrated by his having joined as a cosponsor of the pending reservation.

Third, Mr. President, I want to express my personal gratitude to representatives of the Department of Defense, the Department of State, the American Battle Monuments Commission, and the White House, for their very close and effective cooperation with the sponsors of this reservation. Many very long hours of work have been involved in developing the very comprehensive language in the reservation itself. Today, I received from Assistant Secretary of State Douglas J. Bennet, Jr., a letter stating, on behalf of the administration: "We do not anticipate any difficulties with the terms contained in the reservation offered by you, Senator RANDOLPH, and others." In this connection, Mr. President, I want to note with special appreciation the extremely careful and thoughtful assistance and counsel provided in the preparation of the language of the reservation by Arthur Rynearson of the Office of Senate Legislative Counsel.

Fourth, Mr. President, and of great importance, is our debt of gratitude to the veterans organizations, particularly the Veterans of Foreign Wars and the American Legion, which have worked so hard to bring this matter to the attention of the Congress and to secure a satisfactory resolution. In this connection, a contribution was made to the successful action which I believe the Senate will shortly take on the pending measure, by the farsighted leadership of the distinguished chairman of the House Committee on Veterans' Affairs (Mr. ROBERTS) who held hearings on this issue on March 1. Those hearings brought about a very concrete focus on this issue by the administration and many others who have worked to find an effective remedy.

In closing, Mr. President, I also want to congratulate the very able Senator from Maryland (Mr. SARBANES) who debated the amendment of the Senator from South Carolina in such a very effective fashion yesterday.

Mr. RANDOLPH. I am very grateful for the concern and the commitment of the distinguished Senator from California, our majority whip, who is chairman of our Veterans' Affairs Committee and these words I shall appreciate always.

Mr. MATSUNAGA. Will the Senator from West Virginia yield?

Mr. RANDOLPH. I yield.

Mr. MATSUNAGA. As a member of the Committee on Veterans' Affairs and as a life member of the Disabled American Veterans and of the Veterans of Foreign Wars, I rise in support of the Senator's presentation, and I ask that my name be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will my distinguished senior colleague yield?

Mr. RANDOLPH. Yes, I yield to the majority leader.

Mr. ROBERT C. BYRD. Mr. President, I compliment my senior colleague and join with him in cosponsoring this amendment. I think that this amendment as the resolution of ratification to the treaty is one of the major concerns to many of us that was not dealt with in the text of the treaty, and I would hope that the amendment would be unanimously adopted, and I urge my colleagues to support it.

Mr. President, I have joined with Senators RANDOLPH, TALMADGE, and CRANSTON in introducing this reservation to the resolution of ratification now before the Senate, the resolution whereby the Senate gives its advice and consent to the treaty concerning the permanent neutrality and operation of the Panama Canal.

The reservation which I have joined in offering is designed to assure the dignified treatment of the remains of Americans buried in the Canal Zone up until 1999, when control of the Panama Canal passes to Panama, and thereafter.

There are two cemeteries located in the Canal Zone which contain the remains of Americans. Mount Hope Cemetery, on the Atlantic side, contains the graves of 1,332 Americans, including 175 veterans. Corozal Cemetery, on the Pacific side, contains the graves of 3,395 Americans, including 741 veterans.

Under the terms of the two Panama Canal treaties, one of these cemeteries, Mount Hope, would pass to Panamanian control upon ratification. Corozal Cemetery would remain under U.S. control until 1999.

The reservation which I joined in offering will make certain that the Americans buried in these cemeteries receive proper reverence and respect. It provides that the executive branch proceed to arrange for the orderly removal, at Government expense, of American remains from Mount Hope Cemetery. Every effort must be made to notify the next of kin who, of course, could request that the remains not be moved. The remains would be transferred to Corozal, unless the next of kin requested transfer to a U.S. national cemetery.

The reservation also calls for negotiation of an executive agreement between the United States and Panama, whereby the operation of Corozal Cemetery would be taken over by the American Battle Monuments Commission. The State Department has agreed to proceed with these negotiations immediately upon ratification of the treaties. This agreement will assure that graves of Americans in Corozal will receive dignified and proper treatment. In addition, the agreement would provide that the American flag will be flown over the Corozal Cemetery.

This reservation represents a practical and fair resolution of an issue of concern to many of us which the text of the treaties did not address. I hope that it will be adopted and urge my colleagues to support it.

Mr. RANDOLPH. I thank the able majority leader, and I yield to the Senator from Utah.

Mr. HATCH. Mr. President.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, I appreciate the distinguished Senator from West Virginia for yielding to me, and I would like to also be listed as a cosponsor on the reservation.

Mr. RANDOLPH. It is gratifying to have Senator HATCH to join in the reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. I yield to the distinguished Senator from Kansas.

Mr. DOLE. I would just like to compliment the Senator from West Virginia on his leadership in this area. It is certainly consistent with his leadership over the years, so far as veterans and veterans' affairs are concerned, and I am pleased to join as a cosponsor in the reservation.

Mr. RANDOLPH. I very much appreciate the comment and support of the Senator from Kansas.

The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I would be delighted, if the Senator would add me as a cosponsor also.

Mr. RANDOLPH. I thank the Senator. I am delighted to share this with the Senator from Rhode Island (Mr. CHAFEE).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. Mr. President, on page 3, line 4, where there is a semicolon, I ask unanimous consent that after the words "removing, before the date of entry into force of the treaty," there be inserted a comma instead of a semicolon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RANDOLPH. Mr. President, I ask unanimous consent that the letter dated March 15 from the Assistant Secretary of State to the chairman of the Senate Veterans' Affairs Committee, Mr. CRANSTON, be included with my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

At your request I am pleased to comment on the testimony of March 1 by Mr. Richard Wyrough of the Department before the House Subcommittee on Cemeteries and Burial Benefits Mr. Wyrough's prepared statement was quoted by Senator Thurmond during yesterday's debate on the Panama Canal Treaties The purpose of this letter is to clear up any misunderstandings concerning what was said by Mr. Wyrough as a result of Senator Thurmond's remarks.

Mr. Wyrough participated on March 1 with two other Administration officials in discussing the Administration's plans concerning the proper care under the new treaties of Americans buried in the Canal Zone. Michael Blumenfeld, Deputy Under Secretary of the Army, reviewed the situation which currently exists in the Canal Zone regarding our cemeteries. Mr. Wyrough apprised the Subcommittee of the options which the Administration had considered, but did not favor, in order to assure the proper care of American remains. Finally General Adams, Secretary of the American Battle Monument Commission, presented the

Administration's preferred alternative. It should be clearly understood that the problems which were discussed by Mr. Wyrough and to which Senator Thurmond referred were problems which led the Administration to select the preferred alternative which was discussed by General Adams. At no time did Mr. Wyrough indicate or imply that the United States would have to pay Panama for the right of operating an American sector in the Corozal Cemetery. In fact, all the problems mentioned by Mr. Wyrough in discussing the two options which we do not favor were technical problems as distinct from political problems between the United States and Panama.

While it is correct that Mr. Wyrough observed on March 1 that we cannot be certain as to Panama's reaction to the proposal then presented by General Adams, he went on to say that we do not anticipate any difficulties. I would like to emphasize that portion of Mr. Wyrough's statement. Specifically we do not anticipate any difficulties with the terms contained in the reservation offered by you, Senator Randolph and others.

I hope that this information responds to your request.

DOUG BENNET,
Assistant Secretary of State.

Mr. CHURCH. Mr. President, I am glad that the Senate now has an opportunity to vote on this reservation, inasmuch as many Senators previously were obliged to vote to table an amendment that had similar objectives. This will make it possible for those Senators to express their true sentiments in favor of the objectives stated in both the reservation and the amendment and to do so in the proper form by voting for the reservation offered by the distinguished Senator from West Virginia.

I hope that the Senate may now vote.

Mr. GRIFFIN. Mr. President.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. GRIFFIN. Mr. President, I do not wish to detain the Senate very long, but I did object to the 10-minute limitation because I was not sure at the time I had an opportunity to speak to this that was agreed to.

I think the distinguished Senator from West Virginia has, of course, focused on a rather disturbing omission in the treaty that is now before the Senate. The fact that our negotiators apparently did not try or at least did not succeed in making provision for the appropriate administration and recognition of U.S. citizens who are veterans buried in the Corozal Cemetery, if that is the proper pronunciation, and I, of course, see that the reservation of the Senator from West Virginia recites that the two parties shall begin to negotiate for an agreement to accomplish this purpose.

I am not going to object to this reservation. It obviously falls short of achieving anything. Our negotiators, in the first place, should have achieved it.

Now, of course, we are not amending the treaty. We are not accomplishing anything for those who are buried there or their families other than to recite that we will begin to negotiate for an agreement and hopefully if the Panamanians agree to something, then we will, of course, have an agreement which is the situation that would exist if we did not adopt the reservation at all.

But, of course, I think the Senator from West Virginia is focusing on a serious matter. No wonder the veterans are concerned about that, as indeed they are concerned about the treaties in their totality. This is only one small aspect, one small reason why many veterans and veterans' organizations, of course, are opposed to these treaties, but this is in the nature of a reservation. It does not obligate the Republic of Panama to anything at all.

It only recites that there will be some negotiations in the future and, hopefully, negotiations will be successful.

So, therefore, I hope the reservation will be adopted, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the Randolph reservation No. 7. The yeas and nays have been ordered and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), and the Senator from Montana (Mr. HATFIELD) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE) is necessarily absent.

The result was announced—yeas 96, nays 1, as follows:

[Rollcall Vote No. 60 Ex.]

YEAS—96

Allen	Griffin	Moynihan

NOT VOTING—3

Abourezk	Hatfield, Paul G.
Case	

So the reservation (No. 7), as modified, was agreed to.

Mr. SARBANES. Mr. President, I move to reconsider the vote by which the reservation was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from Louisiana (Mr. LONG) is recognized.

UNDERSTANDING NO. 14

Mr. LONG. Mr. President, I call up my understanding No. 14.

The PRESIDING OFFICER. The understanding will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes understanding No. 14.

The understanding is as follows:

Strike out the period at the end of the resolution of ratification and insert in lieu thereof a comma and the following: "subject to the following understanding:

"Paragraph 1(c) of Article III of the Treaty shall be construed as requiring before any adjustment in tolls for use of the Canal that the effects of any such toll adjustment on the trade patterns of the two Parties shall be given full consideration, including consideration of the following factors:

"(1) the costs of operating and maintaining the Panama Canal;

"(2) the competitive position of the use of the Canal in relation to other means of transportation;

"(3) the interests of both Parties in maintaining their domestic fleets;

"(4) the impact of such an adjustment on the various geographical areas of each of the two Parties; and

"(5) the interest of both Parties in maximizing their international commerce.

The United States and the Republic of Panama shall cooperate in exchanging information necessary for the consideration of such factors.".

Mr. ROBERT C. BYRD. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. LONG. Mr. President, I ask unanimous consent that the names of Senator CANNON and Senator JOHNSON be added as cosponsors of this understanding.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, the Neutrality Treaty reads as follows, referring to the period after the year 2000:

Tolls and other charges for transit and ancillary services shall be just, reasonable, equitable and consistent with principles of international law.

This treaty language refers to broad principles but gives very little, if any, practical guidance to the Panama Canal Commission or the Government of Panama on the factors which are to be taken into consideration in setting tolls for transiting the Panama Canal.

It is generally agreed that the tolls will have to increase in order to comply with the obligations imposed by these treaties. However, such future toll rates will directly determine the degree to which the Panama Canal remains a viable waterway in international trade and commerce. Therefore, it is crucial that the United States and Panama make clear the factors which are important in determining future toll rates.

My understanding to the resolution of ratification has the effect of interpreting and supplementing article III, paragraph 1(c) and its general reference to "principles of international law" by enumerating the considerations that any future increases in tolls must encompass. This measure will require that the effects upon short- and long-term trade patterns of the United States and Panama be considered before any toll adjustment is made.

It is important to note that the total trade patterns of the United States and Panama must be examined. This means the trading activities of all ships, regard-

less of their registry, transporting goods to and from either of the two countries. This distinction is significant because much of the cargo shipped to and from U.S. ports through the Panama Canal is carried by vessels flying the flags of third nations.

This cargo, though carried by foreign flag vessels, nonetheless forms a substantial part of the total trade of the United States and consideration must be given to the effect of any toll adjustments upon such trade.

The understanding further provides that the costs of operating and maintaining the canal and the competitive position of the canal as against other means of transportation must also be among the factors considered in toll rate changes. These are clear-cut economic considerations customarily evaluated in determining a just and equitable toll rate. In addition to these economic factors, the United States and Panama also have mutual interests in maintaining their domestic fleets, in mitigating any adverse regional impact of a change in tolls, and maximizing their international commerce. The critical importance of these interests to both our countries requires that they be given due consideration in any decision to alter existing tolls.

This is not a proposal that the Government of Panama will find difficult to accept. The understanding does not violate the substance or the spirit of the Neutrality Treaty. Rather, it clarifies and reaffirms the obligations placed upon the Canal Commission and the Republic of Panama to maintain the tolls at a just, reasonable, and equitable level.

My amendment does not seek to specify future toll rates or detail procedures by which they shall be determined. Consideration of such matters are more properly handled under the implementing legislation which the Senate will subsequently consider.

The implementing legislation can outline set procedures whereby public hearings are held and public comments are received concerning any proposed adjustments in the toll structure.

This understanding merely insures that any toll adjustments will be enacted only after careful thought and study is given to the effect of these changes would have on the total trading postures of both the United States and Panama.

Mr. President, to clarify this amendment, I modify it on line 9 after the word "factors" to include the following words: "in a manner consistent with the regime of neutrality."

SEVERAL SENATORS. Vote!

Mr. GOLDWATER. Mr. President, will the Senator yield for a question?

Mr. LONG. I yield.

Mr. GOLDWATER. We were told in testimony before the Armed Services Committee by the head of the Panama Canal Company that regardless of who runs the canal, that is the United States or Panama, tolls by the year 2000 will go up at least 100 percent and could go as high as 105 or 110 percent.

With that testimony, what effect will this have on the Senator's amendment?

Mr. LONG. As the Senator says, the tolls will have to go up. I mean there is no doubt about that. These factors should be taken into consideration in deciding what the future tolls will be. And may I say that this amendment and this langauge was prepared for me by the people who have responsibility for the Port of New Orleans, and these are the factors that they feel are important and these people are well advised about all this. I doubt that the canal is more important to any port than it is to the Port of New Orleans.

Mr. GOLDWATER. Does the Senator's reservation continue on after the year 2000 or just until the year 2000?

Mr. LONG. Both, before and after. The treaty language says:

> Tolls and other charges for transit and ancillary services shall be just, reasonable, equitable and consistent with principles of international law.

This provides an understanding which it adds specific factors that should be considered.

Mr. GOLDWATER. I have just one further question.

Assume that the Senator's reservation is approved and becomes part of the treaty and the countries of Panama and the United States sit down together to discuss what the new rates should be. What happens if we find ourselves in disagreement with Panama? Assume that Panama feels that in order for her to operate the canal properly she would have to raise the rates from where the tolls are and we would argue that we do not have to raise those rates. What would happen if we reach an impasse like that?

Mr. LONG. Panama would have the power, after considering all these factors, to go ahead and agree to a toll that we might think unreasonable. But I point out to the Senator that we are going to have another condition. It does not require a reservation but it does require a condition. We are going to have another condition, and I have discussed this condition with the managers of the bill and I believe they will accept it on the other treaty. That other condition will provide that we have the right to negotiate with other countries than Panama with regard to a future canal. By the year 2000, it is my understanding that there will be only a small portion of the world's commercial tonnage that can be moved through that canal anyway. So, that is one of the factors that we should take into account between now and the year 2000 and in considering whether we want to build another canal through Panama and the terms under which we would do it or whether we might want to build it somewhere else.

Mr. GOLDWATER. Mr. President, if the Senator will yield once again on the same subject, it is true, and I do not think the Senator is contrary to this argument at all, that the oil-carrying ships are getting larger and it is true that the tonnage going through the canal will go down. I do not think that has any bearing on the reservation of the Senator. The canal will be in operation in the year 2000. It will be in operation for many years after that. I am merely worried about whether or not we are moving in on the ground that if the treaty is passed it would be the sole prerogative of Panama. This is the sole prerogative of ours now while we set the tolls. When the treaty is finally delivered, if it is delivered, it will become the responsibility of Panama to set the tolls. I do not want to see us tie Panama's hands by our continuing to interfere in her determinations. I believe it should be her determination.

Mr. LONG. Under the language of the treaty the way it stands now, Panama agrees under this treaty that the tolls and other charges shall be just, reasonable, equitable, and consistent with the principles of international law. What I seek to do here is to put some interpretive language in here to spell out what we believe are the proper principles of international law that should be considered. That is not limiting it with regard to other principles that might be brought forward.

Further, let me say this: It is my impression, and I hope I am right—I do not think I will be too wrong about this—that, in the event we think Panama is not living up to the terms of this treaty, Panama would be willing to go to the world court with us. I hope they would and let the international body adjudicate that.

Mr. GOLDWATER. I thank the Senator.

I feel we are already covered on this, and once we turn this over to Panama it is her baby, and I think we would be prohibited or should be prohibited from any decisions relative to the upkeep of the canal unless they come back and need money.

Mr. LONG. I do not think so for this reason: Under the treaties, as I understand it, the tolls will be reasonable and these tolls will be equitable and consistent with the principles of international law. I do not think that language just standing alone is adequate. That is why I am offering this understanding to add some additional meaning to that language. And, under those circumstances, Panama has an obligation that the tolls will be reasonable, and it is my judgment that we would have a right to go to the world court about that matter just like a utility that is not permitted a fair return on its investment has a right to go to court and say its property is being confiscated.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. LONG. Let me yield to the Senator from Maryland first.

Mr. SARBANES. The distinguished Senator from Louisiana is making a very important point. The regime of neutrality that this treaty sets out includes the provision that "tolls and other charges for transit and ancillary services shall be just, reasonable, equitable, and consistent with the principles of international law." That is an obligation which Panama has undertaken with respect to what it is entitled to do after the year 2000. That is part of the regime of neutrality which Panama and the United States have agreed each of them will maintain.

So Panama cannot simply ignore its obligation to maintain just, reasonable, and equitable tolls.

Of course, the understanding of the Senator from Louisiana goes beyond that. It sets out certain factors which should be considered in setting the just,

reasonable, and equitable tolls. Of course, also coming from a port State I share some of the specific concerns of the able Senator from Louisiana. I therefore want to commend the distinguished Senator for coming forward with this understanding, which lists certain factors which ought to be specifically considered in the setting of tolls.

It does not state what the decision will be, but it does insure that these factors, which might otherwise either be ignored or overlooked, will be considered in the course of setting just, reasonable, and equitable tolls.

So I think the very able Senator from Louisiana has made a very valuable contribution. It touches on that part of the treaty where Panama has an obligation to maintain just, reasonable, and equitable tolls as part of the regime of neutrality.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield? I wonder if we could agree on a voice vote.

Mr. LONG. If we can go to a voice vote, that is fine.

Mr. ROBERT C. BYRD. Could we vote now?

Mr. LONG. OK.

The PRESIDING OFFICER (Mr. PELL). What is the pleasure of the Senate?

SEVERAL SENATORS. Vote!

Mr. SCOTT. Mr. President, I want to speak on this matter, and I do not believe we have any time reservation.

Mr. ROBERT C. BYRD. No, we do not.

Mr. President, I ask unanimous consent that a vote occur on the amendment within 10 minutes.

Ms. SCOTT. Mr. President, I only want 2 minutes to speak very briefly.

Mr. ROBERT C. BYRD. Four minutes to the Senator from Virginia, 5 minutes equally divided.

Mr. LONG. Yes.

Mr. SCOTT. Mr. President, I do not intend to oppose the understanding offered by the distinguished Senator from Louisiana. Frankly, I think it is meaningless, and I say that in all candor.

I have been led to believe that under Panamanian law only what is included in the body of the treaty is considered binding under Panamanian law.

Now we had in the treaty that Panama will receive 30 cents per ton on all of the tonnage that transits the canal.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

Mr. SCOTT. No.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, I understand that Panama shall receive 30 cents per canal ton on the transiting ships across the canal. I also understand it gets $10 million, and then another $10 million provided that the tolls will permit that. It gets $10 million annually for fire, police, and street, water and sewage protection. These things have to be paid for, and I think they will come ahead of the understanding that the distinguished Senator from Louisiana refers to.

With that observation, I think it is a meaningless thing. I have no objection to a voice vote and do not intend to vote against the understanding.

Mr. LONG. Mr. President, I do not think it is meaningless. People from New Orleans came to discuss this matter with me. They believe it is important. Furthermore, the State Department has been seeking to amend this understanding right up to the moment I offered it, because they thought we would have difficulty going along with it unless I added the language. In my judgment, Mr. President, there is a difference of opinion, but this is a very important amendment. I hope the Senate will agree to it. It is a very important understanding, and it is important to the interpretation of the treaty.

The PRESIDING OFFICER. The question is on agreeing to the understanding, as modified. (Putting the question.)

The understanding, as modified, was agreed to.

Mr. SARBANES. Mr. President, I move to reconsider the vote by which the understanding, as modified, was agreed to.

Mr. CHURCH. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

STATEMENT COMMENDING SENATOR BROOKE

● Mr. BAKER. Mr. President, the Senate's consideration of the Panama Canal Treaties has taken what seems like a very long time; and we have a long way yet to go. At this point, however, I would like to take the opportunity to observe that no one has contributed more to the process of the Senate's consideration than has my good friend, and distinguished colleague, the Senator from Massachusetts (Mr. BROOKE).

His announcement today that he will support the Neutrality Treaty, reserving judgment on the Panama Canal Treaty, is the result of a typically careful and thorough examination of the issues involved. From the beginning of the Senate's consideration of the treaties, he has believed that important and substantive modifications were required of both treaties. His approach has been restrained, and no one in this Chamber can allege that he has sought the easy way out or that his criticisms have been either careless or frivolous. To the degree possible, his criticisms have addressed the many legitimate concerns raised by the American public.

He has been particularly helpful in enhancing the awareness of the Senate and the American public of those financial aspects of the Panama Canal Treaties that have the potential to create serious problems in the future. These points, I believe, are well taken, as always they are well reasoned; and the administration would be well advised to consider their merits.

I admire my good friend's approach to this issue, and I certainly commend his courageous decision. While I am aware that he has reserved judgment on the Panama Canal Treaty itself pending resolution of the serious problems to which he has so skillfully drawn our attention, I believe his decision to consider that treaty on its merits apart from the Neutrality Treaty is to be commended; and I am grateful for the assistance and perception he has brought to our consideration of the issues.

STATEMENT COMMENDING SENATOR HEINZ

Mr. President, I would like to take this opportunity to bring to the attention of my colleagues the announcement yesterday of the Senator from Pennsylvania (Mr. HEINZ) that if specific reservations are adopted to the resolutions of ratification, he will vote in favor of the Panama Canal treaties.

I, and I believe all of my colleagues, whether in agreement with his ultimate decision or not, would commend the manner by which Senator HEINZ has approached this issue. He has been restrained and deliberate, and his decision reflects his own considered and well-informed judgment that unless serious problems with these treaties are addressed, they should not receive the support of the Senate.

I should like particularly to commend his perception of the importance of the extremely high standard of maintenance necessary to insure that the canal remains open and operable. He is aware, and we should all be aware, that unless the canal is properly maintained, our ability to defend the canal means very little; and he has attempted to insure that the standard of maintenance remains high through the end of the century.

I support, therefore, the reservation that the Senator from Pennsylvania has sponsored, which requires that canal revenues must first be used for the proper operation and maintenance of the canal before payments can be made for other purposes. I believe it important that the Panamanians clearly understand the purposes behind this reservation. I believe it incumbent upon the administration to endeavor to make clear its meaning to that government.

Should this reservation pass, along with the other reservations on which the Senator is insisting, he has decided to vote in favor of the treaties. As we all know, Mr. President, this is a difficult decision; and in the case of the Senator from Pennsylvania, it was thoughtfully reached and courageously made. Whether for or against these treaties, I believe all of my colleagues would agree that the Senator has contributed significantly to our consideration of them and has helped to make them better treaties than those originally submitted to the Senate.

STATEMENT COMMENDING SENATOR DANFORTH

Mr. President, I want to commend Senator JOHN DANFORTH of Missouri for his announcement yesterday morning that he intends to support the Panama Canal treaties, as amended. This was not an easy decision for him as it has not been for many of us. I rather suspect that a different decision would have been politically more popular in the State of Missouri, at least initially. But I know that JACK DANFORTH is not one to put politics above statesmanship. From the outset of the Senate's consideration of the Panama Canal treaties, I have observed JACK DANFORTH submit these treaties to detailed scrutiny in an effort

to resolve his personal concerns and those of his constituents. He was an early supporter of the leadership amendments that strengthened the Neutrality Treaty. He has submitted an understanding designed to strengthen the Panama Canal treaty. Senator DANFORTH has done what I believe the people of Missouri expect him to do—and that is make an enlightened judgment as to what he believes to be in the best interest of the United States. I applaud and commend him for his courage and his statesmanship.●

Mr. ROBERT C. BYRD. Mr. President, I think I am able to announce at this time that there will be no more rollcall votes today. If the Senator from Alaska would allow me just a moment, I would like to propound a further unanimous-consent request.

Mr. STEVENS. I yield.

ORDER FOR THE RECOGNITION OF VARIOUS SENATORS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the recognition of Mr. HART tomorrow, Mr. FORD be recognized for not to exceed 15 minutes; after which Mr. BUMPERS be recognized for not to exceed 15 minutes; after which Mr. LEAHY be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PROCEDURE DURING CONSIDERATION OF NEUTRALITY TREATY TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the disposition of the amendment to the resolution of ratification by Mr. BARTLETT, Mr. DECONCINI be recognized to call up his amendment to the resolution; that he be followed by Mr. HEINZ to call up his amendment to the resolution; that he be followed by Mr. HAYAKAWA to call up his amendment to the resolution; and that he be followed by Mr. CHAFEE to call up his amendment to the resolution of ratification.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Reserving the right to object, Mr. President, but not wanting to object, it is my understanding, Mr. President, that I would have an opportunity to be heard on the substantive treaty tomorrow morning for approximately one-half hour.

Mr. ROBERT C. BYRD. The Senator is going to be recognized under the order entered this morning, will be recognized tomorrow morning for not to exceed 30 minutes.

Mr. METZENBAUM. I have no objection.

Mr. ROBERT C. BYRD. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Now, Mr. President, I wonder if Senators are prepared to go into a period for the transaction of routine morning business or does the Senator from Alaska wish to speak on the issue?

Mr. STEVENS. Mr. President, I have no objection to that provided I can make a statement I wanted to make earlier for the reason that I am opposed to these reservations.

Mr. ROBERT C. BYRD. Would the Senator be willing to do that in a period for the transaction of routine morning business?

Mr. STEVENS. I would have no objection. It depends on the length of time the Senator is going to allow for that period for the transaction of routine morning business.

Mr. ROBERT C. BYRD. Mr. President, may I yield to the Senator from Montana?

Mr. MELCHER. I would ask the majority leader if he could include in that about 5 minutes for me.

Mr. ROBERT C. BYRD. The Senator from Montana wishes to speak for not to exceed 5 minutes. I ask unanimous consent, Mr. President, while I have the floor, that there be a brief period for the transaction of routine morning business.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the statement by the distinguished Senator from Alaska (Mr. STEVENS)—and I hope all Senators will listen—the Senate stand in recess until the hour of 9 a.m. tomorrow morning.

Mr. STEVENS. Reserving the right to object, I do have a request from the Senator from North Carolina who wanted to make a statement of 1 minute before we recessed for the evening, if the Senator will modify his request.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following Mr. STEVENS, Mr. HELMS be recognized for not to exceed 3 minutes and for the purpose of making statements only in both cases.

Mr. STEVENS. That is the agreement we have.

Mr. ROBERT C. BYRD. And that following the statement by Mr. HELMS, the Senate stand in recess until the hour of 9 o'clock tomorrow morning.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following Mr. HELMS, the Senator from Montana (Mr. MELCHER) be recognized for not to exceed 5 minutes, after which the Senate stand in recess until the hour of 9 o'clock tomorrow morning, and that the Senators be recognized for the purpose of making statements only. I want that clearly understood.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDRESS BY SENATOR MATHIAS ON ENERGY

Mr. HAYAKAWA. Mr. President, recently my distinguished colleague, Senator MATHIAS, addressed the Insulation Contractors Association in San Diego. At that time he made some thoughtful remarks about energy which I think my colleagues would do well to read. The remarks were extremely well received by my California constituents.

I ask unanimous consent that the text of Senator MATHIAS' remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

ENERGY: LIVING IN A FOOL'S PARADISE

(By Senator CHARLES MCC. MATHIAS, JR.)

I had hoped to be able to bring you some good news tonight about the energy bills. But, unless you believe that "no news is good news", I'm going to disappoint you.

There just isn't anything new to report. Senator Jackson's so-called compromise proposal on gas pricing and deregulation raised some people's hopes that positions were shifting. But, when the Senate recessed last week, the energy conferees were still reporting no progress.

The tax portion of the energy package, which is of special interest to you because of the tax credit for insulation, is simply in limbo. And it will almost certainly stay in limbo until the stalemate on gas is resolved.

So, about all I can say with any confidence, is that the Senate reconvenes on Monday. I suppose you could say that we're closer to energy legislation when the Senate is in session than when it isn't. But that's the only encouragement I can offer.

The sad truth is that we're not much closer to an energy solution today than we were on April 20, 1977, when President Carter announced the substance of his national energy plan. I'm sorry to have to say this but, in my opinion, this state of affairs traces to public confusion, to Congressional controversy and to President Carter's singular inability to provide leadership on energy.

I'm not alone in thinking this. Shortly after Congress adjourned in December, the Washington Post, which is normally friendly to the President, commented:

"The stalemate on the energy bill and the agreement to put off the hard decisions until next year are an extremely bad sign. They demonstrate and confirm the limitations of the present White House in dealing with Congress and, for that matter, with the country."

Personally, I had hoped that the President might regain some lost initiative in his State of the Union message. The White House billed it as a major statement on the economy and what, if not energy, is the bedrock of our economy?

But that was not to be. Instead the President gave energy only six out of 117 paragraphs in his State of the Union message. And, to make matters worse, he prefaced his meager energy pitch with the curious escape clause:

"Those who govern can sometimes inspire, and we can identify needs and marshal resources, but we cannot be managers of everything and everybody."

I agree with the President that those who govern can't and shouldn't try to manage "everything and everybody." But, if there is any one single thing that "those who govern" should manage to formulate, it is energy policy. And part of managing energy is inspiring the people.

We must wake up to the fact that our energy problem is different from, say, our crime problem, or our unemployment problem, or the problems of our cities. The energy problem challenges our entire civilization and threatens its survival. This distinction is crucial to understanding our present danger and to finding the necessary responses to it.

Energy is not just an aspect of modern society. It is society's lifeblood. Energy is to modern man what wildlife was to primitive man. It sustains life. Our economy—food, jobs, industry, income, homes, health, transportation, recreation—all of these and more depend on energy.

This is the message the President must get across to the American people and he's just not doing it. Pollster Daniel Yankelovich, who has analyzed this phenomenon in some depth, thinks that ultimately the public will accept what must be done. He's not optimistic, however, about the President's ability to lead the effort.

Mr. Yankelovich believes we "muffed the chance for large-scale voluntary mobilization" by the American people by not striking hard during the Arab oil embargo. But he says:

"Jimmy Carter had a second chance, which he also missed . . . He caught the country's attention with his two speeches comparing the attack on the energy problem to the moral equivalent of war. But these speeches were followed by utter silence—as far as the public was concerned. As a result, the communication process with the public was arrested in midair."

Mr. Yankelovich concludes that without some dramatic event, it will not be possible "to recapture the lost momentum."

I can't bring myself to accept that bleak assessment. We have simply got to come to grips with our energy problem before we are confronted with some new dramatic event. And the President has got to help lead the way even if it means talking about energy every time he opens his mouth.

I don't share Eugene McCarthy's assessment of the President as an "oratorical mortican." His style may be low-key, but he has one thing going for him which no one else in this country has: he speaks from what Teddy Roosevelt called "that bully pulpit"—the White House. That alone puts plenty of weight behind his words.

We have been talking about an energy crisis in this country ever since that "dramatic event", the Arab oil embargo of 1973–74. But, highly qualified experts still differ strongly on the nature of our energy problem and on what we should do about it.

It's no wonder the public is divided and confused. Many people don't think there is a problem. Others, who admit there is a problem, simply aren't ready to face up to it.

There are a good many reasons for this national inertia. The most disturbing one is that energy experts and policymakers alike, including the President, tend to talk about the energy problem as if it were down the road a piece. But, it's not and that kind of talk has been a terrible mistake.

During last year's bitter winter, we had to import 50 percent of the oil we used. I shudder to think what this winter will bring us in terms of oil imports. Cold weather combined with the coal strike is actually boosting oil consumption by utilities. There is your real energy crisis. And it is definitely here and now.

Incredible as it seems, however, polls show that half of the American people don't even know that we import oil. Well, we not only import vast quantities of oil, we spend billions of dollars on it. Last year oil imports drained $47 billion from the economy. That much money going out of the country is a very large factor in our employment picture. It means thousands of jobs lost.

Another thing people don't know is that we would have had a $20.3 billion surplus, and have a good healthy surplus, if it weren't for those bloated oil imports. Last year our deficit was $26.7 billion. Without oil imports, we would have had a $20.3 billion surplus. Just think what a change in that direction would do for the stability of the dollar and our reputation for the prudent management of our affairs.

The economic and national security implications of our growing dependence on foreign oil are alarming. Let me remind you of what former Secretary of State Henry Kissinger said about the 1973 Arab oil embargo:

"These events . . . caused an immediate economic crisis both in this country and around the world. A drop of only 10 percent of our imported oil, lasting less than half-a-year, cost Americans half a million jobs and over 10 billion dollars of national output.

"The massive price increases of 1973 added at least five percentage points to the price index, contributing to our worst inflation since World War II.

"It set the stage for a serious recession, in this country and worldwide, from which we are only now recovering."

Since the time Dr. Kissinger describes, we have drifted into even more dangerous waters. The Federal Energy Administration estimated that a one-year Arab oil embargo in 1977 would have sheared between $78 billion and $112 billion from our gross national product and put more than two million people out of work. A new embargo would make the disruptions of 1973–74 look like child's play.

Perhaps here on the West Coast it is hard for you to imagine the chaos on the East Coast that would follow a disruption in the arrival of those oil tankers. But, I assure you, it would be the prelude to disaster. New England now imports 80 percent of its industrial oil. The risks to national security in that situation are obvious and ominous.

In the face of these facts, it is discouraging how little is being done to get this situation under control. In November, the Joint Economic Committee of the Congress, in a report entitled "Living with the Trade Deficit", made this somber assessment of our prospects for 1978:

"No current analysis has indicated that the energy legislation before the Congress will halt the growth of petroleum and natural gas imports, much less reduce them. The best the United States can realistically hope for at this time is to stop increasing our proportionate dependence upon imported energy by virtue of growing production of oil and gas in Alaska, on the Continental Shelf, and possibly elsewhere. About 45 percent of U.S oil consumption is supplied by imports. With luck, this percentage may decline by a point or so in 1978. But even under these circumstances, the absolute amount of energy imports and payments for them will continue to grow as the American economy expands and energy needs increase . . . Far tougher policies than have been adopted to date are necessary to achieve even this growth rate target, which is less ambitious than the President's goal of actually reducing imports."

I'm told that, at the rate things are going, U.S. energy consumption will increase by more than three percent this year. As columnist David Broder said recently, these statistics are irrefutable evidence that we are living in a fool's paradise.

The energy crisis is with us now. It doesn't lie in wait for us sometime 20 or 30 years from now when we run out of fossil fuels. It began 30 years ago when we first had to import oil. And it becomes more serious every year in direct proportion to our mounting appetite for energy.

The picture I've drawn so far is pretty grim. But there is one strong element of hope. It is this: more than half the energy America uses is wasted and much of it could be saved through conservation.

Worldwatch Institute believes that for the next quarter century the United States could meet all its new energy needs simply by using energy more efficiently. This forecast assumes that Americans won't change their lifestyles in any significant way. Much more dramatic savings would be possible, "if we considered functions instead of technologies—ways, for example, to eliminate the need for a certain type of transportation instead of merely ways to make it more efficient."

I'm not going to waste time tonight preaching to the converted about saving energy. You are in the vanguard of this effort. As I told the Senate last April, shortly before the President unveiled his energy plan:

"'Retrofitting' homes and commercial properties holds the promise of being one of our most effective conservation tools. Moreover, the necessary technology already is available, on line and in operation. Millions of dollars in excess energy consumption can be saved through this relatively simple and comparatively cheap method of conservation.

"In the forefront of the effort to establish standards for the expected demand in this area is the Insulation Contractors Association of California. They have recognized the key role that industry representatives can play in educating the public about the needs of insulation and about potential pitfalls. They have high-lighted the need for qualified installers to insure safe installation in conformity with various State and local codes. They have brought to the attention of those in Government the necessity for increased production of basic insulation materials. And, to their credit, they have emphasized the need for standards for products to provide maximum consumer protection."

I think your Association has done an outstanding job. Each of you should take special pride in the fact that, although you are a State organization, you have shown the way for the entire industry across the nation. I hope you will not relax the momentum you have so clearly established.

The insulation industry and each of you here this evening—whether you are a contractor or a supplier to a contractor—have an unprecedented opportunity before you. The country's energy needs will not abate any time soon. And, so the demand for your professional services can only increase. The opportunity before you carries with it special obligations.

Tomorrow a representative of the Federal Trade Commission will tell you where the Commission is heading with regard to the insulation industry. But, it is no secret that the overriding concern will be for sound consumer protection through the installation of good products by skilled professionals like yourselves. Your industry will need to develop the very finest management skills to carry the load that will be placed on it for retrofitting and for new housing construction. What you do to assure the highest performance standards, through continuing training programs and other approaches, will enhance the stature of the insulation contractor throughout the construction industry.

You will be key to assisting the Federal Trade Commission and other bodies in monitoring the insulation product market. You also have an important educational role to play.

Over the past several decades we have become a very vocal advocate society. If you look back over 25 or 30 years, you'll see that Americans pretty much believed in their society, in themselves and in the way things were going. Today, we no longer have that kind of tacit consensus.

Instead, we often disagree or are uncertain about where we are going, where we should be going and how we get there. Those who believe they have answers to these questions advocate their points of view more and more stridently, which leaves those who are uncertain more uncertain than ever.

Energy is a life and death issue in any industrial society, so it is proper and healthy to debate every aspect of it thoroughly. But that debate must lead to resolution; not to stalemate. There must be goodwill and mutual respect among the debaters. And ultimately, confrontations must give way to compromise.

Up to now the forces which oppose each other on the energy question have spent much of their time disparaging each other. Conservationists take on public utilities; consumers groups dispute oil companies; oil companies mistrust the Federal government, so do state and local governments. Too little time has gone to sorting out the truth so that we can somehow reach a consensus about purpose. Yet each of these advocate groups recognizes the problem and has a sincere interest in developing a coherent energy policy.

If we are to meet the energy challenge, then we must begin to bind the disparate forces of our socity into a coalition of common purpose. The time for advocacy is past.

The Banner, a small daily newspaper in Cambridge on the Eastern Shore of Maryland, has put its editorial finger on an important part of our problem. It points out that:

"Since the first White House energy speech which he delivered all buttoned up in a sweater, the President has dodged and twisted like a rabbit losing ground to a beagle."

The President told newsmen there is an urgent need to dramatize the seriousness of the energy problem but, as The Banner points out, "He has not yet shown the imagination to translate the need into action.

Well, I have a suggestion which I think might help the President. We must have a new dynamic in American life—a new partnership between government, business and the people—to dispel once and for all the myths and illusions that cloud our search for an energy policy and retard our pursuit of energy independence.

I urge President Carter to bring together business leaders, scientists, representatives of government and private organizations in the same way labor and management routinely come together. They must sit down together at a White House Conference on Energy and bargain in good faith. When labor and management sit down together, each wants to win concessions but neither wants to put the company out of business. In that same spirit, with Presidential leadership, we can lick our energy problems.

The President, of course, can't be expected to go it alone. He'll need the help and support of every one of us. He must take the lead in giving people the facts, but groups outside of government, like ICA, must be mobilized to join in a consensus-forming process.

This summer I participated in a symposium on energy that brought together representatives of the various factions I have mentioned here tonight. Our experience with one another encourages me to believe we can forge a national consensus. Each of us at that conference came to recognize that the other side, whatever other side it was, was more convincing than we had thought at first. We ended our meetings on an optimistic note. I would like to end on the same note.

America has not been fully mobilized in more than 30 years, and it is an awesome sight when this country rolls up its sleeves and 200 million Americans tackle a problem. It is automatically bi-partisan if it involves the entire country and its needs. Energy does.

The stakes are high: the peace and progress of the world depend on how soon and how widely we as a nation can make up our minds about whether there is an energy problem, about what it is, whose it is, and what we are going to do about it—and then roll up our sleeves and get on with the job.

UNANIMOUS-CONSENT AGREEMENT—S. 2493

Mr. ROBERT C. BYRD. Mr. President, as in legislative session, and this request has been cleared by the minority, I ask unanimous consent that at such time as S. 2493, the airline reform bill, is called up and made the pending business before the Senate, there be a time limitation thereon for debate of 4 hours, to be equally divided between Mr. CANNON and Mr. PEARSON; that there be a time limitation on any amendment of 1 hour; that there be a time limitation on an amendment by Mr. SCHMITT of 2 hours; that there be a time limitation on an amendment by Mr. ZORINSKY of 2 hours; that there be a time limitation on any amendment to an amendment of 1 hour; and that there be a time limitation on any debatable motion, appeal, or point of order, if such is submitted to the Senate for its consideration, of 20 minutes; and that the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, as in legislative session, it will be so ordered.

The text of the agreement is as follows:

Ordered, That when the Senate proceeds to the consideration of S. 2493 (Order No. 575), a bill to amend the Federal Aviation Act of 1958, as amended, to encourage, develop, and attain an air transportation system which relies on competitive market forces to determine the quality, variety, and price of air services, and for other purposes, debate on any amendment (except an amendment by the Senator from New Mexico (Mr. Schmitt) and one by the Senator from Nebraska (Mr. Zorinsky), on each of which there shall be 2 hours debate) shall be limited to 1 hour, to be equally divided and controlled by the mover of such and the manager of the bill, and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided*, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: *Provided further*, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 4 hours, to be equally divided and controlled, respectively, by the Senator from Nevada (Mr. Cannon) and the Senator from Kansas (Mr. Pearson): *Provided*, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

MESSAGES FROM THE HOUSE

At 11:02 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the report of the committee of the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3813) to amend the act of October 2, 1968, an act to establish a Redwood National Park in the State of California, and for other purposes.

The message also announced that the House has passed, without amendment, the bill (S. 1671) to designate the Absaroka-Beartooth Wilderness, Custer and Gallatin National Forests, in the State of Montana.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4320. An act to amend chapter 83 of title 5, United States Code, to discontinue civil service annuity payments for periods of employment as a justice or judge of the United States, and for other purposes;

H.R. 6635. An act to amend the Second Liberty Bond Act to allow the interest rates paid on U.S. retirement plan and individual retirement bonds to be increased to the rate paid on U.S. series E savings bonds;

H.R. 9146. An act to provide for congressional review of proposed changes in postal services;

H.R. 10126. An act to amend title 5, United States Code, to establish a program to increase part-time career employment within the civil service; and

H.R. 11055. An act relating to the year for including in income certain payments under the Agricultural Act of 1949 received in 1978 but attributable to 1977, and to extend for 1 year the existing treatment of State legislators' travel expense away from home.

At 2:20 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 810. An act to amend section 4941(d)(2)(G) of the Internal Revenue Code of 1954;

H.R. 2028. An act to authorize the home production of beer and wine; and

H.R. 5103. An act to amend the Internal Revenue Code of 1954 to provide for excise tax refunds in the case of certain warranty adjustments on tires, and for other purposes.

The message also announced that, pursuant to the provisions of 46 United States Code 1126c, the Speaker has appointed Mr. WOLFF and Mr. WYDLER as members of the Board of Visitors to the U.S. Merchant Marine Academy.

The message further announced that, pursuant to the provisions of 10 U.S.C. 6968(a), the Speaker has appointed Mr. FLOOD, Mr. MCKAY, Mr. KEMP, and Mrs. HOLT as members of the Board of Visitors to the U.S. Naval Academy.

The message also announced that, pursuant to the provisions of 14 U.S.C., section 194(a), the Speaker has appointed Mr. DODD and Mr. SARASIN as members of the Board of Visitors to the U.S. Coast Guard Academy.

The message further announced that, pursuant to the provisions of 10 U.S.C. 4355(a), the Speaker has appointed Mr. MURPHY of New York, Mr. LONG of Maryland, Mr. CEDERBERG, and Mr. GILMAN as members of the Board of Visitors to the U.S. Military Academy.

HOUSE BILLS REFERRED

The following bills were read twice by their titles and referred as indicated:

H.R. 810. An act to amend section 4941(d)(2)(G) of the Internal Revenue Code of 1954; to the Committee on Finance.

H.R. 2028. An act to authorize the home production of beer and wine; to the Committee on Finance.

H.R. 4320. An act to amend chapter 83 of title 5, United States Code, to discontinue civil service annuity payments for periods of employment as a justice or judge of the

United States, and for other purposes; to the Committee on Governmental Affairs.

H.R. 5103. An act to amend the Internal Revenue Code of 1954 to provide for excise tax refunds in the case of certain warranty adjustments on tires, and for other purposes; to the Committee on Finance.

H.R. 6635. An act to amend the Second Liberty Bond Act to allow the interest rates paid on U.S. retirement plan and individual retirement bonds to be increased to the rate paid on U.S. series E savings bonds; to the Committee on Finance.

H.R. 9146. An act to provide for congressional review of proposed changes in postal services; to the Committee on Governmental Affairs.

H.R. 10126. An act to amend title 5, United States Code, to establish a program to increase part-time career employment within the civil service; to the Committee on Governmental Affairs.

ORDER TO HOLD H.R. 11055 AT THE DESK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that H.R. 11055, a bill relating to the year for including in income certain payments under the Agricultural Act of 1949 received in 1978 but attributable to 1977, and to extend for 1 year the existing treatment of State legislators travel expense away from home, be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE BILL REFERRED

On March 14, 1978, H.R. 6782, to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion, reported on March 13, 1978, was referred to the Committee on Appropriations, for 15 days, not including days on which the Senate is not in session.

PRESENTATION OF A PETITION

● Mr. BAKER. Mr. President, I have received a petition from my constituent, Mr. Eddie M. Crain, of Erwin, Tenn., who requests that the Congress repeal the withholding tax law. Mr. Crain has asked that I present his petition to the Senate, and I now submit it for appropriate referral.

The PRESIDING OFFICER. Without objection, the petition is received and appropriately referred.

POM–537. A petition urging repeal of the withholding tax law; to the Committee on Finance.●

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. JACKSON, from the Committee on Energy and Natural Resources:

A report on the nomination of Lynn R. Coleman, to be General Counsel of the Department of Energy (Ex. Rept. No. 95–15).

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Alice Stone Ilchman, of Massachusetts, to be an Assistant Secretary of State.

John E. Reinhardt, of Maryland, to be Director of the International Communication Agency.

Charles W. Bray, III, of Maryland, to be Deputy Director of the International Communication Agency.

Alice Stone Ilchman, of Massachusetts, to be an Associate Director of the International Communication Agency.

Roger Kirk, of the District of Columbia, to be the Deputy Representative of the United States to the International Atomic Energy Agency, with the rank of Ambassador.

POLITICAL CONTRIBUTIONS STATEMENT

Nominee: Roger Kirk.

Post: Deputy Representative, IAEA Vienna.

Contributions, amount, date and donee:

1. Self, none.
2. Spouse, Madeleine Yaw Kirk, none.
3. Children and spouses names, none.
4. Parents names, Lydia Chapin Kirk, (see attached).
5. Grandparents names, deceased.
6. Brothers and spouses names, none.
7. Sisters and spouses names, (see attached).

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

4. Mother, Mrs. Alan G. Kirk, $25, 1975, Carter Pres. Campaign, $25, 1976, Democratic Nat'l Campaign, $25, 1977, Democratic Nat'l Committee.

7. Marion Kirk Appel, none.

John W. Appel, $125, 1973–6, Republican Party Candidates.

Deborah Kirk Solbert, $100, 1976, Udall.

Peter O. A. Solbert, $250, 1976, Udall, (N.Y. '76 Committee), $10, 1976, Udall ('76 Committee), $200, 1976, Democratic Nat'l Committee.

The following-named Foreign Service officers for promotion from class 1 to the class of career minister:

Davis Eugene Boster, of Ohio;
Lawrence S. Eagleburger, of Florida;
Donald B. Easum, of Virginia; and
Thomas O. Enders, of Connecticut.

(The nominations reported from the Committee on Foreign Relations were reported with the recommendation that they be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. SPARKMAN. Mr. President, I also report favorably sundry nominations in the Foreign Service which have previously appeared in the CONGRESSIONAL RECORD and, to save the expense of printing them on the Executive Calendar, I ask unanimous consent that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of February 10, 1978, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. PELL:

S. 2743. A bill for the relief of John and Margaret Diehl, Julie Eastridge, and Jerome and Betty Davis; to the Committee on the Judiciary.

By Mr. SCHWEIKER (for himself, Mr. CLARK, Mr. HAYAKAWA, and Mr. STAFFORD):

S. 2744. A bill to amend the Public Health Service Act to improve rural health services; to the Committee on Human Resources.

By Mr. ANDERSON:

S. 2745. A bill to encourage the continuation of family farming as a part of the agricultural system in the United States; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. PAUL G. HATFIELD:

S. 2746. A bill to maintain in effect for 1978 and succeeding years the social security tax rate which was in effect for 1977, and to provide that there shall be paid into the social security trust funds from general revenues an amount equal to the difference in social security taxes actually received by them and the amount which would have been received by them if the social security tax rates prescribed by existing law for such years had continued in effect; to the Committee on Finance.

By Mr. HASKELL:

S. 2747. A bill to provide for a study of methods by which individuals could be aided in filing their Federal income tax returns; to the Committee on Finance.

By Mr. JAVITS:

S. 2748. A bill to provide an improved consolidation of educational programs under title IV of the Elementary and Secondary Education Act, and for other purposes; to the Committee on Human Resources.

By Mr. JAVITS (for himself and Mr. PELL):

S. 2749. A bill to revise and extend the program for gifted and talented children in order to provide a consolidation of that program with other educational programs, and for other purposes; to the Committee on Human Resources.

By Mr. PROXMIRE (for himself, Mr. RIBICOFF, and Mr. JAVITS):

S. 2750. A bill to reorganize and consolidate certain functions of the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation and the Federal Reserve System into a Federal Bank Commission to administer all Federal laws relating to the examination, supervision and regulation of the banking business both foreign and domestic; to the Committee on Governmental Affairs and the Committee on Banking, Housing, and Urban Affairs, jointly that if reported by one committee, the other has 30 days within which to report, by unanimous consent.

By Mr. KENNEDY:

S. 2751. A bill to amend the Immigration and Nationality Act; to the Committee on the Judiciary.

By Mr. PELL:

S.J. Res. 121. A joint resolution authorizing the President to proclaim the second full week in October 1978, as "National Legal Secretaries' Court Observance Week"; to the Committee on the Judiciary.

By Mr. ANDERSON (for himself, Mr. MCINTYRE, Mr. HART, Mr. PERCY, and Mr. CASE):

S.J. Res. 122. A joint resolution to direct the Office of Technology Assessment to undertake a comprehensive evaluation of energy policy alternatives; to the Committee on Energy and Natural Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SCHWEIKER (for himself, Mr. CLARK, Mr. HAYAKAWA, and Mr. STAFFORD):

S. 2744. A bill to amend the Public Health Service Act to improve rural health services; to the Committee on Human Resources.

RURAL HEALTH SERVICES ACT OF 1978

● Mr. SCHWEIKER. Mr. President, I am today introducing, along with Senators CLARK, HAYAKAWA, and STAFFORD, the Rural Health Services Act of 1978. This act will amend various sections of the Public Health Service Act so that it more equitably addresses the needs of our rural citizens.

The health status of rural Americans is poor, particularly when contrasted to the health status of urban citizens. Approximately 49 million persons live in medically underserved areas. Of these 49 million, 27.4 million or 56 percent live in rural areas. The infant mortality and maternal death rates in rural areas are significantly greater than in urban areas. Rural Americans have a higher prevalence of chronic diseases as well as malnutrition. Yet rural areas have great difficulty in attracting and keeping health personnel and current Federal programs are not adequately addressing their health needs. Indeed, over 83 percent of areas lacking adequate health personnel are rural. This is especially disturbing to me since Pennsylvania has over 3 million rural citizens—more than any other State in the Union. In fiscal year 1978, although comprising 56 percent of the medically underserved population rural citizens received less than one-third of the funds appropriated to community health centers. This bill seeks to redress these inequities. The guiding principle in the utilization of funds under section 330 of the Public Health Service Act should, I believe, be that equal numbers of both rural and urban underserved citizens should receive equal services.

This bill would amend section 330 of the Public Health Service Act to allow the community health centers programs to improve the quality of services rendered to rural Americans. Specifically, this bill would require the Secretary, if requested by a community health center, to support environmental and priority supplemental health services provided by these centers unless he can demonstrate no need for these services. At present, "environmental health services" is not defined by law. This bill defines environmental health services to include the identification and detection of unhealthful conditions associated with water supply, sewage treatment, solid waste disposal, rodent and parasite infestation, field sanitation and other environmental factors related to health. The provision of these environmental health services is viewed as an essential, cost-effective method of improving rural health conditions.

Frequently, rural health centers lack the expertise and knowledge to take advantage of many currently existing Federal programs designed to make the environment more healthful. Accordingly, this legislation would require the Secretary to make available to all centers funded under section 330 a list of Federal resources available to aid in the improvement of the environment and the nutritional status of residents within the catchment area of the center.

To further underscore the importance of the preventive components embodied in the provision of environmental and supplemental health services, this bill gives the Secretary the authority to approve grants for community health centers on the condition that specified environmental and supplemental health services that he deems necessary are provided. However, recognizing that rural areas frequently may have severe financial constraints to the provision of comprehensive services, the Secretary may waive the provision of those environmental and supplemental services upon application from the community health center.

At the present time, section 330 does not provide for developmental or demonstration projects to test innovative new ways to provide health care to medically underserved rural populations. This bill would provide authority to examine: First, the use of differing types of organizational models and providers; second, specific services or mix of services appropriate for a given area, including ambulatory health care, prevention and health education, and environmental health services; third, technologic applications in biomedical communications; and fourth, ways to attract and retain health care providers in scarcity areas.

This demonstration authority would be authorized for 3 years at $20 million the first year and $25 million and $30 million in subsequent years.

The National Health Service Corps was originally intended as a vehicle for developing physicians to medically underserved areas. It is unclear whether the Corps has been effective in this, particularly in rural parts of our Nation. In the near future, the Corps will annually have almost 2,000 new physicians available for placement. I am concerned about their plans for placing these physicians around the country and the attendant costs involved in deploying these physicians. This legislation will require the Secretary in his annual report to the Congress to define the efficacy of the Corps, its future policies and how the National Health Service Corps scholarship program is helping to meet those objectives.

In his speech before the Student National Medical Association, President Carter stated that—

> To improve the availability of services, especially preventive services, the work of nurse practitioners and physicians assistants is crucial.

Unfortunately, the administration's current budget request does not adequately reflect these concerns. This bill would stimulate an increase in these valuable personnel by requiring that 20 percent of the sums appropriated for the National Health Service Corps scholarship program be used for allied health personnel.

In addition to these amendments to the Public Health Services Act, I have, as a member of the Senate Appropriations Subcommittee on Labor-HEW, requested additional moneys be appropriated for several programs which are important to the development of adequate health services for our rural citizens.

The area health education center (AHEC) program is designed to address the problems of geographic maldistribution and overspecialization of health professionals by fostering changes in the pattern of education and the educational environment. The program links the resources and training programs of the Nation's health science centers to community hospitals and other institutions to provide training which addresses locally identified health manpower needs. This program has, I believe, been a success and therefore I am proposing that funds be increased to provide for six new projects annually.

As I indicated previously, we must increase the supply of nurse practitioners so that we may provide cost effective health care to more of our citizens. Accordingly, I am requesting that the nurse practitioner program be funded at its full authorized level of $15 million. Finally, I will seek to assure that the rural demonstration authority created by my bill will be fully funded at $20 million.

I believe, Mr. President, that this rural health package that I am proposing today will significantly aid in improving the health of our rural citizens.●

● Mr. CLARK. I am very pleased to join Senator SCHWEIKER in introducing the Rural Health Services Act of 1978. This bill represents a significant step toward equitable access to primary health services for all citizens, rural and urban alike.

The Senate Rural Development Subcommittee, which I chair, has extensively studied rural health issues over the past few years. Hearings held in New England and in the Midwest underscored the importance of developing organized systems of health care in medically underserved areas. To merely attract a new physician, or to just build a clinic, is an insufficient method of bringing health services to medically needy Americans.

The community health centers program is the Federal Government's major resource for helping communities develop health care systems. Our most recent hearings in Iowa disclosed that this program, while beneficial, needs substantial fine tuning if it is to effectively address rural health needs.

Two major concerns were raised during the subcommittee hearings. One was that unnecessarily rigid program requirements tend to discourage applications from the very communities which need assistance. A second problem we discovered was the lack of funding available for services that communities believe are essential to the health and well-being of their residents.

The time has come to make the community health centers program a more useful tool for rural Americans. The need to increase the Federal support for health services in rural areas is clear: More than 40 percent of Americans living in rural areas have been classified as "medically underserved" by the Department of Health, Education, and Welfare. And of the total 49 million Americans who are "medically underserved"—a measure that takes into account the physician-population ratio, the infant mortality rate, the proportion of elderly persons, and the proportion of people living in poverty—27 million or 56 percent live in rural areas.

While many States have greater problems in terms of access to primary

health services than does my home State of Iowa, we did find that, even here, 60 of Iowa's 99 counties are partially or wholly underserved by HEW standards. Although I am encouraged by efforts like those undertaken by the University of Iowa to train family practice physicians likely to settle in smaller communities, more must be done. Unless organized health care delivery systems are also developed, I fear that these health manpower efforts will be undermined.

An examination of the way community health centers program funds are allocated reaffirms my concerns. Although nearly three-fifths of our medically underserved Americans reside in rural areas, for example, less than one-third of the program's funds are channeled to those areas.

For these reasons, I will work in the coming months to urge the Senate to adopt the provisions of the Rural Health Services Act of 1978.

These provisions, which will be offered within the Senate Human Resources Committee as amendments to pending legislation to reauthorize Federal health programs, are as follows:

First, if a community so desires, the Secretary of HEW would be required to support environmental and priority supplemental health services provided by community health centers.

Second, for the first time, "environmental health services" would be defined in law. These services would include the identification and detection of unhealthful conditions associated with water supply, sewage treatment, solid waste disposal, rodent and parasitic infestation, field sanitation and other environmental factors related to health.

Third, community health centers would be provided a complete list of available Federal resources to improve the environment and the nutritional status of areas served by those centers.

These three provisions address a pressing problem facing all community health centers: The inability to deal with nonmedical, environmental problems that have immediate impact on the quality of a community's health.

A substandard community water supply, for example, can cause severe health problems. Community health centers, however, are thwarted in their efforts to get to the root of the problem—the water supply; instead, they can deal only with the subsequent disease. The provisions mentioned above represent a good initial step toward giving community health centers the resources to confront serious environmental hazards which generate health problems.

Fourth, when communities are unable, due to financial and other constraints, to provide a complete range of health services, the Secretary of HEW may waive certain supplemental services.

Fifth, a rural demonstration program would be authorized, in order to test innovative approaches to providing health services to medically underserved rural people.

Sixth, the Secretary would be required to include an examination of the efficacy and policies of the National Health Service Corps within his annual report to Congress. Since the success of this program in attracting physicians and other health personnel to rural areas is an essential ingredient in promoting health delivery systems, this study will be a useful guide to future congressional rural health legislation.

Finally, the National Health Service Corps scholarship program would be required to place more emphasis upon assisting those who will be trained as nurse practitioners or physician assistants. Twenty percent, as opposed to the current 10 percent, of the program's scholarship funds would be reserved for allied health personnel.

I have a special interest in this last provision because of my earlier efforts to enact the Rural Health Clinic Act, Public Law 95–210. The act, which was implemented March 1, permits medicare and medicaid payment for services furnished by nurse practitioners and physician assistants who work within rural health clinics.

The Rural Health Clinic Act will be meaningless unless Federal programs actively promote the use of these valuable health practitioners. We know that there exists a vast pool of health workers residing in rural areas who could be trained as nurse practitioners or physician assistants. The existing financial obstacles to this training would be removed if the National Health Service Corps scholarship program were revised in the way sought by this bill.

In conclusion, I urge my colleagues to support the Rural Health Services Act of 1978. It would do much to promote equity between urban and rural underserved citizens in terms of their access to the community health centers program, and it would make that program more suitable to the needs of rural communities.●

● Mr. STAFFORD. Mr. President, I am pleased to join Senator SCHWEIKER as a cosponsor of the Rural Health Services Act of 1978.

This legislation is an important step toward improving health care in medically underserved rural areas. It would provide rural citizens with the opportunity for badly needed environmental and supplemental health services. Rural residents need a wide range of services in order to attain and maintain optimal health. Environmental factors such as clean air and clean water are extremely important, and the need for education in nutrition and other health matters cannot be overlooked.

In medically underserved rural areas there are a number of factors which discourage residents from obtaining preventive health services; the presence of a rural health clinic in an area greatly mitigates such factors. In a State such as Vermont for instance, one cannot expect a person to seek out such services when a long, hazardous trip over icy roads is involved. Other obstacles include cost of transportation, employing a babysitter, and time lost from work. When preventive health services are available locally as part of a program of comprehensive primary care, rural residents are more likely to avail themselves of needed services.

This bill would also continue Federal support for nurse practitioner programs. In many instances, our rural health centers are staffed by graduates of these programs. These highly trained nurses have an impressive record of bringing their unique knowledge and skills to medically underserved areas.

If enacted, this legislation would assist Americans in medically underserved rural areas in meeting their various health needs, and I am pleased to be a cosponsor of this measure.●

By Mr. ANDERSON:

S. 2745. A bill to encourage the continuation of family farming as a part of the agricultural system in the United States; to the Committee on Agriculture, Nutrition, and Forestry.

FAMILY FARM DEVELOPMENT ACT OF 1978

● Mr. ANDERSON. Mr. President, family farmers have been puppets of a national farm policy of boom or bust for too many years.

Today, I am introducing the Family Farm Development Act of 1978. It is but one of several possible responses to our farm problem and some of us, myself included, are also sponsoring other bills designed to bring our Nation's family farmers to 100 percent of parity.

We do this because we believe, in such a complicated field, that the Senate Agriculture Committee should have the benefit of a wide range of proposals as this Congress works to respond to the farmers' need for fair prices.

Current farm policy keeps farm prices excessively and dangerously low, drives good farmers from the farm, and encourages immense economic concentration in the food and fiber industry. All of this has created unprecendented unrest in rural America. The recent farm protests underscore the need for a comprehensive attack on economic and social forces threatening the existence of the traditional family farm.

This bill is a step in that direction. The goal of the Family Farm Development Act is 100 percent of parity which means nothing more or less than giving farmers a fighting chance of receiving for their product the cost of production plus a fair profit.

This measure aims for parity by authorizing nonrecourse commodity loans at 90 percent of parity and by prohibiting the Commodity Credit Corporation from releasing stocks at below 110 percent of parity.

Other key components of this new system are strict national production goals, strict conservation standards, orderly marketing procedures, a grain reserve with strong incentives to participate. a food price review board, and a provision which designates the Commodity Credit Corporation as seller or market agent for all export sales of wheat, feed grains, and oil seeds—selling as close to 100 percent of parity as possible.

If properly administered, these mechanisms will give farmers a realistic chance of obtaining 100 percent of parity in the marketplace. Because this is a bill designed to strengthen the hand of the family farmer, there are safeguards to insure that huge farmers and corporations will not reap windfall profits.

In addition to the price, production, conservation, and marketing features of

the bill, there are also provisions for tax reform, new opportunities for young farmers, an expanded Farmers Home Administration loan program for new, marginal, and small family farms, loans for establishing cooperatives, and Farmers Home Administration loans for installing and operating new technology on farms. Also, there will be an enhanced family farm development program within the U.S. Department of Agriculture to focus needed attention on the problems of the small family farmer.

Unfortunately, there are some who will argue that 100 percent of parity is not a reasonable objective no matter what approach to the goal is adopted. These skeptics would have us believe that parity represents a "pie in the sky" ideal at best or, if successful, an unprecedented windfall for farmers. The facts are otherwise. During the past 35 years, there have been 26 in which farm prices averaged 90 percent of parity or better, and in 10 of those years the prices were at or above 100 percent of parity.

During these years of parity or near-parity, food at the retail level has remained a terrific bargain for the consumer. Americans spend less than 17 percent of their disposable income on food, a rate lower than any group of consumers in the world pay. Farm costs were not exorbitant during the good years—it has been during the years of rock-bottom farm prices that costs have skyrocketed. Some have suggested that high farm prices could lead to unemployment. But to my knowledge, there has not been any genuinely credible evidence to show that a good farm year created unemployment for workers. It should be understood by now that when the farmer is doing well, America does well.

Since the administration seems unwilling at this point to take major additional initiatives on behalf of the farmer, Congress must act on its own. Congress cannot ignore the need for substantial changes in the Nation's farm policy. Congress improved an inadequate set of administration farm proposals in 1977, but the 1977 farm bill cannot be considered the final word on farm policy. It is only the opening chapter. The 95th Congress must now complete the work begun last year and produce a 1978 farm bill that could put family farming on a firm road to recovery. The Family Farm Development Act should be seriously considered as a part of the package.

Congressman NOLAN introduced identical legislation, H.R. 10739, in the House of Representatives on February 2, 1978. A section by section outline of H.R. 10739 appeared in the CONGRESSIONAL RECORD with Congressman NOLAN's statement. I ask unanimous consent that this outline be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

TITLE I: 90 PERCENT PARITY COMMODITY LOANS TIED TO CONSERVATION PRACTICES

This title raises the loan rate for agriculture commodities currently covered by the commodity loan program—wheat, feedgrains, cotton, wool, rice, soybeans, and peanuts—in return for establishing conservation practices on the farm. In addition,

PRICE SUPPORT

Milk price supports shall be raised to 100 percent of parity for up to 500,000 pounds of annual production. Milk production exceeding that amount shall be supported at levels as the Secretary is authorized to establish. The Commodity Credit Corporation shall not sell in the domestic market production which it owns or controls for less than 110 percent of parity. The goal, therefore, is for commodity prices to reach 100 percent of parity in the market place.

GRAIN EXPORT BOARD

The CCC shall be the seller or marketing agent for all export sales of wheat and feed grains. Private exporters will continue to function as they do now, except that the CCC must approve the prices, terms and conditions for all export sales.

The CCC may negotiate export sales at less than 100 percent of parity, but the CCC must seek export prices which are as close to parity as possible. Losses, if any, will be borne by the Treasury.

PRODUCTION GOALS AND MARKETING CERTIFICATES

In order for farmers to market their production in an orderly manner, the Secretary shall establish national production goals for all agriculture commodities other than livestock and poultry. The Secretary shall also issue marketing certificates, allocated to producers on the basis of their average production history over the previous three years. If increases or decreases in the production goals are announced, the amount allocated by marketing certificates will be adjusted accordingly and applied on a uniform basis to all producers.

Market certificates shall be allocated only to producers actively engaged in agriculture production and each such producer or land owner shall not receive marketing certifcates valued in excess of $500,000. No agriculture commodities shall be bought, sold, or traded, unless accompanied by marketing certificates.

The Secretary shall establish rules and procedures to assure fair and equitable allocations of marketing certificates, giving priority to new and beginning farmers in any reallocation of certificates. In addition, any producer who purchases land in an amount which exceeds 150 percent of the average farm size in the county wherein the farming operation is located, shall not receive marketing certificates for the land held in excess of the county average.

GRAIN RESERVES

In order to build the extended producer-owned reserve program mandated by Congress, the Secretary shall establish a uniform storage rate authorizing storage payments of 25 cents per bushel, for wheat and corn. If the extended reserve is not accumulated within one year, the interest charged shall be adjusted or waived.

FOOD PRICE REVIEW BOARD

In order to prevent unwarranted increases in food prices, the Department of Agriculture (specifically, the Assistant Secretary for Marketing Services) shall have oversight authority over food price increases. A Consumer Price Review Board representing the interests of farmers, consumers, other federal agencies, and the food industry shall be established by the USDA to conduct hearings investigating food price increases. If the Board determines that food price increases are unwarranted, the Department shall report such findings, together with recommendations, to the President and to Congress. The President shall have the authority to roll back food prices to the levels recommended by the Board.

To receive this increased 90 percent loan payment, a farmer would have to apply a system of best management practices on the farm with the help of the Soil Conservation Service. In return for applying these conservation practices, the farmer would receive a certificate from SCS to be turned in at the request for loan payments. Without the certificate, the farmer would receive no loan payments whatsoever.

These conservation practices will not have to be applied all at once. The farmer will have a five-year period to apply the entire conservation plan.

TITLE II: TAX-STRUCTURE AMENDMENT

Two changes would be made in the Internal Revenue Rules which permit farmers to create artificial tax losses by using cash accounting (and ignoring inventory changes).

1. Farmers having more than $100,000 annual gross farm sales would be required to adopt accrual accounting;

2. Taxpayers having more than $15,000 non-farm income will be discouraged from using cash accounting methods.

For tax purposes, farm losses allowable to off-set non-farm income would be limited to $15,000 reduced by the amount that non-farm income exceeded $15,000. If non-farm income exceeded $30,000, no farm losses could be used to off-set any non-farm income, unless accrual accounting were adopted.

These two changes would discourage tax loss farming by very large farms, and by non-farmers, but still allow small family farmers to obtain the full benefit of cash accounting.

TITLE III: FAMILY FARM PRESERVATION PROGRAM

This title establishes a new program for buying and selling agricultural land for the purpose of, 1) providing opportunities for new, young, small or limited resource family farmers to acquire farm land, 2) keeping family farmers on the land to prevent it from being used for non-agricultural development or acquisition by large land owners; 3) helping the economic base of rural communities by bringing more farmers into the area.

The program will work this way: when farmland is up for sale, local organizations or county or city governments, are authorized to buy the land at market price. The cash for such purchases will be available from a federal grant to be used exclusively for purchase and sale of local farmland.

The land can then be sold (or divided and sold) to new, small or limited resource family farmers who need to acquire land in order to establish a family farm of no larger than 640 acres.

TITLE IV: FAMILY FARM OWNERSHIP AND OPERATING LOANS

(1) This is a new Farmers' Home Loan program for those new and marginal small and family farms and cooperatives who presently are unable to obtain loans for the ownership or operation of farms from traditional public or private lenders.

(a) The ownership loan section provides for low interest (5%) loans with payments that amount to 10% of normal annual payment during the 1st year, 20% in the second year, etc., until the tenth year of the term, when the recipient of the loan, would pay 100% of what the normal annual payment would be under regular interest/principal payments. The difference over those 10 years of reduced payments is amortized over the remaining 30 years of the loan period:

(b) The Farm Operating Loan program resembles normal Farmers Home Administration (FMHA) operating loans except that it offers a 3% low-interest payment and is available only to small or family farmers who cannot otherwise obtain loans because they are considered high risk;

(c) Farm cooperatives and farm partnerships are included in the eligibility requirements for these two loan programs.

(2) Farmers Home Loan programs are amended to give FMHA authority to offer loans for installation of appropriate technology on farms.

(3) The ownership loan program outlined in 1(a) is also extended to those participating in the program outlined in Title III, at a reduced 3 per cent interest level, to encourage use of the program.

TITLE V: FARM MARKETING PROGRAMS

This title creates new marketing programs, including the following:

(1) Broadening the authority of the Farmer Cooperative Service to give asssistance to small and moderate sized family farmers with technical, managerial, financial and statistical information so they can establish small cooperatives to help market their products and also encouraging FCS to emphasize aid to small and family farm cooperatives succeed at marketing their products.

(2) Amending the school lunch program to provide that schools shall spend an average of 2¢ per lunch to buy local fresh farm products which are nutritional, valuable and acceptable to local eating preferences, emphasizing those purchases having greatest impact on small and moderate sized family farms.

(3) Directing the Agricultural Marketing Service to evaluate its programs to determine the extent to which they aid small and family farmers and how they could be made more useful to these farmers;

(4) Establishing a pilot project in 12 states based on a program in Indiana which uses electronic computer systems to help small and family farmers;

(5) Establishing Federal-State Direct Marketing Program which allows any interested state government or private organization to submit a proposal to USDA for creating a state-wide direct marketing system that includes:

(a) Maximum participation by farmers and consumers;

(b) A method to attract wholesale and retail buyers;

(c) Locations and good facilities for storage and selling of farm products;

(d) Methods of transferring products between each market, so surpluses are reallocated in an efficient manner.

If the proposal is satisfactory, the cost for establishing and operating it for 3 years are shared 75/25—federal/state or private organization.

(6) The Farmer-to-Consumer Direct Marketing Act is amended to permit nonprofit organizations to receive grant money from the U.S.D.A. to carry out direct marketing projects. (Currently, only the Extension Service and State Departments of Agriculture can receive it.)

TITLE VI: FAMILY FARM DEVELOPMENT

This title establishes a Family Farm Development Service within the U.S. Department of Agriculture to focus needed attention on the small family farmer's problems. This Service would have the authority to:

(1) Coordinate activities within the USDA concerning development & maintenance of small and moderate-sized family farms. This would require working with Extension Service, Farmer Cooperative Service, etc. to enhance communication and avoid duplication of efforts;

(2) Evaluate the activities of the USDA in terms of their impact on small & family farmers and communicate this annual evaluation to the Congress with recommendations for changes;

(3) Develop a national long-term plan to re-direct agricultural policy towards an agricultural system comprised of energy-efficient, environmentally-protective, economically sound family farms which provide a good standard of living to their owners; and report this national plan to Congress in 3½ years;

(4) Set up a Family Farm Assistance board which will also be responsible for giving out research and education grants that will help develop the technology and practices necessary to re-vitalize the family farm.

TITLE VII: RESEARCH PROGRAM

The Family Farm Development Service will give grants to individual organizations, colleges and universities, agencies of a state or local government and other federal agencies to conduct research concerning the development and maintenance of small and moderate-sized family farms—primarily for small farms with gross sales under $30,000 and moderate-sized farms with gross sales of less than $100,000. This research shall include the following matters:

(1) Analysis of the situation leading to the decline in farm numbers—causes of the trend (economic, social, and other) ways to reverse trend, statistics on present farm sizes and numbers, analysis of the relationship between rural economic stability and reduction in numbers of farmers;

(2) Surveys to determine who are beneficial and nominal owners of land and an analysis of trends regarding land ownership;

(3) Ways to enhance the lifestyle of small and moderate-sized family farmers, including community services;

(4) Development of energy efficient, appropriate farm techniques and technologies that are low-in-cost, environmentally protective, such as utilization of solar, wind, water, waste products, and improved soil and water conservation;

(5) Analysis of costs/benefits of these various technologies in comparison to currently used systems and development of means by which to apply these methods on the farm;

(6) Ways to increase and improve nutrient levels of the soil, increase soil productivity, reduce nutrient runoff and water pollution from farming;

(7) Benefits of increasing humus content of the soil—costs/benefits; water retention; food quality; affects on soil erosion, pest control, necessity for irrigation;

(8) Methods to increase humus methods in soil, i.e., composting, cover cropping;

(9) New and improved methods of biological and integrated pest control;

(10) Development of closed-nutrient cycle models for small farms and a cost-benefit analysis;

(11) Studies of agricultural methods in other countries and ways they could be applied to us farmers;

TITLE VIII: EDUCATION, TRAINING AND DEMONSTRATION PROGRAMS

This title contains new programs and amends old programs to change the emphasis of existing education and demonstration programs. These include the following:

(a) Broadening the small farm extension program (often called the "para-professional program") to apply it to every state to help small farmers with financial, managerial, credit, bookkeeping marketing, conservation, and choices of cropping assistance which will help lower costs. This assistance shall include providing information and training on pest control, new crops and better machinery, etc. The para-professionals hired to do this shall be mostly local people, and preferably consist of small farmers themselves.

(b) Establishing Farm Demonstration and Training Centers in each state, located in rural areas, to help train new farmers in improved methods of small and moderate-sized farming and simultaneously demonstrate the new methods and technologies being researched which are energy-efficient, low-in-cost, and environmentally protective.

These Centers shall be managed by the agency, group or individual in each state whose proposal is approved by the Family Farm Development Service and funded by the service.

Instruction to students will include all basic skills needed to operate and manage a small family farm—bookkeeping, machinery repair, carpentry, livestock and crop production, soil and water maintenance and protection, etc.—utilizing those new methods and technology which are energy-efficient, low-in-cost and ecological.

Tours of these Centers and demonstrations shall be provided to farmers and interested groups on a regular basis; reports on costs, energy-savings, soil erosion and quality, and other pertinent statistics of the Centers' operation shall be prepared annually.

(c) Training one USDA agent per state to help instruct small and family farmers in installing and operating appropriate technology;

(d) Establishing a new USDA program to instruct and demonstrate biological and integrated pest control methods, and soil and water conservation methods to family farmers; also to instruct methods to increase soil humus content of soil;

(e) Authorizing new USDA program called the "Apprenticeship Program" to establish a system to help farmers needing workers, and young people wishing to learn how to farm, contact, each other. If an apprentice works for 3 years, this then counts as eligibility for a young farmer loan program to buy and operate a farm.

TITLE IX

The Secretary of Agriculture is authorized to establish regulations by which retail stores shall display signs under all major food commodities which compare the "unit price" to the price received by the farmer for the food value within that community.

Through this mechanism consumers will be able to see the percentage of the price they are paying for the commodity that the farmer received for his product.●

By Mr. PAUL G. HATFIELD:

S. 2746. A bill to maintain in effect for 1978 and succeeding years the social security tax rate which was in effect for 1977, and to provide that there shall be paid into the social security trust funds from general revenues an amount equal to the difference in social security taxes actually received by them and the amount which would have been received by them if the social security tax rates prescribed by existing law for such years had continued in effect; to the Committee on Finance.

SOCIAL SECURITY INCREASE ROLLBACK

● Mr. PAUL G. HATFIELD. Mr. President, the bill that I am introducing today will roll back the social security payroll tax immediately to the rate in effect last year, providing the tax relief so desperately needed by the Nation's wage earners and their employers.

It also will provide temporary general revenue financing to replenish the trust fund, giving Congress time for reconsideration of ways to insure the long-term integrity of the social security system without having to increase the patently unfair payroll tax.

I believe that a long term solution to the depletion of the trust fund requires that disability and hospitalization portions of social security be paid out of general revenues, financed by the progressive income tax. Funding of old age and survivors insurance—the basic retirement security under the system—should continue to be financed by payroll tax contributions.

I have joined in sponsoring legislation introduced on February 6 by the dis-

tinguished Senator from Wisconsin (Mr. NELSON) to accomplish this objective. But such a fundamental change will require time for careful study and deliberation, and it is becoming clearer every day that we must act—now—to provide real relief for those hit hardest by the new payroll taxes, the lower and middle income wage earner and the small businessman. Unless we do so, the families already so heavily burdened by inflation can only be plunged deeper into nagging financial worry, despair, and hardship.

Without such relief, the Nation's improving employment and economic picture could change suddenly and drastically for the worse.

Mr. President, the new social security taxes approved by this Congress late last year will take almost $227 billion from workers and their employers during the next decade, beginning next January 1. That increase—the largest peacetime tax hike in the memory of most Americans—will be on top of another increase, mandated earlier, which this year is taking about $3.3 billion more from the 108 million Americans and their employers who are presently contributing to the system.

The billions of dollars taken out of worker's paychecks for these taxes can only mean less consumer purchasing power, economic stagnation, and, ultimately, more people out of work. And at the same time, employers will have to pass the higher costs of their share of the payroll tax along to consumers, pushing prices ever higher for most of the things we buy.

We cannot allow these conditions to occur, especially now, when economic stimulation and new jobs—without runaway inflation—are needed for our economic well-being.

Certainly we can and must maintain a sound, fully funded social security system. The 33 million Americans receiving benefits today, along with those still contributing, must be assured that the trust fund will not go broke and leave them out in the cold. But the worst way of accomplishing this is by boosting the payroll tax, an indisputedly unfair tax that costs rich and poor alike without any adjustment whatsoever for ability to pay.

Mr. President, I do not need an opinion poll to tell me how most Montanans feel about President Carter's proposals for tax relief. The logger and miner, the farmer and rancher, the housewife and average family breadwinner—all tell me they do not believe the administration's proposals will provide needed help.

We do need an overall net tax reduction at or near the $25 billion envisioned in his proposals. But in my judgment, the notion of "offsetting" increases in the social security payroll tax by cutting the progressive individual income tax is without merit. This roundabout approach is unnecessarily complicated. Because of the mismatch of the two different tax systems, it will not assure relief for many families—particularly the middle income wage earners—who, despite a somewhat lower income tax bill—will wind up paying the same or even more to the Federal Government after the new social security payroll taxes are added on.

The bill I am introducing today will immediately cut back the regressive payroll tax to the 5.85-percent rate in effect prior to last January 1. It will allow necessary time to consider ways to finance a portion of social security benefits permanently through general revenues.

Temporarily, for a 2-year period, my bill also provides for use of general revenues to keep the trust fund in the black while Congress finds a fairer, more sensible way to finance the social security system. The cost to the Treasury will be about $2.2 billion for the remainder of this year, plus $5.5 billion for next year. This reduction in social security obligations will represent significant and direct tax relief until 1980.

Mr. President, the average American family is suffering from a massive overdose of payroll taxation. Our Nation's economy is in jeopardy. Real relief is urgently needed.

I ask unanimous consent that my bill to roll back the payroll tax be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2746

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) (1) section 3101(a) of the Internal Revenue Code of 1954 (relating to tax on employees for purposes of old-age, survivors, and disability insurance) is amended to read as follows:

"(a) Old-Age, Survivors, and Disability Insurance.—In addition to other taxes, there is hereby imposed on the income of every individual a tax equal to 4.95 percent of the wages (as defined in section 3121(a)) received by him after December 31, 1977, with respect to employment (as defined in section 3121(b).".

(2) Section 3111(a) of such Code (relating to tax on employers for purposes of old-age, survivors, and disability insurance) is amended to read as follows:

"(a) Old-Age, Survivors, and Disability Insurance.—In addition to other taxes, there is hereby imposed on every employer an excise tax, with respect to having individuals in his employ, equal to 4.95 percent of the wages (as defined in section 3121(a)) paid by him after December 31, 1977, with respect to employment (as defined in section 3121(b)).".

(3) Section 1401(a) of such Code (relating to tax on self-employment income) is amended to read as follows:

"(a) Old-Age, Survivors, and Disability Insurance.—In addition to other taxes, there shall be imposed for each taxable year beginning after December 31, 1977, on the self-employment income of every individual, a tax equal to 7.0 percent of the amount of the self-employment income for such taxable year.".

(b)(1) Section 3101(b) of such Code (relating to tax on employees for purposes of hospital insurance) is amended to read as follows:

"(b) Hospital Insurance.—In addition to the tax imposed by the preceding subsection, there is hereby imposed on the income of every individual a tax equal to 0.90 percent of the wages (as defined in section 3121(a)) received by him after December 31, 1977, with respect to employment (as defined in section 3121(b)).".

(2) Section 3111(b) of such Code (relating to tax on employers for purposes of hospital insurance) is amended to read as follows:

"(b) Hospital Insurance.—In addition to the tax imposed by the preceding subsection, there is hereby imposed on every employer an excise tax, with respect to having individuals in his employ, equal to 0.90 percent of the wages (as defined in section 3121(a)) paid by him after December 31, 1977, with respect to employment (as defined in section 3121(b)).".

(3) Section 1401(b) of such Code (relating to tax on self-employment income for purposes of hospital insurance) is amended to read as follows:

"(b) Hospital Insurance.—In addition to the tax imposed by the preceding subsection, there is hereby imposed for each taxable year beginning after December 31, 1977, on the self-employment income of every individual, a tax equal to 0.90 percent of the amount of the self-employment income for such taxable year.".

SEC. 2. In the administration of sections 201 and 1817 of the Social Security Act—

(1) there shall be deemed to have been imposed by the Internal Revenue Code of 1954 the same amount of taxes as would have been imposed by such Code had the first section of this Act not been enacted, and

(2) there shall be deemed to have been paid an amount of such taxes equal to the difference in the amount actually paid and the amount which would have been paid if the first section of this Act had not been enacted and all persons liable for the payment of such tax had made timely payment of the difference in the amount for which they were actually liable and the amount for which they would have been liable if the first section of this Act had not been enacted.●

By Mr. HASKELL:

S. 2747. A bill to provide for a study of methods by which individuals could be aided in filing their Federal income tax returns; to the Committee on Finance.

● Mr. HASKELL. Mr. President, I am introducing a bill which will provide for the study of certain problem areas and areas of complexity in our tax laws. The purpose of the study is to provide solutions to these problems which might be implemented in order that taxpayers might have an easier time filling out their Federal income tax returns.

Specifically, I have asked for a study to find ways to simplify the tax provisions and forms relating to low income, disabled, and retired taxpayers; cases involving medical interns and residents, sales and exchanges of residences, income averaging; cases involving divorced individuals and the payment of alimony and child support; and a means of eliminating the so-called "marriage penalty."

I have also directed that the study consider the feasibility of having senior citizens file their tax returns on June 15 instead of April 15 so that they do not have to go out in the colder months to obtain taxpayer assistance for their complicated tax problems. I would also like them to be able to make scheduled appointments at the IRS so that they do not have to wait in long lines to have their questions answered.

I feel that Congress ought to have as an objective the simplification of tax forms to an extent that either every American can fill out his own return without the help of a return preparer, or let the IRS fill out the returns of all those who cannot.

In recent years, more than 50 percent of taxpayers in all income groups have used return preparers. Of this 50 percent,

only 3 percent of all returns are prepared by the IRS.

It is no wonder that so many people seek professional help in the preparation of their tax returns. A 1971 HEW study showed that reading the form 1040 instructions required a college-level reading ability.

In an attempt to clarify things the instructions for the 1040 forms have gone from one page in 1913 to 40 pages in 1975. Is the problem the forms or is it the underlying Tax Code? I believe that it is the Tax Code. If we take certain gray areas of the law and make them black or white, this sharpened picture could then be reflected on the forms.

In my bill I have called for a study to be done of certain provisions which affect mainly retired and low- and middle-income Americans. I would like to find solutions to some of these problems.

What are the problems I am talking about? The marriage penalty for one. Maybe if there were only one schedule at the single rates the inequality and complexity could be solved. Instead we have four schedules and people have to do their taxes maybe two or three times to figure out which way is most advantageous. And, if married people file separate returns, then they have the added complexity of figuring out who gets what deduction and how much credit, and so forth. And, add to that the situation of divorced taxpayers with children, and income averaging, and the waters get really murky.

The tax law is still too complicated in areas that touch low-income people, the elderly and just the average taxpayer. Examples are the earned income credit, the credit for the elderly and the medical expense deduction. However, we should not "simplify" by simply taking away deductions like the medical expense deduction or the deduction for home mortgage interest, or deferral of gain on the sale of residence. We must simplify by making these gray areas black and white.●

By Mr. JAVITS:

S. 2748. A bill to provide an improved consolidation of educational programs under title IV of the Elementary and Secondary Education Act, and for other purposes; to the Committee on Human Resources.

By Mr. JAVITS (for himself and Mr. PELL):

S. 2749. A bill to revise and extend the program for gifted and talented children in order to provide a consolidation of that program with other educational programs, and for other purposes; to the Committee on Human Resources.

GIFTED AND TALENTED CHILDREN—EDUCATION CONSOLIDATION IMPROVEMENT

Mr. JAVITS. Mr. President, I am pleased to introduce today, with my colleague Senator PELL, the chairman of the Subcommittee on Education, Arts and Humanities, new legislation which will enable America's gifted and talented children to receive educational services commensurate with their needs.

This legislation does not add yet another separately administered program to the long list of education programs. Instead, it proposes to incorporate an expanded effort for gifted and talented children into an already existing and more efficient delivery system: The consolidation framework constructed in title IV of the 1974 Elementary and Secondary Education Amendments.

THE FEDERAL ROLE IN GIFTED AND TALENTED

Until recently, America's gifted and talented children were among our most neglected minorities. With the advent of a cooperative effort at the Federal, State, and local levels, based largely upon such initiatives as the gifted and talented component of the Special Projects Act, which I authored in 1974 and with the support of Senator PELL and Senator STAFFORD we are at last beginning to remedy this neglect. Yet we cannot be satisfied alone with the current thrust of this effort, for we have only begun to identify and reach these children with new methods and programs. This legislation will improve and expand the current effort, and provide the crucial next step in a history of State and Federal action which has been all too short.

I believe that the gifted and talented child has traditionally been the victim of a nonpolicy. The National Defense Education Act of 1958 was largely a response to a perceived superiority in educational and scientific programs in the Soviet Union. The NDEA was our first visible effort to identify and educate gifted children, and it emphasized training those children demonstrating outstanding scientific, mathematical, or technical ability. The intent of NDEA—to improve America's relative educational status and enable our children to reach their maximum potential—was both noble and pragmatic. Yet should we again require the kind of stimulus from which NDEA resulted to reaffirm the commitment of the American people to achieve their vast potential?

The problem of the gifted and talented has not been well enough understood. There exists a pervasive opinion that these children constitute an elite group who will automatically, by the very nature of their outstanding abilities, reach the top in their respective fields of expertise. Yet this assumption does not begin to account for the fact that the talents of the gifted are frequently potential talents, and may only be made actual through a major effort to identify these children and provide them with necessary special instructional programs. Only last year, less than 4 percent of the gifted and talented children in this country were receiving services commensurate with their needs. This means that over 1.9 million gifted children were seriously impeded in their educational progress. There is an implicit, unacceptable cost, a cost which must be borne by all of us, to leaving this precious resource untapped.

In 1969, I authored a provision of Public Law 91-230, the Education Amendments of 1969, mandating the Commissioner of Education to evaluate the status of education of the gifted and talented, examine the role of Federal, State, and local assistance to these children, and recommend new programs to meet current and future needs. The resultant report to Congress in 1972, "Education of the Gifted and Talented," commonly known as the Marland Report, was a landmark document, one which indicated a lack of resources for gifted and talented children at all levels of Government and a concomitant need for an increased Federal role to narrow the vast gap between the need for services and actual services provided.

Six years ago, when the Marland Report was released, only 10 States had a single staff person working even half-time on the gifted and talented in their Departments of Education. State and local efforts to establish programs were thus sporadic at best. To begin to meet the needs of our gifted population, the legislation was initiated which resulted in the gifted and talented program under the Special Projects Act in 1974. Special projects were a new concept to allow new ideas a period of gestation in which they could prove their worth. A "basket" of seven new Federal demonstration programs was established. I believe the time has come to remove the gifted and talented program from the basket and to enact regular authority to continue these efforts.

THE NEED FOR NEW LEGISLATION

The authority given to the Commissioner of Education under the Federal gifted and talented program has been successful in doubling the capacity of State education agencies to identify and serve gifted children. Yet the $2.56 million current appropriation for this program is insufficient. If the estimate of 2 million gifted and talented children in this country is even roughly correct, then this expenditure of little more than $1 per gifted child is the merest minimal price to pay to identify the gifted and enhance not merely their lives but, through them, the lives of all of us and, it is less than a quarter of the annual authorization of $12.25 million.

This minimal current Federal expenditure in the gifted and talented program assists, through competitive grants, nascent programs in slightly more than half the States. In addition, these funds support projects of educator and leadership training and a small, though diverse, range of demonstration projects sponsored by local education agencies. In fiscal year 1976, over 400 applications for local project funding were received by the Office of the Gifted and Talented; more than 20 applications were received for each such project funded. Obviously, current needs are thus not being served by efforts at either the local or Federal level. There is a great, heretofore unsatisfied demand for a new legislative direction to meet both present and future requirements of the gifted and talented children who represent the best of America's patrimony.

The issue here is not merely one of increased funding for the existing program. Rather, the Federal role must be to give direction and coherence to a more broadly based program of State and local support for gifted and talented education. In strengthening this program, I propose that we act within the broader

framework of ESEA title IV, which contains mechanisms for a flexible and streamlined distribution of funds without sacrifice of individual program identities.

THE ROLE OF GIFTED AND TALENTED IN ESEA IV

Title IV of the Education Amendments of 1974 included both the consolidated State-grant program and the new Special Projects Act, the purpose of which was to create transitional demonstration projects in seven categorical areas. One of these areas is the current Federal gifted and talented program. After 2 years of funding, it is time to reevaluate each of the programs. Congress has already began to unbundle the basket through the recent passage of the Career Education Incentive Act, thus making career education, formerly part of the Special Projects Act, a free-standing Federal program.

Similarly, the gifted and talented program deserves special attention. Current needs, as I mentioned previously, are not being met by the small-scale demonstration project thrust of Federal gifted and talented activity. This bill, by creating a new part within the title IV consolidation, establishes the necessary and proper focus for the gifted and talented, yet does not expressly create another categorical education program. By using the current concepts and mechanisms of the title IV–A State plan and title IV–C allocation formula for the gifted and talented program, the new part D will be relatively simple to administer at both the State and Federal levels.

Furthermore, as a program of educational innovation, part D is consistent with the philosophic framework of the title IV consolidation accomplished in the Education Amendments of 1974. Some States, such as New York, currently designate the education of gifted and talented children as a title IV–C priority area and allocate additional Federal funds provided in the consolidation for such purposes. Although title IV has been a major vehicle for the advancement of the gifted and talented in New York State, resources remain insufficient. The gifted throughout our Nation require more of this kind of support. This bill will finally provide support for the gifted and talented on a truly national scale.

Our purpose is to give gifted and talented children a greater focus of support at the Federal, State, and local levels. I believe this bill accomplishes this goal within a clear and efficient framework. The Council for Exceptional Children (CEC), an organization whose membership has done much to advance the education of handicapped and gifted children, has recently suggested possible legislative changes which it believes would also improve educational opportunities for the gifted and talented. Included in CEC's recommendation is a proposed expansion of the Commissioner's discretionary programs under the Education of the Handicapped Act to include gifted and talented, as well as handicapped children. CEC has also suggested a simple statutory change in the name of the current Office of Education Bureau of Education of the Handicapped (BEH) to the Bureau of Education of Exceptional Persons (BEEP), in order to serve all children with special educational needs.

We must certainly make every effort to assist both our gifted and handicapped children. Many of the major organizations serving both the gifted and handicapped populations have voiced concern, however, that the inclusion of the gifted and talented in current handicapped education programs could create competition between the handicapped and gifted for limited funds appropriated under the Education of the Handicapped Act. Such competition should not be created, and I believe this legislation obviates this by establishing authority for gifted and talented funding separate from the Education of the Handicapped Act.

I invite the views of my colleagues and other interested parties regarding the BEEP concept. The gifted and talented and the handicapped are unquestionably exceptional, and we should not exclude suggested improvements in serving these too-long neglected children from our consideration.

SUMMARY OF GIFTED AND TALENTED BILL

The bill creates a new part D in title IV of the Elementary and Secondary Education Act, with a $50 million annual authorization, and provides for grants to States pursuant to their approved title IV State plans, which shall be expanded to include a gifted and talented component. The distribution of assistance to the States and from State to local education agencies will function in a manner similar to that of the current ESEA title IV–C mechanism; that is moneys allotted to the States based upon relative proportion of population children ages 5 through 17 and distributed by the SEA to local education agencies on a competitive grant basis. Each State receiving funds under title IV–D must insure that at least 25 percent of its allotment goes toward the identification of disadvantaged gifted children, a population underserved and inadequately identified in existing State and Federal programs.

The new Federal gifted and talented program will be primarily one of financial assistance and encouragement to State efforts to serve gifted and talented children rather than federally administered support. Thus, the States are expected to match Federal support for their programs with funds of their own, gradually phasing into a 50–50 Federal-State match in fiscal year 1983. This encourages growth within State programs to a point where each State's gifted and talented population may begin to be adequately served.

This legislation provides that 75 percent of the funds appropriated under part D be reserved to the States for distribution to LEA's. The Commissioner of Education is given discretionary authority over the remaining 25 percent of funds appropriated. This discretionary fund is to be used for activities similar to those currently funded under the gifted and talented component of the Special Projects Act—training of leadership personnel and educators, model projects of identification and education, and an information clearinghouse. This distinction between State and Federal discretion within this new Federal program enables States and localities to best determine their own need for services to gifted and talented children while simultaneously insuring proper Federal coordination of this effort. Furthermore, the Commissioner's discretionary authority allows targeting of funds to areas of greatest need nationally.

In conclusion, Mr. President, the current scope of our country's effort in the field of the gifted and talented is limited, given the ultimate potential benefits to our Nation of a massive effort to identify and develop the talents of every gifted American child. The long-term benefits of our future policy, of which the legislation which we introduce today will form the crux, will be fully evident when our gifted children reach positions of leadership in their respective fields, and perform in these positions to their maximum capacity, with wisdom and sensitivity.

The quality of our future rests largely in the hands of our gifted and talented children, and their future rests largely with us. We have a clear obligation, to them and to ourselves, which this legislation can begin to fulfill.

THE EDUCATION CONSOLIDATION IMPROVEMENT AMENDMENTS

Mr. President, in addition to introducing the gifted and talented measure, I would like to alert my colleagues to certain flaws in the title IV consolidation design which have emerged since the consolidation took effect. The current review of elementary and secondary education programs is an opportunity to apply recent experience to refine the consolidation mechanisms. I am introducing today a second bill containing perfecting amendments which will further improve the delivery of services through the consolidation framework. The education consolidation improvement amendments are drafted to be merged with the new Gifted and Talented Education Act.

THE TITLE IV DELIVERY SYSTEM

In recent years, the proliferation of paperwork and the administrative complexity resulting from the numerous categorical education programs have evolved into a major issue challenging the legislative imagination of the Congress. Congress took a significant step toward meeting this challenge in the Education Amendments of 1974 by incorporating, or consolidating, separate categorical authorities for certain programs under a single title. Previous authorities for school libraries, learning resources, guidance, counseling, and testing are combined into a single formula grant to each State. State education agencies pass the funds onto their local school districts according to individually devised State formulas. Local districts have considerable discretion in using their allocations for any or all of the several program purposes as they see fit. A second formula grant goes to States for previously separate educational innovation, support, and demonstration purposes. States reallocate these funds to

local school districts on a competitive grant basis, setting their own priorities among the several categories. States apply for both of these grants under a single State plan to the Commissioner of Education. This consolidation framework was designed to fulfill two objectives: First, to retain the identity of those Federal programs which clearly respond to a national need; and, second, to simplify the procedures for administering the programs, in order to provide needed and improved educational services to children with greater efficiency and effectiveness. I believe that we should pursue consolidation approaches to the extent that we can satisfy these objectives.

Since the 1974 consolidation, educators and concerned legislators have continued to search for ways to clarify and simplify the range of education programs. One of the most significant attempts to attack the paperwork and administrative problems was undertaken by my colleagues Senators DOMENICI and BELLMON. Their proposed Optional Education Simplification Act is the result of an innovative effort to restructure the many education programs in a functionally logical manner. While their proposal, in my view, may not fully satisfy the objective of retaining the Federal program purposes, we can certainly benefit from the ideas it offers as we consider the education legislation this session.

We are now in the third year of operating programs under the consolidation instituted by the 1974 amendments. As is to be expected with any new and different approach, there have been both positive and negative reports of the efficacy of the design. The consensus is that the general framework is a sound delivery system, but that modification is needed. During House and Senate hearings this past year, witnesses repeatedly noted two flaws in the construction: One in the formula grant to local school districts; the other, in the single application requirement for local districts.

The formula allocation to a school district can be spent, as the district chooses, both for things—material items such as books and learning materials for libraries, classrooms, and school laboratories—and for people—salaries for guidance and counseling personnel. The flaw appears in practice when competition develops between expenditures for things and people. Several groups have pointed out that such competition is illogical within a single formula grant and impedes, rather than facilitates, program implementation.

Among those groups, the American Federation of Teachers, the Council of Chief State School Officers, and the American Personnel and Guidance Association have recommended that the guidance and counseling activities be funded separately from the libaries and learning resources. The American Association of Media Producers' testimony described the competition as a factor retarding the impetus of the consolidation effort. The Domenici/Bellmon consolidation proposal also recognized this problem and recommended a separate treatment of guidance and counseling programs.

The libraries/learning resources and guidance/counseling programs have clearly not blended smoothly within the title IV formula allocation as had been hoped. A new support mechanism is needed to sustain the individual program purposes without losing the workable and desirable characteristics of the existing legislation: Most notably, the distribution formulas and the local discretion in use of the funds.

A second weakness in the consolidation structure of the requirement that local school districts combine their requests for formula and competitive grant funds into a single annual application to the State education agency. While this provision was undoubtedly intended to simplify application procedures, it has unfortunately produced the opposite effect and has compounded the difficulties in initiating and supporting a variety of projects. The fundamentally different funding methods, formula verus competitive grants, demand quite different application time tables and funding award processes for best results. New York State Education Commissioner Gordon Ambach testified that—

There are occasions when we need to have competition for IV–C funds several times a year. We would like to have offered planning grants to districts which were anxious last June to begin planning and operating this past summer.

According to Ambach and the Council of Chief State School Officers, the rigidity of the annual application contradicts the innovative purpose of the competitive grants, sets an unnecessary deadline for formula grant applications, and generally precludes State and local education agencies from making optimal use of the funds.

By dealing with these problems within the context of the consolidation framework, we can further develop the strengths of the existing title IV delivery system.

I ask unanimous consent that the texts of the two bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. (a) (1) Section 401(a) (1) of the Act is amended—

(A) by striking out "$395,000,000" and inserting in lieu thereof "$345,000,000", and

(2) Section 401(a) (2) (A) (ii) of the Act is amended by striking out "and so much of title III as relates to testing, guidance and counseling".

(b) Section 401(b) (1) of the Act is amended by striking out "October 1, 1979" and inserting in lieu thereof "October 1, 1983".

(c) Section 401 of the Act is amended by redesignating subsection (e) and all references thereto, as subsection (f), and by adding after subsection (d) of such section the following new subsection:

"(e) (1) (A) Subject to the provisions of paragraph (2), there is authorized to be appropriated the sum of $50,000,000 for obligation by the Commissioner during the fiscal year 1979 and for each succeeding fiscal year ending prior to October 1, 1983, for the purpose of making grants under subpart 1 of part E (Guidance, Counseling and Testing; Formula Grants) of this Act.

"(B) There is authorized to be appropriated the sum of $20,000,000 for the fiscal year 1979 and for each succeeding fiscal year ending prior to October 1, 1983, for the purpose of carrying out subpart 2 of part E (Guidance and Counseling; Discretionary Grants) of this Act.

"(2) No funds are authorized to be appropriated under this subsection for obligation by the Commissioner during any fiscal year unless—

"(A) (i) the aggregate amount which would be appropriated under this subsection for subpart 1 of part E and under subsection (a) of this section is at least equal to the aggregate amount appropriated for obligation by the Commissioner during the preceding fiscal year in which part B and subpart 1 of part E was in effect, or

"(ii) in the case of appropriations under this subsection for the first fiscal year in which subpart 1 of part E is in effect, the amount appropriated for part B plus the amount appropriated for subpart 1 of part E is at least equal to the aggregate amount appropriated for obligation by the Commissioner for the fiscal year 1978 under part B, and

"(B) the sums appropriated pursuant to this subsection are included in an act making appropriations for the first year prior to the fiscal year in which such sums will be obligated, and are made available for expenditure prior to the beginning of such fiscal year.

(d) Section 401(f) of this Act (as redesignated by subsection (c) of this section) is amended by—

(A) striking out "October 1, 1979" and inserting in lieu thereof "October 1, 1983", and

(B) striking out "the allotment under section 402(a) (2)" and inserting in lieu thereof "the aggregate of the allotments under section 402(a) (2) and section 402 (a) (4)".

ALLOTMENT

SEC. 3. (a) (1) The first sentence of section 402(a) (1) of the Act is amended by striking out "subsections (a), (b), or (d)" and inserting in lieu thereof "subsections (a), (b), (d), or (e)".

(2) The second sentence of such section is amended by striking out "under part B, part C, or part D" and inserting in lieu thereof "under part B, part C, part D, or subpart 1 of part E".

(b) Section 402 of the Act is amended by redesignating paragraph (4) of such section as paragraph (5) and by adding immediately after paragraph (3) the following new subparagraph:

"(4) From the amounts appropriated to carry out subpart 1 of part E of this title for any fiscal year pursuant to subsection (e) of section 401, the Commissioner shall allot to each State from such amount an amount which bears the same ratio to such amount as the number of children aged five to seventeen, inclusive, in the State bears to the number of such children in all States.".

(c) Section 402(b) of the Act is amended by striking out "part B, C, or D" and inserting in lieu thereof "part B, C, D, or subpart 1 of part E".

STATE PLANS

SEC. 4. (a) Section 403(a) (2) of the Act is amended by striking out "parts B, C, and D" and inserting in lieu thereof "parts B, C, D, and subpart 1 of part E".

(b) Section 403(a) (4) (A) of the Act is amended by inserting after "section 401(a)" the following: "and from appropriations made under section 401(c) (1) (A)".

(c) Section 403(a) (5) is amended by inserting "(A)" immediately after "provides that" and by adding the following new subparagraph at the end of such section: "and (B) each local educational agency will be given complete discretion (subject to the provisions of section 406) in determining how funds it receives from appropriations made under section 401(e) (1) (A) will be

divided among various programs described in section 451;".

(d) Section 403(a)(7) of the Act is amended by striking out "under any program" and inserting in lieu thereof "allotted".

(e) Section 403(a)(8)(E) of the Act (as added by section 103) is amended—

by inserting after "part D" a comma and the following: "and subpart 1 of part E".

(f) Section 403(a)(11) of the Act is amended by striking out "and section 431 (a)" and inserting in lieu thereof a comma and the following: "section 431(a), and section 451".

PAYMENTS

SEC. 5. Section 405(a) of the Act is amended by striking out "parts B and C" and inserting in lieu thereof "parts B, C, and subpart 1 of part E".

PROGRAM AUTHORIZED

SEC. 6. (a) Title IV of the Act is amended by adding after part D the following new part:

"PART E—GUIDANCE, COUNSELING, AND TESTING

"Subpart 1—Formula Grants

"PROGRAM AUTHORIZED

"SEC. 451. The Commissioner shall carry out a program for making grants to States (pursuant to State plans approved under section 403) for—

"(1) programs of testing students in elementary and secondary schools,

"(2) programs of counseling and guidance services for students at the appropriate levels in elementary and secondary schools designed (A) to advise students of courses of study best suited to their ability, aptitude and skills, (B) to advise students with respect to their decisions as to the type of educational program they should pursue, the vocation they should train for and enter, and the job opportunities in the various fields, and (C) to encourage students to complete their secondary school education, take the necessary courses for admission to postsecondary institutions suitable for their occupational or academic needs, and enter such institutions, and such programs may include short term sessions for persons engaged in guidance and counseling in elementary and secondary schools, and

"(3) programs, projects and leadership activities designed to expand and strengthen counseling and guidance services in elementary and secondary schools.

"Subpart 2—Discretionary Grants

"FINDINGS

"SEC. 456. The Congress finds that—

"(1) guidance and counseling activities are an essential component to assure success in achieving the goals of many education programs;

"(2) lack of coordination among guidance and counseling activities supported jointly or separately by Federal programs and by State and local programs has resulted in an underutilization of resources available for such activities; and

"(3) increased and improved preparation of education professionals is needed in guidance and counseling, including administration of guidance and counseling programs at the State and local levels, with special emphasis on inservice training which takes educational professionals into the workplaces of business and industry, the professions, and other occupational pursuits, and that increased and improved use of individuals employed in such pursuits are needed for effective guidance and counseling programs, including (A) bringing persons employed in such pursuits into schools, and (B) bringing students into such workplaces for observation of, and participation in, such pursuits, in order to acquaint the students with the nature of the work.

"PROGRAM AUTHORIZED

"SEC. 457. (a) The Commissioner is authorized, on a competitive basis, to enter into contracts and make grants to State and local educational agencies, to institutions of higher education, and to private nonprofit organizations to assist them in conducting institutes, work shops, and seminars designed to improve the professional guidance and counseling qualifications of teachers and counselors in State and local educational agencies and nonpublic elementary and secondary school systems, including—

"(1) programs providing opportunities for teachers and guidance counselors in such agencies and systems to obtain experience in business and industry, the professions, and other occupational pursuits,

"(2) for the purpose of such improvement, programs, services, or activities which bring individuals with experience in such pursuits into schools as counselors or advisors for students, and which bring students into the workplaces of such pursuits to acquaint students with the nature of the work,

"(3) programs providing training for supervisory and technical personnel in such agencies and systems having responsibilities for guidance and counseling, and

"(4) programs improving supervisory services in the field of guidance and counseling.

"(b) The Commissioner is authorized to make grants to States to assist them in carrying out programs to coordinate new and existing programs of guidance and counseling in the States.

"ADMINISTRATION

"SEC. 458. (a) The Commissioner shall establish or designate an administrative unit within the Education Division for purposes of—

"(1) carrying out provisions of this section;

"(2) providing information regarding guidance and counseling as a profession, guidance and counseling activities of the Federal Government, and, to the extent practicable, activities of State and local programs of guidance and counseling; and

"(3) advising the Commissioner on coordinating guidance and counseling activities included in all programs which he is authorized to carry out, and, to the extent he deems practicable, how such activities may be coordinated with other programs of the Federal Government and State and local guidance and counseling programs.

"(b) The Commissioner may reserve an amount not to exceed 5 per centum of the sums appropriated for this subpart to carry out the provisions of this section.".

(c)(1) Section 421(a) of the Act is amended by inserting "and" after clause (1), by striking out the semicolon and "and" after clause (2) and inserting in lieu thereof a period and by striking out clause (3) of such section.

(2) Section 421(b) of the Act is amended by striking out "so much of title III as relates to testing, counseling, and guidance".

S. 2749

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Gifted and Talented Education Act of 1978".

AUTHORIZATION

SEC. 2. Section 401 of the Elementary and Secondary Education Act of 1965 (hereinafter in this Act referred to as the "Act") is amended by redesignating subsection (d), and all references thereto, as subsection (e), and by adding after subsection (c) of such section, the following new subsection:

"(d) There is authorized to be appropriated the sum of $50,000,000 for obligation by the Commissioner during the fiscal year 1979 and for each of the four succeeding fiscal years, for the purpose of making grants under part D (Education of Gifted and Talented Children) of this title.".

ALLOTMENT

SEC. 3. (a)(1) The first sentence of section 402(a)(1) of the Act is amended by striking out "subsections (a) or (b), or both," and inserting in lieu thereof "subsections (a), (b), or (d) or under any such subsection,".

(2) The second sentence of such section is amended by striking out "under part B or part C, or both" and inserting in lieu thereof "under part B, part C, or part D, or any such part,".

(b)(1) Section 402(a)(2) of the Act is amended by striking out the second and the third sentence thereof.

(2) Section 402(a) of the Act is amended by inserting after paragraph (2) the following new paragraphs:

"(3) From the amounts appropriated to carry out part D of this title for any fiscal year pursuant to subsection (d) of section 401, the Commissioner shall reserve 75 per centum of such amounts to be allotted to the States. The Commissioner shall allot to each State from such amount so reserved an amount which bears the same ratio to such amounts so reserved as the number of children aged five to seventeen, inclusive, in the State bears to the number of such children in all the States.

"(4) For the purpose of this subsection, the term 'State' shall not include Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands. The number of children aged five to seventeen, inclusive, in a State and in all States shall be determined by the Commissioner on the basis of the most recent satisfactory data available to him.".

(c) Section 402(b) of the Act is amended by striking out "part B or C" and inserting in lieu thereof "part B, C, or D".

STATE PLANS

SEC. 4. (a) Section 403(a)(2) of the Act is amended by striking out "parts B and C" and inserting in lieu thereof "parts B, C, and D".

(b) Section 403(a)(8) of the Act is amended by striking out "and" at the end of clause (B), by striking out the semicolon at the end of clause (C) and by adding at the end thereof the following new clause:

"(D) that not less than 25 per centum of the amounts which such State receives from its allotment under sections 401(d) and 402(a)(3) in any fiscal year shall be used to make payments to local educational agencies to be used by local educational agencies for programs and projects which include identification and education of disadvantaged gifted and talented children from low-income families; and

"(E) from the funds described under clause (A), the State will administer the provisions of State plans relating to section 441(a) of part D.

(c) Section 403(a) of the Act is amended by striking out "and" at the end of paragraph (10), by striking out the period at the end of paragraph (11), and inserting in lieu thereof a semicolon and the word "and", and by adding at the end thereof the following new paragraphs:

"(12) provide, with respect to programs and projects authorized by part D of this title—

"(A) satisfactory assurance that funds paid to the State from its allotment will be expended solely to plan, establish, and operate programs and projects which—

"(i) are designed to identify and to meet the special educational and related needs of gifted and talented children, and

"(ii) are of sufficient size, scope, and quality as to hold reasonable promise of making substantial progress toward meeting those needs;

"(B) that the State educational agency will establish such policies and procedures as are necessary for acquiring and disseminating information derived from educational research, demonstration and pilot projects, new educational practices and techniques, and the evaluation of the effectiveness of the program or project in achieving its purpose; and

"(13) provide that funds made available to any local educational agency from the State's allotment for the programs authorized under part D of this title may be used for the acquisition of instructional equipment to the extent such equipment is necessary to enhance the quality or the effectiveness of the program for which the application by such an agency is made.".

PAYMENTS

SEC. 5. Section 405 of the Act is amended by inserting "(a)" after the section designation, and by adding at the end thereof the following new subsection:

"(b)(1) From the amounts allotted to each State under section 402(a)(3) for carrying out programs authorized by part D, the Commissioner shall pay to that State an amount equal to the Federal share of the amount expended by the State in carrying out its State plan (after withholding any amount necessary pursuant to section 406(f)).

"(2) The Federal share for the fiscal year 1979 shall be 90 per centum, for the fiscal year 1980, 80 per centum, for the fiscal year 1981, 70 per centum, for the fiscal year 1982, 60 per centum, and for the fiscal year 1983, 50 per centum.".

PROGRAM AUTHORIZED

SEC. 6. Title IV of the Act is amended by adding at the end thereof the following new part:

"PART D—EDUCATION OF GIFTED AND TALENTED CHILDREN

"PROGRAM AUTHORIZED

"SEC. 441. (a) The Commissioner shall carry out a program from 75 per centum of the amounts appropriated pursuant to section 401(d) (for making grants to the States pursuant to States plans approved under section 403) for the planning, development, operation, and improvement of programs and projects designed to meet the special educational needs of gifted and talented children at the preschool and elementary and secondary school levels.

"(b) From 25 per centum of the sums appropriated pursuant to section 401(d) the Commissioner is authorized to—

"(1) make grants to State educational agencies to assist them in establishing and maintaining, directly or through grants to institutions of higher education, a program for training personnel engaged or preparing to engage in educating gifted and talented children or as supervisors of such personnel;

"(2) make grants to institutions of higher education and other appropriate non-profit institutions or agencies to provide training to leadership personnel for the education of gifted and talented children and youth; and

"(3) enter into contracts with, and make grants to, public and private agencies and organizations, including State and local educational agencies, for the establishment and operation of model projects for the identification and education of gifted and talented children.

For the purpose of clause (2) of this subsection, leadership personnel may include, but are not limited to, teacher trainers, school administrators, supervisors, researchers, and State consultants, and grants under such clause may be used for internships, with local, State, or Federal agencies and other public or private agencies or institutions.

"(c) Notwithstanding the second sentence of section 405(b)(1) of the General Education Provisions Act, the National Institute of Education shall, in accordance with the terms and conditions of section 405 of such Act carry out a program of research and related activities relating to education of gifted and talented children. The Commissioner is authorized to transfer, from amounts available for the purposes of subsection (b), to the Institute of Education such sums as may be necessary for the program required by this subsection, but such sums shall not exceed 5 per centum of the amount available for this part in any fiscal year. As used in the preceding sentence the term 'research and related activity' means research or research training, surveys and demonstrations in the field of education of gifted and talented children and youth, or the dissemination of information derived from such research, surveys or demonstration, and all such activities, including experimental and model schools.

"ADMINISTRATION

"SEC. 442. (a) The Commissioner shall designate an administrative unit within the Office of Education to administer the programs and projects authorized by this part and to coordinate all programs for gifted and talented children and youth administered by the Office of Education.

"(b) The Commissioner shall establish disseminate to the public information pertaining to the education of gifted and talented children and youth. The Commissioner is authorized to contract with public or private agencies or organizations to establish and operate the clearinghouse.".

By Mr. PROXMIRE (for himself, Mr. RIBICOFF, and Mr. JAVITS):

S. 2750. A bill to reorganize and consolidate certain functions of the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation and the Federal Reserve System into a Federal Bank Commission to administer all Federal laws relating to the examination, supervision, and regulation of the banking business both foreign and domestic; to the Committee on Governmental Affairs and the Committee on Banking, Housing, and Urban Affairs, jointly, that if reported by one committee, the other has 30 days within which to report, by unanimous consent.

(The remarks of Mr. PROXMIRE when he introduced the bill appear later in today's proceedings.)

By Mr. KENNEDY:

S. 2751. A bill to amend the Immigration and Nationality Act; to the Committee on the Judiciary.

REFUGEE AND DISPLACED PERSONS ACT OF 1978

● Mr. KENNEDY. Mr. President, the Immigration Act of 1965, of which I served as floor manager in the Senate, repealed the discriminatory national origins quota system and commence needed steps to reform basic policy governing one of the oldest themes in our Nation's history. Since then, some additional reform measures have been enacted regarding the admission of immigrants, and the bill I am introducing today continues this effort. The bill establishes new policies and procedures for the more orderly admission of refugees and displaced persons from all over the world.

In preparing the bill, I have worked closely with many experts in the private sector, especially the representatives of the voluntary agencies associated with the American Council of Voluntary Agencies and the American Immigration and Citizenship Conference in New York. I have also sought the counsel and advice of many others, including Members of Congress concerned about the deficiencies of our national refugee policy, officials in the executive branch, and representatives of the United Nations High Commissioner for Refugees and other international bodies. I believe the bill represents a reasonable consensus on needed reform, which not only reflects a traditional concern of the American people, but also adds new substance to the humanitarian and human rights dimensions of our Nation's foreign policy.

The bill accomplishes these objectives:

First, it repeals the current law's discriminatory treatment of refugees and displaced persons, by providing a new definition which recognizes the plight of homeless people all over the world and by according refugee admissions the same immigration status as all other immigrants.

Second, it raises the annual limitation on regular refugee admissions from 17,400 to 40,000. This is accomplished without increasing overall annual immigration in recent years.

Third, the bill provides an orderly but flexible procedure to meet "emergent" refugee situations and any other situation of special interest to the United States, if the resettlement needs of the homeless people involved cannot be met within the 40,000 numerical limitation on regular annual admissions.

And four, it authorizes the granting of permanent resident status to students, visitors, and other nonimmigrant aliens, who claim refugee or displaced person status while temporarily present in the United States.

Mr. President, I would like to elaborate briefly on these objectives by referring to specific sections of the bill.

DEFINITION OF REFUGEE OR DISPLACED PERSON

Section 2(a) of the bill repeals the current's law discriminatory definition of a refugee or displaced person, and puts in its place a new definition which fully recognizes the global character of refugee movement.

In contrast to the definition in present law, which only recognizes the plight of homeless people from Communist areas and certain countries in the Middle East, the proposed definition recognizes the plight of homeless people in all parts of the world. The proposed definition defines a refugee or displaced person as—

Any person (i) who is outside the country of his nationality or who, not having a nationality, is outside the country of his habitual residence, and who is unable or unwilling to return to such a country because of persecution or well-founded fear of persecution on account of race, religion, nationality, membership of a particular social group or political opinion, or (ii) who has been uprooted by catastrophic natural calamity, civil disturbance or military operations and who is unable to return to his usual place of abode . . .

A definition along these lines brings our law more in line with our actual prac-

tice in recent years, and finally finishes the job of removing discrimination from the immigration laws. It also gives meaning, after nearly a decade, to our country's 1968 accession, with two reservations, to the United Nations Protocol relating to the status of refugees.

If such a definition were the law, admitting refugees from Chile, for example, would hopefully be a simple matter of humanitarian practice, instead of an issue for needless debate.

ADMISSION OF REFUGEES AND DISPLACED PERSONS

Mr. President, a fundamental change in the definition of homeless people is the cornerstone of any global policy on refugees and displaced persons. But also needed are legislative changes in the procedures for admitting new arrivals in reasonable numbers. Section 2(b) of the bill accomplishes this objective.

To meet ongoing resettlement needs among the normal flow of refugees and displaced persons on a global basis, the bill admits up to 40,000 homeless people during each fiscal year. In contrast to current law, under which refugees are accorded "conditional entry" status, the bill I am introducing today provides for the issuance of regular immigrant visas to qualified refugees and displaced persons, and accords them the same permanent resident status given to any other immigrant. The visas are allocated and issued pursuant to regulations set forth by the Secretary of State.

To meet "emergent" situations and other situations of special interest to the United States, the Secretary of State is authorized to recommend to the Attorney General the conditional admission of additional refugees and displaced persons, if their admission is not "possible or practical" under the 40,000 annual limitation to meet ongoing resettlement needs. The implementation of this authority is dependent on consultations with Congress and is similar to the practices and procedures which govern the Attorney General's parole authority in current law. On the need for this flexible authority, there can be no doubt.

ADJUSTMENT OF STATUS FOR CONDITIONAL ADMISSIONS AND OTHERS

Section 2(b) of the bill also authorizes the Attorney General to grant permanent resident status to homeless people admitted to the United States conditionally.

We know from many years of experience that the granting of such status helps to give new arrivals a greater sense of belonging in our society, and it also helps to encourage them in learning and assuming the responsibilities of eventual American citizenship. And I emphasize this point, because for most refugee families the sense of belonging, which is conferred by permanent resident status, helps to dispel some needless anxieties over the future and is an important psychological boost in helping them to cope with the many daily problems in building new lives. In short, permanent resident status helps to bring refugees and displaced persons into the mainstream of our society and to speed the process of normalizing their lives in the communities in which they live.

Moreover, to include a permanent authority for adjustment of status in the basic immigration statute, avoids the need and cumbersome procedure for special legislation of the kind previously enacted in behalf of refugees from Hungary and Cuba and, more recently, displaced persons from the Indochina Peninsula.

As to students, visitors, and other nonimmigrant aliens who are temporarily present in the United States and claim refugee or displaced person status, section 2(c) of the bill authorizes their adjustment of status to that of permanent resident alien.

Hopefully this provision will help to stimulate the development of nondiscriminatory and sensible policy in this general area of public concern—a policy which is long overdue. Such a policy should govern both the process for granting refugee, displaced person or "temporary safe haven" status to a nonimmigrant alien, and the guidelines which qualify such an alien for permanent residence.

Serious problems persist in this area of public policy, causing undue hardship to many individuals. The plight of some Ugandan students, for example, and certain nationals from a number of countries in Latin America are cases in point.

A good example of some longstanding needs are a few cases of Ugandan Asians who were temporarily in the United States as students in 1972, when their fellow nationals were summarily expelled from Uganda by President Idi Amin. At least two of these cases currently live in Massachusetts and are contributing to their adopted communities. Although they were given refugee status at the time of the expulsions from Uganda, they have yet to be granted permanent residence. The current law does not deny them adjustment of status, but it also does not assure them of the opportunity. This bill accomplishes this objective.

CONCLUSION: ACTIONS NEEDED PENDING MAJOR REFORM

Mr. President, over many years, the American people have responded generously and compassionately to the needs of homeless people, and I share the view of many that a national policy of welcome serves our country and traditions well. The basic purpose of the bill I introduce today is to update the law—and to help insure greater equity in our treatment of refugees and displaced persons and to establish a more orderly procedure for their admission into the United States in reasonable numbers.

Pending the enactment of some basic reform, however, I am hopeful that we will not shun our humanitarian responsibilities toward the homeless, and will use the authorities in current law to help meet these responsibilities in a decent way. And I appeal to the President for his help in accomplishing this end.

The Attorney General should continue to exercise his existing parole authority—judiciously and without discrimination—in behalf of a reasonable number of people who are seeking to build a new life in a new land.

We have a special responsibility toward the displaced persons from the Indochina Peninsula, especially family reunion cases in Thailand and "boat people" from Vietnam. And the need to act is there today.

We also have a special responsibility to meet the growing resettlement needs among Soviet Jews and Armenians and other special migrants from Eastern Europe. And, again, the need to act is there today.

We have a responsibility to join with many other countries in meeting the resettlement needs among Chilean refugees in Argentina and other homeless people in this hemisphere. And a pending proposal for this purpose should be implemented without delay.

And, finally we have a responsibility to meet the scattered cases of other refugees around the world, who claim a special tie with our country.

In "A Nation of Immigrants," President Kennedy wrote:

> Immigration policy should be generous; it should be fair; it should be flexible. With such a policy we can turn to the world, and to our own past, with clean hands and a clear conscience. Such a policy would be but a reaffirmation of old principles. It would be an expression of our agreement with George Washington that 'the bosom of America is open to receive not only the opulent and respectable stranger, but the oppressed and persecuted of all nations and religions; whom we shall welcome to a participation of all our rights and privileges, if by decency and propriety of conduct they appear to merit the enjoyment.'

Mr. President, I ask unanimous consent that the text of the bill, as well as a summary of its provisions, be printed at this point in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 2751

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Refugee and Displaced Persons Act of 1978".

ADMISSION OF REFUGEES AND DISPLACED PERSONS

SEC. 2 (a) Section 101(a) of the Immigration and Nationality Act (8 U.S.C. 1101(a)) (hereinafter in this Act referred to as "the Act") is amended by adding after paragragh (41) the following new paragraph:

"(42) The term 'refugee' or 'displaced person' includes (A) any person (i) who is outside the country of his nationality or who, not having a nationality, is outside the country of his habitual residence, and who is unable or unwilling to return to such a country because of persecution or well-founded fear of persecution on account of race, religion, nationality, membership of a particular social group or political opinion, or (ii) who has been uprooted by catastrophic natural calamity, civil disturbance or military operations and who is unable to return to his usual place of abode, and (B) the spouse and children of any such person if accompanying or following to join him.".

(b) Chapter 1 of title II of the Act is amended by adding after section 206 (8 U.S.C. 1156) the following new section:

"ADMISSION OF REFUGEES AND DISPLACED PERSONS

"SEC. (a) Immigrant visas shall be made available, pursuant to such regulations as the Secretary of State may prescribe and in a

number not to exceed forty thousand in any fiscal year, to refugees and displaced persons described in section 101(a)(42), who are not firmly resettled in any country and apply for admission to the United States.

"(b)(1) In addition to the authority conferred upon him by subsection (a) of this section, the Secretary of State may in his discretion recommend to the Attorney General that all or any portion of a group or class of persons, who are refugees or displaced persons described in section 101(a)(42), may be admitted into the United States conditionally, if the Secretary of State finds that the admission of such refugees or displaced persons—

"(A) is not possible or practical under subsection (a);

"(B) is justified by emergent or humanitarian reasons; or

"(C) is in the public interest.

"(2) Upon receiving a recommendation pursuant to paragraph (1) of this subsection, the Attorney General immediately shall consult with the appropriate Committees of the Senate and the House of Representatives with respect to the recommendation of the Secretary of State. Immediately after the conclusion of such consultations or thirty days after the Attorney General's request for such consultations, the Attorney General may admit into the United States conditionally, pursuant to such regulations as he may prescribe, any alien with respect to whom the Secretary of State has made a recommendation and who is not firmly resettled in any country.

"(c)(1) Any alien admitted into the United States conditionally, pursuant to subsection (b) of this section, shall return or be returned to the custody of the Immigration and Naturalization Service and shall thereupon be inspected and examined for admission into the United States as an immigrant in accordance with the provisions of sections 235, 236, and 237, if—

"(A) the alien's conditional admission has not been terminated by the Attorney General, pursuant to such regulations as he may prescribe;

"(B) the alien has not otherwise acquired the status of an alien lawfully admitted for permanent residence; and

"(C) the alien has been physically present in the United States for at least two years.

"(2) Notwithstanding any numerical limitations specified in this Act, any alien who, upon inspection and examination as provided in paragraph (1) of this subsection or after a hearing before a special inquiry officer, is found to be admissible as an immigrant as of the time of his inspection and examination, except for the grounds of exclusion specified in paragraphs (14), (15), (20), (21), (25), and (32) of section 212(a), shall be regarded as lawfully admitted to the United States for permanent residence as of the date of the alien's arrival.".

(c) Section 245(b) of the Act (U.S.C. 1255(b)) is amended to read as follows:

"(b) Upon the approval of an application for adjustment of status made under subsection (a) the Attorney General shall record the alien's lawful admission for permanent residence as of the date the order of the Attorney General approving the application for the adjustment of status is made, and the Secretary of State shall reduce by one the number of immigrant visas authorized to be issued under sections 202(e), 203(a), or 207(a) within the class to which the alien is chargeable for the fiscal year then current.".

ATTORNEY GENERAL'S PAROLE AUTHORITY

SEC. 3. Section 212(d)(5) of the Act (8 U.S.C. 1182(d)(5)) is amended to read as follows:

"(5) The Attorney General may in his discretion parole into the United States temporarily, pursuant to such terms and conditions as he may prescribe and for emergent or humanitarian reasons or for reasons deemed strictly in the public interest, any alien applying for admission to the United States, but such parole of any alien shall not be regarded as an admission of the alien to the United States. When the purposes of such parole shall, in the opinion of the Attorney General, have been served, the alien shall return or be returned to the custody of the Immigration and Naturalization Service and thereafter his case shall continue to be dealt with in the same manner as that of any other applicant for admission to the United States.".

CONFORMING AMENDMENTS

SEC. 4. (a) Section 201(a) of the Act (8 U.S.C. 1151(a)) is amended—

(1) by striking out ", or who may, pursuant to section 203(a)(7), enter conditionally," each time it appears;

(2) by striking out "45,000" and inserting in lieu thereof "43,000";

(3) by striking out "170,000 and inserting in lieu thereof "160,000";

(b) Section 202 of the Act (8 U.S.C. 1152) is amended—

(1) by striking out "and the number of conditional entries" in subsection (a);

(2) by striking out "(8)" in subsection (a) and inserting in lieu thereof "(7)";

(3) by striking out "or conditional entries" and "and conditional entries" in subsection (e);

(4) by striking out "20 per centum" in subsection (e)(2) and inserting in lieu thereof "26 per centum";

(5) by striking out paragraph (7) of subsection (e);

(6) by striking out "(7)" in paragraph (8) of subsection (e) and inserting in lieu thereof "(6)"; and

(7) by redesignating paragraph (8) of subsection (e) as paragraph (7).

(c) Section 203 of the Act (8 U.S.C. 1153) is amended—

(1) by striking out "or their conditional entry authorized, as the case may be," in subsection (a);

(2) in subsection (a)(2), by striking out "20" and inserting in lieu thereof "26", by inserting a comma and "or parents" after "unmarried daughters", and by inserting after "permanent residence" the following: ": *Provided*. That in the case of parents, such alien lawfully admitted for permanent residence must be at least twenty-one years of age";

(3) by striking out paragraph (7) of subsection (a);

(4) by striking out "and less the number of conditional entries and visas made available pursuant to paragraph (7)" in subsection (a)(8);

(5) by striking out "or to conditional entry under paragraphs (1) through (8)" in subsection (a)(9) and inserting in lieu thereof "under paragraphs (1) through (7)";

(6) by redesignating paragraphs (8) and (9) of subsection (a) as paragraphs (7) and (8);

(7) by striking out "(7)" in subsection (d) and inserting in lieu thereof "(6)"; and

(8) by striking out subsections (f), (g), and (h).

(d) Sections 212(a)(14), 212(a)(32), and 244(d) of the Act (8 U.S.C. 1182(a)(32), 1254(d) are amended by striking "section 203(a)(8)" and inserting in lieu thereof "section 203(a)(7)".

(e) Subsection (h) of section 243 of the Act (8 U.S.C. 1253) is amended to read as follows:

"(h) The Attorney General is authorized to withhold, pursuant to such terms and conditions as he may prescribe and for such period of time as he deems to be necessary, the deportation or return of any alien to any country, if such alien is a refugee or displaced person described in section 101(a)(42)."

(f) Any reference in any law to section 203(a)(7) of the Act shall be deemed a reference to section 207.

EFFECTIVE DATE

SEC. 5 (a) Except as provided in subsection (b), the amendments made by this title shall take effect on October 1, 1978.

(b) The repeal of subsections (g) and (h) of section 203 of the Act, made by section 4(c)(8) of this Act, shall not apply with respect to any individual who before October 1, 1978, was granted a conditional entry under section 203(a)(7) of the Act (and under section 202(e)(7) of the Act, if applicable) as in effect immediately before such date.

SUMMARY OF REFUGEE AND DISPLACED PERSONS BILL INTRODUCED BY SENATOR KENNEDY

Section 1: designates the bill the "Refugee and Displaced Persons Act of 1978".

Section 2: establishes new policies and procedures for the admission of refugees and displaced persons.

1. subsection (a) repeals the discriminatory definition of a refugee in present law and substitutes a new definition as follows:

"The term 'refugee' or 'displaced person' includes (A) any person (i) who is outside the country of his nationality or who, not having a nationality, is outside the country of his habitual residence, and who is unable or unwilling to return to such a country because of persecution or well-founded fear of persecution on account of race, religion, nationality, membership of a particular social group or political opinion, or (ii) who has been uprooted by catastrophic natural calamity, civil disturbance or military operations and who is unable to return to his usual place of abode."

2. subsection (b) creates a new "Sec. 207" in the basic immigration statute, entitled "Admission of Refugees and Displaced Persons". This new section provides as follows:

a. Up to 40,000 immigrant visas are available annually to refugees and displaced persons throughout the world, pursuant to such regulations as the Secretary of State may prescribe.

b. For "emergent or humanitarian" reasons or for reasons "in the public interest", the Secretary of State is authorized to recommend to the Attorney General the conditional admission of additional refugees and displaced persons, if the admission of such persons is not "possible or practical" under the annual limitation of 40,000 immigrant visas cited above.

c. Upon receiving such a recommendation, the Attorney General shall "immediately" consult with the appropriate committees of Congress. Thereafter, or thirty days following the commencement of such consultations, the Attorney General may admit conditionally, any refugee or displaced person covered by the Secretary of State's recommendation.

d. Persons admitted conditionally are eligible to adjust their status to that of permanent resident alien after two years, pursuant to such regulations as the Attorney General may prescribe.

3. subsection (c) specifically authorizes the adjustment of status of nonimmigrant aliens (a visitor, student, etc.) who claims refugee or displaced person status while present in the United States.

Section 3: amends the Attorney General's parole authority to include "humanitarian reasons" as a basis for the parole of aliens into the United States.

Section 4: contains, in the main, technical and conforming amendments; also facilitates the admission of parents of permanent resident aliens by specifically including them in the "preference system" governing annual immigration into the United States.

Section 5: effective date of the Act is October 1, 1978.●

By Mr. PELL:

S.J. Res. 121. A joint resolution authorizing the President to proclaim the second full week in October 1978, as "National Legal Secretaries' Court Observance Week"; to the Committee on the Judiciary.

● Mr. PELL. Mr. President, I take great pleasure in introducing today a joint resolution authorizing and requesting the President to designate the second full week in October 1978 as "National Legal Secretaries' Court Observance Week."

Although this is not a new resolution, similar resolutions were adopted into law in 1973 and 1974, it is one whose merit is as fitting today as it was in the past.

Legal secretaries are truly an indispensable facet of the legal system. Their expertise and dedicated services are essential to the smooth and efficient functioning of the legislative, legal, and judicial processes.

I believe it is most appropriate that we declare a week in special honor of this worthy profession. I hope this resolution will encourage employers to give their legal secretaries a greater opportunity to observe courtroom procedure firsthand so that they may not only better serve their employers and the public but also satisfy their own thirst for knowledge.

I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

Whereas legal secretaries deserve the praise, gratitude, and respect not only of their employers but of the system which they serve so well; and

Whereas employers of legal secretaries can demonstrate their appreciation for jobs well done by giving their legal secretaries greater opportunities to observe courtroom proceedings: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating the second full week in October 1978, as "Nation Legal Secretaries' Court Observance Week", and calling upon the people of the United States to observe such week with appropriate ceremonies and activities.●

By Mr. ANDERSON (for himself, Mr. MCINTYRE, Mr. HART, Mr. PERCY, and Mr. CASE):

S.J. Res. 122. A joint resolution to direct the Office of Technology Assessment to undertake a comprehensive evaluation of energy policy alternatives; to the Committee on Energy and Natural Resources.

OTA STUDY

● Mr. ANDERSON. Mr. President, this year the administration is asking Congress to appropriate $12 billion for the Department of Energy. These moneys will be used for a wide range of programs, some of which are designed to meet our short- and long-term energy supply needs. Behind this $12 billion figure are thousands of decisions made in developing DOE's programs. Each of these decisions is taking U.S. energy policy toward one energy future or another, with little careful planning as to how much energy the U.S. consumer will require or where this energy supply will come from 5, 10, or 20 years from now.

The resolution I am introducing along with Senators MCINTYRE, HART, and PERCY will hopefully result in the establishment of a decisionmaking framework within which Congress can sensibly make energy choices. The Office of Technology Assessment is being asked to study nine separate energy strategies and report to Congress in 18 months on their feasibility.

The study establishes 3 levels of possible energy consumption: High (140 quads per year), medium (110 quads per year) and low (80 quads per year). Within each of these scenarios differing energy supply options are defined. The report is to contain an examination of the commercialization requirements for industry and government for each energy supply option, existing and leadtime manufacturing capabilities, the role State and local governments can play, and the policy options available to remove actual or potential implementation barriers.

In addition, the report is to include an analysis of impacts on national security, economic prosperity (including employment and resource availability), environmental quality, land use, interest groups and their political dynamics and international economic development. Each option is to include a strategy for implementation.

This study may serve to direct our energy efforts down an unexpected path. Technologies may be shown to be feasible only at great social, economic, or environmental costs or a scenario may develop which proves a promising technology's ultimate dependability and its potential level of contribution. A small technology strategy may prove to be the most acceptable energy supply option when all the costs are weighed or a high technology future with a mixture of nuclear and synthetic fuels may be a more plausible scenario to insure an adequate energy supply. The study allows each technology to compete fairly so that each supply strategy will be based on fact not on political whim or regional prejudice.

The report required by Senate Joint Resolution 122 will not only guide spending and program authorizations for the Department of Energy for the next several years, but will also allow Congress and the private sector to move on many fronts; job training, environmental regulations, and capital availability, so that each necessary piece is developed simultaneously to bring us to the energy future most beneficial to the United States and which will also achieve our established goal of energy independence.

Some may argue that work, such as that proposed in Senate Joint Resolution 122, has already been completed. I will not argue that similar work may have been undertaken but I might argue with the conclusions of some of these reports. Our resolution allows OTA to make full use of any prior work provided a justification of the prior studies assumptions and methodologies are available.

Congress needs an independent assessment of where our energy supply decisions are taking us and what parallel actions need to be taken. The OTA report can provide us, at the least, a framework within which to decide.

Mr. President, I ask unanimous consent that the text of Senate Joint Resolution 122 be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 122

Whereas, the strength and stability of our economy, the nature and quality of employment opportunities, the latitude which the Nation will have in pursuing an independent foreign policy, the choices which individuals will have in styles of living, the degree of Federal control over private decisions, the quality of the natural environment, and the security and welfare of the Nation in the immediate and indefinite future will be affected by the energy policy choices of the Federal Government;

Whereas, previous Federal studies of our energy options are inadequate for the responsible formulation of public policy because they do not consider or adequately resolve a number of issues which are crucial to the determination of such policy, including the extent to which our Nation can reduce its growth in energy consumption and sustain balanced economic growth, the maximum and minimum of our strategic energy supply and demand options, the trade-offs which may be necessary in the future between environmental and energy goals, and the measures which would be necessary if for any reason the development of a key technology was constrained; and

Whereas, each plausible pattern of energy supply and demand development should be closely examined and compared systematically, and the potential impact and costs of the corresponding strategies of the Federal Government should be thoroughly evaluated before making a commitment to an energy policy which may be irrevocable and which may have widspread and long-lasting repercussions; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

STUDY

SECTION 1. The Office of Technology Assessment is hereby authorized and directed to study energy strategies and prepare and transmit to the Congress—

(1) within 9 months of the date of the enactment of this resolution, an interim report of its preliminary findings together with a summary of actions to be taken under this resolution; and

(2) within 18 months of such date of enactment, a final report in accordance with section 2 of this resolution.

CRITERIA

SEC. 2. (a) The report under section 1(2) of this resolution shall include detailed formulations, evaluations, and comparisons of a full range of energy policy strategies for the short-, mid-, and long-term future. Such strategies shall include—

(1)(A) one strategy based on a set of assumptions associated with (i) a level of gross national energy use of approximately 140 quads per year in the year 2000 and (ii) a maximum use of synthetic fuels and enhanced oil recovery techniques,

(B) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) intensive electrification, and

(C) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) rapid energy self-sufficiency,

(2)(A) one strategy based on a set of assumptions associated with (i) a level of gross national energy use of approximately 110 quads per year in the year 2000 and (ii) maximum use of solar energy,

(B) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) limited use of power derived from coal, and

(C) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) rapid energy self-sufficiency; and

(3)(A) one strategy based on a set of assumptions associated with (i) a level of gross national energy use of approximately 80 quads per year in the year 2000 and (ii) maximum use of solar energy,

(B) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) a phaseout of nuclear power, and

(C) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) rapid energy self-sufficiency.

(b) Strategies contained in such report—

(1) in the case of strategies described in paragraph (3) of subsection (a), shall be designed to conform energy equipment to end-use needs with respect to scale, geographic distribution, and energy quality;

(2) in the case of strategies described in paragraphs (1)(C), (2)(C), and (3)(C) of subsection (a), shall assume a cessation of imports of fossil fuels into the United States on or before January 1, 2000;

(3) in the case of the strategy described in paragraph (2)(B) of subsection (a), shall assume that the use of coal for producing power will not increase over the approximate level of use during 1990;

(4) in the case of the strategy described in paragraph (3)(B) of subsection (a), shall assume a cessation of use of nuclear powerplants within the United States on or before January 1, 2020; and

(5) in the case of each strategy described in subsection (a), shall specify the gross primary and delivered energy use per year within the United States, including the source, technology, and end use with respect to such energy.

(c) The report under subsection (a) shall include a strategic implementation plan corresponding to each strategy which shall include findings of—

(1) the principal institutional characteristics of commercially operating startup, transitional, and full scale industries for each emerging technology;

(2) the policy options to meet commercialization requirements, estimating cost to the Government, timing, and rate of market penetration;

(3) the policy options to remove or mitigate actual or potential implementation barriers;

(4) the existing capacity for the manufacture of energy (and supporting) equipment and leadtimes necessary for the development of additional capacity;

(5) the possible roles of State and local governments and actions required by them to achieve the goals of each alternative; and

(6) the necessary Federal energy research, development, and demonstration program, including an estimate of the technology priorities, reorientation requirements, and budget level.

(d) The report under subsection (a) shall include analyses, evaluations, and comparisons of the international, national, and (as appropriate) regional and local impacts of each strategy with respect to—

(1) national security;

(2) economic prosperity (especially concerning growth, stability, resource availability, employment, income distribution, inflation, corporate profits, and balance of payments);

(3) environmental quality (especially concerning air and water pollution, solid wastes, and climate);

(4) social welfare and organization (especially concerning equity in sharing costs and benefits of energy programs, health and safety, occupational displacement, industrial infrastructure, and individual lifestyles);

(5) land use (especially concerning agriculture and urban design);

(6) politics (especially concerning interest groups which stand to gain or lose as the result of a particular energy strategy or any portion thereof);

(7) international economic development and stability; and

(8) any other aspect which the Office of echnology Assessment may deem to be relevant to the purposes of the report.

(e) The Office of Technology Assessment is directed to select and utilize the best available methodological, analytical, and evaluative techniques, and to include in the report under subsection (a) explanations of and justifications for the methodological, technical, environmental, economic, demographic, social, institutional, and other assumptions made in carrying out the provisions of this resolution.

(f) In preparing the report under this subsection, the Office of Technology Assessment shall use, to the extent it considers appropriate, information and analyses from any qualified source. Any such use shall be subject to the requirements of subsection (e).

DEFINITIONS

SEC. 3. For purposes of this resolution—

(1) the term "nuclear power" means power derived from the application of fission technologies;

(2) the term "quad" means one quadrillion British thermal units;

(3) the terms "short-, mid-, and long-term future" means the date of the adoption of this resolution through 1985, 1986 through 2000, and after 2000, respectively;

(4) the term "solar energy" includes all the meanings and technologies included within the definition of that term in section 3(1) of the Solar Energy Research, Development, and Demonstration Act of 1974 (88 Stat. 1431; 42 U.S.C. 5552) and also within the definitions of the terms "solar heating", "solar heating and cooling", and "combined solar heating and cooling" in sections 3(1) and (2) of the Solar Heating and Cooling Demonstration Act of 1974 (88 Stat. 1070; 42 U.S.C. 5502); and

(5) the term "synthetic fuels" includes fuels derived from coal, oil shale, or biomass.

APPROPRIATIONS AUTHORIZATION

SEC. 4. There is hereby authorized to be appropriated such sums, not to exceed $2,000,000, as may be necessary to carry out the provisions of this resolution.●

● Mr. PERCY. Mr. President, I am pleased to be joining my distinguished colleagues, Senators ANDERSON, BUMPERS, and HART, in introducing this resolution directing the Office of Technology Assessment to undertake a comprehensive evaluation of energy policy alternatives. This study should provide Congress with precisely the kind of information most useful in formulating energy policy.

Energy decisions made in this Chamber will be felt by every citizen of this country. Jobs, incomes, mobility, patterns of urban, suburban, and rural living, air quality, water quality, and many other factors, both obvious and subtle, that touch the day-to-day life of every American, will all be affected by the energy future we pursue.

Since the ramifications of energy choices are so important, it is imperative that we choose our energy path wisely. To do this, we must be aware of the diverse implications of each potential choice. With the results of the study commissioned by this resolution, policymakers will be able to assess the effects of different energy options, and so choose the best one.

Outlined in the bill are nine different energy scenarios. The different scenarios are based on different critical assumptions, such as the level of energy usage in the year 2000 and the predominant type of energy supply system. One scenario, for example, assumes a very high national energy use—140 quads per year—and a strategy of intensive electrification, which would rely heavily on nuclear generating plants. At the opposite extreme is a scenario that posits the annual use of 80 quads of energy and a phaseout of nuclear power. However, as well as researching these two extremes, the entire middle ground will be covered. Should we commission the Office of Technology Assessment to study these nine scenarios, the relationships they discover will provide Congress with a comprehensive evaluation of energy policy alternatives. As a contribution to the energy debate, such an evaluation would be immensely helpful.

The OTA is, I think, well suited for such an assignment. It was created to provide Congress with information and analyses necessary for policymaking. Having just established its independent authority to hire and fire staff, there can be no accusations of political bias in OTA's work.

Mr. President, though the subject of this resolution may seem a little technical and a little removed from the urgent needs of this country, I think it is a much needed measure. The energy decisions we make today, as well as the ones we fail to make, will have repercussions far into the future. Most of these repercussions are, if not unknown, at least not fully understood. To a greater extent than most people realize, the kind of energy system this country runs on in the year 2000 will determine how its people live. It is the responsibility of Members of Congress to understand the repercussions and to base our decisions on the best evidence and analysis that can be found.

The need for energy legislation will not wait for the OTA staff to conmplete these studies. But the sooner we give them a mandate to begin working, the sooner the invaluable information they will provide can be used as a basis for decisions and legislation. Mr. President, I urge all my colleagues to vote for this resolution.●

ADDITIONAL COSPONSORS

S. 1487

At the request of Mr. BELLMON, the Senator from New Jersey (Mr. CASE)

was added as a cosponsor of S. 1487, a bill to eliminate racketeering in the sale and distribution of cigarettes, and for other purposes.

S. 2388

At the request of Mr. PACKWOOD, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 2388, a bill to amend the Internal Revenue Code of 1954 to provide for the exclusion from gross income of certain employer educational assistance programs.

S. 2384

At the request of Mr. CRANSTON, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 2384, the Veterans' and Survivors' Income Security Act.

S. 2397

At the request of Mr. STEVENS, the Senator from New Hampshire (Mr. DURKIN) and the Senator from Alaska (Mr. GRAVEL) were added as cosponsors of S. 2397, a bill to amend the Act of March 12. 1914, relating to Alaskan railroads to provide for relocation, travel, and transportation expenses for the General Manager of The Alaska Railroad.

S. 2481

At the request of Mr. DOLE, the Senators from Colorado (Mr. HASKELL and Mr. HART) and the Senator from Michigan (Mr. GRIFFIN) were added as cosponsors of S. 2481, the Flexible Parity Act of 1978.

S. 2507

At the request of Mr. ANDERSON, the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Texas (Mr. BENTSEN), and the Senator from Maryland, (Mr. SARBANES) were added as cosponsors of S. 2507, a bill to authorize the Smithsonian to acquire the Museum of African Art, and for other purposes.

S. 2606

At the request of Mr. CHURCH, the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of S. 2606, a bill to amend and supplement the Federal reclamation laws.

S. 2626

At the request of Mr. HODGES, the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 2626, a bill to provide price and income protection for agricultural producers by assuring such producers a price for their agricultural commodities of not less than the cost of producing such commodities; to assure consumers an adequate supply of food and fiber at reasonable prices; and for other purposes.

S. 2627

At the request of Mr. GRAVEL, the Senator from Kentucky (Mr. FORD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Michigan (Mr. RIEGLE), and the Senator from Missouri (Mr. EAGLETON) were added as cosponsors of S. 2627, a bill to amend the Internal Revenue Code of 1954 to defer from certain amounts deferred pursuant to State or local public employee deferred compensation plans.

S. 2645

At the request of Mr. WILLIAMS, the Senator from Massachusetts (Mr. BROOKE) was added as a cosponsor of S. 2645, a bill to establish an art bank.

S. 2690

At the request of Mr. TALMADGE, the Senator from North Carolina (Mr. MORGAN) was added as a cosponsor of S. 2690, a bill to provide emergency assistance to producers of wheat, feed grains, upland cotton, and soybeans, and for other purposes.

S. 2691

At the request of Mr. WILLIAMS, the Senator from New Hampshire (Mr. DURKIN) was added as a cosponsor of S. 2691, a bill to provide for the furnishing of congregate housing services under the U.S. Housing Act of 1937.

S. 2711

At the request of Mr. WILLIAMS, the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 2711, the Community Schools and Comprehensive Community Education Act of 1978.

S. 2716

At the request of Mr. NELSON, the Senator from California (Mr. CRANSTON) was addde as a cosponsor of S. 2716, the Interstate Land Sales Full Disclosure Act Amendments of 1978.

S. 2730

At the request of Mr. WILLIAMS, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 2730, a bill to establish a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowship.

SENATE JOINT RESOLUTION 29

At the request of Mr. BURDICK, the Senator from Minnesota (Mrs. HUMPHREY) was added as a cosponsor of Senate Joint Resolution 29, a bill to establish an annual National Family Week.

SENATE JOINT RESOLUTION 116

At the request of Mr. SARBANES, he was added as a cosponsor of Senate Joint Resolution 116, providing for National Neighborhood Week.

SENATE RESOLUTION 414

At the request of Mr. PERCY, the Senator from Minnesota (Mr. ANDERSON), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Arizona (Mr. DECONCINI), the Senator from Maine (Mr. HATHAWAY), and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of Senate Resolution 414, a bill to study the feasibility of installing a solar energy system in the extension of the Dirksen Office Building.

SENATE RESOLUTION 416

At the request of Mr. GRIFFIN, the Senator from Nebraska (Mr. CURTIS), the Senator from Oklahoma (Mr. BARTLETT), the Senator from Nevada (Mr. LAXALT), and the Senator from Georgia (Mr. NUNN) were added as cosponsors of Senate Resolution 416, a resolution to disapprove standards authorized under section 402(a)(426)(B) of the Social Security Act.

AMENDMENTS SUBMITTED FOR PRINTING

AMENDMENT NO. 1730

(Ordered to be printed and referred to the Committee on Human Resources.)

Mr. WILLIAMS submitted an amendment intended to be proposed by him to the bill (S. 2549) to authorize appropriations for the activities of the National Science Foundation, and for other purposes.

● Mr. WILLIAMS. Mr. President, today I am submitting legislation to authorize a study that could have profound implications for our future energy policy and ultimately, for the future of the entire planet. This amendment to the National Science Foundation Reauthorization Act, S. 2549, would authorize the NSF to analyze the costs, benefits, and impacts of implementing an accelerated development of satellite solar power stations and orbiting manufacturing facilities. This 2-year planned research program would assess the practicality of manufacturing orbiting structures from lunar or asteroidal materials in space, while analyzing the feasibility of housing the necessary work force at the orbital industrial site.

While these ideas may sound like science fiction, many scientists say they are well within today's engineering possibilities. I am particularly impressed by the work of Dr. Gerard K. O'Neill of Princeton University, whose pioneer research in this field has led him to advocate an expensive large-scale development program similar to the Apollo moon project. Dr. O'Neill, the director of Princeton's newly established Space Studies Institute, believes there is a great future for the United States if we invest in what he and his colleagues around the country are calling the "High Frontier." The High Frontier is the region beyond the Earth's atmosphere where scientists hope to tap solar energy and mine minerals on the Moon's surface.

More and more people are learning about the proposals of Dr. O'Neill and his colleagues. Some are fascinated by the prospect of solar energy being beamed back to Earth from space, while others are intrigued by the prospect of space colonies. I think we owe it to ourselves, to the Nation, and to the world to undertake a serious, realisitc assessment of these ideas. I believe the National Science Foundation, with its access to our Nation's most brilliant minds, is best equipped to coordinate this historic evaluation.

Mr. President, orbiting solar power stations are being considered today around the world as a major future option for supplying electricity on a large scale. The satellite would be a huge array of solar cells to convert sunlight directly into electrical energy. Measuring roughly 3 by 12 miles, it would be assembled in space and placed in geosynchronous orbit over the Equator at an altitude of 22,300 miles. From Earth, it would appear stationary.

The power satellite would beam microwaves to an array of receivers on Earth,

6 miles in diameter, for direct conversion to electricity. About 200 sites in the United States have already been found suitable for such receiving arrays. And, although the total amount of power delivered would be huge—about 5 million kilowatts—scientists say the microwave could be so diffuse as to create no danger to humans, aircraft, or birds.

These scientists estimate that by the early to middle part of the 21st century, it would be possible to have 112 such satellites in orbit through an international endeavor and solar power from orbiting stations might supply half the world's electricity needs.

The study I am proposing today would examine the possibilities and problems raised primarily by Dr. O'Neill and his colleagues. Dr. O'Neill believes his proposals would require an investment of $50 to $60 billion over the next few decades, but would become "almost obscenely profitable" around the turn of the century because of earthbound needs for power and products that could be manufactured easily in space.

Dr. O'Neill recently outlined a possible sequence of events, which he drew up in conjunction with scientists at the National Aeronautics and Space Administration. Their projection is that power transmission to Earth from a satellite is possible by 1992. My 2-year study would be the necessary first step, and a decision whether to proceed could be made by 1980. Dr. O'Neill strongly supports the timing and the need for this study.

He envisions that if the study issues a positive recommendation, then between 1981 and 1984 there could be a program of engineering development and testing on the scale of the Apollo moon program. A mission in 1985 could establish a mining facility on the Moon. By 1987, the mining facility would begin sending lunar material—iron ore, rock, oxygen compounds—out to a predetermined orbital point where a satellite would be constructed. That would take until 1992, when power transmission would begin.

Dr. O'Neill believes that by diverting a small percentage of the solar power produced by the satellite to building a colony could enable as many as 100,000 people to live in space by the turn of the century. They would live in rotating cylinders that would be able to simulate farms, weather, private homes and even trees and streams. As incredible as this sounds, Dr. O'Neill shows that even this is within today's technology, according to his new book, "The High Frontier."

If Dr. O'Neill and his colleagues are correct, then solar satellite power generation—at the very least—would supply cheap energy around the world, without the need for any type of major technological breakthroughs. He insists that the program could be accomplished within the present capabilities of the space shuttle program.

This project sounds like a tremendous opportunity to explore an alternative energy source that has not yet been seriously considered by the Federal Government and ought to be. This study seems urgently needed. The scientific literature on this subject grows daily by leaps and bounds. Newspapers have begun to pick up the story, and I have received several letters from constituents urging the Federal Government to start an active solar satellite power program, or at least investigate the possibility of doing so.

So today, Mr. President, I am asking the National Science Foundation to conduct a study to provide a full and complete evaluation of solar satellite power stations and their potential use in helping to meet U.S. energy needs. The study shall also assess the practicality of constructing in high orbit or in free space, large manufactured assemblies, such as satellite power stations, large optical and radio telescope arrays, ships of exploration, deep space research laboratories, and habitats for long-term human occupation, including in this assessment, the need, if any, for advanced engineering and new hardware technology. Moreover, it will examine the extent to which the program could be accomplished within the capabilities of the space shuttle program.

I would also like the National Science Foundation to analyze the benefits, costs, and impacts of implementing the High Frontier program in the areas of jobs, the economy, the environment, balance of payments, international relations, and national security.

The main purpose of this study, of course, is to have the National Science Foundation make recommendations to the Congress and the President—based on the data obtained during the course of the study—whether we should adopt development of the High Frontier as a national goal, as we did with the Moon program in 1961. The study would also require that ongoing recommendations be made to the Congress as to whether accelerated funding should be provided for current and future High Frontier research and at what level.

To undertake this 2-year feasibility study, I am asking that $500,000 be authorized for each of the fiscal years 1979 and 1980 to the National Science Foundation.

Mr. President, I might add that I do not doubt that there are skeptics among us who might say our money could be better spent on other projects. Quite frankly, many of these skeptics said the same thing about mass transit 30 years ago. Therefore, I urge my colleagues to consider this amendment very carefully, bearing in mind that the investment at this point is relatively minor, but the returns may be tremendously beneficial to the world.

Mr. President, I ask unanimous consent that the text of my amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 1, between lines 4 and 5, insert the following:

"TITLE I—AUTHORIZATIONS".

On page 1, line 5, strike out "Sec. 2." and insert in lieu thereof "Sec. 101.".

On page 2, line 13, strike out "Sec. 3." and insert in lieu thereof "Sec. 102.".

On page 2, line 14, strike "sections 2 and 5" and insert in lieu thereof "sections 101 and 104.".

On page 2, line 17, strike out "Sec. 4." and insert in lieu thereof "Sec. 103.".

On page 2, line 24, strike out "Sec. 5." and insert in lieu thereof "Sec. 104.".

On page 2, line 24, strike "section 2," and insert in lieu thereof "section 101,".

On page 3, line 7, strike out "Sec. 6." and insert in lieu thereof "Sec. 105.".

On page 3, line 8, strike "section 2 (b)," and insert in lieu thereof "section 101 (b),".

On page 3, line 11, strike "section 2," and insert in lieu thereof "section 101,'.

On page 3, insert immediately after the end of line 25 the following:

TITLE II—HIGH FRONTIER PROGRAM FEASIBILITY STUDY

SHORT TITLE

SEC. 201. This title may be cited as the "High Frontier Program Feasibility Study Act".

STATEMENT OF FINDINGS AND PURPOSE

SEC. 202. The Congress finds and declares that—

(1) the exploration of all possible alternative energy sources is essential to the development of sufficient power resources for future generations of Americans;

(2) the solar energy-rich orbital region between the Earth and the Moon, including the materials-rich lunar surface, together known as the High Frontier, may be utilized for the construction of solar power satellites and other large manufactured assemblies;

(3) exploration of the High Frontier area would not only lead to the development of new energy resources but also would serve to maintain and expand America's preeminent position in space; and

(4) research and analysis are needed in order to ascertain the feasibility and practicability of initiating a program to explore and develop the resources of the High Frontier.

ESTABLISHMENT OF STUDY

SEC. 203. (a) The Director of the National Science Foundation (hereinafter referred to as the "Director") shall conduct a High Frontier Program Feasibility Study, which shall be a two-year planned program of research to determine and report on the feasibility of manufacturing structures from lunar or asteroidal materials for use in high orbit.

(b) The Director may conduct the study required by this section directly or by contracts with public agencies, private nonprofit organizations, and academic institutions.

AREAS OF INVESTIGATION

SEC. 204. The study required by this title shall—

(1) provide a complete evaluation of the technical feasibility of establishing satellite solar power stations and the potential use of such stations in meeting American energy needs;

(2) assess the practicability of constructing and operating in high orbit or free space large manufactured assemblies such as satellite power stations, large optical and radio telescope arrays, ships of exploration, deep space research laboratories, and habitats for long-term human occupation, including a determination of—

(A) The extent to which such construction and operation could be accomplished through the use of the existing technological capabilities of American space programs, including the space shuttle program;

(B) the need for the development of advanced engineering and new hardware technology in order to accomplish such construction and operation; and

(C) the feasibility of housing the human work force necessary to construct such large manufactured assemblies at the orbital industrial site; and

(3) analyze the costs, benefits and impact of developing the High Frontier area on the employment, economy, environment, security and balance of payments of the United States, as well as on international relations.

REPORTS REQUIRED

SEC. 205. (a) At the completion of the study, the Director shall report to the President and to the Congress concerning the areas of investigation studied pursuant to section 204. In such report, the Director shall include recommendations concerning—

(1) the advisability of adopting the development of the High Frontier as a national goal;

(2) the feasibility of establishing a program to develop the resources of the High Frontier including the investment cost and payback schedule of such a program; and

(3) the desirability of making such a program to develop the High Frontier an international effort.

(b) At any time during the course of the study, the Director shall make recommendations to the Congress as to whether accelerated funding should be provided for current and future research concerning the development of the High Frontier.

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 206. To carry out the provisions of this title, there is authorized to be appropriated $500,000 for each of the fiscal years 1979 and 1980.●

LABOR LAW REFORM ACT OF 1978—S. 2467

AMENDMENT NO. 1731

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted an amendment intended to be proposed by him to the bill (S. 2467) to amend the National Labor Relations Act to strengthen the remedies and expedite the procedures under such act.

Mr. HELMS. Mr. President, today I am submitting an amendment to the so-called labor reform bill (S. 2467) to provide for shareholder ratification of labor-management contracts.

It is a familiar practice in the labor contract negotiating procedure to submit a negotiated contract to labor union members for ratification. Such a procedure is not mandated by law; rather it has been voluntarily adopted by unions under the provisions of their own constitutions. While such a ratification procedure by the union members is helpful in preserving some degree of democracy in union affairs, it nevertheless has been and will continue to be subject to abuse. Obviously, when union members turn down a carefully negotiated contract, especially in an industry vital to the health and safety of the Nation, most of the pressure falls on management to make further concessions regardless of how unreasonable those further concessions may be. Indeed, the mere prospect of contract rejection by union members gives unwarranted leverage to union leaders during the course of the negotiations.

Nowhere has this been better illustrated than in the current coal strike. A fair settlement was negotiated. In fact, management made many important concessions to placate the union membership. Yet even though management, the labor leadership, and various public officials, including the President, endorsed the contract, the membership rejected it by an overwhelming margin. At some point, negotiations were sure to resume, which they did. When that occurred, there was no doubt as to who will be forced to make still further concessions.

The purpose of my amendment is to establish a more evenhanded policy by permitting businesses to adopt corporate bylaws providing for shareholder ratification of labor-management contracts. Surely the shareholders, many of them retired persons with limited incomes, have as much a financial stake in the eventual outcome of contract negotiations as the employees. If it is permissible for the employees to ratify the contract, it is only fair that the shareholders also be permitted to do so.

If a contract must satisfy both the employees and the shareholders, then the pressure will be felt equally by both labor and management to negotiate a reasonable contract. The contract will almost automatically reflect the fairest possible settlement, because any contract blatantly unfair to either the employees or the stockholders will be sure to be rejected.

Furthermore, it is not just the shareholders' interest that my amendment seeks to protect. To the extent that unreasonable contract settlements are inflationary or contribute to reductions in worker productivity, it is the general public that has the most at stake. The consumers in the end pay the higher prices or receive the poorer quality of goods and services. It is, of course, not practical to have a national referendum on every labor contract. But the shareholders, in their natural desire to reject the acceptance of extravagant labor settlements, will serve well as a consumer surrogate.

Mr. President, I ask unanimous consent that the text of my amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 1731

On page 22 insert the following between lines 3 and 4:

SEC. 14. Section 8 is amended by adding at the end thereof the following new subsection:

"(h)(1) It shall not be an unfair labor practice under subsection (a) for an employer to submit a proposed collectively bargained labor management agreement to the registered shareholders of such employer for approval of its terms and conditions.

"(2) Any shareholder vote held in accordance with paragraph (1) shall be held within a reasonable time, as determined by the Board. Each shareholder shall be entitled to not more than one vote.".

On page 22, line 4, strike "Sec. 14." and substitute "Sec. 15.".

UNDERSTANDING SUBMITTED FOR PRINTING

UNDERSTANDING NO. 15

(Ordered to be printed and to lie on the table.)

Mr. BROOKE submitted an understanding intended to be proposed by him to the resolution of ratification of the Panama Canal Treaty, Ex. N, 95-1.

ADDITIONAL COSPONSOR—EX. N, 95-1

UNDERSTANDING NO. 1

At the request of Mr. HOLLINGS, the Senator from Nevada (Mr. CANNON) was added as a cosponsor of Understanding No. 1 intended to be proposed to the resolution of ratification of the Panama Canal Treaty, Ex. N, 95-1.

NOTICE OF HEARING

RESCHEDULING OF HEARINGS

Mr. CRANSTON. I would like to announce a change in the hearing schedule of the Subcommittee on Child and Human Development of the Human Resources Committee. The hearing on youth camp safety scheduled for March 21 will begin at 9:15 a.m., rather than 9 a.m. as previously announced, in room 4232, Dirksen Senate Office Building.

ADDITIONAL STATEMENTS

THE UNITED STATES PROVIDES $30 MILLION TO ZAMBIAN SUPPORTERS OF RHODESIAN TERRORISTS

● Mr. ALLEN. Mr. President, it was recently brought to my attention that on March 6, 1978, John J. Gilligan, Administrator of the Agency for International Development, announced a $30 million loan to Zambia from security assistance funds on standard, highly concessional AID terms. This loan is for the purpose of providing balance-of-payments assistance by financing high priority imports of equipment, materials, and spare parts.

As Senators know, during consideration of the foreign aid legislation for fiscal year 1978, a provision was included prohibiting the utilization of the Southern African Special Requirements Fund for the benefit of Zambia and several other pro-Communist African nations unless the President determine that such assistance would further the clear foreign policy interests of the United States and so certified to the Congress. This prohibition was included in the legislation because of Zambia's consistent and deplorable support for Communist terrorists operating from Zambia in Rhodesia. These terrorists are actively waging a campaign of indiscriminate murder designed to disrupt the internal peaceful settlement recently achieved in Rhodesia by the various political factions in that country which do operate within the bounds of civilized conduct.

So why, then, does the administration, through a presumably legal delegation of authority to Mr. Gilligan, find it advisable now to imply support for acts of ter-

rorism by providing these funds to Zambia, especially inasmuch as the aid provided is contrary to the clear wishes of the Congress and comes at the most inopportune time humanly imaginable.

Mr. President, a major breakthrough was made in negotiations in Rhodesia on March 3, 1978, at which time it was announced that basic agreement for majority rule had been finally achieved between the three moderate and responsible black Rhodesian leaders and Prime Minister Ian Smith, leader of the present white-dominated government. Confronted with this excellent opportunity for achieving a peaceful and correct settlement in Rhodesia, what then was the response of our Department of State? As might be imagined, with characteristic deftness of approach and sensitivity of timing, the lofty-thinking, big-dollar planners down at the Department of State decided almost immediately, if not concurrently, to shell out $30 million in indirect aid and implied support to the very parties engaged in slaughtering the black civilian population in Rhodesia for the clear purpose of intimidating and terrorizing that population, for the further purpose of disrupting the political settlement achieved, and for the final purpose of seizing power and establishing a Communist dictatorship under which majority rule would be little more than a poorly remembered phrase from the rhetoric of the past.

Mr. President, I wish to serve notice now and without equivocation that I, for one, will never again buy off on a prohibition of the sort provided with respect to Zambia in the fiscal year 1978 foreign aid legislation. Apparently we cannot again entrust to the discretion of the President's designees at the Department of State vital decisions of the sort involved here. Apparently we cannot allow an escape valve to the Department of State to be used in the event of major changes in circumstances so as to permit the lifting of a prohibition on aid when that prohibition is no longer reasonable. If the officials at the Department of State are going to abuse procedure to the extent evidenced in this decision to provide $30 million to the irresponsible government now in power in Lusaka, Zambia, then the Department of State cannot again be given the discretion to act.

There will be attempts, I am sure, made soon in the future to secure foreign aid appropriation for these terrorist-leaning governments, and in that event, I wish to assure the Senate that this Senator will not be misled by assurances that the Department of State needs and will not misuse discretion or leeway for changed circumstances affecting decisions governing congressionally prohibited aid to pro-Communist, terrorist-aiding dictatorships of the unfortunate variety now in power in Zambia.

Mr. President, I ask unanimous consent that there be printed in the RECORD an excerpt from the Federal Register, volume 43, No. 45 (Tuesday, March 7, 1978) found at page 9402 and beguilingly entitled "Zambia Import Program Loan."

There being no objection, the notice was ordered to be printed in the RECORD, as follows:

Agency for International Development

ZAMBIA IMPORT PROGRAM LOAN

Determination and Waiver Pursuant to Section 533(c)(2) of the Foreign Assistance Act of 1961, as Amended, Relating to Zambia

FEBRUARY 27, 1978.

The Agency for International Development has proposed a commodity import program loan to Zambia in the amount of $30 million from Security Assistance funds on standard concessional AID terms. The primary purpose of the loan is to provide balance of payments assistance by financing high-priority imports of equipment, materials and spare parts. Funding for the loan will be drawn from the Southern African Special Requirements Funds (FAA section 533).

FAA section 533(c)(2) prohibits the utilization of Southern African Special Requirements Funds for Zambia unless it is determined that such assistance would further the foreign policy interest of the United States.

Zambia occupies a key geographic and political position in Southern Africa. As a frontline state, Zambia has a major role in efforts aimed at a peaceful solution to majority rule in Southern Rhodesia (Zimbabwe) and Namibia. Zambia has experienced severe economic problems by adhering strictly to U.N. sanctions imposed by the U.N. against Southern Rhodesia. These have been compounded by a sharp and continuing decline in world copper prices, Zambia's main export. The significant economic dislocations have created a substantial need for increased capital and development assistance for Zambia.

United States foreign policy in Southern Africa is to support self-determination, majority rule, equal rights and human dignity for all people of the region. It is United States policy that the region have an opportunity to establish the foundations for economic growth and to become a full-fledged participant in the evolving international economic system.

The economic stability of Zambia is extremely important in contributing to the economic stability of Southern Africa, which reflects the basic United States concerns and objectives. The proposed AID loan will have a direct bearing on helping the country meet its critical economic needs and move towards implementing its plans for increasing agricultural production and rural development.

Pursuant to the authority set forth in section 533(c)(2) of the Foreign Assistance Act of 1961, as amended, and delegated to me by Executive Order 10973 and Department of State Delegation of Authority 104, and for the reasons stated above, I hereby determine that it would further the foreign policy interests of the United States to provide assistance to Zambia from the Southern African Special Requirements Funds and hereby waive the prohibition set forth in the above cited provision of law with respect to Zambia.

This determination and waiver shall be reported to the Congress and shall be published in the FEDERAL REGISTER.

Dated: February 27, 1978.

JOHN J. GILLIGAN,
Administrator, Agency for International Development.●

TREASURY DEPARTMENT ESTABLISHES TASK FORCE TO FACILITATE THE INCREASED USE OF ALCOHOL FUELS

● Mr. PERCY. Mr. President, my distinguished colleagues Senators BAYH, JAVITS, ABOUREZK, and I recently requested that the Bureau of Alcohol, Tobacco, and Firearms (ATF) of the Department of Treasury examine ways to simplify the establishment and supervision of alcohol fuel distilleries. Present regulations make the establishment of distilleries complex and time consuming.

I am pleased that ATF has created a task force to consider this question. It is important that we encourage the use of alcohol as a motor fuel in order to decrease our dependence on foreign petroleum. However, it is also important not to allow alcohol produced for fuel purposes to be illegally diverted to beverage use. The creation of this task force by ATF demonstrates that the Treasury Department is sensitive to these issues and will work with the Congress in promoting domestic, renewable fuel sources.

Mr. President, I ask unanimous consent that a recent news release by the Bureau of Alcohol, Tobacco, and Firearms concerning the alcohol fuel task force be printed in the RECORD.

There being no objection, the news release was ordered to be printed in the RECORD, as follows:

ATF EXPEDITES GASOHOL PLANT APPROVAL

WASHINGTON.—The Bureau of Alcohol, Tobacco and Firearms (ATF) has formed a task force to determine if regulatory changes can simplify establishment and supervision of plants to produce gasohol—a motor fuel mixture of 10 per cent alcohol and 90 per cent gasoline.

"ATF has received two applications from farm groups to set up experimental alcohol fuel production plants within the past few months," said Director Rex D. Davis. Ethyl alcohol production plants for experimental or research purposes must be approved by ATF but no formal permit is required.

ATF can waive, for experimental alcohol plants, some of the strict regulations which apply to producers of alcohol beverages and industrial alcohol. Using this authority, ATF is seeking ways to expedite approval of plants which distill alcohol from agricultural products or blend such alcohol with gasoline.

Davis said because of Congressional interest in encouraging the use of alcohol for fuel, the Bureau expects more applications for experimental alcohol plants. He predicted that eventually several full scale commercial alcohol plants will produce ethyl alcohol for use as a motor fuel. Several legislative proposals airmed at facilitating the establishment of such plants have been introduced in Congress and in several State legislatures.

"Use of alcohol as a gasoline extender for farm and automobile applications has received considerable attention recently," Davis said. "Because the ethyl alcohol for fuel utilization is the same as that used for drinkable alcohol, which is regulated by federal law, ATF must approve and inspect such plants to ensure that alcohol is not illegally diverted to beverage use, avoiding excise tax payments."

Under the Internal Revenue Code and the Federal Alcohol Administration Act, ATF regulates the alcohol produced for beverage and industrial use at nearly 130 distilled spirits plants nationwide. The bureau also regulates users of alcohol in products such as hair spray and perfumes. Tax-free use by hospitals, research institutions and medical laboratories also is regulated.

Davis said ATF issues operating permits and conducts periodic compliance inspections at these facilities to protect the annual collection of $4 bil. in federal excise taxes on alcohol production and distribution.

The excise tax on distilled spirits beverages is $10.50 per gallon of 100 proof alcohol.

In September of 1977 ATF officials consulted with representatives of the Office of Minority Business Enterprises at the Department of Commerce and developed procedures to assist black businessmen of the Southwest Alabama Farmer's Cooperative Assn. in their efforts to establish an alcohol fuel plant in Selma, Ala. Their application was approved in October and an inspection was conducted during November when Federal government locks and seals were applied to secure the facilities. Production of gasohol began in late January at the plant.

Another applicant, Domestic Technology Institute of Lakewood, Colo., submitted a plan for a system which will use a solar still to produce ethanol from forestry, agriculture and urban wastes. The application has been approved. Laboratory production tests will begin soon.

Alcohol used for fuel would be distilled from agricultural products at the experimental distillery. Then the alcohol is denatured, or made undrinkable by adding chemicals.

By law ATF must closely regulate this distilling, and the the eventual mixing with gasoline, with closed lines secured by government seals to prevent diversions of the alcohol for beverage use. ATF must be assured before the gasohol leaves the regulated plant that the denaturants will make the alcohol as non-potable as possible.

Proposed experimental plants will produce 190 proof alcohol. As a beverage, alcohol is diluted to about 100 proof or less and is taxed at $10.50 per proof gallon. To ensure adequate revenue protection, plant operators are required to post $5,000–$100,000 bonds to cover production.●

MRS. ELIZABETH CUDWORTH

● Mr. PELL. Mr. President, I am delighted to take this opportunity to commend the outstanding service provided to the Senate and our constituents over the past 24 years by the vivacious, compassionate, and conscientious Mrs. Elizabeth Cudworth, formerly of Pawtucket and Newport, R.I. Mrs. Cudworth has spent the past 24 years of her 32-year career with the U.S. Army in the Army Senate Liaison Office. She has retired from the Army and the Senate to pursue another career.

In her liaison capacity, Mrs. Cudworth has provided invaluable assistance to servicemen throughout the country. On February 24, 1978, she was awarded the Meritorious Civilian Service Medal by the Secretary of the Army for her outstanding performance during her Army career. This medal is the second highest honor that the Secretary of the Army can award for civilian service. It is certainly well deserved, and I believe my colleagues share my gratitude and esteem for Mrs. Cudworth. We are proud of Mrs. Cudworth's contribution to our country in this regard and wish her the best in her new career.●

THE COST OF FEDERAL REGULATION

● Mr. DOMENICI. Mr. President, on Monday, March 13, Senator GAYLORD NELSON testified before the Senate Judiciary Subcommittee on Improvements in Judicial Machinery on S. 2354, the Equal Access to Courts Act, which he and I introduced on December 15, 1977. I ask unanimous consent that his testimony be printed in the RECORD at the end of my remarks.

There being no objections, the testimony was ordered to be printed in the RECORD.

Mr. President, in the further course of testimony on this bill, the Department of Justice voiced the objection that the cost of this legislation, estimated at $225 million, was too high a price to pay to stop the steamroller of expanding Federal regulation. As a rebuttal, I ask unanimous consent that the article in Monday's Wall Street Jcurnal entitled "Federal Regulation of Business on Rise, Budget Study Shows" be printed in its entirety. This study calculates the effect of Federal regulatior. on business to be $100 billion annually. Two hundred fifty million dollars is a staggering sum, I agree, but how it pales when compared to $100 billion.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FEDERAL REGULATION OF BUSINESS ON RISE, BUDGET STUDY SHOWS

ST. LOUIS.—Government regulation of business will continue its climb in fiscal 1979, despite pledges from the Carter administration to trim red tape, says a report by the Center for the Study of American Business at Washington University here.

The federal government's 41 regulatory agencies have a combined budget of $4.82 billion in fiscal 1979, up from $4.54 billion in fiscal 1978 and $2.24 billion in fiscal 1974.

This level of expenditure "represents a growth rate that is unsurpassed by the federal budget as a whole, the population of the country, the gross national product or any other applicable basis for comparison," the study notes.

In an interview, Murray L. Weidenbaum, the center's director, said the study "is a good, direct measure of the rising intervention of government in the economy." He stressed that "the overriding concern isn't just $4.8 billion, but the costs to business for complying with the regulations" which are ultimately passed on to the consumer.

MULTIPLIER EFFECT

An earlier study by the center indicated a multiplier effect of about 20 times the federal regulatory expenditures, Mr. Weidenbaum said. Thus, we reasoned that the cost to business in fiscal 1979 "could easily be close to $100 billion."

Mr. Weidenbaum, formerly Assistant Treasury Secretary for economic policy, said he and a graduate student, Robert DeFina, had pored through the budget since late January, when it became available, picking out regulatory costs.

"It was quite a chore," he continued, noting that "you have to know your way around budget concepts and tables." Nonetheless, he added with a chuckle, "it was something like a detective story. You had to find bits and pieces" related to costs of regulation.

The report disclosed tLat the bulk of budgeted expenditures for fiscal 1979, which begins Oct. 1, are earmarked for areas of social regulation that have received increasing attention in recent years. For instance, the total for consumer health and safety is $2.67 billion, up 3 percent from fiscal 1978, but a 105 percent increase from fiscal 1974. Job safety receives $626 million, up 11 percent from fiscal 1978 and 102 percent from five years earlier.

Regulatory costs for environment and energy increased 13 percent to $1.12 billion from $989 million a year earlier, and reflect a 222 percent gain since fiscal 1974. For instance, the budget for the Environmental Protection Agency is $522 million, up from $473 million in fiscal 1978 and $232 million in fiscal 1974.

"OLD-LINE" AGENCIES

Mr. Weidenbaum maintained that "much media attention" is focused on "old-line" agencies such as the Federal Communications Commission, the Federal Trade Commission and the Interstate Commerce Commission. Yet, this group's expenditures "have a much more stable pattern," he said. "The big money isn't here; the action is in the newer agencies," he said.

Regulatory costs budgeted for these "old-line" agencies edged upward to $341 million in fiscal 1979 from $340 million the year earlier. The fiscal 1979 figure was up 39 percent from fiscal 1974, the economist said.

"Frankly," he observed, "I wasn't aware of the extent the Department of Agriculture has expanded its role." The overall regulatory costs declined to $830 million from $862 million in fiscal 1978; however, both years "are substantially ahead of" fiscal 1974's costs of $314 million, he said.

"In all fairness," Mr. Weidenbaum said, "a lid has been kept on expeditures of the Consumer Product Safety Commission" in recent years. The fiscal 1979 budget allotted the commission $40 million, from $42 million the year earlier and $40 million in fiscal 1977.

TESTIMONY OF SENATOR GAYLORD NELSON THE EQUAL ACCESS TO COURTS ACT

Mr. Chairman, thank you very much for your invitation to testify this morning on S. 2354, the Equal Access to Courts Act. Swift action by the Judiciary Committee and the Congress on this measure would be a real shot in the arm for our nation's small business community, who bear the brunt of arbitrary and autocratic regulation by the Federal bureaucracy. It would also provide relief for individuals who are powerless when they confront bureaucrats whose unfair judgments or actions are backed by the vast resources of the Federal Government.

Arbitrary and unfair government regulation of individuals and small businesses has reached epidemic proportions in this country.

It goes unchecked because those who are hurt can't afford to fight back. For years, bureaucrats have been causing great economic damage to people and small businesses, because the cost of opposing government regulations or fines in court is prohibitive. The Government has vast resources to enforce the arbitrary decisions made by autocratic bureaucrats, but very few individuals or small businesses have the time or money needed to fight back.

Thus we have permitted the development of a situation in which justice cannot be done because those who are victims of arbitrary, unreasonable and unlawful exercise of power by the Federal Government do not have the resources to challenge the Government even though the Government is wrong and they are right.

This legislation provides a remedy that is simple and fair. It provides that whenever an individual or small business challenges an order, rule or regulation and prevails, the Government must reimburse the victim for attorney's fees and court costs.

This will have two salutory effects. First, it will do justice for the victim which is, after all, a fundamental responsibility of government toward its citizens. Second, it will have a marvelously beneficial chilling

effect upon the ardor of those bureaucrats who have a tendency to be careless, arbitrary or irresponsible.

If enacted, this legislation would represent a major step toward curbing one of the greatest threats facing our economic system today—the excessive, arbitrary, nitpicking regulation and harassment of small businesses and individuals by government bureaucrats.

It would have a far-reaching effect by putting individuals and small businesses in a position where they can effectively challenge the arbitrary and autocratic demands of government bureaucrats. It will give them the tools and resources to fight back with when they are faced with arbitrary or unreasonable rules, regulations or orders, whereas now they often have to capitulate to the Federal Government because it would cost them too much to fight.

The unfair and stifling burden of unnecessary government regulations on small business, and our need to get government bureaucrats off the backs of small business proprietors, was a major theme of President Carter's campaign during 1976. In an interview which the National Small Business Association published in their October, 1976, newsletter, Presidential-candidate Carter gave a brief but compelling description of the burden of regulation on small business:

"Because of their lack of ability and resources to defend themselves, small businesses are favorite targets for the 82 regulatory agencies in Washington who last year put out some 45,000 pages of regulations. This underscores the burden forced upon small business by Washington, and makes it more difficult for the small businessman and woman to compete with big business who can afford the best in full-time CPA's, attorneys and lobbyists."

"As a former businessman, I pledge to allow the small businessman and woman to get back to running their business by completely reforming our Federal regulatory agencies, their reporting requirements and tax laws to get the Government off his back."

The Administration has begun doing this, particularly in areas where regulation was exceptionally arbitrary and oppressive, such as OSHA.

There are numerous measures before Congress that would also provide some relief. For example, the Regulatory Flexibility Act, which Senator Culver and I introduced, would authorize agencies to develop two-tiered regulations to simplify the reporting and compliance requirements for small enterprises.

But these measures, as important as they are, go only halfway because they don't, and can't, address one of the most important dangers of government regulations—the inability of small businesses and individuals who are hit by an unjust fine or regulation to muster the time and resources needed to wage an effective fight against the vast powers and resources of the Federal bureaucracy.

Time after time, when the IRS goes after an individual on a tax claim or when OSHA goes after a small business on a health or safety matter, the individual or small business owner can still suffer serious economic damage even if he prevails over the Government and wins his case, simply because the individual has to bear the attorney's fees and other court costs which are involved.

There are many small businessmen and women who have told me that it usually makes no sense to fight the bureaucracy, even when the bureaucracy is wrong. The cost of attorney's fees, the cost of putting together a case and seeing it through an administrative proceeding or the courts, the cost of paying expert witnesses and developing facts, can all come to much more than the cost of simply giving in to the will of the bureaucracy. Either way—give in or fight—the individual or small business loses, and it often makes more sense to capitulate than to fight.

We have a belief in this country that we have the best system of justice in the world. Anyone can have his day in court.

But justice is certainly not done when one side cannot afford to fight.

The Equal Access to Courts Act would right the scales of justice: it would help protect an innocent party from economic damage, often economic ruin, when the Government has made a mistake or exceeded its authority or misconstrued the law. It would help protect us all from the bureaucratic tendency to extend its net of control into every aspect of our business and our lives.

As Chairman of the Senate Small Business Committee, I have long been aware of the deep frustrations and resentment of small businesses against excessive regulation by faceless, distant Washington bureaucrats. Most small business owners and most individuals recognize the need for government regulation in such areas as product safety of the workplace. But many have found that regulations are often excessive and counterproductive, that they are often trivial and serve little purpose other than harassment, and that they are far too often enforced in an arrogant and arbitrary manner.

The horror stories of government regulation are legion. Literally tens of thousands of examples can be drawn from all across the country. Four from Wisconsin provide particularly poignant examples of how arbitrary bureaucratic decisions can cause individuals and small businesses to bear serious economic losses, even if they challenge the decision and win. In each case, they should be reimbursed for their attorney's fees and court costs.

One of the worst occurred five years ago and involved the Marlin Toy Company of Horicon, Wisconsin. Members of this Committee may recall the incident, because Congress had to pass a resolution allowing Marlin to sue the Government for its losses. In 1972, the Food and Drug Administration cited two of Marlin's toys as unsafe. The company conducted a $95,000 recall campaign and corrected the defects to meet the FDA's objections. Just before Christmas of that year, the regulation of toy safety was turned over to the newly-formed Consumer Product Safety Commission, which published a "banned-product" list. The Marlin toys were mistakenly included. Although the government had been able to force Marlin to conduct a recall campaign of its toys, there was no way Marlin could get the Government to conduct a recall of its inaccurate banned-product list. As a result, toy retailers all across the country cancelled their orders causing Marlin a $1.2 million loss. Marlin was forced out of the toy business, and all but 10 of its 85 workers were laid off.

One careless bureaucrat caused 75 Wisconsinites to lose their jobs. The CPSC certainly didn't suffer, and I seriously doubt if anything happened to that bureaucrat.

Another example involves a Hayward, Wisconsin family's inability to correct what seems to be government misrepresentation which occurred in the Interior Department's purchase of the family's land for inclusion in a national park. The family agreed to sell the land for $30,000 less than its fair market value, in return for which the land purchase agent promised that the Interior Department would reimburse the family for up to $15,000 in expenses which the family might incur in physically moving its home and barn to a new location.

After the family went ahead and moved its house and barn—incurring an actual cost of $22,000—and they contacted the government to submit their moving expenses for the $15,000 reimbursement, they were informed that they were entitled to only a $500 fixed payment. They appealed through the proper channels in the Interior Department, which disallowed their claim.

Now they are faced with a choice that will cause them serious economic harm whichever way they go. On the one hand, they can take their $15,000 loss and treat it as the price of mistakenly trusting a government bureaucrat. Or they can sue the government for fraud or misrepresentation. Their lawyer has told them this will cost $5,000 to $6,000, or more if the Government were to appeal an adverse judgment.

In either case, this family loses, unless we enact the Equal Access to Courts Act.

Now let me turn to a case involving the Defense Department, which is costing a small Wisconsin business over $500,000.

In 1966, an Appleton, Wisconsin, firm which qualifies as a small business under the Small Business Act obtained a $1.4 million contract from the Defense Department for the manufacture of diesel generator sets. This firm is well known as an excellent manufacturer of diesel generators and would have had no trouble if parts supplied by the government had not been defective. It cost the firm more than $1 million out-of-pocket to correct for the defects, and a claim was submitted in September, 1969, to the Defense Department for reimbursement. The negotiations took more than a year, but in December, 1970, the two sides agreed to settle the claim for just over $600,000. As the Government memo on this stated: "An important factor in negotiation for the settlement was prompt/expeditious payment by the Government."

But in March, 1971, just as the claim was being processed, the House Armed Services Committee began hearings on allegations of impropriety in the settlement of claims against the Defense Department, and the Department refused to settle this firm's claim. For four years, the company fought the Government, and finally won its $600,000 adjustment in 1974.

But the firm was out over $125,000 in attorney's fees and court costs as a result of the Defense Department's unreasonable refusal to honor the firm's valid claim. In addition, the firm lost another $375,000 due to interest costs, inflation, and shut-down costs that would not have been incurred if the claim had been promptly paid. The Equal Access to Courts Act would take some of the sting out of the massive loss by at least reimbursing the firm for its attorney's fees.

Last but not least, a Milwaukee-headquartered firm which provides temporary manpower has an interesting tale to tell involving conflicting actions by two Federal agencies that have cost the firm over $300,000 in attorney's fees.

The firm franchises its name and business to independent owner-operators in cities and towns across the country, each of which receives an exclusive right to conduct the business in its own market area.

Recently, the firm got caught between two Federal agencies in a predicament that would have been funny but for the great damage it caused.

On one hand, the IRS brought an action against the company to force it to pay millions of dollars in back social security taxes for the owners of the franchises, under the theory that the franchises were really part of the parent franchising firm and the franchise owners were really its employees.

At the same time, an antitrust action was brought against the firm for giving their franchises exclusive territorial rights, under the theory that each franchise is an independent business, making the granting of exclusive territories an illegal restraint of trade.

The Government wanted to have it both ways. Even when the firm brought the government attorneys from each side together to discuss the conflict in their positions, neither side was willing to give in.

The firm ended up spending over $100,000 in attorney's fees on the antitrust case, before it was finally dropped. It has spent more than $200,000 on the IRS case—which the IRS attorneys say is a flimsy one and will probably be won by the company—and that one is still going on.

In cases such as these, if the individual or business prevails over the Government, and proves that the Government was wrong in its action, there is no reason why the Government should not have to pay the attorney's fees and court costs of those who were injured, especially since the taxpayer is already paying the bill for the bureaucrat or lawyer who caused all the trouble.

The argument will be made that this legislation would have an adverse effect on the enforcement efforts of the Federal regulatory agencies, deterring them from pursuing those cases which do involve violations of the regulations. In my view, this particular concern is unfounded. In a case where the agency seeks to expand its interpretation of the law in an uncharted area and the outcome is uncertain, if the agency is proceeding reasonably, it should not be deterred by the possibility that the individual or small business would receive attorney's fees if the Government has exceeded its authority. Congress should make it clear in these cases that the possible cost of attorney's fees is part of the cost of doing Government business and a worthwhile investment of funds to resolve an important policy question. But in those situations where the Government agency goes ahead without a strong case against a business; or where it is proceeding carelessly; or where it now imposes a fine, secure in the knowledge that its action will not be challenged because of the cost involved, I would be very happy if the enactment of this legislation caused some chilling effect on Government regulatory efforts.

In S. 2354, a small business can qualify for reimbursement by meeting either of two definitions—it can qualify as (A) a small business under the Small Business Act, or it can qualify by being (B) "an individual, partnership, corporation, or labor or any other private organization having assets valued at less than $1,000,000 and annual receipts or income of less than $100,000 in each of the five years immediately preceding the filing of the civil action in question." A wire service recently got these definitions intertwined in a news story and the Small Business Committee has received frantic mail from small businesses that don't quite meet the asset-income criteria. We should make it perfectly clear that if a small business meets either criteria (A) or (B), it qualifies for reimbursement.

In addition, a technical amendment is needed—the definition of small business occurs in section (3) and not section (2) of the Small Business Act, and the bill should be changed to reflect that.

In other areas, this legislation may need some fine-tuning, but the principle is sound and just.

The Federal regulatory effort includes thousands of Federal employees, trying to enforce 70,000 pages of regulations involving thousands of diverse businesses throughout the country. In an effort of this magnitude, perhaps it is inevitable that there will be cases of Government negligence, perversity and sheer ineptitude. But, it is absolutely vital that we hold the Government to the strictest standards of care in its enforcement efforts, deterring those abuses which can be prevented, and providing a mechanism for compensating individuals and businesses for those governmental mistakes which cannot.

The need for this legislation highlights a basic dilemma which the United States faces along with the other industrial democracies. Can we have a powerful national Government to enforce the laws which protect public health and safety and preserve competition in the marketplace, while avoiding a Government which is so powerful, intrusive, and arbitrary that it poses a menace to individual and economic freedom? In walking this thin line, we must continually strive for instruments to keep the Government accountable for its actions. This legislation is one such instrument.●

ADEQUATE INCOME FOR RETIRED ELDERLY AMERICANS

● Mr. GRAVEL. Mr. President, this morning the Finance Committee Subcommittee on Private Pension Plans and Employee Fringe Benefits, under the able chairmanship of my good friend, the Senator from Texas, Mr. BENTSEN, held hearings on recent Treasury action with respect to retirement plans sponsored by State and local governments.

There is no more important issue for this Congress than the assurance of adequate income for the retirement of elderly Americans. And yet, most people concede that social security payments are not sufficient to insure a minimal standard of living for retired workers. Americans need to accumulate a capital estate in order to assure themselves a supplement to Government transfer payments in their later years. The accumulation of capital is not easy. With high State and Federal tax rates it is difficult for the average taxpayer to save anything for retirement from his monthly paycheck. As a result we have developed ways for Americans to set aside a certain portion of their income and delay taxation until retirement. We do this through pension plans, individual retirement accounts, and deferred compensation plans.

Recently, Treasury has attacked one of these methods of accumulating retirement capital: the deferred compensation plans. These plans allow an employee to set aside, tax free, a portion of his income for retirement. The employee must elect to set aside a portion of his salary for which he receives an unsecured claim against his employer for payment at retirement. These plans have become very popular with State, county, and municipal governments—and rightly so. They provide retirement security for employees at little or no additional cost to the employer government. The opportunities for abuse under the public plans are minimal. They are generally made available to all the employees of the sponsoring government. The participants are not highly paid and many would not otherwise be capable of accumulating capital for retirement.

Some 30 States have an interest in deferred compensation plans; many have plans in operation, others are contemplating the adoption of deferred compensation plans, and yet others do not themselves have plans, but have county and municipal plans in operation. In my own State deferred compensation plans have been adopted by both State and municipal governments. The State government has 1,250 employees participating in its plan. While that number may appear to be small it constitutes over 13 percent of Alaska's State employees.

Many cities and counties have adopted deferred compensation plans of their own. For example, Anchorage, Alaska's largest city, has adopted a plan in which more than 10 percent of its employees participate.

The continued existence of these deferred compensation plans has been threatened by a proposed Treasury regulation which would require the taxation of the deferred income at the time of deferral. The regulation would reverse the long standing Treasury position that the deferred income is not taxable until received at retirement or other earlier payout. In response to this action by the Treasury, I have introduced S. 2627 which requires the Treasury to return to its original position. S. 2627 is designed to protect existing and contemplated public deferred compensation plans. It will require that income deferred under a public plan not be taxed until the employee receives it upon retirement or termination. It will apply both to existing plans and allow the adoption of new plans.

During our hearings this morning, Mr. President, we heard from the representatives of many State governments affected by the proposed Treasury regulation. Eugene Krasicky, first assistant attorney general of the State of Michigan, set forth for us how these regulations will affect his State and gave us his opinion of the Treasury regulation. I would like to ask unanimous consent that an excerpt from his statement be printed in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT

Michigan's deferred compensation plan was instituted following the imprimatur of the Internal Revenue Service in July of 1975. Under the plan, all state employees are provided the opportunity to defer portions of their income in order to establish a retirement program. Most employees contemplate applying such funds as a supplement to their state pension and social security benefits so as to allow them to enjoy their post working days without serious diminution in their standard of living. In essence, these employees are willing to sacrifice a little now so that they will not have to sacrifice greatly later.

It should also be pointed out that the State of Michigan Employee Retirement Plan, like that of so many other state and public bodies, is wholly inadequate in meeting the needs of retired employees. Recent statistics show that approximately 12,500 retired state employees are receiving an average monthly benefit of 236.83. Of these, approximately 20% receive less than $100.00 per month. Thus, state employees who lack either the foresight or financial ability to provide a supplementary source of retirement funds face a poverty level existence. The state's dedeferred compensation program provides the opportunity and the ability to assure that state employees are not forced to seek public assistance or further employment when they retire.

Michigan's deferred compensation plan is similar to plans already in existence or soon to be implemented in 37 other states. The make-up of its participants clearly shows that it was not designed as a tax shelter for the well paid. Instead, Michigan's plan is

comprised of a broad spectrum of state employees totaling over 9,500 participants. The median deferral of compensation of these employees into the plan is $41.52 per two-week pay period. Approximately 90% of these employees earn between ten and twenty-five thousand dollars annually, with 40.7% earning between ten and fifteen thousand dollars, 31% earning between fifteen and twenty thousand dollars, and 17% earning between twenty and twenty-five thousand dollars. Only about 9% of the participants earn in excess of twenty-five thousand dollars.

The proposed action of the Internal Revenue Service would, in one sweeping regulation, destroy the expectations and dreams of thousands of state employees. It would place such employees at an unequitable disadvantage compared to employees in the private sector who are eligible for such income deferral plans as profit sharing, stock options, and bonus programs. It would further place such employees at a disadvantage when compared to public school employees and employees of certain tax-exempt organizations whose deductions for annuities are specifically exempted from taxation under section 403(b) of the Internal Revenue Code.

An interesting point to note is that Michigan public school employees enjoy a higher state pension on the average than do state employees. Public school employees receive an average $318.46 per month, while Detroit public school employees receive an average $411.53 per month. That means that the school employees receive $1,000.00 to $2,000.00 more per annum.

Michigan's deferred compensation plan was expressly approved by the Internal Revenue Service in a letter dated July 16, 1975. Therein, the Service recognized that consistent with the cash receipts and disbursement method of accounting and income reporting, a state employee electing to defer a portion of his or her income to a later date would be able to defer inclusion of such sums in his or her gross income until the money was actually paid or otherwise made available to the employee. The IRS would now take the position that such funds are includable in the gross income of state employees at the time the funds are deferred, despite the fact that such employees do not have possession of the money, exercise no dominion over the investment of the funds, and cannot reach such funds until retirement or death of the employee. The proposed action of the Internal Revenue Service, reversing its earlier determination regarding the taxability of deferred income, amounts to an arbitrary and capricious shift in policy, a policy, I submit, which may be made only by the people's elected representatives. We submit that such action is illegal in that it is contrary to such tax court decisions as *In Re Oats*, 18 Tax Court 570 (1952) and *In Re Robinson*, 44 Tax Court 20 (1965), as well as a lengthy list of revenue rulings and acquiescences. In revenue rulings 60-31; 67-449; 68-86; 68-79; and 69-650, the Service recognized that income is only constructively received and is taxable when funds are credited to the employee's account, set apart for him, or otherwise made available so that the employee may obtain them at any time. Income is not, under the traditional view, received if the taxpayer's control of it is subject to stringent limitations and restrictions. Under the State of Michigan's deferred compensation program, employees are required to designate the amounts of deferment in advance of any payment. Such funds are retained by the state and are at all times state funds subject to all statutory and constitutional limitations. The employee has no access to such funds and can only receive them on the happening of certain agreed upon contingencies. i.e. death, retirement, separation, and disability, and unforeseen catastrophe. Thus, the state's deferred compensation program is consistent with the long established Service interpretation regarding income receipt and taxation.

It is significant that the Internal Revenue Code has been amended many times since these decisions and service rulings. In particular, section 451, dealing with the taxable year of income inclusion, was amended in 1965 by P.L. 89-97, in 1969 by P.L. 91-172, and as late as 1976 by P.L. 94-455. The failure of Congress to take action contrary to the historical interpretation regarding income deferment is seen as evidence of Congressional approval. Accordingly, any deviation from this traditional approach must come from Congress and cannot be effected by administrative fiat.

Almost 10,000 employees of the State of Michigan have relied upon the 1975 action of the Internal Revenue Service, have denied themselves so as to provide for their old age without fear or anxiety of becoming a burden on society. The Internal Revenue Service, without the authorization of Congress seek to deny them the benefits to which they are entitled under law. I would urge the Congress to act to prevent this unjust result. On behalf of the State of Michigan, the public good is served by the retention of qualified employees in the public service. The program of deferred compensation helps accomplish the worthy purpose of attracting and retaining dedicated public servants.●

S. 2164 AND UNIT COAL TRAINS

● Mr. ZORINSKY. Mr. President, on March 16, 1978, I was privileged to testify before the Subcommittee on Transportation of the Committee on Environment and Public Works regarding S. 2164, a bill to amend title 23 of the United States Code, relating to highways, to authorize a program to separate rail and highway crossings in certain energy-impacted cases.

I ask unanimous consent that my remarks before the subcommittee be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY BY SENATOR EDWARD ZORINSKY

I want to thank Senator Bentsen for providing me the opportunity, through this testimony to air a problem immediately being faced by the states of Colorado, Iowa, Kansas, Minnesota, Montana, Nebraska, Nevada, North Dakota, and Wyoming. I am referring to the problems arising at the intersections of unseparated highway and rail crossings.

This situation was brought to my attention through the efforts of the citizens of my state. Lincoln, Nebraska is privileged to have been one of 12 cities funded as a demonstration project under section 163 of the 1973 Highway Act. A privilege I might add provided by the foresight of this very committee. The 12 demonstration cities were given the responsibility of developing and implementing plans for the relocation or consolidation of railroad tracks in order to eliminate conflict at surface crossings for community benefit and for improved rail operations.

Consolidation in Lincoln under this project went smoothly until coal became the keystone of our nation's efforts to strive for energy independence. As unit coal trains consequently became a primary delivery mechanism from source to consuming public, varying segments of the Lincoln community became embroiled over whose ox was to be gored by having the coal trains pass through their neighborhood.

Lincoln, as an old sage railroadman aptly coined, could possibly become the "coal chute" of the nation.

I am now convinced that this comment could be similarly applied to Moorhead, Minnesota, Littleton or Fort Collins, Colorado, Lusk or Douglas, Wyoming, and Decker, Montana. Needless to say, this enumeration is far from an exclusive listing of troubled communities.

Even with the added impact of coal trains, Lincoln, because of your foresight is able to plan and work out a compromise consolidation, responsive to the needs and desires of the varying affected community segments with money available for separated grade crossings.

Lincoln is nearing the final stages of completing its demonstration project. Although efforts will be made to stop funding these projects, it would certainly be a disservice and highly uneconomical to preclude Lincoln from finishing this task. This is especially true, in light of the insight from their own experiences such projects can provide to help solve the nation's growing problems at rail and highway intersections.

This past summer at my behest Chester Davenport, Assistant Secretary of Transportation brought the Coal Transportation Task Force which he chaired to Nebraska. During the Task Force's open public hearings in Lincoln, because of testimony by representatives from Broken Bow and Grand Island, Nebraska, it became clear that the problem with unit coal trains was even more pervasive than originally perceived by the Task Force or anyone else.

Subsequent to the Nebraska hearing of the Task Force, the gravity of this problem was confirmed by investigation of situations in other states.

In response to a congressinal inquiry the Federal Energy Administration stated:

"Some idea of the magnitude of the overall problem can be gained from the fact that approximately 2,000 communities in the United States have one or more railroads running through them. A recent study by the Nebraska Department of Economic Development showed that in Nebraska, the Burlington Northern (B.N.), one of five major railroad companies operaing in the state, has 690 miles of trackage with 449 public road and street grade crossings. Providing minimal grade crossing protection, which would not include separation, for the B.N. alone would cost an estimated $57,655,000. The cost of installing protective devices is normally borne by the community concerned, while the railroad must maintain them. Where grade crossings are separated by using overpasses or underpasses, the community concerned is responsible for constructing them."

I emphasize in Nebraska alone there are 449 public road and railroad crossings. The estimate of $57.6 million to provide the requisite safety features does not include separation and is only for B.N. crossings. Obviously these crossings will not all require separation, but the potential cost for those that will is staggering.

Likewise the Comptroller General in a Report to Congress entitled "U.S. Coal Development—Promises, Uncertainties" dated September 22, 1977 pointed out:

Weekly unit train traffic of principal western coal carriers

Railroad:	*Number of unit trains a week*
Burlington Northern	55
Chicago & Northwestern	35
Denver & Rio Grande Western	25
Union Pacific	23
Total	138

By 1985 unit train traffic is expected to expand severalfold. The Burlington Northern,

for example, expects to operate about 200 unit trains per week by 1985.

Increased unit train traffic could have a major impact on communities en route, interrupt motor vehicle traffic, and subject community residents to increased noise and air pollution. Some Wyoming communities could experience coal traffic of between 30 and 48 unit trains a day in addition to other rail traffic.

Public concern over the environmental impacts of increasing unit train traffic is causing citizens' and environmental groups to seek closer Federal scrutiny of coal traffic buildup. The Sierra Club, for example, has filed suit in the U.S. District Court to require ICC to more closely examine the environmental impact of a proposed 116-mile coal route to be jointly constructed by the Chicago and Northwestern and the Burlington Northern through the Wyoming coalfields. According to the Sierra Club, the route could carry as many as 48 trains daily through a number of small towns.

Action will be required to reduce the safety hazards and disruption of vehicular traffic and community services that may be caused by unit train operations. Grade crossing improvements such as overpasses, crossing gates, and warning lights will be needed.

Presently, the railroads and affected communities disagree over who will bear the cost of these improvements. Railroads have contended that grade crossing improvements are not their responsibility, and affected communities seem unlikely to receive financial assistance from the rail industry. However, Federal funds are available to the States for construction of highway overpasses and grade crossing improvements under provisions of title 23, United States Code (which contains the Federal Aid Highway legislation), some of which could be used to help alleviate railway and highway crossing problems caused by unit train traffic.

Richard J. Barber Associates, Inc., obviously to the benefit of their railroad clients speak well of their clients' ability to deliver the coal to market. In their 1977 copyrighted report "Railroads, Coal, and the National Energy Plan: An Assessment of the Issues" they publish the kind of matrix which illustrates however that while the problem of unit coal trains is initially a regional issue, transportation of coal on a country wide level is predictable and the problems therefore become national in perspective.

FORECAST IMPACT OF INCREASED UTILITY AND INDUSTRIAL RAIL COAL TRAFFIC ON PRINCIPAL FLOW PATTERNS, 1975 AND 1985 WITH NATIONAL ENERGY PLAN

[In millions of tons]

Producing region: Consuming census region	Increase in tonnage		
	Utility	Industry	Total
Northern Great Plains: West south-central	62.1	8.1	70.2
Appalachia: East north-central	4.3	48.1	52.4
Northern Great Plains: West north-central	43.6	3.9	47.5

Pacific		.3

ANTICIPATED INCREASE IN RAIL COAL TRAFFIC TO ALL CONSUMING SECTORS IN 9 SELECTED CORRIDORS, 1975-85

Production region: Consuming census region	Tonnage increase (millions)	Percent of total gain in rail coal traffic
Appalachia:		
Middle Atlantic	31.0	5.6
East north-central	57.8	11.3
South Atlantic	63.1	14.7
East south-central	28.4	6.4
Interior basin:		
East north-central	40.3	9.0
West north-central	11.6	2.7
Southwestern: West south-central	16.1	3.8
Northern Great Plains:		
East north-central	10.1	2.4
West north-central	47.5	11.1
West south-central	70.2	16.4
Rockies: Mountain	16.4	3.8

These above charts clearly show that the movement of coal by rail will spare few if any sections of our country.

Finally in January of this year the long awaited report of the Coal Transportation Task Force was released.

The following chart published by the Task Force confirms the Barber report's analysis that the flow of coal will affect nearly every region of the country.

The report of the Coal Transportation Task Force substantiates my concern, and the concern of my colleagues who have co-sponsored S. 2164:

"The substantial increase in unit coal trains required to transport new coal production will result in major social and environmental disruptions in many communities through which they move. While many different parts of the country will see more unit trains, the primary growth and the resulting impacts will occur along Western coal routes.

"For example, the Burlington Northern Railroad estimates that it will transport over 142 million tons of coal in unit train service in 1980, an increase of 390 percent over 1974 tonnage. Unit train traffic will increase significantly on all of the six major coal hauling Burlington Northern rail links. Traffic on the Alliance to Lincoln, Nebraska segment, for example, will jump from 5 unit trains per day in 1975 to approximately 35 per day in 1980. For other routes, it is anticipated that traffic will rise from only 2 or 3 trains per day to as many as 25–35 per day.

"These large traffic increases will create significant social and environmental impacts in the hundreds of small towns through which the major rail lines pass. In many cases, these towns are spread out along both sides of the track. With most rail lines at grade, passing trains will temporarily sever towns, disrupting traffic on local streets and delaying essential hospital, fire and police services. In some communities, in addition to acting as physical barriers, rail lines have come to represent social boundaries as well. In these cases, increased train traffic may have the effect of further isolating certain sectors of the community while adding to an already unsatisfactory community environment.

"In a physical sense, the extent of these impacts depends on: (1) the frequency of exposure; (2) the length of the trains; and (3) train speed. Most unit trains transporting western coal will total 100 or more hopper cars, plus four or five locomotives and a caboose. It is not uncommon for such trains to exceed one mile in length. Train speed varies considerably, depending on track conditions, the existence of grade separations, and local ordinances. A March 1976 Department of Transportation Report to the Congress on Railroad Consolidation and Relocation in Urban Areas indicates that the average maximum timetable speed in towns of 4,001 to 10,000 population was 26.3 miles per hour, while the average typical speed ranged from 9 7 to 24.7 miles per hour. Some communities have imposed ordinances requiring passing trains to travel as slowly as 5 miles per hour. Assuming a hopper length of 50 feet, it would take a 100-car unit train with five locomotives approximately 3 minutes to pass a particular point at 20 miles per hour, and 12 minutes to pass at 5 miles per hour.

"The disruptions to the normal activities of affected communities would seem to be tolerable in cases where unit trains pass through towns only two or three times a day. *However, should traffic increase to 35 trains per day, the total passby time for one day will jump to approximately 1.8 hours at 20 miles per hour, and 7.2 hours at 5 miles per hour. In the latter case, the affected communities would in effect be severed for more than one-quarter of the day. This situation would be intolerable in virtually all cases.* (emphasis added)

"Railroad relocation and consolidation projects can result in a variety of benefits including increased safety and mobility for the highway user, reduced maintenance and operating costs for the railroad, and environmental enhancement, more compatible land use, and improved safety for the community.

"In an effort to keep abreast of this problem, the Federal Railroad Administration maintains a national inventory of grade crossings which identifies the amount of railroad traffic and the amount of motor vehicle traffic at each railroad-highway grade crossing. The inventory identifies the road system and shows two speeds at each grade crossing, the maximum timetable speed, and the typical speed over the crossing. It is possible to identify the towns associated with extremely slow speeds. It is not possible to learn whether a local ordinance or some other factor is responsible for the slow speed.

"At this time it is difficult to identify coal route grade crossings. Within a year, however, it will be possible, using the Fed-

eral Railroad Administration's network model and additional information supplied by the railroads, to identify the grade crossings associated with coal routes

"The 1944 Federal-Aid Highway Act provided that the entire construction cost for eliminating railroad-highway grade crossing hazards on the Federal-aid highway system could be paid from Federal funds. This Act also provided that not more than 10 percent of the total funds apportioned to each state in any year could be used for grade crossing projects at the special Federal share. Since the states have other high priority highway needs, only two to three percent of regular Federal-aid highway funds are expended each year for railroad-highway projects.

"In addition to the regular Federal-aid highway program, the Highway Safety Acts of 1973 and 1976 provided special funding for railroad-highway grade crossing safety improvements, both on and off the Federal-aid highway system. Since 1973, under the FHWA's Rail-Highway Crossing Program approximately $25 million has been apportioned to the states of Colorado, Kansas, Minnesota, Montana, Nebraska, Nevada and Wyoming. This $25 million will be spent making improvements to railroad crossings throughout each state, not just to those crossings traversed by coal-carrying unit trains. In accord with the legislation creating the program, at least half of these funds will be spent on low-cost grade crossing safety improvements, which are of little or no help in alleviating the hazards and inconveniences occasioned by increasing unit train operation. An additional $7 million is the 1977 fiscal year apportionment to these same states for improvements to rail-highway crossings on roads other than those on the Federal-aid system. *The apportionments of these funds to the various states are relatively small and the emphasis is on low-cost safety improvements. Consequently, this program is not currently an adequate means of funding a significant number of grade separation structures, which are typically justified on the basis of improving traffic mobility rather than safety.* (emphasis added)

"Other potential impacts from increased unit train traffic include increased air pollution emissions from both locomotives and auto traffic idling at grade crossings, and coal dust particles escaping from open hopper cars. The latter problem can be mitigated by wetting the open coal."

In volume 2 of its 9 volume report dated August 1977 to the Department of Interior, Bureau of Mines and the Federal Energy Administration, entitled "Comparative Coal Transportation Costs: An Economic and Engineering Analysis of Truck, Belt, Rail, Barge and Coal Slurry and Pneumatic Pipelines" by the Center for Advanced Computation of the University of Illinois at Urbana while addressing the technical issues of unit coal train delivery tangentially address the problem created by unit trains:

"A singular area for public action is rerouting lines around cities and towns. Clearly if train speeds must be 30–60 mph and train spacing one hour or less, trains cannot roll through level crossings in populated areas. The bypasses on the Interstate highway system are thoughtful examples of this. An alternative is the cordoned corridors for rail traffic that exist in the east. Both alternatives are expensive. *Nevertheless, if the rails are to carry the anticipated increased coal traffic and other freight, not only must an accommodation be made with the populated areas through which they pass, but it is likely that all county road crossings will have to be protected by remote control gates and all secondary (and higher classification) roads will have to be supplied with overpasses.* To the railroads the payoff for the capital investment is train speed, reduced operating costs and increased capacity which benefits all traffic. *If the railroads cannot or will not provide the capital, if rail transport is still considered desirable or necessary, rerouting must be done publicy.*" (emphasis added)

I think it is now clear that we have a problem. A problem which is not going to go away, but rather one which is only going to grow in terms of geographic perspective and intensity.

Obviously the problem is not one of simply cars versus trains. What we are talking about is disintegration of communities. Factions in communities will vie for public services to be located on that their side of the tracks. The fabric of our small towns will be torn apart by such debate. Just recently I received a copy of a letter from the Mayor of Scottsbluff, Nebraska (a copy of which I have provided all of you). On February 25 the city experienced a fire in the city's refinery and an explosion at the electric plant at the same time and all on the other side of the railroad tracks and no overpass to boot. Luckily, however, no coal trains were rolling through. Others may not be so fortunate. Emergency vehicles will be prolonged so that families may burn to death, individuals in ambulances may die, babies may die in birth on their way to the hospital. It is not a pretty picture to paint but the truth must be told regarding the impact of unit coal trains. The old adage that one lives on the wrong side of the tracks will become a life and death reality.

The situation is presently not hopeless but only precarious. Immediate action is needed to insure that grades can be separated or track relocated before the brunt of the unit coal train traffic is upon us. We can provide leadership and not simply be forced into a reactive posture, but we do not have much lead time.

I introduced S. 2164 in September of this past year to expedite the dialogue on this issue. The Department of Transportation should be finished formulating a position on this legislation soon.

Additionally, the issue of the cost of such a program must be addressed. The report of the Coal Transportation Task Force, states:

"The states, the railroads, and affected communities have all expressed concern with the effects of heavy coal traffic at grade crossings. In a survey conducted by the Federal Highway Administration, the states which indicated funding needs for grade separations and for bypass routes for 1985 coal traffic. Costs for individual separations range from $500,000 to $1 million or more, with total rail-highway grade crossing *needs exceeding $200 million*. This study focused on energy-related highway needs and the results do not reflect the full extent of the rail-highway grade crossing problem. The cost of eliminating all serious rail-highway conflicts could be significantly greater. The states expressing needs are Colorado, Iowa, Kansas, Minnesota, Montana, Nebraska, Nevada, North Dakota, and Wyoming. The heavily impacted states of Minnesota and Nebraska indicate needs for 32 grade separations each." (emphasis added)

The figures are conservative. A separated grade can run anywhere from $500,000 to $2.5 million depending on the size of the highway going over or under and the number of tracks being traversed. Additionally the "exceeding $200 million" figure I understand was a good faith effort but nevertheless a shot in the dark and is far low.

The costs of such a program are indeed high. While I introduced S. 2164, I do not subscribe to the belief that such a cost should be borne solely out of the federal treasury. Nor am I wedded to any specific dollar level. S. 2164 is a vehicle to expedite dialogue. I believe that we must have a shared cost; be it railroad, coal producer, coal consumer, federal or local money. I leave the division and level of funding of this program to your expertise.

However divided, the authorization for such a program must begin, and begin now.

Finally, Mr. Chairman, the Task Force made six recommendations. One of which is that "The Department should develop a program to identify and alleviate the adverse community impacts of expanded coal movement by rail." We can now take a major step toward fulfilling the recommendation.

Again I would like to thank the Chairman for the time he has extended to discuss this vital situation.●

THE REPUBLIC OF LITHUANIA

Mr. STEVENSON. Mr. President, I join Americans of Lithuanian origin in once again marking the anniversary of the establishment of the Republic of Lithuania. It was 60 years ago last month that the Lithuanians declared their independence. For many years now they have cherished the memory of that exhilerating, but all too brief, period when they were free to manage their own affairs. Tragically an end came to that freedom with the Soviet invasion in 1940.

The United States has laid heavy emphasis in recent years on the obligation of all States to honor those fundamental rights enunciated in the United Nations Charter and the Universal Declaration of Human Rights. The burden of that obligation ought not to rest lightly on the Soviet Union which bears the responsibility for extinguishing the freedom of Lithuanians.

While the adoption of the Helsinki Final Act may have held out to some the hope that human rights and personal freedoms in the orbit of the Soviet Union would be enhanced, experience has not borne that out. And this has been confirmed by the results of the recently-concluded Belgrade Conference.

In the face of the discouragements of the Lithuanian people over the recovery of their liberty, we should not lose faith. The United States must continue to expose the denials of freedom that do exist and to press the Soviet Union to live up to the commitments it has made within the framework of the United Nations and in the Helsinki Final Act so that the Lithuanians may one day enjoy the peace and freedom they justly aspire to.

THE NEED FOR PARKS PEOPLE CAN USE

● Mr. STEVENS. Mr. President, one thing that all Americans pride themselves on is their enjoyment of recreational facilities. In many instances, people travel many miles for recreation and spend hundreds of dollars to utilize a certain recreational facility. More recently, there has been an effort to bring recreational facilities closer to urban centers where large populations of Americans live. I support this concept and believe we need to develop more recreational facilities near our urban centers. One of the problems with developing

such urban facilities is the money that is needed to purchase the land and to develop the facilities. At present, there is a tremendous backlog of private inholdings located in existing parks throughout the Nation. The cost to purchase these private lands is often prohibitive and the land and water conservation fund does not contain the money needed for these purchases.

Legislation which I have introduced dealing with an Alaskan lands issue provides a special means to obtain more money to purchase private inholdings. My "d-2" legislation would designate a special fund in which moneys obtained by the Federal Government for the development of resources in Alaska would be earmarked for the purchase of inholdings in the Lower 48. I suggest to my colleagues that such a fund would benefit all Americans by assuring that the appropriate and reasonable development of Alaska's resources would also aid the development of recreational facilities throughout the United States.

Recently, an article in the Washington Post by Neil Peirce noted the increasing need to provide recreational facilities near urban centers. This article was an excellent summary of the conflict between the development of urban recreational parks and the establishment of parks in rural areas. Mr. President, I believe that there is a way to satisfy all needs through proper land use planning and careful consideration by Congress of new park legislation in Alaska. I ask unanimous consent that Mr. Peirce's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 17, 1978]

TIME TO PUT PARKS WHERE THE PEOPLE ARE

(By Neal R. Peirce)

A controversy pitting environmentalists against city leaders, and rural areas against urban, is shaping up over how the federal government should focus the hundreds of millions of dollars it spends on parks and recreation.

Ever since the Yosemite Valley became protected territory in 1864, federal funds for parks and recreation have been channeled overwhelmingly toward the great open spaces, far away from the centers of population where most of the nation's people live.

City spokesmen are arguing that it's time to reverse the priorities, to use federal funds to undergird badly deteriorated urban parks and to place new parks and recreation areas where they're accessible to the 70 percent of Americans who live in urban areas.

The cities are finding surprising allies in the Interior Department, historically a bastion of rural and western interests. Interior Secretary Cecil Andrus recently presented in person a check for $307,476 to Massachusetts Gov. Michael S. Dukakis to cover half the cost of Boston's new Harbor Islands State Park.

Says Interior Under Secretary James A. Joseph: "A week in the mountains can be a wonderful and revitalizing escape from the numbing routines of urban life, but its brief exhilaration cannot carry one through 51 weeks of life trapped in the inner-city constrictions of brick and asphalt, mind-numbing routine and depressing lack of recreational opportunity."

Joseph notes that many of the people who need recreational opportunities the most can ill afford them—"especially if they involve long trips by private automobile to faraway places." And a new Interior Department study (the National Urban Recreation Study, to be sent to Congress today) notes that 45 million Americans live in households without cars.

The new study is sure to generate heated debate because it will name as one clear policy option deemphasizing acquisition of open space and recreation development in rural areas in favor of federal support for park facilities in densely populated urban centers. Specifically, the study will suggest the possibility of shifting part of the federal government's Land and Water Conservation Fund, 60 percent of which goes to the states for preservation of natural areas and outdoor recreation development, toward direct aid to cities to develop and operate their own park and recreation facilities.

The idea of siphoning off part of that fund, authorized by Congress at $900 million in the next fiscal year, already has environmental interests, led by the Sierra Club, up in arms. They say federal funding for open space is already inadequate and that the cities ought to look to other funding sources. The cities reply that inflation and declining tax bases have made it almost impossible to maintain their existing recreational facilities, let alone expand them.

In fact, Congress has reduced some of the federal government's traditional bias for open space projects by funding three urban recreation areas since 1970: Gateway in New York City and neighboring New Jersey, Golden Gateway in San Francisco, and Cuyahoga between Cleveland and Akron, Ohio. All have proven expensive to operate. Congress, worried about becoming enmeshed in a bottomless pit of similar requests, in 1976 asked the Interior Department to list "options" for future urban park development—the genesis of the study.

Meanwhile, the new urban facilities are proving extremely popular. The Gateway National Recreation Area, for instance, drew 9.6 million visitors in 1976, costing $6.6 million to operate. In the same year, Yellowstone National Park drew only 2.5 million visitors, with an operating cost of $7.6 million.

Urban parks, says Massachusetts state planner Frank Keefe, provide multiple benefits: They save energy "by bringing parks to where people live." They serve needy populations. And by making cities attractive places in which to live and work, they help attract private investment and provide a powerful incentive for citywide and neighborhood economic redevelopment.

Keefe says that in earlier years, when Massachusetts was using federal funds to buy up big chunks of open space on the urban fringe, "we found we were just making the contiguous parcels all the more attractive for development by high-income people and fostering suburban sprawl." Now the Bay State focuses 90 percent of its federal park funds on urban centers.

Keefe believes environmentalists defeat their own goals by insisting that federal support for parks be concentrated in distant rural areas. "That scarce money opens up areas where there are fragile natural resources," he says. "You just attract more and more people there to trample around." Urban parks, by contrast, create amenities close to home so that people will be less tempted to try to get "a second home, a trailer, or a tent pack in the middle of the wildlands of America. It's an elitist notion that the only place you can recreate with any level of satisfaction is in the wildlands."

But Keefe takes issue with the Interior Department's suggestion that federal parks money might go directly to cities, bypassing the states. He acknowledges that states have made the mistake of putting most or all their parks money—from federal grants and their own treasuries—into distant open spaces. But Washington could require states to reorient their use of federal parks funds toward urban areas. The states' own moneys would probably be reoriented as well, so that "the grants would be mutually supportive of one another."

In several large cities where local recreation funds have been cut back, private nonprofit "friends of the parks" organizations have been formed. The New York City Parks Council, for instance, raises private money, trains federal manpower workers and lobbies the state parks agency for federal and state money for city parks. With regular parks maintenance personnel cut back 50 percent, the organization mobilizes adult and teenage volunteers to assist with park maintenance.

Last year the council built a waterfront park at the foot of Grand Street in Brooklyn's Williamsburg section. Using oak barrels from an old fish market for seating, rock from a subway tunnel for construction and donations from industries in the area, the cost was kept under $10,000.

Chris T. Delaporte, newly appointed director of the Interior Department's Heritage Conservation and Recreation Service (formerly the Bureau of Outdoor Recreation), is clearly of a mind to support urban recreation. Delaporte says his agency will be part of "the campaign at all levels of government to make our towns and cities good places to live in. We are going to have a national set of goals and objectives to see that neighborhood parks become synonymous with the reputation and quality of our national parks." ●

COMMUNITY SCHOOLS AND COMPREHENSIVE COMMUNITY EDUCATION ACT OF 1978

● Mr. WILLIAMS. Mr. President, I am pleased that my distinguished colleague, Senator CLAIBORNE PELL, chairman of our Subcommittee on Education, Arts and the Humanities, has asked to be added as a cosponsor to S. 2711, the Community Schools and Comprehensive Community Education Act of 1978.

Senator PELL'S continuous leadership in the field of American education is much appreciated by the Nation and his support of this bill is welcome news for the strengthening of Federal efforts to assist State and local education agencies.●

IMPORTANT ROLE OF THE INTERNATIONAL RED CROSS

● Mr. KENNEDY. Mr. President, one of the most important and effective international organizations in the crucial area of human rights and humanitarian concerns is the International Committee of the Red Cross. For more than 100 years, the ICRC has intervened in behalf of the victims of conflict, war, and political strife, and its record of achievement has earned it three Nobel Peace Prizes.

This past week the President of the International Committee of the Red Cross, Mr. Alexandre Hay, visited Washington. In an interview with the Washington Star, Mr. Hay briefly assesses some of the current issues and concerns involving the ICRC, and reviews the important work it has undertaken in Af-

rica—where the Red Cross has assisted victims on both sides of the conflict between Ethiopia and Somalia.

Mr. President, I commend to the attention of my colleagues the interview with Mr. Hay, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

[From the Washington Star, Mar. 15, 1978]

DIFFICULT ROLE FOR RED CROSS IN AFRICA'S WARS

(NOTE.—Alexandre Hay is president of the Geneva-based International Committee of the Red Cross—a 100-year-old, three-time Nobel Peace Prize-winning organization whose main function is to intervene on behalf of victims of international conflicts. He was interviewed by Washington Star Staff Writer Henry S. Bradsher.)

QUESTION. What is the ICRC's main area of emphasis these days?

HAY. As you know, the situation of warfare and suffering, unfortunately, has very much changed. We do not have so many classical wars between two or three or four states. Now the fights are quite often internal—rebellions, wars of national liberation. It's a little more complicated. Our task is to bring help in all parts of the conflicts and to all sides of the conflicts, to visit prisoners, to bring help to the wounded, to the civilian population which suffers from the conflicts. We remain completely neutral, we don't take any political position. We're just offering our service on a humanitarian basis. All that is based on the so-called Geneva Conventions, which are the international basis for our activities.

Q. Where are you most active now?

A. The African continent is now our main preoccupation. In this continent we have at least five or six conflicts—Rhodesia, the southern part of Africa, in Chad, in the Sahara, in Ogaden and Somalia. The Middle East, which is quite near, is also one of our fields of activity. So there really is plenty to do in this part of the African continent.

Q. To take one example, what are you able to do in the Ogaden conflict right now?

A. Just now we have our delegates in the capitals of Ethiopia and Somalia as well as on the front. Our delegates are trying to visit the prisoners held by the armies involved. We are bringing medical help to the wounded in the hospitals and I can tell you it is a very deep necessity. There are very many wounded on both sides. And we contemplate bringing food help in certain areas for the civilian population.

Q. Has it been your experience that visits to prisoners sometimes help to improve their conditions in conflicts of this sort?

A. I would say yes. Our people, of course, have a great deal of experience in these types of visits. They are familiar with the normal standard that we should have for prisoners. If this normal standard is not reached, we make recommendations for alternative ways to treat the prisoners.

Q. You use simply a moral force without any way to back it up?

A. Where we are acting on the basis of the Geneva Conventions, there are certain responsibilities on the regime which should be applied in prisoners' camps. So we can invoke these legal aspects and that, of course, is a certain help. Generally, the country which signs these conventions feels it is best to apply them.

Q. What about guerrilla movements which are not signatories? How are you able to exercise your influence?

A. We can give some indication about reciprocity: We try to ensure that their people are well treated by the enemy and in that case they should treat well the people they have under their control. That is sort of the argument which applies generally but we are not very keen on invoking the argument of reciprocity. But sometimes it helps.

Q. During the Indochina wars you were very active in Cambodia, Vietnam, that area. Have you been able to continue your work there?

A. Yes, our delegates are still in Vietnam. We maintain contact with the Red Cross people of Vietnam and we were able to fulfill certain tasks of protection. For example, to help in the repatriation of foreign people who were in Vietnam without diplomatic protection and who now want to go back to their own countries. The Chinese want to go to Taiwan, and the Koreans want to go back to Korea. So we help in the repatriation of these people.

Q. Have you been able to work in Cambodia? Do you have any information on what has been happening there in the last three years?

A. Unfortunately not. Of course the information we have about the situation in Cambodia is the same as many others. We know that the situation is a very tragic one. We would like very, very much to do something. As soon as we saw what happened in the newspapers we offered our services basing our offer on the Geneva Conventions signed by both countries, Cambodia as well as Vietnam. We consider that as an international war which is covered by the Geneva Conventions. We have offered our services. Until now, we have no official answer.

Q. You were very active in the civil war in Lebanon. Do you continue to maintain a presence?

A. Yes, we are still present in Beirut and active mainly in south Lebanon where some fights still are going on from time to time. The situation is still very tense. Certain regions are very difficult to reach and only our people are capable of bringing some help—medical or food—in certain villages which are in exposed situations. We still have doctors, and certain delegates in Lebanon. But it's less than in the time of the big fights.

Q. How are the ICRC operations financed?

A. By contributions we get from the governments who have signed the Geneva Conventions. The main part is assured by the Swiss government because of the special situation of Switzerland. I think the Swiss government now pays something like 50 percent of the total of our normal budget.

Q. You have just been told by the U.S. government that it is going to increase its contribution.

A. Yes. That intention at least is in discussion before the Congress. And I hope very much that Congress will vote that. The administration is recommending it. That would be a help for us and we hope that other governments will follow the example of the United States and increase also their contributions because our budget now is so narrow and so small.

Q. What is an example of an area which you are not able to operate because of financial problems?

A. Well, we feel we have to have representation in Africa, with all these new states. The position of the ICRC is not always well understood. People think you cannot be neutral in a national liberation conflict. It's difficult to understand. So we think we should be much more in evidence in these different countries and have delegates there who can have the necessary contacts, to explain what we can do, how we can help and so on. And for that, it needs something of a permanent delegation in the region. We've had to close one or two of our delegations in Africa, because we didn't have the money to support an operation which did not meet an immediate need. In Africa, we encounter some difficulties in our activity, probably because we are not known enough. Of course coming from an industrialist country, we're white and so on, we're raised a certain way. We are coming from the other world. What does it mean that a Swiss can be neutral? they ask. He is white. He is coming from the capitalist country and so on. There are obstacles which we can overcome if we can explain what we are doing. Who we are and what are our real intentions. That would need a much more permanent presence. That could cost money.

Q. In addition to prisoners of combat there has been much international attention focused by organizations like Amnesty International on domestic political prisoners. Do your operations extend to those kinds of prisoners?

A. Yes, we have had quite a large activity in this field for more than 30 years. But here we offer our service not on the basis of our international conventions because they did not foresee this type of activity. But we feel that, after all, the political prisoner is quite often in the same situation as a prisoner of war. He has fought against the state: The state was successful in capturing him so he is in the hands of his enemy. We ask to be able to visit these people just to see that the conditions are as good as possible. These people are human beings and they should not be tortured and so on and so on. ●

CONFERENCE ON THE PANAMA CANAL TREATIES

● Mr. STEVENSON. Mr. President, in Chicago last Friday the Progressive Association of Latin Americans and the International Relations Club of the University of Chicago held an important conference on the Panama Canal treaties. I was scheduled to address them on that topic but was prevented from being in Chicago because the Senate was voting on the leadership amendment to article IV of the Neutrality Treaty. I ask unanimous consent that my remarks be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR ADLAI E. STEVENSON

The treaties before the Senate are the product of negotiations by four American administrations with the Republic of Panama:

One, the Panama Canal Treaty, governs the operation of the canal until the year 2000. Under this treaty, the United States, operating through a Panama Canal Commission, will be responsible for the operation of the canal for the next 22 years. We will also have the primary responsibility for the defense of the canal. Although we will continue to have responsibility for the canal's operation, we undertake in this treaty to associate Panamanians in the operation of the canal so that by the end of the century they can ensure that the canal is kept in safe and efficient operating order for the benefit of ships of all nations.

The Neutrality Treaty, the one now being debated in the Senate and on which a final vote is expected March 16, requires the permanent neutrality of the Panama Canal after the canal is turned over to Panama on December 31, 1999. Under this treaty the United States has the right, along with Panama, to defend the neutrality of the canal against any action that threatens its secure operation. We also have the right to have our ships go to the head of the line in time of emergency.

The United States built the Panama Canal and developed it into one of the world's great waterways—an economic boon in peacetime and a vital defense link in wartime. Con-

sequently, many people are reluctant to relinquish its "control."

I understand that—but I intend to vote for ratification of the treaties. These are not the swashbuckling days of the Spanish-American War when manifest destiny was riding high. In those days the Panama Canal was conceived and executed as an American enterprise. Since then, we have been sobered by two World Wars, Korea, Vietnam, an awareness that the globe has shrunk, the nations of the world are dependent on one another and that other peoples have their inalienable rights, too.

We encouraged other nations to give up their colonial possessions. We pressed the British to leave India, the Dutch to leave Indonesia and the French and Belgians to give up their African empires. We effectively opposed Britain's attempt to regain the Suez Canal in 1956. And for all the flag waving to the contrary the Panama Canal Zone is not an American colony to give up. It was a part of Colombia. It never was a part of the U.S., the U.S. pays rent for its occupation of the Canal Zone We give up nothing that is ours by these treaties; and far from giving up "control," we seek in these treaties to maintain control and for all time our right to transit the canal. To give us less than we have urged others to relinquish would be rank hyprocrisy.

Our interest is the canal's continued efficient operation and U.S. access on a nondiscriminatory basis. Four administrations have not sought to give up "control"; they have sought to assure U.S. access for all time. That means putting relations with Panama on a realistic footing instead of defending an indefensible status quo. One mortar round could put the canal out of operation. It is an extreme sort of unrealism that supposes we can go back to the days of the Rough Riders and defend the Panama Canal from the Panamanians and ourselves from the judgment of this world. It is time we acted from the vision of an enlightened America and not the hallucinations of extremists.

It often takes time for reason to prevail in America. But give ourselves some time, and the right usually wins out. This subject has inflamed feelings and produced misunderstanding. But the tide is turning. My mail reflects an increasing awareness of the benefits these treaties will bring to the United States. The latest national poll bears this out. NBC reports that 54 percent favor the treaties and 40 percent are opposed. A gallup poll earlier in February showed 45 percent in favor, 42 percent opposed. The trend is clear.

The people of America are not unjust or unwise. They seek to protect their basic interests while respecting the legitimate interest of the Panamanians in controlling their own land. Failure to reach agreement with the Panamanians would be viewed throughout the world as a collapse of American wisdom, a triumph of ignorance and evidence of our inability to govern and lead a world which once saw us as its last best hope. I think most American people understand that.

Question after question has been raised—and answered. Questions have been raised about the right of the United States to take military action to preserve the neutrality of the canal and enjoy expeditious passage of its warships through the canal. These questions have been dealt with by assurances and clarifications from the administration and Panama. They are now incorporated in amendments to the Neutrality Treaty which employ the language of the Carter-Torrijos statement of last October. They make explicit in the text of the treaty what was already implicit.

Questions have been raised about the economic implications of these treaties. The operating costs of the canal and payments to Panama will be made from canal revenues, not tax dollars. These payments will be about $45 million per year, an annuity of $10 million and an additional $10 million if canal revenues permit. The United States will also pay Panama $10 million for police and fire protection and other municipal services that we now provide. Canal tolls will increase, but inflationary pressures would have brought increases in any event.

There will be costs for the United States in connection with termination of American activities in Panama. Defense installations will be relocated. Retirement benefits will be paid. The Secretaries of State and Defense estimate that all these costs over the next 21 years will be about $350 million. But we have recovered our investment and these costs many times over. And, more important, endless warfare and universal contempt would cost far more.

Questions have been raised about the provision which prevents the United States from building an interoceanic canal in any other country in the region without Panamanian approval. However, the best route for another and more adequate canal is in Panama. The effect of this provision is to protect the United States by preventing Panama from negotiating with another country for a new canal without our consent.

These are the major questions the Senate is debating. It has become a one sided debate; indeed the debate is reduced to a genteel filibuster. The tide is turned, and it appears only a matter of time before the Nation shakes off a romantic vision of the past for a nobler vision of the future. These treaties will serve us better than the old; and so I support them along with most Americans.●

THE TAX SQUEEZE ON MIDDLE-INCOME TAXPAYERS

● Mr. ROTH. Mr. President, for the past few years, I have been urging Congress to provide tax relief to middle-income taxpayers. I have argued that middle-income taxpayers pay most of the taxes yet receive few benefits from the Government. And finally, I have argued that across-the-board tax cuts are needed, and that tax relief should not be limited to those making less than $15,000, $20,000 or some other arbitrary level.

A recent article in the Washington Post written by Mr. Art Pine confirms my belief that substantial across-the-board tax reductions are needed. According to the article, American households earning $17,000 and more paid more than 70 percent of all personal income taxes in 1976.

Even more startling, about half of all American households paid 94 percent of all taxes last year. This means that we are approaching the point where half of the people will be paying taxes to support the other half.

As the article points out, the tax reductions enacted over the past few years have only benefited lower-income groups, pushing more of the tax burden onto middle-income taxpayers. According to the article, this has resulted in a "a significant tax squeeze on the so-called 'middle' and 'upper middle' income brackets—the 10.7 million taxpayers show incomes fall between $20,000 and $35,000 a year."

Mr. President, this article clearly shows that the middle-income taxpayers of this country are shouldering a disproportionate share of the tax burden. And the statistics presented in the article emphasize the need to reject the administration's tax proposals which increase the tax burden on middle-income taxpayers. In particular, the President's proposal to replace the $750 personal exemption with a $240 tax credit and his proposed changes in itemized deductions will substantially increase the tax burden on middle-income taxpayers, and I urge my colleagues to reject these two proposals.

Mr. President, I ask unanimous consent that the Washington Post article be printed in the RECORD following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RICHER HALF OF U.S. PAYS 94% OF ALL INCOME TAXES

(By Art Pine)

The richest one-fourth of American households—those with incomes of $17,000 a year or higher—took home half the income in this country in 1976 and paid more than 70 percent of all personal income taxes.

By contrast, those in the poorest one-fourth—wage earners making less than $5,000 a year—received less than 5 percent of the nation's income that year and paid a minuscule 0.1 percent or less of the income-tax tab.

Those in the richest 5 percent of the country—taxpayers with incomes of $30,000 or more—earned 22 percent of the income in 1976 and paid 39.2 percent of all income taxes.

By contrast, the poorer half of all persons filing tax returns earned 19 percent of all income and paid 6 percent of the personal income taxes in 1976, while the richer half paid 94 percent.

Those figures, compiled by the Treasury Department from estimates based on 1976 income levels, show a stark fact about the way the tax burden is distributed in this country:

While it's true, as some studies show, that wealthier persons enjoy the biggest tax breaks and deductions, they also shoulder a disproportionate share of the tax burden—far beyond what is perceived generally.

Moreover, the distortion has been heightened by the tendency of Congress in recent years to skew most of the tax breaks it has enacted to those at the lower end of the income scale.

To make up for inflation and higher Social Security payroll taxes, the law-makers have cut income taxes. But most of the cuts have benefited lower- and lower-middle-income taxpayers—not the middle or the top.

The result of all this has been a significant tax squeeze on the so-called "middle" and "upper-middle" income brackets—the 10.7 million taxpayers whose incomes fall between $20,000 and $35,000 a year.

While the proportion of Americans' personal income eaten up by the income tax has remained relatively constant over the past few years, at about 13 percent, the burden of that tax load has shifted to higher-income brackets.

For example, figures compiled by the Tax Foundation show that the richest 25 percent of the nation's taxpayers paid 68.3 percent of all taxes in 1970. By 1975, that figure had risen to 72 percent.

Those in the richer 50 percent paid 89.7 percent of the total tax in 1970. By 1975, that had increased to 92.9 percent. All taxpayers

in the richer 50 percent bracket saw their share of the total tax tab rise.

At the same time, those in the poorer half enjoyed a shrinking tax burden during the period. The taxes paid by the lower half fell from 10.3 percent in 1970 to 7.1 percent in 1975.

For the poorest 25 percent of all taxpayers, the proportion of the total tax bill fell to 0.4 percent in 1975, from 0.9 percent in 1970. In any case, the trend is clear.

President Carter's new tax-cut package would only heighten the disparity. Carter has proposed replacing the present $750-a-dependent personal exemption with a new $240 credit that would shift the burden further toward the middle- and upper-middle-income brackets.

The battle in Congress now is precisely over how far that shift should be allowed to go. Members of the House Ways and Means Committee have indicated that they are concerned about the tax burden borne by upper-income brackets and most likely will revamp the Carter proposals.

Moreover, the heavier tax burden continually is reaching downward to include people who used to be in lower-middle-income brackets. As inflation pushes incomes higher, taxpayers are thrust into higher brackets.

With the combination of inflation and higher tax rates in the upper brackets, the wealthiest of the nation's taxpayers pay disproportionately high shares of the total tax burden—even including their shelters and deductions.

For example, the richest 1.4 percent of the nation's citizens—some 985,000 whose incomes total $50,000 or more a year—take home 10.7 percent of the income, but pay 23 percent of the taxes.

The wealthiest 0.3 per cent—those in the $100,000-and-up category—receive 4.5 percent of the total income, but pay 10.5 percent of the tax burden. (The poorest 0.3 percent escape taxes altogether.)

The breakdown portrayed by these figures pertain only to personal income taxes. With Social Security payroll taxes included, the pattern is different but the point remains the same.

The figures used in the computations include income from capital gains—profits from the sale of stocks or other assets—only half of which are subject to tax. The totals for tax liability include writeoffs and deductions.

But the fact remains that, for all the complaining about wealthy, taxpayers, those in the richer half of the nation's income brackets are paying 94 percent of the personal income taxes. The other half is paying the rest.●

NOTICE OF DETERMINATION ON ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

● Mr. STEVENSON. Mr. President, it is required by paragraph 4 of rule 43 that I place in the CONGRESSIONAL RECORD this notice of a Senate staff member who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 43 from Senator DANIEL P. MOYNIHAN which would permit his staff assistant, Gabriel Schoenfeld, to participate in a program sponsored by a foreign educational organization, the Ring Politischer Jugend of the Federal Republic of Germany, March 7–17, 1978.

In addition, Mr. Schoenfeld will be participating in a related program in Brussels, Belgium, from March 17–20, 1978, at the invitation of the U.S. Youth Council, Young Political Leaders delegation, which is a domestic, U.S. organization, partially funded by the Department of State.

It has been determined that participation of Mr. Gabriel Schoenfeld in the program in West Germany, at the expense of the Ring Politischer Jugend to discuss Western European governmental matters is in the interest of the Senate and the United States.●

ADMINISTRATION SUPPORTS S. 2546, THE EFT CONSUMER PROTECTION ACT

● Mr. RIEGLE. Mr. President, I am extremely pleased to report that the administration has announced its support for S. 2546, legislation which I have introduced to establish consumer rights and remedies in electronic fund transfer systems.

In a letter to me dated March 13, 1978, Esther Peterson, the President's Special Assistant for Consumer Affairs, has communicated the administration's support for S. 2546 and its hope that Congress will take action this session to assure that consumers are provided fundamental safeguards in EFT transactions. Ms. Peterson makes two points which I believe are important. First, the raw number of EFT transactions now being completed is so substantial that consumer safeguards should not be put off to a later date. In addition, she points out that the consumer protection issues of EFT stand on their own merits and should not be combined legislatively with other more controversial EFT issues that might delay implementing these safeguards.

S. 2546 represents a 9-month effort to carry out the National EFT Commission's recommendation that Congress enact a "model EFT consumer code" setting forth basic consumer rights and safeguards, such as full disclosure of EFT account terms, prompt correction of account errors, and limits on a consumer's liability if an EFT card or code is lost or stolen and the consumer's bank account is emptied. In drafting this legislation, every effort has been made to meld these protections with existing bank practices so as not to create operating difficulties for financial institutions.

I think that success of this effort is borne out by the endorsements which this bill has received. Among consumer groups, the Consumer Federation of America, Consumers Union, and the National Consumers League all have endorsed the bill. One of the Nation's largest EFT networks, Wisconsin's TYME Corp., has also voiced its support. And now the administration has endorsed this bill.

Mr. President, I ask unanimous consent that the text of Ms. Peterson's letter to me be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, D.C., March 13, 1978.

DEAR SENATOR RIEGLE: I am pleased to provide comments on behalf of the Administration on your revised Electronic Fund Transfer Consumer Protection bill, S. 2546.

In general, the Administration supports this bill and believes that it provides the necessary consumer protection legislation in this area. Those who argue that the time is not ripe for the development of consumer protections should bear in mind that EFT is not a thing of the future; there are now some six million EFT transactions taking place every month. In addition, they should remember that the success of EFT systems is heavily dependent on consumer acceptance which may not and probably will not occur unless consumers feel they are as secure in using EFT as they are in using checks and credit cards. Accordingly, we urge passage of this legislation by the end of this session of Congress.

We have a good bill before us, a bill on which there is a great deal of consensus between consumers, the banking community, retailers, and members of Congress. Therefore, there is no reason to put off consideration of these issues any longer. If these important consumer problems are mixed with other knottier problems, such as sharing, on which there is less consensus, they will be buried. Now is the time to shape the future of consumer EFT services—with this bill—so that EFT will not only benefit its developers, but will also benefit its users.

Many of the changes you have made in S. 2546 are excellent. In particular, the definitions in this bill are much clearer than in S. 2065. "Business day" has been well defined, "electronic fund transfer" has been narrowed, and "preauthorized electronic fund transfer" clarified. This bill also wisely limits liability for unauthorized use of a debit card to $50 instead of shifting to the negligence standard recommended by the National Commission on Electronic Fund Transfers.

However, some of the provisions of S. 2546 are not as beneficial to consumers as those in S. 2065. Of particular concern is the extension of time in which a bank must investigate an alleged error from three to ten days. Because we are dealing in EFT with funds that the average person relies on from day to day to buy food and pay bills, any error must be resolved as quickly as possible. While ten days is certainly preferable to the 45 day period suggested by the EFT Commission, I still question whether ten days is, in fact, as quickly as banks can resolve EFT problems. It seems that the new electronic technology should make it easier, not harder, for a bank to investigate and resolve an error.

The modification in this bill to allow the distribution of unsolicited debit cards is also of concern. The bill does build in many safeguards against unauthorized use of unsolicited cards. Section 912(b)(4) should be strengthened to require written verification of identity. As the requirement now stands, it seems that a consumer's identity could be verified merely by phone contact or some other non-secure means.

Additional concerns about S. 2546 are outlined in the attached pages. I want to stress again that, in general, I support your efforts and hope that your fine EFT bill receives prompt attention by the full Senate.

Sincerely,

ESTHER PETERSON,
Special Assistant to the President, for Consumer Affairs.

ADDITIONAL COMMENTS ON S. 2546

Section 903(2)—Definition of "Account".

Recommendation: Revise to include consumer system accounts which may be used by farmers and others for business purposes.

Rationale: In general, the definition of "account" has been wisely clarified to exclude funds which may be temporarily held by retailers. However, it seems that the limitation of coverage to accounts "established primarily for personal, family, or household purposes" does not really accomplish your presumed intent to exclude those using business EFT systems from the detailed protection of this bill since they could, presumably, protect themselves in their contracts. However, it does not seem that the contractual protections theory should extend to those such as family farmers or small businessmen who may very well use regular consumer accounts to conduct their business. In addition, the Uniform Commercial Code does not make this sort of distinction for checks; is there really a strong reason for making the distinction with EFT?

Section 905(a)(10)—Notification of circumstances under which information will be dislosed to third parties.

Comment: It should be pointed out that S. 2546 does not comprehensively cover the privacy concerns surrounding EFT and other banking transactions. For instance, there is no requirement that account holders disclose the nature of the records kept, the extent of the availability of records to the government and private third parties or the rights, if any, of consumers to contest third party access to their records. The Senate should consider these and other problems in comprehensive privacy legislation in the near future.

Section 905(b)—Notification of change in terms or conditions.

Recommendation: Amend to require conspicuous disclosure.

Rationale: Some have alleged that under similar requirements in Truth-in-Lending, credit grantors have disclosed changes in finance charges so inconspicuously that they are not noticed by consumers, or have disclosed them in such a way that consumers do not understand the effects of the change. If possible, 905(b) should be amended to avoid these pitfalls.

The Committee might also wish to add at the end of the subsection "or a decrease in the period of time in which a consumer must act to exercise his rights." Changes in these time periods may have just as negative an impact as increased costs and liabilities or decreased access to an account.

Section 906—Documentation of Transfers.

Recommendation: Require notice of financial institutions inability to complete telephone transfers because of insufficient funds or other reasons at the time the transfer is requested.

Rationale: Financial institutions are not liable for any damages due to failure to complete a transaction because of insufficient funds, over-extension of credit, etc., under Section 911(a). Therefore, the consumer needs to know when a transaction cannot be completed for any of these reasons in order to protect himself.

Section 908—Reversal of Transfers.

Recommendation: Delete the $50 minimum for reversible transactions.

Rationale: The theory behind the $50 minimum is to attempt to distinguish between EFT transactions which are taking the place of checks and those which are taking the place of cash. This is faulty logic for two reasons: first, EFT is a totally new system which combines some of the characteristics of checks, cash, and credit cards with some new characteristics of its own. Therefore, it is totally arbitrary to say, merely by dollar amount, what consumer protections should carry over to EFT from more traditional payment systems; second, assuming that reversal is designed to replace stop payment on a check, it should be remembered that one can stop payment on any size check, from $.50 to $50 and above. Why should EFT make a distinction which checks do not?

Reversibility is an important protection for consumers and should be available for all transactions, and it seems that retailers and others offering EFT to consumers will need reversibility to gain consumer acceptance of the systems. In addition, reversibility should not be much of a financial threat to retailers and other third parties, for the number of reversals should be very small. The number of annual stop payments is estimated at only .029 percent of all checks. Furthermore, in Wisconsin, where reversibility has been available in some stores for almost a year, there has not been one reversal. So, we are talking about a very small burden to retailers in exchange for a large benefit, the benefit of leverage, to consumers.

Section 909—Error Resolution. See cover letter.

Section 912—Issuance of cards and other means of access. See cover letter.●

INTERSTATE LAND SALES FULL DISCLOSURE ACT AMENDMENTS

● Mr. NELSON. Mr. President, last Friday I introduced legislation that would significantly reduce the regulatory and paperwork burden imposed on small land developers by HUD's Office of Interstate Land Sales Registration (OILSR), which administers the Interstate Land Sales Full Disclosure Act (ILSFDA) of 1968. Senators SPARKMAN, MCINTYRE, TOWER, GARN, MORGAN and CRANSTON have joined me as cosponsors of this bill, S. 2716.

In keeping with the original intent of the Interstate Land Sales Full Disclosure Act, which was to eliminate fraudulent practices in the "interstate" sale of land, this bill would create two exemptions to the act for developers who sell land entirely, or almost entirely, "intrastate." Unlike exemptions which OILSR currently permits for certain small land developers, these exemptions would be automatically available for any developer who qualifies, thereby sparing the burden and expense of having to fill out all kinds of forms currently required by OILSR to determine if the developer is eligible for its regulatory exemptions.

First, a developer who sells no more than five lots or 5 percent of the lots sold during a calendar year (whichever is greater) to out-of-State purchasers would be exempt if, first he provided those purchasers with assurances that the land is free and clear of liens and encumbrances; second, the purchasers make an onsite inspection of the lot; and third, the seller agreed to submit himself to the jurisdiction of the home State of the purchasers.

Also exempted would be sales to purchasers residing within 100 miles of the seller, provided, first, the lot was free and clear of liens and encumbrances; two, the purchaser made an onsite inspection; third, the seller agreed to submit himself to the jurisdiction of the home State of the purchaser; and fourth, the developer executes a written affirmation on a form furnished by the HUD Secretary that he has complied with these three provisions.

This legislation also makes several technical changes in the ILSFD Act:

First. Language has been added to make clear that the terms "liens," "encumbrances," and "adverse claims" do not refer to U.S. Land Patents and similar grants or reservations. OILSR's interpretation of the law on this has been used to bring virtually every acre of land sold west of the Mississippi under their jurisdiction.

Second. Language has been added which would require OILSR to publish any regulation in accordance with the Administrative Procedures Act.

Third. The term "sale or lease" has been defined as occurring at the time when a contractual relationship is created between the developer and purchaser, thus clearing up an area where OILSR has been free to use whatever interpretation it has found most favorable to its continuing regulation of land sales.

A 3-year study by my staff and hearings before the Select Committee on Small Business, dealing with the problems of small business land sales operations as they are affected by the operation of the HUD Office of Interstate Land Sales Registration, have convinced me that corrective legislative action is imperative.

OILSR has interpreted this "interstate" law as granting it the authority to regulate "intrastate" land sales operations as well. In my opinion, OILSR was granted a restricted fishing license to go after a rare species; the "interstate" fraudulant land developer. However, it appears determined to net all the fish in the lake to make certain that that rare species does not escape.

This stretching of OILSR's "interstate" jurisdiction to include "intrastate" land developers subjects those businessmen to the cost and aggravation of an unnecessary, substantial paperwork burden; unnecessarily consumes tax dollars to support the bureaucracy which is needed to handle the additional government paperwork burden; and inevitably increases the cost of land for the consuming public. And, this inclusion of the "intrastate" developer, who is not and never was a part of the problem, contributes nothing to the solution of the real problem of controlling fraudulent "interstate" land sales.

The amendments which I offer today are designed to narrow OILSR's jurisdiction so that its resources can be committed to effectively protecting the land buying consumer by controlling fraudulent "interstate" land sales operations, which was clearly the intent of Congress when the ILSFD Act was enacted.

I believe there is agreement both in the public and private sectors that the objective of the Interstate Land Sales Full Disclosure Act is sound. The bill has the mechanisms to protect purchasers of land who live in one State from the sharp practices of developers in another State, as the Congress intended. Under these circumstances, sales are frequently made sight unseeen. By legislating Federal jurisdiction and disclosure requirements in these incidences. the law places the purchaser in a position where he or she can make an informed judgment regarding the value of the property prior to pur-

chasing it, and allows that purchaser to sue in Federal court rather than having to go through the expensive and complicated procedure of suing in the State courts where the land is located, if he or she has a grievance.

However, the vast majority of land sales operations in this country are small business "intrastate" operations. Sales by these businessmen are rarely made without an on-site inspection by the purchaser; and, of course, the problem of suing in the courts of another State does not exist.

The most common complaint regarding OILSR comes from the small business real estate operator who has never been involved in "interstate" land sales and has no intention of engaging in such an operation, but who has none the less been drawn into the jurisdictional net because of OILSR's interpretation of what constitutes "interstate commerce". One small business "intrastate" realtor, who was engaged in a dispute with OILSR, recently wrote to me:

It is another example of a regulatory agency placing an almost insurmountable reporting burden on a small businessman who has neither the staff nor the economic wherewithal to stay in compliance and still be able to carry on his regular business.

The Small Business Committee heard testimony from three panels representing the real estate industry—the National Association of Realtors, the National Association of Home Builders, and the American Land Development Association. These groups, I am told, represent a majority of those in the industry who must deal with OILSR (the National Association of Realtors alone has over 500,000 members). I do not believe that their testimony, which was based on 9 years of experience by their members in operating under the law and which universally criticized the way the law is being administered, can be taken lightly. I believe they were sincere and responsible. No one advocated the dismantling of the act. There was no "consumer be damned" attitude expressed. They expressed support for the basic goal of controlling the fraudulent land sales operations which gave rise to the act. Their plea was for an easing of the burden imposed, especially on small business intrastate operations by OILSR's administration of the act.

The paperwork burden imposed by Government regulations is a matter of growing concern for businessmen of this country. The President has made the lessening of this burden one of the primary concerns of his administration. There is a consensus among the Members of Congress to assist the administration in reaching a reasonable level of regulation, which will carry out the mandates of Congress with the least amount of expense and aggravation for both the public and the Government.

The operation of HUD's Office of Interstate Land Sales Registration has worked at cross purposes with this goal since its creation. It has systematically expanded its mission from the important but limited role which the Congress mandated: that is, the control of "interstate" land sales, to a point where every land developer, no matter how small or geographically confined his operation is, comes under its jurisdiction.

The law reads:

SEC. 1703(a). It shall be unlawful for any developer or agent, directly or indirectly, to make use of any means or instruments of transportation or communication in interstate commerce, or of the mails to sell or lease any lot in any subdivision unless the Act has been compiled with.

A "subdivision" under the act is defined as:

Section 1701(a)(3). Any land which is divided or proposed to be divided into fifty or more lots.

Since the act is titled "The Interstate Land Sales Full Disclosure Act" it is important to note how the act defines the term "Interstate Commerce." Section 1701(a)(7) recites:

"Interstate Commerce" means trade or commerce among the several states or between any foreign country and any State.

My understanding of these provisions when I voted for this act in 1968, and my understanding of the act today, is that if a developer has 50 or more lots to sell and he is engaged in "trade or commerce among the several States or between any foreign country and any State" he must comply with the provisions of the act unless his operation comes under the provisions of one or more of the statutory exemptions, which the act provides, or qualifies for one of the regulatory exemptions. It was and is my belief that we were passing a law which would strike at the heart of a serious "interstate" problem. The report of the Committee on Banking and Currency (Rept. No. 1123 dated May 15, 1968) which accompanied this legislation, clearly defines that problem as follows:

The sale of undeveloped subdivided land in resort and retirement areas has become a major business. Naturally, it has attracted some get rich quick promoters who make glowing promises of fully developed "dream communities.

And, the report continued:

The committee believes that because of the nature of the business and its interstate character, innocent purchasers can be effectively protected only through Federal action.

It is true, as OILSR is fond of stating, that the law does not specifically exempt "intrastate" sales operations, but the act does grant the Secretary of HUD discretion to promulgate rules and regulations to implement the law and, again turning to the committee report, it is clear what the 90th Congress intended the Secretary to do with this discretionary power. The report states:

The committee expects the Secretary to utilize the discretion given him to exempt sales of lots in subdivisions which would technically be covered but which are intrastate or almost entirely intrastate in nature—such cases as where interstate sales are very few in number and mainly coincidental. Such a situation could arise, for example, where a few out-of-state purchasers buy lots in a subdivision which is only being offered for sale within the state of the land's location or in nearby communities.

I interpret this language to mean "Let's not bother the thousands of 'intrastate' developers who are operating within their home communities and its surrounding areas, and who are not a part of the problem we're trying to solve. In fact, we're not interested in him if he makes a few 'interstate' sales. We're after the 'get rich quick promoters' who are truly operating in 'interstate' commerce. Let's avoid bringing everyone under the jurisdiction of the Act through the raising of technicalities."

Now let us take a look at how OILSR has interpreted its mission under the act. It hinges on that office's view of what constitutes "interstate commerce."

According to the form letter which is routinely sent out by OILSR—

The sale of lots exclusively to residents of the situs state does not of itself constitute exemption from the Act. Advertising in publications that have an interstate circulation, signs on interstate highways, use of the telephone or any use of the U.S. mails in the operation of the subdivision, including the billing or collection of installment payments is sufficient to bring the subdivision under the jurisdiction of the Act.

The intent of Congress could hardly be more clearly stated than it is in the title of the act, the language of the act itself and the committee report. However, because of OILSR interpretation of the act, we now have a situation in which the Interstate Land Sales Act has been stretched to cover real estate operators who have never sold a single lot in interstate commerce. OILSR, nevertheless, insists that, because of the very technicalities the Congress hoped to avoid, real estate operators who sell exclusively within a State are covered by the act if they use a telephone in their business or use the U.S. mails (because both can be operated in interstate commerce), or if they advertise in a newspaper with any circulation across a State line no matter how small. Since every real estate operator must use a telephone and the mails, and generally uses local newspaper ads in the conduct of business, the law now becomes an Interstate and Intrastate Land Sales Act. I trust not a single Member of Congress intended that.

As a typical example, a real estate operator in Green Bay, Wis., who had never sold so much as a single lot in interstate commerce, was caught in a big bureaucratic mess, because OILSR determined, "The material that the developer has submitted clearly indicates that in the sale and promotion of these subdivisions, he has advertised in newspapers, used the telephone and made use of the U.S. mails." Therefore, says OILSR, he is covered by the act. This real estate operator did use a telephone and the U.S. mails, but strictly within the State of Wisconsin; and the "newspapers," referred to by OILSR, was in reality one local newspaper—the Green Bay Press Gazette, with a circulation of 55,400—567 of which were sent to subscribers in the Michigan Upper Peninsula.

Under any circumstances, how does this "intrastate" operator fit into any category of abuses the ISLSFD act sought to eliminate?

I cite another example. This intrastate small businessman was told that he came under the act, because, "Your use of the telephone and the mails is

sufficient, we feel, for this office to claim jurisdiction over this subdivision." He did not understand how he could be in violation of an "interstate" law, so he ignored the initial requests for compliance. His letter to OILSR explains his predicament.

DEAR MR. ROGERS: "I am at a loss to figure out what is happening to me. My business operation here in Waukesha, Wis. is a small enterprise consisting of one man, myself, I don't even have a secretary.

You are asking me to do something which I do not understand, and cannot find anyone else that does. I have checked with attorneys, savings and loan organizations, other land developers, realtors, and innumerable other laymen. None have had to, nor heard of anyone having to file a subdivision under the Interstate Land Sales Act when it is strictly a small local business.

Now you subpoena me to come to Washington, D.C. and appear with a history of everything I have done in real estate. First of all, I have had a couple of very lean years in business as a result of the tight money policies which have been created, so I can't afford to make a trip to Washington unless the Government pays my expenses. Secondly, I have no one to leave in charge of business while I am gone. I would like to request that you have someone in your Milwaukee office meet with me and explain to me what you require of me, and why. I repeat, I'm at a loss to figure out why the Government is after a small potatoes operation such as mine, but I'll be happy to co-operate if I'm able. Please advise.

He ultimately went through the considerable expense of filing for a "limited offering exemption."

I ask again—under any circumstances, how does this "intrastate" small businessman fit into any category of abuses the ILSFSD act sought to eliminate?

I do not wish to go into great detail regarding the question of whether OILSR has judicial support for its sweeping findings of jurisdiction. OILSR cites highly technical court decisions regarding the involvement of "instrumentalities of interstate commerce" with regularity in its explanations for finding jurisdiction. But, I believe one example of what a Federal court determined to be an advertising "offering to out-of-State residents" will serve to illustrate how far OILSR feels it can spread its net, when given a judicial assist.

In a 1975 Federal court case (*Happy Investment Group* v. *Lakewood Property, Inc.*, 396 F. Supp. 175) the defendants contended that OILSR had no jurisdiction because their offerings were "almost entirely 'intrastate.'" The court said "Whether or not defendants' subdivision offerings were almost entirely intrastate is a very close question." And then found, "The evidence at this juncture indicates that defendants did make offerings to out-of-State residents, although it was relatively modest."

The court found that the defendants, a California corporation, advertised in Nevada and Utah, a German publication and Life magazine. The number of out-of-State persons appealed to by the Life advertisement was not known, but the court found "that at least 75,000 nonresidents saw the other publications." The ruling was against the defendants on their motion for summary judgment on this "very close question."

The figures of this "very close question" and "relatively modest" advertising offering are interesting, when compared with the Green Bay realtors situation. How would the court rule on the 567 newspapers which incidentally cross a State line?

The two cases which I referred to above are not isolated cases. A steady stream of such cases have come to the attention of my office staff and the staff of the Select Committee on Small Business since we have become interested in the problem. In fact, on the day following the last hearing held by the committee on this subject another typical case was brought to my attention. My letter to HUD's Deputy Assistant Secretary for Regulatory Affairs, Patricia Worthy, delineates the details and spotlights the continuing problem.

DEAR MS. WORTHY: On the day following the January 17th Small Business Committee Hearing, I received the enclosed letter from constituents in Wisconsin. If I had had it for the Hearing I would have put it in the record. I believe it illustrates and typifies what we have been talking about. Anytime a law or the rules and regulations which implement that law are capable of producing this kind of absurd result, there is something wrong with the law, the administration of it, or both.

These people (age 75, 69 and 86) are engaged in closing out the remnants of a land development—which was first subdivided in 1956—twenty-two years ago. In September 1977 they received word from OILSR that "Information furnished this office has indicated that your lot sales program may be covered by the Interstate Land Sales Full Disclosure Act."

Since the letter stated "You are also advised to stop all sales until your subdivision is effectively filed as required by Section 1404 (a)(1) of the Act", they immediately suspended all sales, even though they were mystified by the sudden knowledge that they had somehow violated an "interstate" Land Sales Act. They were also advised of the fact that sales made prior to a Statement of Record being made effective, "may subject you to civil liabilities and criminal penalties," and that "such sales may be voidable at the option of the purchaser".

Of the original 187 lots these people had available for sale starting in 1956—only 21 remained. They had buyers for 20 of the lots; which would have left them with a single lot. However, they suspended sales, as they were "advised".

They tell the familiar story of "advertising in local newspapers" and "all sales have been to families within a radius of 30 miles" and "there have been NO sales to persons from out of State, and no effort has been made to attract or solicit sales from out of State."

The second act of this play is just as familiar—"From the information you have submitted, it appears (you) are subject to the jurisdiction of the Interstate Land Sales Full Disclosure Act." And, again, "Any nonexempt sales or leases made after April 28, 1969 and prior to the time a Statement of Record becomes effective are in violation of the Act and may subject you to civil liabilities and criminal penalties."

They responded as, judging from our experience, most small business operations respond. They retained an attorney.

Now, I assume, the final acts will be played out. A substantial amount of time will elapse while the On Site Exemption is perfected. The purchasers who purchased in the last two years will receive letters regarding their right of rescission. Some will void their contracts. And the costs incurred by these small businessmen will be borne by those who purchase whatever lots remain to be purchased at the end of this ridiculous exercise.

I would like to know what all this has to do with the control of fraudulent "interstate" land sales the Congress aimed the ILSFD Act at. I would like to know whether any consumer suffered at the hands of these people during their 22 year strictly "intrastate" sales operation. I would like to know whether the "discretion" granted to the Secretary is ever exercised to avoid obvious injustices and absurdities such as this.

In this, as in so many other cases which have been brought to my attention, the consumer, the seller and the taxpayers will pay dearly.

After you have reviewed the facts surrounding this case, I would appreciate your evaluation of how this whole expensive procedure protects the consumer.

I did not receive an explanation regarding how this "expensive procedure protects the consumer", but, as I predicted, the final acts are being played out. The attorney for these senior citizens, who were engaged in a strictly "intrastate" sales operation, received the following standard form letter from OILSR.

I invite your attention to the wording of this letter, since, when OILSR officials appeared before the Select Committee on Small Business, they insisted that it was not a demand letter which required the compliance of the recipient, but that it was merely a request that the recipient follow the procedure outlined."

As we previously informed your client, and pursuant to a telephone conversation between you and this office on January 11, 1978, it is our opinion that certain sales made were made in violation of Federal law. To administratively settle this matter and in lieu of any further agency action based on the present facts concerning the sale or lease of lots prior to your client's compliance with the Rules and Regulations of the Interstate Land Sales Full Disclosure Act, we request that your client agree to the terms of the enclosed administrative Settlement Offer.

This agreement will include sending a letter to those persons who purchased lots in the subject subdivision during the period of time beginning January 22, 1975 and ending at the present. This letter shall notify those persons that since your client had neither perfected a full Statement of Record nor received an affirmative exemption order at the time of sale, they have the right under Section 1404 (b) of the Act to void their contract, and receive a complete refund of all moneys paid on account of the said contract, including principal, interest, taxes, special assessments and property owners association dues. This letter need not be sent to those purchasers who: 1) bought lots with an existing dwelling; or, 2) are contractors engaged in the business of building; or, 3) have subsequently resold the property and can no longer reconvey the property to you.

The text of the enclosed letter is to be used. Any change in the text or form of this letter requires the approval of the Office before any mailing. No item is to accompany this letter other than a copy of a currently effective Property Report if you have effected a registration with this Office. The letters shall be sent certified mail, return receipt requested. The return receipts shall be retained in your client's files.

You are advised that the thirty (30) days mentioned in the model letter is in no way to be considered a limitation on the right of a purchaser to void his contract or to bring suit under the Act for a re-

fund or damages. Neither your client or this Office can abridge this right.

If your client accepts this proposed settlement agreement, please have him execute the enclosed Settlement Offer and return it to this Office within 20 days of your receipt of this letter. If he fails to respond to this letter within the allotted time, we shall assume that he has rejected the Settlement Offer and consequently, we will assume the responsibility of notifying purchasers of their rights and consider what further action may be necessary to protect purchasers and assure full compliance with the provisions of the Interstate Land Sales Full Disclosure Act.

I would like to meet the person who could read the text of this letter from a big, powerful Federal agency in Washington, D.C., and would conclude that it is not a "demand" but merely a "request." I do not think that person exists.

I ask again, Under any circumstances, how does this "intrastate" operator fit into any category of abuses the ILSFD Act sought to eliminate? And, I would still like to know how this expensive procedure protects the consumer? In 3 years of dealing with OILSR and during the Small Business Committee hearings, at which time OILSR officials testified, I have not received an answer to these questions.

To illustrate what the normal consequences are of the notice to purchasers of their right to void their contracts, I offer the following case.

This developer also runs a one-man sales operation (in fact, he also does not even have a secretary), has developed a tract of vacation and recreational land, all within one Wisconsin county. He does not advertise by mail or any other means. He merely sits in his office during the selling season (May through October) and accomodates purchasers who seek him out. His property is unencumbered. Onsite inspections of the property is always carried out. He does respond to inquiries from people who had previously visited his subdivision and he does receive installment payments through the mail on some lots that were sold. He has been operating since 1964. He was aware of the passage of the ILSFD Act, and after reading it, determined that he was statutorily exempt from its coverage under the onsite inspection exemption.

In 1974, he received a letter from OILSR asking for certain information and indicating that his operation "may" come under the act. He responded by furnishing basically the information I have listed above.

OILSR notified him that he came under the jurisdiction of the act. OILSR explained in a letter to his attorney "the information that your client has provided this office reveals that the telephone and the U.S. mails are used routinely in the promotion and sale of (lots in his subdivision)." Since he did not promote or sell by use of the telephone or mails he questioned this finding through his attorney. OILSR again did not accept his explanation.

He was "requested" to send letters of the right of rescission to all purchasers who bought lots between March 31, 1972 and December 31, 1975 (the date of the letter). The letter from OILSR routinely stated "the text of the enclosed letter will be used. No item is to accompany this letter" The text of the letter reads as follows:

DEAR ———. We are writing you at the request of the Office of Interstate Land Sales Registration, Department of Housing and Urban Development, to inform you of a matter of interest to you concerning your agreement to purchase a lot in ———.

At the time you entered into your agreement, there had been no effective Statement of Record filed nor an exemption established with the Office of Interstate Land Sales Registration as required by the Interstate Land Sales Full Disclosure Act which became effective April 28, 1969.

In view of the fact that your purchase occurred prior to the establishment of an exemption or an effective Statement of Record, you may, if you wish, void your agreement as provided in Section 1404(b) of the Interstate Land Sales Full Disclosure Act and any payments made in accordance with this agreement will be refunded.

In the event your property has been deeded to you and you elect to receive a refund you will be required to execute the necessary documents to reconvey the property to us free of any restrictions and encumbrances other than those contained in our original Deed of Conveyance to you.

So that our records may be brought up to date, we request that you notify us of your election within thirty (30) days from the date you receive this letter, after which time you may be deemed to have confirmed that you wish to keep the property.

If you have any question regarding this matter please feel free to call this Office and we will make every effort to be of help to you.

Sincerely,

——— ———.

As I stated at the outset, this is a one man sales operation. He had only sold seven lots during the 3-year period of "violation." Four of the purchasers elected to void the sales. He feels that the use of the prescribed text of the letter offer of rescission, without allowing an explanation from him, resulted in the purchaser believing that he had bad title.

This developer ultimately qualified for an onsite inspection exemption—after the expenditure of several thousand dollars and 16 months after he was first contacted by OILSR.

It is interesting to note that this "consumer protection" law as administered by OILSR resulted in the developer making an additional $16,000 in profit from the resale of the four lots which were returned to him.

Other developers have expressed the view that in an economic situation such as we have been in for the last several years with real estate prices constantly on the rise, it is no financial burden for him to reacquire lots—however, they complain that the method used to notify the purchaser of his right of rescission is extremely damaging to the developer's reputation in his community.

Another interpretation of the language of the act which has produced confusion among those engaged in real estate development is the OILSR practice of aggregating sales which have a "common promotional plan," to reach the 50 lot threshold recited in the act. The statutory authority for this devise is found in section 1701(3) which says:

"subdivision" means any land which is divided or proposed to be divided into fifty or more lots, whether contiguous or not, for the purpose of sale or lease as part of a common promotional plan and where subdivided land is offered for sale or lease by a single developer, or a group of developers acting in concert, and such land is contiguous or is known, designated, or advertised as a common unit or by a common name such land shall be presumed, without regard to the number of lots covered by each individual offering, as being offered for sale or lease as part of a common promotional plan;

I believe any developer who is in the business for a livelihood will someday reach the 50-lot jurisdiction threshold, since OILSR aggregates sales from one year to the next. But, if there is any doubt left that would allow the developer to escape, the doubt is resolved in favor of finding jurisdiction by OILSR's interpretation of the above cited "common promotional plan." It defines it as follows:

Among the most important characteristics which are evaluated in determining whether a common promotional plan exists are:

(1) A thread of common ownership;
(2) Common advertising or promotion;
(3) Common name or identity;
(4) Common sales agents;
(5) Common sales offices or facilities;
(6) Common inventory, etc.

"A developer who owns several small subdivisions which for example, are promoted by the same sales agent, or share the same advertising or when referrals are made between the subdivisions may be determined to be part of the same common promotional plan. If the lots in these subdivisions aggregate 50 or more, the subdivisions would fall under the jurisdiction of the Act.

I think the impact of this practice can best be illustrated by the inclusion of another example. The following is the pertinent text of a letter which I received from an attorney who is representing a Wisconsin developer:

Stated as simply as possible, the fact situation is this. Our client is a relatively small corporation engaged in the real estate business in the Minocqua/Woodruff area of northern Wisconsin. Over the years this company has been involved, either on its own or on behalf of various investors, in developing small subdivisions and residential developments, primarily off-water, on various parcels throughout Oneida and Vilas counties. Most of the developments are quite small and the lots are relatively inexpensive. No sales have ever been made without onsite inspection and the receipt, by the buyer, of a guaranty that the lot is "buildable."

In 1976, the company became involved in a rather large subdivision project. Because it involved the creation of more than fifty lots, the company was aware that a Statement of Record would have to be filed pursuant to the ILSFDA. All of the necessary documents were prepared and submitted to HUD in accordance with the agency's regulations.

The Statement of Record contained the names of all of the investors in this particular project. In addition, it listed forty-two other smaller developments in which this company had been involved over the preceding years. Several weeks after the submission of the document, HUD responded by requesting a "Statement of Facts" for each of these additional developments. This requires submission of the subdivision name and location, total number of lots in each subdivision, names of the purchasers of lots, number of lots sold to in-state and out-of-state residents, lot sizes, sales program, advertising, use of mails and telephone, etc.

Without going into further detail regarding communications between HUD and the company, it is now accurate to say that HUD has taken the position that it is proper to aggregate all of the lots in the forty-two subdivisions and, because the total number exceeds fifty, takes the position that the company was in violation of the ILSFDA for not registering or qualifying for exemption. If this determination by HUD is permitted to stand, it will mean that all lot purchasers since March 31, 1972 will be able to rescind their purchases and the company will have to go through the registration, or request for exemption, on all forty-two subdivisions.

HUD has taken this position in spite of the fact that each subdivision was a separate project in which the owners varied from a single owner to as many as nine additional investors, that each of the projects was commenced at a different point in time over a period of eight years and that the projects were scattered over a 2,870 square mile area of northern Wisconsin. HUD has maintained that all of these subdivisions have been subject to a "common promotional plan" because there is a "thread of common ownership" because the same real estate company was involved in selling lots in each one. Also, they assert that instruments of interstate commerce were used in selling lots because the real estate company did such things as use the telephone and the mails in its sales efforts, along with having signs on Interstate Highway 51.

We feel very strongly that the regulatory position being taken by HUD in situations such as this are far beyond anything ever envisioned by Congress when it passed the ILSFDA. While it is totally justifiable to have federal regulation of large projects such as those in Florida and Arizona with nationwide marketing programs, we can see no justification for a federal agency requiring that numerous small projects be lumped together and subjected to the extremely detailed, time consuming and costly reporting requirements established by the regulations under the ILSFDA. Lots in subdivisions such as these can be priced in such a way that they are available to hourly wage earners and other medium income families. And yet my client has determined that his surveying and engineering costs go from $100 per lot to as much as $500 per lot when it is necessary to file a Statement of Record with HUD. Obviously, a portion or all of these costs have to be passed along to the lot purchasers and this seems to be an unfair burden to impose on those people. Also, it is another example of a regulatory agency placing an almost insurmountable reporting burden on a small businessman who has neither the staff nor the economic wherewithal to stay in compliance and still be able to carry on his regular business.

One final point. All indications are that HUD has not taken a consistent position with respect to its administration of the ILSFDA. I have contacted various realtors in the Wausau and Minocqua areas and found that none of them were aware of this problem. In addition, the attorney for the State Realtors Association knew of only one other case in the state where HUD had taken a similar position. However, it is also quite apparent that virtually every real estate company in the State of Wisconsin, or any other state, has been involved in various subdivisions, either on its own behalf or on behalf of clients, which, if aggravated, would total more than fifty lots and put him in a position where he was in violation of the Act and subject to its penalty provisions which, in addition to those described above, include civil and criminal sanctions.

Our situation can be summarized as follows: First of all, we do not believe that Congress intended to have the ILSFDA apply to aggregations of small subdivisions such as the ones in question here. However, if that was Congress' intent, then it is essential that the ILSFDA be applied in an even-handed manner so that a few isolated companies are not singled out for enforcement action and placed at a very substantial competitive disadvantage because they have had to incur an additional cost of up to $500 per lot in order to comply with the reporting requirements.

OILSR officials in their appearance before th Select Committee on Small Business did not agree with these figures. They contended that all this proved was that the developer had an expensive attorney. However, support was given by the industry spokesman, who also testified at the hearings.

Richard C. Farrer, chairman of National Association of Realtors, legislative committee, testified:

The time consumed and cost incurred to comply with OILSR rules and regulations can be enormous and can drive up the price of land significantly for the consumer. Reports from our members involved in land development indicate that to file for a simple exemption from OILSR can cost as much as $1000 and may consume up to 50 manhours in preparation. In fact, members report that by making an application, for an exemption and having that exemption approved in no way assures that one will not later be compelled to file for a full registration on the very same subdivision covered by the exemption. Full OILSR registration can cost as much as $20,000 and may consume 150 manhours in preparation. The major portion of these costs are represented in attorney's fees. If the filing of a simple exemption is completed without administrative delays, the applicant may expect OILSR approval within 2 months; application for full registration without difficulty may take from 4 to 8 months to obtain approval.

S. M. Karsh, president of Western Developers Council (in a letter submitted for the hearing record) said:

What do these delays, rejections, and requests for additional documents mean to the small developer? They mean escalating holding costs, added legal, accounting and consultant fees, loss of sales personnel, loss of potential sales and in many cases the cost of refiling with the DRE which includes both payment of additional filing fees and the costs inherent in reprocessing. It is not unusual for these costs to be in the tens of thousands of dollars.

What does it cost a small developer to file with OILSR? Depending upon how much of the work the developer does, it may cost from $10,000 to $50,000 per filing. This includes accounting costs that a small developer would not otherwise incur, such as costs for audited statements and budget projections, engineering and local fees, title costs, and the innumerable costs incurred in assemblying the necessary information.

And, William B. Ingersoll, general counsel, American Land Development Association, offered:

When all is said and done, the developer will probably have spent $25,000 to $100,000 on the registration procedure, including legal accounting and engineering expenses, staff time, and other miscellaneous expenses. That is, if he can afford an attorney. If he does the work himself, what he saves in attorney's fees he will more than likely lose in time spent on the process.

OILSR defends its position by pointing out that there are exemptions available to the developer, if he qualifies. But, the question is, Why should an "intrastate" developer have to qualify for an exemption from an "interstate" land sales act? Especially since he was not part of the land fraud problem which gave rise to the act.

Furthermore, it is OILSR's contention that it is justified in extending its jurisdiction to include "intrastate" land sales operations because, in HUD's words, "some of the worst abuses on the land buying public" are in "intrastate" land sales. Using this justification it could be contended that all Federal law can be applied to any "intrastate" situation at the whim of any regulatory agency.

Now, I am distressed to learn that the administration has offered a proposal to further expand the jurisdiction of OILSR by eliminating the "on-site inspection exemption."

The "on-site" exemption was offered by the distinguished Senator from Arkansas, William Fulbright, and was adopted as an amendment to the original act. I will quote extensively from Senator Fulbright's address on the occasion of the introduction of this amendment because it contains the most reasonable, commonsense approach to the problem that I have seen; and, I believe it clearly defines the overall limits of jurisdiction which the Congress intended for those who were to have the mission of administering its provisions.

The Senator said:

I think this is a legitimate and proper exemption because with respect to these companies in my State that are developing land in recreation areas and around lakes—many of them are large but most of them are small—it would be a great burden for them to have to file with HUD.

And he added:

The conditions that gave rise to this (Act) have been concentrated in three or four States and I see no necessity for everybody coming to Washington and filing elaborate statements when there is no justification for it.

Senator Fulbright, in this same address compared the crisis situation, which precipitated the enactment of the Securities Act, which was the model for the ILSFD Act—"There is certainly no crisis which would justify putting real estate in the same straitjacket as the securities industry," he said.

He continued:

I question the premise that those people should be subject to the expense and burden of the filing and other requirements, merely because a few unscrupulous promoters have cheated customers. The cure for these relatively few sharp practices may be worse than the disease. At a minimum it seems to me that there should be an exemption from the act for those developers who, whether or not they use the mails or the facilities of interstate commerce, make it a practice to sell only "onsite." This is the traditional method of selling real estate and it is hard to see how a purchaser would not have an opportunity to know what he is buying if he has inspected the lot himself. It is true, of course, that he would not know all the details of title, encumbrances, and so forth, merely by inspection, but civil and criminal provisions of State laws dealing with real estate transactions have been considered adequate. They apparently are still considered adequate for practically every form of sales except those of undeveloped land. There is no such proposal, for example, to deal with sales of new

or used cars or, in fact, homes. Yet I daresay the opportunities for misrepresentation, fraud and unscrupulous promotion are more prevalent in these areas than in interstate land sales. And their impact on the economy is greater.

This exemption will not, in itself, properly define those persons who operate truly interstate, but it is at least simple and easily understood. And it can provide a method by which one who is not truly an interstate promoter can avoid needless and burdensome requirements.

Those few interstate developers who would sell 'onsite' would also be exempt, it is true, but the purchasers would have inspected the property and its surroundings and would still have the additional protection of the laws against fraud and deceptive practices.

I believe the cure has now become "worse than the disease." This "interstate" act has resulted in potentially every land developer, whether he is engaged in "interstate" or "intrastate" sales, being "subject to the expense and burden of the filing and other requirements." It has become, in reality, an "interstate and intrastate" act. I trust not a single Member of Congress intended this result.

I fully support the administration proposals which are aimed at strengthening the provisions of the act as they relate to the control of fraudulent "interstate" land sales. But, I reject any further attempt to codify those practices of OILSR which have resulted in a wholesale distortion of the original legislative intent.

It is absolutely clear from the House report, the Senate report, and the conference report, from the remarks of Senator Fulbright and from the title of this legislation, that the original legislative intent was to restrict the operation of this law to the areas of land sales which produced the problems which gave rise to the act; that is, the unscrupulous land dealer who sold unusable, distant land in "interstate" commerce. It was never intended that this legislation should be administered in such a manner that both the legitimate developer and the consumer should be damaged or that the very character of the legitimate real estate development industry should be altered to conform to the whim of the bureaucracy which administers the law.

The amendments which I propose, will return our focus to the real problem. And, as I stated at the outset, they will narrow OILSR's jurisdiction so that its resources can be committed to effectively protecting the land buying consumer by controlling fraudulent "interstate" land sales operations. The involved businessmen will benefit from the lifting of a needless, heavy reporting burden; the Government will benefit from the resultant decline in paperwork; and, the taxpayers and consumers will be relieved of the financial obligation of funding the present meaningless procedure.

I believe the 11 exemptions which now appear in the act should be retained. This, of course, includes the "on-site inspection" exemption. In addition, my amendments are designed to remove those land sales operations which, historically, were not part of the problem which the Congress sought to solve by the enactment of the ILSFD Act—and are not part of the problem today.

My first exemption will categorically exempt the sale or lease of lots by a developer who is engaged in a sales operation which is intrastate or almost entirely intrastate in nature. This language is taken from the conference report which accompanied this legislation; and, I believe, satisfies the intent of the 90th Congress.

This exemption would specify that a sales operation is deemed to be intrastate or almost entirely intrastate in nature if not more than 5 percent of the sales made in 1 calendar year are to residents of another State; or not more than 5 sales made in 1 calendar year are to residents of another State, whichever is greater.

The 5-percent rule is now included in the regulatory exemptions, but it has proven to be unworkable for the small developer. For example: A developer sold only two lots in 1 year and one was to a resident of another State. The 5-percent rule did him no good, since 50 percent of his sales were to out-of-State residents. In another case a developer sold nine lots in 1 year, one of which was to a newly hired employee of the developer who was moving into the State where the lot was located. He was in violation of the OILSR 5-percent limit since the one lot constituted 11 percent of his sales that year. The five-lot alternative makes this exemption realistic.

The second category of exemption which I offer deals with the problem of land developers who operate on or near State borders. It exempts the sale or lease of lots by a developer to the resident of another State when the principle residence of the purchaser is within a radius of 100 miles from the property purchased. The 100-mile radius was chosen for three reasons. First, a prospective purchaser can easily drive the 200-mile roundtrip distance in a day; second, the loan jurisdiction of lending institutions extends to that limit; and third, local newspaper and electronic advertising would normally not extend beyond that limit.

Sales made under this exemption would, however, have to meet certain requirements:

First. The land must be free of encumbrances;

Second. There must be an on-site inspection;

Third. The seller must designate an agent for service of process in the home State of the purchaser and submit to the jurisdiction of the resident State of the purchaser;

Fourth. The seller must file a written affirmation with OILSR affirming that these requirements have been met. This would be a simple form with no action required by OILSR, but would acknowledge jurisdiction under the act if there is a problem later on.

These amendments will narrow the assignment of OILSR to solving the problem that was originally presented to the Congress in 1968. It will no longer be burdened with the responsibility of policing every local real estate sales operation in the country.

I ask unanimous consent that S. 2716 be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2716

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Interstate Land Sales Full Disclosure Amendments of 1978".

SEC. 2. Section 1402 of the Interstate Land Sales Full Disclosure Act is amended by striking out the period at the end of clause (10) and inserting in lieu thereof a semicolon and by adding at the end thereof the following:

"(11) 'sale or lease' means the entering into of a legally binding agreement by a purchaser to buy or lease a lot in a subdivision. The date of sale or lease shall be the time a contractual relationship is created between the developer and the purchaser.".

SEC. 3. Section 1403(a) of the Interstate Land Sales Full Disclosure Act is amended—

(1) by inserting "condominium," after "commercial," in clause (3);

(2) by inserting after "adverse claims do not refer to" in clause (10) the following: "United States land patents and similar Federal grants or reservations, nor to";

(3) by striking out "or" at the end of clause (10);

(4) by striking out the period at the end of clause (11) and inserting in lieu thereof "; and"; and

(5) by adding at the end thereof the following:

"(12) the sale or lease of real estate by a developer who is engaged in a sales operation which is intrastate or almost entirely intrastate in nature. A sales operation is 'intrastate or almost entirely intrastate in nature' if not more than 5 percent of the lots sold in the preceding calendar year were sold to residents of another State, or if not more than 5 lots sold in such year were sold to residents of another State, whichever is greater, exclusive of sales made under the provisions of clause (13) of this subsection. For the purpose of the exemption contained in the preceding sentence, a lot may be sold to a resident of another State only if—

"(A) the lot is free and clear of all liens, encumbrances, and adverse claims;

"(B) the purchaser or his or her spouse has made a personal on-the-lot inspection of the lot purchased; and

"(C) the developer executes and supplies to the purchaser a written instrument designating a person within the State of residence of the purchaser as his agent for service of process and acknowledging that the developer submits to the legal jurisdiction of the resident State of the purchaser.

As used in this clause (12), the terms 'liens', 'encumbrances', and 'adverse claims' do not include United States land patents and similar Federal grants or reservations, property reservations which land developers commonly convey or dedicate to local bodies or public utilities for the purpose of bringing public services to the land being developed, taxes and assessments imposed by a State, by any other public body having authority to assess and tax property, or by a property owners' association, which, under applicable State or local law, constitute liens on the property before they are due and payable, or beneficial property restrictions which would be enforceable by other lot owners or lessees in the subdivision, if—

"(i) the developer, prior to the time the contract of sale or lease is entered into, has furnished each purchaser or lessee with a statement setting forth in descriptive and concise terms all such reservations, taxes, assessments, which are applicable to the lot to be purchased or leased; and

"(ii) receipt of such statement has been acknowledged in writing by the purchaser or lessee; or

"(13) the sale or lease of real estate by a developer to the resident of another State when the principal residence of the purchaser is within a radius of 100 miles from the property purchased if—

"(A) the lot is free and clear of all liens, encumbrances, and adverse claims;

"(B) each purchaser or his or her spouse has made a personal on-the-lot inspection of the lot purchased; and

"(C) the developer executes and supplies to the purchaser a written instrument designating a person within the State of residence of the purchaser as his agent for service of process; and acknowledges that the developer submits to the legal jurisdiction of the resident State of the purchaser; and

"(D) the developer executes a written affirmation to the effect that he has complied with the provisions of clauses (A), (B), and (C) of this clause (13), such affirmation to be made a matter of record on a form provided by the Secretary, where such form shall contain only the name and address of the developer, the legal description of the subdivision, the affirmation, and the legal signature of the developer.

Sales made under this clause shall not be subject to the limitation contained in clause (12) but the number of sales made under this clause will be added to sales made under clause (12) to arrive at the total number of sales made in one year by a developer for purposes of calculation of the 5 percent out-of-State sales limitation factor contained in clause (12). As used in this clause (13), the terms 'liens', 'encumbrances', and 'adverse claims' do not include United States land patents and similar Federal grants or reservations, property reservations which land developers commonly convey or dedicate to local bodies or public utilities for the purpose of bringing public services to the land being developed, taxes and assessments imposed by a State, by any other public body having authority to assess and tax property, or by a property owners' association, which, under applicable State or local law, constitute liens on the property before they are due and payable, or beneficial property restrictions which would be enforceable by other lot owners or lessees in the subdivision, if—

"(i) the developer, prior to the time the contract of sale or lease is entered into, has furnished each purchaser or lessee with a statement setting forth in descriptive and concise terms all such reservations, taxes, assessments, which are applicable to the lot to be purchased or leased; and

"(ii) receipt of such statement has been acknowledged in writing by the purchaser or lessee.".

SEC. 4. Section 1416 of the Interstate Land Sales Full Disclosure Act is amended by adding at the end thereof the following:

"(c)(1) In discharging his responsibilities under this title, the Secretary shall conduct all actions with respect to rulemaking or adjudication in accordance with the provisions of chapter 5 of title 5, United States Code.

"(2) The Secretary, by rule, shall prescribe the procedure applicable to every case pursuant to this title of adjudication (as defined in section 551 of title 5, United States Code) not required to be determined on the record after notice and opportunity for hearing. Such rule shall, as a minimum provide that prompt notice shall be given of any adverse action or final disposition and that such notice and the entry of any order shall be accompanied by a statement of legal authority and other written reasons.".●

JOINT STATEMENT OF SENATORS, CONGRESSMEN, AND GOVERNORS ON NORTHERN IRELAND—ST. PATRICK'S DAY 1978

● Mr. KENNEDY. Mr. President, earlier today, in anticipation of St. Patrick's Day this Friday, a group of nine Senators, seven Members of the House of Representatives, and Govs. Hugh Carey of New York and Brendan Byrne of New Jersey, issued a joint statement on Northern Ireland. I was pleased to be part of this group, and I ask unanimous consent that the joint statement may be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

JOINT STATEMENT OF SENATORS, CONGRESSMEN, AND GOVERNORS ON NORTHERN IRELAND—ST. PATRICK'S DAY 1978

One year ago, a group of us, as Irish Americans concerned about the continuing terrorism and destruction in Northern Ireland, issued a statement calling for an end to the killing on both sides and appealing to our fellow Americans to renounce any action that provides support or encouragement for those engaged in violence.

We and others renew that appeal in even stronger terms this year. We condemn the violence of all individuals and extremist groups. We just as strongly condemn the violations of human rights by the British Government in Northern Ireland as found by the European Court of Human Rights.

We are deeply concerned over reports that some individuals, organizations and groups in the United States are still providing assistance to the enemies of peace in Northern Ireland. There is no justification whatever for any persons to lend their support or good names to activities that enhance the cause of violence. Those who violate this standard bear a heavy responsibility for prolonging the terrorism and endangering the lives of innocent men, women and children in Northern Ireland.

All of us share the great goal of Irish unity. We reject the view that the goal can or should be achieved by spilling the blood and sacrificing the lives of Irish or any other people. Acts of terrorism and violence committed in the name of Irish unity will only increase the present polarization and postpone the long-sought day when unity will be achieved.

We strongly endorse the statement of President Carter of August 30, 1977 condemning the violence, supporting a solution based on a form of government acceptable to both sides in Northern Ireland and to the Irish and British governments, and proposing American financial aid for jobs and investment in Northern Ireland after a settlement is obtained.

At a time when we seek greater restraint and respect for peace on the part of our fellow Americans, it is essential that there be a more genuine commitment on the part of the leadership of the majority community in Northern Ireland to a settlement that is fair to Protestants and Catholics alike. It is also essential that there be more effective leadership by the British Government to achieve such a settlement. Time and again in recent years, movement toward a negotiated solution has been halted by the intransigence of extremist elements in the Protestant community and by Britain's failure so far to end the festering stalemate.

We are heartened by recent indications that an actual majority of the people of Northern Ireland are now at last in favor of a peaceful solution that is fair to both sides of the community. We urge the leaders of all the parties to renew forthwith their efforts to reach an acceptable agreement.

The season of St. Patrick's Day brings the green of spring, the ancient sign of hope and rebirth. It is a season for life and not death, for progress and not despair, for peace and not destruction. In this spirit we make our appeal, hopeful that it will touch responsive chords in the hearts and minds of all who truly seek an end to the violence in Northern Ireland.

Signed:

Senators: Edward M. Kennedy, Daniel Patrick Moynihan, Thomas F. Eagleton, George McGovern, John A. Durkin, Gary Hart, Thomas J. McIntyre, Joseph R. Biden, Jr., Patrick J. Leahy.

Representatives: Thomas P. O'Neill, Jr., Speaker; Thomas S. Foley, Frank Thompson, Jr., John J. McFall, Don Edwards, Edward J. Markey, John J. Cavanaugh.

Governors: Hugh L. Carey of New York and Brendan T. Byrne of New Jersey.●

WATERWAY USER CHARGES: COMPARING SUBSIDIES

● Mr. DOMENICI. Mr. President, last week a statement appeared in the RECORD discussing waterway subsidies on a ton-mile basis. That statement apparently was designed to show that my proposal on waterway user charges was unfair to the barge industry, compared with the railroad industry.

Unfortunately, the statement contained two basic fallacies: It was based on inaccurate figures, vastly overstating rail subsidies while understating the barge subsidies. And it utilized an unrealistic base for comparing subsidies.

From remarks several months ago, it is clear that last week's statement was based on 1976 barge subsidies listed at $360 million and 1976 rail subsidies said to cost $1 billion.

Actually, barge subsidies far exceed $360 million. The $360 million figure for 1976 appears to represent Corps of Engineers outlays for inland waterway construction and operations (the aspect covered by my amendment). It excludes, for example, tens of millions in additional subsidies in Coast Guard expenditures on the inland waterways and the Maritime Administration's equipment guarantee program.

By contrast, the railroad "subsidy" was supposed to be $1 billion in 1976. That is far beyond the real subsidy. According to the Congressional Research Service the rail industry has received, at most, a total of $1.1 billion in net nonpassenger-service subsidies for the entire period from 1835 through 1977. In fact, "Inland water navigation has received more net Federal aid than rail, buses, large trucks, and air carriers combined," the CRS found.

According to a Department of Transportation study printed previously in the CONGRESSIONAL RECORD, the complete list of freight subsidies to the rail industry (outside the loans and stock investment to ConRail and the bankrupt Northeastern railroads) totals $138 million for the past decade. That is not a 1-year figure; that is a 10-year figure. And all of that was in the form of loans of one sort or another.

Is that comparable to the gift of a free system provided to the barge companies? I think not.

But even if those figures were accurate, do they represent a true measure of comparability between modes? No. The real measure is how a subsidy affects rates, and thus the competitive advantage the taxpayers are providing to one mode in competition with another. According to a study by the Congressional Budget Office:

Federal subsidies are equal to about 41 per cent of all barge revenues, compared with 3 per cent for railroads.

Thus, for every $1 that a shipper pays to ship by barge, the Federal taxpayer kicks in 41 cents of subsidy. For every $1 that a shipper pays to ship by rail, the Federal taxpayer contributes three pennies. There is no "comparability" when one mode gets a 3-cent benefit compared with a 41-cent benefit provided to the competitor.

But, I must admit that those supporting the position of the barge industry may someday be right. A continued policy of major barge subsidies could make multibillion-dollar aid subsidies a self-fulfilling prophecy. Some of those now arguing most strenuously against barge fees are at the same time urging ever-vaster DOT rail subsidies. Rail subsidies can only worsen if we continue unabated the subsidized advantage of the barge lines. I think it is time to back off from subsidies to both, allowing big corporations to compete for traffic.

In recent testimony to the Committee on Environment and Public Works, Alice Rivlin, Director of the Congressional Budget Office, stated:

User charges represent a way to recapture from the actual beneficiaries some of the costs to the general public. Levying user charges promotes economic efficiency because users pay, directly or indirectly, for the services they receive. Proper incentives are provided, since heavier use imposes greater costs on the user and, at the same time, generates revenues to expand facilities. The absence of user charges implies subsidies. Federal aid without related tax collections subsidizes the beneficiaries.

Mr. President, to place this issue in perspective, I ask unanimous consent that the Congressional Budget Office calculation of subsidies be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

Summary of net Federal aid to railroads, inland water navigation, and commercial highway and air carriers, 1835–1977 [1]

(Billions of dollars)

Description	Low estimate	High estimate
Intercity buses (1957–76)	$0.04	$0.04
Railroads (1835–1977)	[2](.7)	[3]2.2
Large trucks (1957–76)	2.5	2.5
Air carriers (1957–76)	.7	5.0
Inland water navigation (1957–76) [4]	9.0	9.0

[1] Net Federal aid refers to Federal aid reduced by land-grant transportation provided to the Government in the case of railroads; and the estimated underpayment in the case of buses, large trucks, air carriers and inland water navigation.

[2] The parenthesis indicates a net benefit to the Federal Government.

[3] This amount includes $1.1 billion Federal aid to intercity rail passenger service. As discussed in Chapter II, there is considerable discussion as to whether aid to intercity rail passenger service should properly be considered Federal aid to railroads.

[4] Since separate amounts for recreational users and commercial users has not been determined, the estimate includes benefits to both. The estimates include National Weather Service expenditures for the period 1972–76 only, Coast Guard expenditures for the period 1971–75 only, and Corps of Engineers expenditures for the period 1957–75.

Mr. DOMENICI. Mr. President, to add further perspective, I ask unanimous consent that a table from the study entitled "Federal Aid to Domestic Transportation" by the Congressional Research Service of the Library of Congress be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[In percent of industry revenues]

	Fiscal year 1974	Fiscal year 1975	Fiscal year 1976
Air carriers	1	1	1
Highway transportation	--	--	--
Railroad freight	1	2	3
Inland barges	47	44	41

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ORDER FOR THE RECOGNITION OF MR. SCHMITT TOMORROW AND TIME-LIMITATION AGREEMENT ON AMENDMENT

Mr. ROBERT C. BYRD. Mr. President, will the Senator from Alaska yield to me once more? He is very courteous. I ask unanimous consent that on tomorrow at 2:30 p.m. Mr. SCHMITT be recognized to call up his amendment, that there be a time limit thereon of 15 minutes, not to exceed 15 minutes, to be equally divided between Mr. SCHMITT and Mr. CHURCH, and at the expiration of that time, or upon time being yielded back, a vote occur in relation to the amendment to the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the Senator from Alaska.

TREATY CONCERNING THE PERMANENT NEUTRALITY AND OPERATION OF THE PANAMA CANAL

Mr. STEVENS. I thank the distinguished majority leader.

Mr. President, earlier today I tried to obtain the floor to explain why I was going to oppose the resolutions, understandings, and reservations that were to be offered.

Mr. President, legal research evaluating recently translated Panamanian Supreme Court cases and legal treatises which were heretofore not available in English to the American public or the Senate indicates that many Members of the Senate have been mislead into believing that understandings or reservations are binding upon the Republic of Panama under their domestic law without a second plebiscite. The research which Senator GRIFFIN has done compliments that of my own and I would thank my good friend from Michigan for the thorough job he and his staff have done in evaluating the international legal aspects of these documents. The focus of my research has been upon Panamanian domestic constitutional law. Mr. President, I believe the legal research which my staff and I have conducted casts serious doubts upon the legality of any understanding or reservation and shows the information provided us by the administration to be so erroneous and inconsistent with Panamanian domestic law that all Members of the Senate who have heretofore committed themselves to these treaties as a result should reevaluate their position in the light of this new legal material.

In the Republic of Panama the Supreme Court makes the final determination on what is constitutional. The Panamanian Supreme Court has declined in the past to evaluate the constitutionality of the substance of treaties, but has on at least one occasion declared a treaty unconstitutional, because it was not properly published during the ratification process. That decision was reached under the 1946 Constitution as amended in 1959.

The jurisdictional mandates for the Supreme Court of Panama under the 1946 constitution as amended in 1959 and the Torrijos constitution of 1972 are strikingly similar. The 1972 constitution is modeled after the 1946 constitution as amended. Torrijos expanded the jurisdiction of the court somewhat in most areas by giving them greater jurisdiction over the subject matter of documents in controversy, but denied the court's jurisdiction to review the constitutionality of constitutional amendments. For purposes of my comments, it is my understanding that the court's jurisdiction over treaties is, if changed at all, somewhat broader under the Torrijos constitution.

During the 1960's there were three court cases dealing with the Panamanian treaty ratification process. There have been no cases under the Torrijos constitution. The differences in the language of the two constitutions are so minor as to give no weight to theories that the decisions of the 1960's have been viciated by the new constitution. There is no reason to expect that the doctrine of stare decisis would not be in operation.

The treaty cases of the 1960's affirmed the concept that the Panamanian Supreme Court has no jurisdiction over the substance of the treaties, but may deal with the constitutionality of the procedures used in the Panamanian ratification process.

An example of this was the Supreme Court's decision that the Geneva Convention of August 12, 1949, was unconstitutional, because the Panamanian Government failed to use the proper procedures in ratifying the treaty. ("Fallo de 22 de enero de 1963") article 133 of the 1946 National Constitution required that the National Assembly approve treaties. As part of that process the entire document had to be printed in the official Gazette. In the case of the

Geneva Convention in controversy the entire document was not printed properly in the Gazette. The Supreme Court described the treaty as "truncated and therefore incomplete." The Panamanian Supreme Court held "if the promulgation of the laws exists as a constitutional prerequisite so that their texts, through the publication in the official Gazette, can be accessible to those that must observe it, then it must be concluded that the observance of the acts omitted in the laws enacting them cannot be made compulsory, insofar as their text is unknown, because of not having been published as part of that law * * *." This statement could have serious implications on the constitutionality of any reservations, understandings, declarations, or even amendments not submitted to a national plebiscite.

If the Carter-Torrijos understanding was not published as part of the text of the Neutrality Treaty, there are serious doubts cast on its constitutionality. Dr. Cesar Quintero, dean of the Law and Political Science School of the Panama University and Dr. Linares, a Panamanian lawyer and professor of law, both agree that there was insufficient publication of the leadership amendments under Panamanian constitutional law. Both professors point that there was no official publication of these documents prior to the Panamanian plebiscite.

When asked if the Carter-Torrijos understanding was properly published and voted upon, thus being binding on the people of Panama without a second plebiscite Dr. Quintero stated:

It just so happens that I have a copy of the ballots used during the plebiscite. What did we vote on? The ballot reads: I agree with the new Panama Canal treaty, the treaty on permanent canal neutrality and operation of the Panama Canal, the documents that have been agreed upon, the notes exchanged, the maps, the related agreements and annexes signed between the governments of Panama and the United States on Wednesday, 7 September 1977.

We voted on all this, to use their favorite word, the whole package—that is the term Americans use.

I am still quoting Dr. Quinteros:

These documents appear in a publication issued by the national lottery and in an earlier short publication—the lottery publication is longer. They contain the two basic treaties, all the notes exchanged, all the related agreements, all the signed annexes and all the documents agreed upon, as the ballot clearly says, on Wednesday, 7 September. So the oral agreement—because I insist that it was an oral agreement—between President Carter and General Torrijos could and should have been included—and it would have already been voted on—but it was not included on the ballot. (FBIS–LAT–78–16, 24 January 1978, Vol. VI, No. 16, p. N3)

I have been quoting, again, from the record of the statement of Dr. Quinteros.

It is clear from Dr. Quinteros' statement that the Carter-Torrijos understanding was an oral agreement and even though it was stated publicly before the plebiscite it was not properly published. It has no more force and effect under Panamanian law than a regulation in the United States that someone neglected to publish in the Federal Register.

Carlos Bolivor Pedreschi, a leading Panamanian constitutional scholar in citing examples where the Panamanian Supreme Court has jurisdiction over a treaty states:

Consider, for example, a public treaty entered into by the President of the Republic, and a situation in which he states that the treaty is finalized and in effect only with his signature, with that of the appropriate minister being unnecessary, and, even more serious with the approval of the National Assembly being unnecessary. Could not a treaty such as the one given in this example, which can allegedly be finalized with the signature of the President of the Republic, be brought before the Court on constitutional grounds? A treaty entered into in clear violation of the Constitution can be brought before the Court on these grounds". (Pedreschi, Carlos Bolivar, *El control de la constitucionalidad en Panama*, pp. 252–254)

The Pedreschi article predated the new transitory provisions of the Panamanian Constitution created by General Torrijos in 1972. Those provisions require that treaties dealing with the Canal Zone be submitted to a national plebiscite and it is only logical to conclude that Carlos Bolivar Pedreschi would have included the national plebiscite as part of the constitutional procedure which must be followed within the framework of his article had it existed at the time of the publication.

There are no precedents to indicate whether the Panamanian Supreme Court could strike understandings, reservations, declarations, or amendments including the leadership amendment leaving the balance of the text in force. Since there appears to be no restrictions in this regard and the Panamanian Supreme Court has broad discretion in their decisionmaking, there would seem to be nothing to prohibit them from rendering such a decision. And I point out that that was the decision that was made in connection with the Geneva Convention.

This analysis, incidentally, is concurred in by Eduardo Abbot, a Chilean lawyer, working as a Hispanic law expert for the Library of Congress. I ask unanimous consent that Mr. Abbot's report, which was conducted independent of my analysis, be printed in the RECORD immediately following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. STEVENS. Mr. President, my point is that under the precedents of the Panamanian supreme court, since these reservations, understandings, declarations, and even the leadership amendments were not officially published and properly set out before the people of Panama prior to the time of the plebiscite, at the very least a second plebiscite is required. Furthermore, if we do not insist that Panama comply with their own domestic law at this time, a subsequent administration in Panama could do the same thing as was done in connection with the Geneva Convention: It could bring before the court the question of the reservations, understandings, or amendments that were so not published and properly presented to the Panamanian people prior to the plebiscite, and have them declared unconstitutional and not binding upon Panama at some future date.

I think that the problem is, as I have tried to state here before, after the year 2000 the United States has no formal role with regard to the Panama Canal. We are partners with Panama under the treaty which will come up for consideration after this Neutrality Treaty. We would be partners up until the year 2000. But after the year 2000, we have no relationship to that canal, and cannot protect our interests except through the use of force.

This is the reason I have opposed the reservations, understandings, and the declarations. I believe that only through an amendment, an amendment that is approved through the constitutional processes of Panama after they see what we have done to these treaties—and that means, to me, through a second plebiscite—only through their compliance with their own constitutional processes will we be assured that Panama has agreed to the same treaties and understandings that we would have agreed to.

I feel that we are setting the stage, Mr. President, as I have said before on this floor, for more misunderstanding in the future. We are setting the stage for not better relationships with Panama but worse relationships. We are setting the stage for future generations of Americans to have no alternative but to use force to assert our legitimate interests with regard to this canal. A canal which we constructed and which is an engineering marvel of the world, and which is still essential to our national economic and military security.

I believe that the legal research which we have done casts serious doubts upon the legality of any reservation, understanding, declaration, or amendment not properly presented to the Panamanian people under their domestic law that is through their process of a plebiscite. I understand that is contrary to what the managers and proponents of the treaties believe is necessary with regard to the reservations, understandings, and the declarations which are before us and which are being considered with regard to this treaty.

It is my opinion that these do not change the treaties and have no binding impact upon Panama, unless presented in accordance with their constitutional procedures under their domestic law to their people by plebiscite.

I think we are misleading the country. We are certainly putting future generations in a very difficult position if we lead the American public to believe that what we are doing here in connection with these reservations and understandings in any way corrects the defects some of us have articulated in regard to particularly the treaty which is before us and which will be voted upon tomorrow.

EXHIBIT 1

CONSTITUTIONALITY OF THE CANAL TREATIES

PANAMA

An opinion is requested to answer the following questions based on Panamanian law:

1. Hypothetically, if the U.S. Senate amends the resolution of ratification of the

Panama Canal Treaties with reservations or understandings, and those reservations or understandings are not submitted to a second plebiscite in the Republic of Panama, could the Panamanian Supreme Court strike those reservations and understandings on constitutional procedural grounds?

2. If such an event were to occur, under Panamanian domestic law, would the text of the Treaty without those reservations and understandings be the only binding document?

I. *Introduction*

Before answering the specific questions of the requester, it is necessary to review the nature and extent of the changes to the Treaties that the U.S. Senate could eventually propose, and also the statutory provisions establishing the judicial review of the constitutionality of treaties in Panama.

(a) According to a report prepared by the Senate Steering Committee,[1] there are three kinds of changes that the Senate may eventually propose:

(1) Understandings, statements, and declarations, terms which are generally "used for statements which clarify or explain one country's position on a given matter, or which give notice of a certain policy or principle; these, in other words, are statements which clarify but do not change a contractual relationship";

(2) Reservations, which are statements "whose effect is to alter the contractual relationship between the States," without necessarily altering the actual text of the treaties; and

(3) Amendments, which involve "a change in the authentic text of the treaty, and results (if the President wants to proceed with the treaty) in further negotiations with the other parties leading to the adoption of a new language."

(b) Article 188 of the Panamanian Constitution[2] entrusts the Supreme Court with several functions, among which is the following:

1. Guardianship of the integrity of the Constitution, to which end it shall decide, after hearing the Attorney General of the Republic or the Solicitor General, on the constitutionality of laws, decrees, decisions, resolutions and other acts challenged before it by any person on the grounds of content or form.

Articles 65–68 of Law 46 of November 24, 1956,[3] provide the procedural rules for this type of judicial review.

Unfortunately, the materials available to this Library do not cover the legislative history of the Panamanian Constitution currently in force, nor do they provide any judicial, administrative, or even monographic sources specifically related to this subject, which would help to sustain our interpretation of the above cited provision.

There are, however, some judicial precedents based on the former Panamanian Constitution, which contained similar provisions on the subject.[4] A brief review of the two most important precedents follows.

In the first case,[5] the Panamanian Supreme Court held unconstitutional and without legal effects in the Republic Law 35 of November 23, 1957,[6] which approved the adhesion of Panama to the Geneva Conventions of August 12, 1949, based on the following grounds: (1) This law did not contain the full text either of the instrument by which the Executive adhered to those Conventions or of the Conventions themselves, procedural steps deemed essential for them to become laws of the Republic; and (2) The law approving the Conventions was not promulgated within the time period established by the Constitution.

That is, based on the wording of articles 118(5) and 133 of the 1946 Constitution,[7] the Supreme Court ruled that the treaties concluded by the Executive become a part of the laws that approve them, and are therefore subject to the same procedural requirements, among which are their publication and timely promulgation, steps that are essential to make them known and obeyed.

In the second case,[8] the Supreme Court was asked to rule unconstitutional the 1903 Panama Canal Treaty with regard to its provisions that were violating the 1946 Constitution, then in force.

The Supreme Court stated in its decision of the case that a State cannot, through its own jurisdictional bodies, declare invalid an international convention because the convention violates the provisions and principles of its constitution or because the provisions of the convention are incompatible with the country's existence and institutional development. The Court added that an international treaty signed by Panama could not be disregarded because the international law principle of pacta sunt servanda was present in article 3 of the 1946 Constitution,[9] as it was in the previous constitutions of the country. Finally, the Court declared that it lacked jurisdiction to rule on the subject, because the jurisdictional function exercised by the courts ends at the same point that the country's sovereignty ends, and therefore the court lacked authority to rule in a case where the country itself was one of the parties. The Court added that only international courts could impose their will over the will of the contracting States, that is that only these courts had jurisdictional powers to rule on international conflicts, and if the Panamanian Supreme Court should rule on this subject it would be not only invading a field reserved to international courts but also acting as judge and party at the same time.[10]

Based on such considerations the Court dismissed the case, without even considering the allegations of the plaintiff.

The only available monographic comment on these precedents deals with the second case and is contained in an article written by Dr. Mario Galindo H., entitled "Constitutional Control and International Treaties."[11] In this article the author harshly criticizes the Panamanian Supreme Court decisions, noting the inexistence of international courts empowered with the necessary authority to compel countries to accept and obey their judgments, a fact that made illusory the reference of the Supreme Court to international courts as the only competent bodies to solve the conflict.

The article also notes that it is a widely accepted principle that, at a national level, treaties and statutes are on a legal parity with each other, and consequently the rule that the one with the later date supersedes the earlier, at least to the extent to which they are in conflict, is applicable to them. As examples, the author cites two U.S. Supreme Court decisions in which these principles were upheld.[12]

Finally, the article states that the 1946 Constitution empowered the Panamanian Supreme Court to review the constitutionality of treaties not only because of the ample terms in which constitutionality control function was given to the Court,[13] but also because of the fact that once a treaty is approved by the National Assembly it becomes a formal law of the Republic and, as such, subject to the Court's constitutional control.

In short, it may be stated that the Panamanian Supreme Court is empowered by the current Constitution to review the constitutionality of laws, decrees, decisions, resolutions, and "other acts" on grounds of either content or form. This attribute was also present in the former Constitution, and the Court makes use of it in ruling unconstitutional based on procedural grounds a law approving some international conventions. The same Court, however, refused to even consider an eventual conflict between the content of the 1946 Constitution and the provisions of the 1903 Panama Canal Treaty.

It must be noted that none of these precedents is necessarily binding on the Court; that the current Constitution is slightly different from the one on which the precedents were based; and that the last cited decision was adopted with a dissenting opinion, and has been harshly criticized by a Panamanian author.

II. Specific questions

Based on the above sources, our opinion regarding the specific questions of the requester, which are considered with regard to the internal legislation of Panama and not with regard to the international legal consequences of the ratification of the Treaties, is the following:

1. Given the text of the constitutional provisions governing the control of constitutionality in Panama, and the existing precedents, it appears to be hypothetically possible that the Panamanian Supreme Court could rule on the constitutionality of the new Canal Treaties, specially on the procedural aspects of their ratification.

It must be noted, however, that changes proposed by the United States Senate could range from mere understandings to formal amendments to the text of the treaties already signed, and this is an important fact to consider in assessing the likelihood of a Panamanian Supreme Court ruling on this subject.[14]

In the case of mere understandings that do not alter the text of the treaties already approved by the Panamanians in a plebiscite, it appears that actually there would be no need for a new plebiscite, considering that the interpretation of that text should be an attribute of the Executive, which is in charge of the negotiation process according to the Constitution. In such a case a Supreme Court ruling seems unlikely.

If the Senate proposes amendments that significantly alter the existing text of the treaties, and these amendments are not subjected to a new plebiscite by the Panamanian Government, the hypothetical possibilities of a Court ruling in the terms indicated by the requester seem, in our opinion, to be higher.

Finally, in the case of reservations, the likelihood of a Supreme Court ruling striking them as unconstitutional if they are not approved by a new plebiscite should depend largely on their nature and content, that is, on the extent to which they alter the already approved text of the treaties.

2. The second question is even more hypothetical than the first, and the absence of specific rules or precedents makes us conclude that the Supreme Court could eventually decide either way: to strike out as unconstitutional only those provisions that are different from the text approved by the Plebiscite of October 23, 1977, or to consider that the whole ratification process is defective, and, that the treaties' approval as a whole is formally unconstitutional.

PLEBISCITE FOR AMENDMENTS TO PANAMA CANAL TREATIES

PANAMA

The requested desires an opinion as to whether amendments to the Panama Canal Treaties would require a new plebiscite in Panama.

I. Constitutional provisions

The Constitution currently in force in Panama was enacted and came into effect on October 11, 1972.[1] According to its article 163(4) one of the functions of the President of the Republic is "to conduct foreign relations, to accredit and receive diplomatic and consular agents, and to enter into international treaties and agreements, which shall be submitted to the National Assembly for consideration."

This provision, also present in all past Panamanian constitutions, has two important exceptions in the current Constitution. First, article 277 (transitory) recognizes Brigadier General Omar Torrijos Herrera, Commander in Chief of the National Guard, as the Supreme Leader of the Panamanian Revolution, and, in order to ensure the fulfillment of the objectives of the revolutionary process, authorizes him to exercise for a 6-year period a number of public functions, one of which is the direction of the country's foreign relations.

The second exception is related to treaties dealing with the Panama Canal, which are under the purview of article 274 (transitory) of the Constitution, which reads as follows:

Art. 274. Treaties which may be signed by the Executive Organ with respect to the Panama Canal, its adjacent zone, and the protection of the said Canal, and for the construction of a new Canal at sea level or of a third set of locks, shall be submitted to a national plebiscite.

Finally, article 141 of the Constitution provides that the functions of the National Assembly of Municipal Representatives (Asamblea Nacional de Representates de Corregimientos) include enacting laws for several purposes, among which is: "1. To approve or reject public treaties signed by the Executive."

As far as we can ascertain no other constitutional or statutory provisions regulate this subject.

II. The Plebiscite of October 23, 1977

Law 33 of September 13, 1977,[2] submitted the Panama Canal Treaty and the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal to a plebiscite in the following terms:

Art. 1. A Plebiscite is hereby convened that shall take place on October 23, 1977, [with the purpose] that the citizens through their vote shall decide whether or not they approve the new Treaty of the Panama Canal, the Treaty concerning the permanent neutrality of the Panama Canal, and the related agreements and annexes signed between the Governments of Panama and the United States of America on Wednesday, September 7, 1977.

According to article 11 of the same law voters had to choose between ballots saying "yes" or "no" to the following proposition provided by article 10 of the same law:

"I agree with the new Treaty of the Panama Canal, the Treaty concerning the Permanent Neutrality of the Canal and the Operation of the Panama Canal, the minutes agreed upon, the exchanges of notes, maps, the related agreements, and the annexes signed between the Governments of Panama and the United States of America on Wednesday, September 7, 1977."

Neither the text of the ballot nor any other provisions of Law 33 of 1977 referred to future amendments to the treaties being approved by the Plebiscite of October 23, 1977.

In the Plebiscite the Canal treaties were approved by a wide margin by Panamanian voters.[3] It appears, therefore, that the remaining constitutional step would be the enactment of the treaties as a law by the National Assembly, according to article 141 of the Constitution, cited above.

III. Conclusions

The 1972 Panamanian Constitution requires that treaties signed by the Executive concerning the Panama Canal must be submitted to a national plebiscite for their approval. Neither the Constitution nor any statutory provision states whether or not a plebiscite is required in the case of amendments to treaties already approved by a plebiscite. Therefore, the law governing the subject must be interpreted by resorting to sources other than the statutes themselves.

The requirement of a plebiscite for the approval of treaties dealing with the Canal was established for the first time in the 1972 Panamanian Constitution. Unfortunately, the materials available to this Library do not cover the legislative history of this Constitution or provide any other judicial, administrative, or even monographic sources related to this problem, preventing us from issuing a substantiated opinion on the subject at the present time.

We can note, however, some of the basic elements that may be considered, within the context of Panamanian law, for arriving at a definite opinion on the subject:

(1) The Plebiscite of October 23, 1977, as noted in part II above, approved the text of the Panama Canal treaties and related agreements and documents as signed by the Governments of Panama and the United States on a specific date: September 7, 1977.

(2) The eventual amendments to the treaties could range from mere formalities to substantial modifications to the nature, extent, and content of the treaties; therefore, the content and nature of the amendments to be introduced to the treaties may determine, to an important extent, the necessity for a new plebiscite.

(3) According to Panamanian law, the interpretation of this legal problem can be considered an attribute to the Executive, which is in charge of the conduct of foreign relations, but the National Assembly of Municipal Representatives could consider the problem while passing the treaties as a law. Also, the Supreme Court could eventually be asked to rule about the legality of the treaties and their formal approval is an important element of the case.[4]

Mr. MELCHER. I believe it is fair and accurate to assess the majority judgment of the people of the United States as being sensitive to the problems of the people of Panama and willing to adjust with the Panamanians' use of the land in the Canal Zone for their purposes and to give them greater economic return from the canal's operation. We can do that, and people here in the United States know we can without these particular treaties.

[2] *Graceta Oficial*, Sept. 19, 1977.

[3] New York *Times*, Oct. 25, 1977.

[4] Art. 188 of the 1972 Panamanian Constitution entrusts the Supreme Court with several functions, among which is the following: "1. Guardianship of the integrity of the Constitution, to which end it shall decide, after hearing the Attorney General of the Republic or the Solicitor General, on the constitutionality of laws, decrees, decisions, resolutions and other acts challenged before it by any person on the grounds of content or form." Based on similar provisions of past constitutions the Supreme Court has ruled on the constitutionality of laws and decrees approving treaties. For example: Judgments 1/63 of Jan. 22, 1963, and 12/63 of July 29, 1963, *in* 1 *Jurisprudencia Constitucional* 424–26, 438–39 (Universidad de Panamá, Sección de Investigación Juridica, Panama City, 1967).

It is the other requirements in the new treaties that are objected to by the American people.

From time to time in our history the reactions of deep and thoughtful judgment on a national issue have been developed and firmly enunciated by our people.

Such is the case now with these new treaties. That judgment does not warrant a simple label. It is neither "right wing" nor "imperialistic." It is not selfish, nationalistic fervor. The refusal of the majority of people here in the United States to back the new treaties is reflecting their commonsense to question certain key changes in the management and defense of the canal under the proposed treaties.

Polls in the United States have demonstrated an overwhelming rejection of the treaties. The poll shifts dramatically to nearly 50/50 when the question is asked: What if the treaties are amended to allow for continued U.S. defense of the canal after the year 2000? The amendments referred to are the Baker-Byrd amendments. Many of the people here, perhaps most, assume the Baker-Byrd amendments mean the United States would have a continued military base in Panama and that the United States would determine when it was necessary to defend the canal from hostile acts within Panama.

The Baker-Byrd amendments do not permit that. I repeat—the treaties with the Baker-Byrd amendments as part of the Neutrality Treaty prohibit a U.S. military base in Panama after 2000, and the Neutrality Treaty with the Baker-Byrd amendments does not allow the United States to determine when hostile acts within Panama require our defense of the canal.

The latter point—to defend the canal against hostile acts in Panama—was thoroughly debated on Senator DOLE's amendment No. 59 to add eight words to article IV to state that the United States would decide if hostile acts in Panama need our defense of the canal. The treaties' floor managers shrugged off the amendment as "messing with words"—citing the treaties as "a contract entered into by two sovereign governments" and the amendment would require renegotiation.

That admission by the floor managers of the treaties clearly demonstrates the inadequacy of the treaty. They say it would require a new plebiscite in Panama. An honest conclusion can be made then that the Panamanians understand and accept the treaties only on the basis that hostile acts against the canal in Panama cannot result in United States defense of the canal unless they ask us to help them. The confusion that this raises is: Who determines what in Panama? While Panamanians historically have been friendly to the United States, there have been 49 different heads of government in 70 years. A hostile act endangering the canal's operation might occur within Panama under a different faction. That possibility would be harmful to many countries, including Panama, and they must understand that.

While Panama might need a new plebiscite, our plebiscite in the United States is the Senate vote.

Treaties are made to determine legitimate actions between participating countries, and if endorsed by other countries, become conditions accepted throughout the world. It is our intention under these treaties—or a subsequently negotiated modification with Panama—that we are fair and prudent, not imperialistic or unreasonable.

In that light, the treaty floor managers, with White House push, advise the Senate and the people of the United States that flaws in the treaty can be corrected with reservations—not to the treaty—but to the article of ratification. Upon consultation with the international lawyers they advise us that this will add requirements of the Government of Panama.

It is not—no, it is not contended—that the changes in the article of ratification carry the same weight as do amendments to the body of the treaty.

The logic advanced by the treaty backers fails to meet U.S. interest or intent in the new treaty. It is our purpose to have a clear commonsense understanding on the continued operation and defense of the canal.

If the points raised by amendments to the body of the treaty are unacceptable because they would require a new plebiscite in Panama, the same provisions added to the article of ratification—if binding—would also require a new plebiscite in Panama. "Not so," say the treaty floor managers and the President. It follows that additions to the article of ratification are not only something less than if the provisions had been accepted to the body of the treaty, but it also can be concluded that to avoid a new plebiscite in Panama that the U.S. Senate must only consent to the treaties—no advice, no adjustment, to protect U.S. concerns.

In all of the discussions I have had with the President and Ambassador Linowitz concerning the treaties, I have refused to accept that the flaws I found in the treaties would be adequately corrected by reservations or additions attached outside the body of the treaties.

It is evident that if an addition or reservation to the article of ratification similar to rejected amendments to the real body of the treaty is not of sufficient consequence to require a new plebiscite in Panama, then it is not a firm part of the treaty clearly agreed to and accepted by the Panamanians.

Retention of a military base in Panama after 1999 is only practical for mutual defense and in line with a score of foreign countries. The Panama Canal is a strategic facility still requiring mutual defense in 2000 and after. Panama has a 10,000-member national guard which is a combined police, military secret service, and political enforcer of the Torrijos government.

The amendments to retain a U.S. military base in Panama after 1999 were rejected when the treaty backers said any of them would kill the treaties because it would require a new plebiscite in Panama. Amendment No. 59 of only eight words to article IV, which would have helped the people of the United States and Panama to clearly understand that the United States had the right to defend the canal against hostile acts within Panama was defeated.

Treaty managers and the White House advise us that, it, too, kills the treaty because it would cause a new plebiscite in Panama.

Attaching the same propositions outside of the body of the treaties they say, requires no new plebiscite in Panama. Therefore, those propositions attached at that point cannot be represented by the treaty backers as understood and accepted by Panama. They are not accepted by Panama as firm requirements of the treaty.

Are we to believe that the advice of international lawyers to the treaty backers here in the United States that these attachments to the article of ratification will become binding on Panama without their understanding and accepting the attachments?

Is this a hoodwinking method of getting what we want to protect U.S. interests without bothering Panama?

Either the amendments to article IV and article V on these two points would not have bothered the Panamanians if we had accepted them, or the Panamanians will not bother to accept or recognize the same provisions attached outside the body of the treaty.

That is no basis for having a workable treaty.

Many of us who will vote against the Neutrality Treaty cannot accurately be described as "right wing" or "imperialistic." Rather in my judgment, the reasons against the treaty are only practical and necessary regardless of which side of the aisle we sit on.

The Neutrality Treaty to protect U.S. interests required substantial restructuring. This method of add-ons to the article of ratification, in my judgment, fails to meet our requirements and would not be recognized by Panama as "for real" or binding because the Senate, at the behest of the President and General Torrijos, refused to incorporate them in the appropriate articles of the treaty.

I regret that I must disagree with the President in his judgment on this treaty. But our function in the Senate must be to both advise and consent on the treaty. I cannot, in face of the facts, only consent.

I regret that the issue has been projected to be of such magnitude politically. If this Neutrality Treaty is defeated, adjustments with Panama on better returns from the canal's operation and use of the land by Panama can immediately proceed.

To help President Carter and the country, we need to quickly get on with solving the problems of our economy here in the United States. Agriculture, steel, copper, energy, and many other industries need immediate attention.

In my judgment, the best way to help the country and President Carter is to defeat the Neutrality Treaty and to turn the Senate's attention and efforts to the more urgent domestic problems.

RESERVATIONS AND THE NEED FOR A NEW PLEBISCITE

Mr. GRIFFIN. Mr. President, on Monday of this week I cited extensive legal authority, as well as statements made earlier this year by Secretary of State Vance, General Torrijos, and others, to the effect that if the Senate adopted amendments to the Neutrality Treaty a new plebiscite would be required in Panama.

The Senate has adopted two amendments. However, it is now clear that President Carter and General Torrijos intend to exchange instruments of ratification without subjecting the amended treaty to a vote of the Panamanian people.

Now the Senate is considering the resolution of ratification to which a number of reservations and understandings are being proposed. Accordingly, it is appropriate to consider what will be the legal implications of the adoption by the Senate of reservations and understandings.

Under international law a reservation to a treaty, like an amendment, amounts to a rejection of the treaty as submitted and requires reratification by the other party in order to be valid. This has been recognized by the Department of State for decades as a basic principle of international law.

For example, Green Hackworth—a former Legal Adviser of the State Department—writing in 1943 in his Digest of International Law, quoted this memorandum by the Solicitor for the Department of State on April 18, 1921:

The action of the Senate when it undertakes to make so-called "reservations" to a treaty is evidently the same in effect as when it makes so-called "amendments", whenever such reservations and amendments in any substantial way affect the terms of the treaty. . . .

In the course of negotiations regularly conducted in accordance with established international practice, *the Government of the United States must either ratify a treaty as it has been signed or reject it. If the Senate attempts to alter it, consent of the other nations must be obtained to the alteration. In effect, a new treaty is substituted for the old one.* (Emphasis supplied.)

In 1950, another State Department Legal Adviser, Adrian Fisher, said this in a statement before the Senate Foreign Relations Committee:

. . . [*A*] *Reservation* is based on the theory that this is something other than what was agreed to and *has to be resubmitted to the other parties* of the Convention to see whether they accept that change in the terms. *It is, as we used to say in contracts, a counter-offer.* (Emphasis supplied.)

In his casebook, International Law, Prof. William Bishop of the University of Michigan says:

In the case of bilateral treaties, reservations or amendments may be suggested by the Senate or corresponding body in the other state concerned; but of course *it is necessary that the President and the Senate, in the case of the United States, and the corresponding treaty-making organs, in the case of the other party, agree to the treaty with the amendment or reservation before it becomes effective.* (Emphasis supplied.)

Let me emphasize the words "the corresponding treaty-making organs, in the case of the other party." In the case of Panama, this means not only the executive but also the people, because under Panama's Constitution a treaty concerning the Panama Canal can only be made with the approval of the people voting in a national plebiscite.

Almost echoing the words of Adrian Fisher, Professor Bishop explains:

Since a true reservation is, in effect, a "counteroffer" by the reserving state, it is obvious that in the case of a bilateral treaty the reservation and the action which it accompanies (signature or ratification) will be of no effect unless accepted by the other party.

Consider also the writings of Oxford University's distinguished J. L. Brierly, who said this in his the Law of Nations:

In accepting a treaty a state sometimes attaches a *"reservation"*, that is to say, it makes the acceptance conditional on some new term which limits or varies the application of the treaty to itself. *Such a qualified acceptance is really a proposal for a treaty different from that agreed on, and if the reservation is persisted in and is not accepted by the other states concerned it amounts to a rejection.* . . . When a treaty has only two parties, the matter is simple; *if the other party does not accept the tendered reservation the treaty will fall.* (Emphasis supplied.)

A similar view is provided by the late Professor Oppenheim, of the University of Cambridge, who wrote in his classic work, International Law:

"§ 517. It follows from the nature of ratification, as a necessary confirmation of a treaty already concluded, that *ratification must be either given or refused, no conditional or partial ratification being possible.* That occasionally a State tries to modify a treaty while ratifying it cannot be denied; but *conditional ratification is not ratification at all, but is equivalent to refusal of ratification coupled with a fresh offer which may or may not be accepted.* Nothing, of course, prevents the other contracting party from entering into fresh negotiations in regard to such modifications; but such negotiations are negotiations for a new treaty, the original treaty having become null and void through its conditional ratification." (Emphasis supplied.)

It is worth noting that Professor Oppenheim in using the term "conditional ratification" is including not only amendments and reservations, but also understandings.

Thus, he writes:

"It has been asserted that it is quite legitimate—and that one ought not in this case to speak of conditional ratification—for a contracting party who wishes to secure a certain interpretation for certain terms and clauses of a treaty, to grant ratification upon the understanding only that they should bear a particular interpretation. In such cases, according to that view, ratification does not introduce an amendment or an alteration, but only fixes the meaning of otherwise doubtful terms and clauses of a treaty. However, it is clear that such interpretation, in order to be binding upon the other parties, must secure their assent. Otherwise it might be possible for a contracting party to modify substantially in its obligations by means of its own interpretation of the provisions of the treaty."

Let me cite one more authority. In "Cases and Materials on International Law," written by Friedmann, Lissitzyn and Pugh—three Columbia Law professors, they say:

In the context of bilateral agreements, a reservation is closely analogous to a counter-offer by the reserving state, and the legal situation is clear, whether the reservation is accepted or rejected by the other state. . . .

They then quote from a 1951 advisory opinion of the International Court of Justice, which said in part:

It is well established that in its treaty relations a State cannot be bound without its consent, and that consequently *no reservation can be effective against any State without its agreement thereto.* (Emphasis supplied.)

There is one other legal point I wish to deal with before yielding the floor.

On Monday I stressed that if the Senate attached conditions to the treaties requiring Panamanian acceptance, and if General Torrijos proceeded to "ratify" the treaties without the approval of the Panamanian people, the validity of the treaties would be subject to challenge.

It has been argued, in effect, by several Senators that we need not be concerned whether General Torrijos violates his Constitution by accepting a revised treaty without submitting it to a new vote of the people. This is a contention with which I cannot agree, and which I do not believe is supported by the bulk of the legal authority on the subject.

There are legal scholars who stress that a nation cannot avoid a treaty commitment by citing obscure portions of its internal law to, in effect, annul a treaty. However, with respect to major provisions of internal law—particularly constitutional requirements for legal ratification—the weight of the authority supports the contention that a state cannot be bound by an illegally ratified treaty.

For example, Prof. C. G. Fenwick—who, by the way, was a specialist on Inter-American law—has written:

The majority of writers . . . maintain that foreign governments should be held to a knowledge of the constitutional prerequisites of ratification in each country with which they are dealing; and they insist that a treaty which has been ratified without the proper observance of these requirements is ipso facto invalid, whatever the proclamation of the head of the state may assert in that respect.

Consider also this conclusion by Professor Oppenheim, from his classic work, International Law:

§ 497. Although the Heads of State are regularly, accordingly to International Law, the organs that exercise the treaty-making power of the States, *such treaties concluded* by Heads of States, or other organs purporting to act on behalf of the State, *as violate constitutional restrictions do not bind the State concerned.* This is so for the reason that the representatives have exceeded their powers in concluding the treaties." (Emphasis supplied.)

Finally, let us look at the relevant provisions of the 1970 Vienna Convention on the Law of Treaties, which—which technically not applicable to the Panama treaties because it has not yet been ratified by the two parties—can be viewed as representative of existing standards of international law.

Article 46 of the convention says:

1. A State may not invoke the fact that its consent to be bound by a treaty has been

expressed in violation of a provision of its internal law regarding competence to conclude treaties as invalidating its consent *unless that violation was manifest and concerned a rule of its internal law of fundamental importance.*

2. A violation is manifest if it would be objectively evident to any State conducting itself in the matter in accordance with normal practice and in good faith. (Emphasis supplied.)

Clearly, as I demonstrated Monday, the plebiscite requirement in Panama's Constitution is a rule of "fundamental importance," and a failure to follow that rule would be "manifest."

In sight into the "legislative history" of article 46 is provided by two of the participants in the negotiations which led to the convention.

Chief Justice of Nigeria, T. O. Elias, writes in "The Modern Law of Treaties," that the conference wanted to include the provision that a State could not be held to a treaty ratified in manifest violation of a fundamental rule of its internal law:

. . . [B]*ecause cases have occurred in the past when a Head of State entered into a treaty with another State in sheer disregard or contravention of the State's clear constitutional provisions.* The latter State must surely know that the Head of State's want of authority to express consent to conclude the treaty is so manifest that the treaty should be regarded as *ipso facto* invalid. (Emphasis supplied.)

The support for this exception was emphasized by I. M. Sinclair, the senior legal advisor to the British Foreign and Commonwealth Office, who—in his book, "The Vienna Convention on the Law of Treaties"—noted that an amendment by Pakistan and Japan to delete the "manifest violation" exception was defeated by "a fairly substantial majority."

And so. Mr. President, two facts seem clear:

Under international law any condition applied to these treaties by the Senate—whether we call it an amendment, a reservation, or by some other term—must be accepted by Panama in accordance with its constitutional procedures. Its constitution requires approval by a vote of the people.

If we permit President Carter and General Torrijos to exchange instruments of ratification without the required new plebiscite, we will invite a future Panamanian leader to denounce the treaty as null and void under international law.

While I have been speaking this afternoon of the legal dangers inherent in the path we are being asked to follow by the administration, I do not intend to overlook the moral implications of following such a course.

Can we really simply turn our backs on the people of Panama, whose constitutional right to pass judgment on the modified treaties would be ignored?

And if we do, Mr. President, can we really expect this new treaty relationship to serve as a foundation for a new relationship of friendship and partnership with the people of Panama? On the contrary, it is almost certain to increase the bitterness which too often has characterized our relations in the past.

SCHOOL PRAYER

Mr. HELMS. Mr. President, earlier today as we joined with the distinguished Chaplain of the Senate, Dr. Elson in prayer, as we do each day when the Senate begins its sessions, I could not help thinking that while we begin our day's work by asking God's blessing on our efforts, the Supreme Court has denied that same right and privilege to millions of schoolchildren across the Nation.

Mr. President, one would think that if the legislators of this country are entitled to ask for divine blessing upon their work, then so are schoolchildren. However, the court has ruled to the contrary and in so doing has overturned more than 200 years of Americans custom. Indeed, the Supreme Court has even ruled that schoolchildren may not read the prayer of the House or Senate Chaplain as printed in the CONGESSIONAL RECORD as a beginning to their school day.

Mr. President, the interpretation of the first amendment used by the Supreme Court to strike down this practice of the American people, distorted the intent and language of the amendment. The Justices of the Court held that a voluntary, nondenominational prayer constituted a violation of the "establishment of religion" clause of the first amendment. The Court's interpretation of the first amendment indicated not only an animosity toward the effect of religion in the public life of our Nation, but also a misunderstanding of its historical role.

Last month, the Senate once again assembled to listen to George Washington's Farewell Address. Washington brought the unique experiences of his service as first President of the United States, as commander of the continental forces during the War of Independence and as president of the convention which wrote and presented the Constitution to the States for ratification. He rejected the narrow opinion that religion must be excluded from the public life of the Nation. In his final counsel to the Nation, Washington warned that:

Of all the dispositions and habits which lead to political prosperity, religion and morality are indispensable supports. In vain would that man claim the tribute of patriotism who should labor to subvert these great pillars of human happiness.

Mr. President, Washington's view has indeed been the mainstream of the legal and social attitude of the American people and the drafters of the Constitution in regard to the religious rights preserved in the Bill of Rights. Prof. Edward Corwin, one of our most distinguished constitutional scholars, rejected any interpreation of the first amendment which would force upon government institutions a formal agnosticism. Professor Corwin writes:

The historical record shows beyond peradventure that the core idea of an "establishment of religion" comprises the idea of preference; and that any act of public authority favorable to religion in general cannot, without manifest falsification of history, be brought under the ban on that phrase.

THE SUPREME COURT DECISIONS

Nearly 200 years after the drafting of the Constitution, the Supreme Court for the first time ruled that prayer and Bible-reading in public schools encouraged by the State constitutes an establishment of religion in violation of the first amendment. At the time of these decisions, 26 States permitted Bible reading in the public schools and 13 authorized the saying of the Lord's Prayer.

The first amendment provides that:

Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof.

In *Engel* v. *Vitale*, 370 U.S. 421 (1962). the court prohibited a requirement of the New York State Board of Regents that each class begin the school day with the following prayer:

Almighty God, we acknowledge our dependence upon Thee, and we beg Thy blessings upon us, our parents, our teachers and our Country.

In *Abington School District* v. *Schempp*, 374 U.S. 203 (1963), the court struck down a Pennsylvania statute requiring the reading of at least 10 verses from the Holy Bible without comment and the saying of the Lord's Prayer at the beginning of each school day. In a companion case, the court invalidated a Maryland requirement concerning the reading of a chapter of the Holy Bible and/or saying the Lord's Prayer.

In each case, the court ruled that voluntary school programs including Bible-reading or prayer violate the establishment clause of the first amendment. In Engel, Justice Black wrote:

the constitutional prohibition against laws respecting an establishment of religion must at least mean that in this country it is no part of the business of government to compose official prayers for any group of the American people to recite as a part of a religious program carried on by government. (370 U.S. at 425)

In Schempp, Justice Clark concluded that the Bible-reading programs:

are religious exercises, required by the States in violation of the command of the First Amendment that the Government maintain strict neutrality, neither aiding nor opposing religion. (374 U.S. 203)

In both rulings the court went beyond the language of the establishment clause to construct an interpretation of it which would overturn the long-standing state practices. In Engel, Justice Black asserted:

Its first and most immediate purpose rested on the belief that a union of government and religion tends to destroy government and to degrade religion . . . The Establishment Clause thus stands as an expression of principle on the part of the Founders of our Constitution that religion is too personal, too sacred, too holy, to permit its "unhallowed perversion" by a civil magistrate. (370 U.S. 431–32)

Justice Clark argued in Schempp that the court had previously "rejected unequivocally the contention that the establishment clause forbids only governmental preference of one religion over another." (374 U.S. 216) He maintained that the establishment clause must be considered together with the free exercise clause, and that they impose on

Government a "wholesome neutrality" toward religion. In Justice Clark's view, the first amendment prohibits Government from any action favoring one religious sect over all others, or religion in general over nonreligion.

Justice Clark formulated a new standard by which to measure legislative action regarding the first amendment:

The test may be stated as follows: what are the purpose and the primary effect of the enactment? If either is the advancement or inhibition of religion the enactment exceeds the scope of legislative power as circumscribed by the Constitution. That is to say that to withstand the structures of the Establishment Clause there must be a secular legislative purpose and a primary effect that neither advances nor inhibits religion. (374 U.S. at 222)

The court maintained that even though the prayer and Bible-reading activities were voluntary, this did not prevent them from violating the establishment clause. In Engel, the court held that:

The Establishment Clause, unlike the Free Exercise Clause, does not depend upon any showing of direct governmental compulsion and is violated by the enactment of laws which establish an official religion whether those laws operate directly to coerce nonobserving individuals or not. (370 U.S. 421)

COURT'S INTERPRETATION—SHEER INVENTION

Thus the Supreme Court reached a position which earlier the highest court of New York State had concluded "is so contrary to history as to be impossible of acceptance." Constitutional scholars also took issue with the Court's new interpretation. For example, Prof. Charles Rice of Notre Dame Law School found that the Court interpreted "the establishment clause in abstract and oversimplified terms, doing violence thereby to the history and informed logic of the first amendment" and Erwin Griswold, Dean of Harvard University Law School, viewed the Court's holding as "sheer invention."

The Court reached its holdings in Engel and Schempp by way of a myopic and narrow view of the history of the Constitution. Only by a thorough distortion of the work of the authors of the Constitution is it possible to arrive at the sweeping condemnation of America's spiritual heritage presented in the Court's opinions.

Professor Rice, writing in the South Carolina Law Review, explains:

It has been incorrectly asserted, by the Supreme Court and others, that the establishment clause ordained a government abstention from all matters of religion, a neutrality between those who believe in God and those who do not. An examination of the history of the Clause, however, will not sustain that analysis. Its end was neutrality, but only of a sort. It commanded impartiality on the part of government as among the various sects of theistic religions, that is, religions that profess a belief in God. But as between theistic religions and those nontheistic creeds that do not acknowledge God, the precept of neutrality under the establishment did not obtain. Government, under the establishment clause, could generate an affirmative atmosphere of hospitality toward theistic religion, so long as no substantial partiality was shown toward any particular theistic sect or combination of sects.

Justice Joseph Story, who served on the Supreme Court from 1811 to 1845 and who was a contemporary of the framers of the Constitution, maintained that at the time of the drafting of the first amendment:

The general if not the universal sentiment in America was, that Christianity ought to receive encouragement from the state so far as was not incompatible with the private rights of conscience and the freedom of religious worship. An attempt to level all religions and to make it a matter of state policy to hold all in utter indifference, would have created universal disapprobation, if not universal indignation.

COURT IGNORED HISTORY

The first amendment provides that Congress shall make no law respecting an establishment of religion. Those assembled at the Constitutional Convention did not arbitrarily choose the phrase "an establishment of religion." There was much history behind the term. Not only did England and Scotland have an established church, but five of the States which later adopted the first amendment had established churches as well.

In the Engel and Schempp opinions, the court ruled that the phrase "establishment of religion" really meant not just the creation of a national church, but any Government action dealing or touching religion. To cite Justice Clark's new test outlined in Schempp, the "primary effect" of any governmental act must not "advance religion."

Yet, it is just this view of what the first amendment should provide that the authors of the amendment specifically rejected. During the Constitutional Convention the delegation from New Hampshire proposed that the first amendment should read:

Congress shall make no laws touching religion . . .

Needless to say, that language was rejected.

An elementary rule of statutory construction provides that when a legislative assembly rejects language which has a broad application and substitutes in lieu of it language with a specific, narrow application, that the legislative intent is to exclude the broad application. Had the proposal that Congress make no law "touching religion" been accepted, it would undoubtedly have prevented Congress from doing much more than establishing a national religion. If applied to the States, it undoubtedly would have prohibited the type of prayer at issue in the Engel and Schempp cases. However, it is equally clear that this broad language was rejected and that Congress viewed the official encouragement of voluntary prayer, even on the national level, as not to be contrary to the first amendment's establishment provision.

On September 24, 1789, the first Congress passed a resolution requesting that the President "recommend to the people of the United States a day of public thanksgiving and prayer, to be observed by acknowledging, with grateful hearts, the many signal favors of Almighty God, especially by affording them an opportunity peaceably to establish a constitution of government for their safety and happiness."

Congress passed this resolution calling for a national day of prayer on the same day on which it adopted the first amendment to the Constitution. Nine days later President Washington issued the Thanksgiving Proclamation. Could any action more clearly indicate the intent of the authors of the first amendment regarding its establishment clause and Government-encouraged public prayer? The framers of the Bill of Rights clearly rejected the doctrine imposed upon the Nation in their name nearly 200 years later when the Supreme Court demanded that:

In the relationship between man and religion, the state is firmly committed to a position of neutrality.

A threshold issue presented in the Engel and Schempp cases was whether the establishment clause of the first amendment could be applied to the action of State governments through the 14th amendment. The court rejected an historical analysis of the meaning of the 14th amendment and relied on unsupported assertions. "First," wrote Justice Clark, "this Court has decisively settled (that the establishment clause) has been made wholly applicable to the States by the 14th amendment." For proof, he cited an opinion of Justice Roberts in Cantwell against Connecticut. The difficulty here is that the Cantwell case does not deal with the establishment clause and therefore does not settle anything at all. Thus the fundamental issue before the Court was disposed of by hypothesis.

Here again, an open historical inquiry would have led to a result far different than that of the Court's. The framers of the 14th amendment themselves did not intend, nor did they believe that the amendment would prohibit the States from encouraging prayer in public schools. How else can one understand the serious attempt by some in Congress only 7 years after the ratification of the amendment to amend the Constitution once again to prohibit the State establishment of religion. If the 14th amendment was intended to do this, why would those who had just adopted it propose to do it again?

The answer is that the 14th amendment did not apply the establishment clause of the first amendment to the States. Only a distortion of both amendments and their history permit such an application.

In part, the 14th amendment provides that no State "shall deprive any person of life, liberty, or property, without due process of law." Before its decisions in the Engel and Schempp cases, the court had applied other aspects of the Bill of Rights to the States through the 14th amendment by asserting that the word "liberty" as used in the amendment included all the liberties included in the Bill of Rights. Hence the liberties annunciated in the Bill of Rights could be protected from encroachment by the States.

But as Prof. Edward Corwin has explained, the establishment clause is not like the liberties outlined in the first nine amendments such as the right to bear arms. Rather it is like the 10th amendment which distinguishes the proper constitutional powers of the national and State governments under our Federal system.

The framers of the first amendment rejected the proposal by the delegations of Virginia and North Carolina that:

> No particular religious sect or society ought to be favored or established, by law, in preference to others.

because this language would have allowed Congress to disestablish the established churches of five States. The Congress then rejected Madison's proposal that the first amendment not apply to Congress at all, but that it prohibit only the States from violating "the equal rights of conscience."

The authors of the first amendment sought to protect religious liberty by providing that "Congress shall make no law . . . prohibiting the free exercise" of religion. However, regarding the purpose of the establishment clause, the legislative history is clear that the framers sought to prohibit Congress from establishing a national church or interfering with the individual State's policy regarding religion. As Justice Story later wrote:

> The whole power over the subject of religion is left (by the amendment) exclusively to the State governments to be acted upon according to their own sense of Justice and the State constitutions.

The authors of the first amendment sought a division of power in which the States would retain their ability to establish or disestablish a religion, while Congress had no power in this area. There simply is no liberty contained in the establishment clause to be "incorporated" through the 14th amendment and applied to the States. To interpret both amendments in such a way as to construe such an application would amount to prohibiting a State from establishing a national religion or from interfering with its own arrangements regarding religion.

CONGRESS CAN RESTORE THE RIGHT TO SCHOOL PRAYER

Mr. President, the Congress need not yield to any Justice of the Supreme Court in its respect for the words of the first amendment or for the principles or history behind them. Neither must Congress yield its responsibility under the Constitution to insure that the freedoms protected by the first amendment are not undermined by actions of other institutions. There is no more pressing duty facing the Congress than to restore the true spirit of the first amendment.

In anticipation of judicial usurpations of power, the framers of our Constitution wisely gave the Congress the authority, by a simple majority of both Houses, to check the Supreme Court by means of regulation of its appellate jurisdiction. Section 2 of article III states in clear and unequivocal language that the appellate jurisdiction of the Court is subject to "such exceptions, and under such regulations as the Congress shall make."

Thus on February 23 of this year, I reintroduced S. 2573, my school prayer bill. It states simply that the Federal courts shall not have jurisdiction to enter any judgment, decree, or order denying or restricting, as unconstitutional, voluntary prayer in any public school. Implicit in this bill is the understanding that the American citizen will have recourse to a judicial settlement of his rights, but this settlement will be made in the State courts of this Nation and not in the Federal courts. This is where our religious freedoms were always safeguarded for 173 years until they were nationalized by the Supreme Court.

The limited and specific objective of this bill, then, is to restore to the American people the fundamental right of voluntary prayer in the public schools. I stress the word "voluntary." No individual should be forced to participate in a religious exercise that is contrary to his religious convictions, and the bill recognizes this important freedom.

At the same time, the bill seeks to promote the free exercise by allowing those who wish to recite prayers—and they are the vast majority of our citizens—to do so, with or without the blessings of the Government.

I think the conclusion is inescapable that in the Engel decision the Supreme Court in effect gave preference to the dissenters and at the same time violated the establishment clause of the first amendment by establishing a religion—the religion of secularism.

Public schoolchildren are a captive audience. They are compelled to attend school. Their right to the free exercise of religion should not be suspended while they are in attendance. The language of the first amendment assumes that this basic freedom should be in force at all times and in all places.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER. Without objection, as in legislative session, the Chair, on behalf of the Vice President, appoints the Senator from Texas (Mr. BENTSEN) and the Senator from Pennsylvania (Mr. HEINZ) as congressional advisers to the SALT talks in Geneva during 1978.

WELFARE REFORM—DESPITE HEW

Mr. GRIFFIN. Mr. President, as in legislative session, on yesterday I introduced a resolution, S. Res 416, to disapprove regulations proposed recently by the Department of Health, Education, and Welfare, regulations that threaten to cripple the highly successful "runaway fathers" program. If allowed to go into effect, these regulations would be a step backward—away from welfare reform—saddling the American taxpayers with millions of dollars of unnecessary welfare costs.

Under the sponsorship of Senator LONG 4 years ago, Congress enacted the "runaway fathers" program—a joint Federal-State effort—to require fathers with sufficient means to help support their families who might otherwise have to live on public assistance. Enactment followed a General Accounting Office study revealing that a great many fathers with adequate incomes had skipped out and were not paying a penny of child support—thus forcing the mothers of their children onto welfare.

Just this week, the Washington Post reported that States have collected $1.6 billion over the past 2 years by tracing delinquent fathers and making them support their children. It is estimated that more than $1 billion more will be collected in the current fiscal year.

The State of Michigan—among the leaders in developing an aggressive child support enforcement program—has collected more than $150 million from absent fathers since the program began in 1975. One case involved a former law student, who had divorced his wife and fallen $5,000 behind in child support payments. While his family was living on welfare, State officials found that he had advanced considerably in his profession—in fact, he had become a judge.

Because this program has been so fruitful, I was dismayed to learn that HEW recently has managed to come up with another bureaucratic obstacle to place in the path of welfare reform. If these proposed HEW regulations go into effect as scheduled next week, States such as Michigan with aggressive and effective programs to track down delinquent fathers will be severely hampered in making them meet their child-support obligations.

The "runaway fathers" program requires, as a precondition to a woman receiving public assistance for support of her child, that she must cooperate in establishing the identity of the father and, where possible, securing financial support for him. This requirement must be complied with unless the mother can show "good cause" for refusing to cooperate.

This "good cause" exemption was adopted in 1975. Under that law (Public Law 94–88), HEW was directed to develop regulations specifying what would constitute "good cause." Those regulations were to take effect 60 days after Congress received them, unless either the House or the Senate adopted a resolution of disapproval.

HEW finally promulgated regulations on January 17, 1978, which were received by Congress on January 23. Although the intent is laudable—to protect mothers and children from retribution and cruel abuse from angry fathers—the practical effect of the regulations would be to hamstring State efforts to track down absent fathers and compel support payments.

Specifically, the regulations would allow a mother to refuse to identify the father of her child if doing so would result in "emotional harm" to the child or to herself. Other—more supportable—grounds for refusal, such as cases of rape or incest, are also included in the regulations. But the "emotional harm" exemption is a particularly serious threat to the continued viability of the program, because the phrase "emotional harm" carries with it no legal or professional meaning.

Indeed, under the proposed regulations a woman would not even be required to have a doctor's certification that identifying the child's father would result in emotional harm; in fact, this judgment would be left to a social worker unqualified to make such an evaluation. Since it would be easy for a mother simply to claim emotional harm, thus avoiding her

responsibility to cooperate, a State would find it that much more difficult to identify, track down and obtain support from delinquent fathers.

This would harm seriously State child support enforcement programs across the country, resulting in increased welfare costs and decreased paternal support. In fact, the Michigan Department of Social Services estimates that implementation of these regulations would cost the State of Michigan alone more than $12 million a year. Nationwide, the estimate is roughly $220 million yearly.

In addition to the weakening of these State programs, the regulations could affect severely children's rights derived from establishment of paternity—such as potential social security benefits, rights of inheritance, and veterans' benefits.

I am pleased that I am not alone in my concern about the impact of the proposed HEW regulations. My distinguished colleague from Louisiana—who was the architect of this successful program—recently expressed his serious reservations to Secretary Califano. In hearings before the Senate Finance Committee, Senator LONG told Secretary Califano that in pressing for the "Runaway Fathers" program, it was his purpose to require the mother to cooperate in seeking support from the father—and that it appeared to him that the proposed HEW regulations would make it very easy for a person to decline to cooperate. The Secretary assured the Senator that he would look into the problems he raised.

I share Senator LONG's concern, particularly since these regulations are scheduled to go into effect next week if the House or the Senate does not disapprove them. But so far as I know, HEW has not yet done anything to address the problems raised by Senator LONG.

Accordingly, Mr. President, I am introducing a resolution to disapprove the proposed HEW regulations so that the new guidelines can be formulated to advance—rather than inhibit—the purposes of Congress in enacting the "Runaway Fathers" program. In view of the rapidly approaching deadline, I urge my colleagues to act quickly in adopting it.

Mr. LONG. Will the Senator yield?

Mr. GRIFFIN. Yes.

Mr. LONG. Mr. President, I am glad the Senator is putting in his resolution of disapproval of these regulations. I have seen these regulations and I am most disappointed to see that the Secretary of Health, Education, and Welfare has permitted the kind of people who have been responsible for the welfare mess to prevail upon him to sign these regulations. The Secretary had been in favor of making fathers support their children. These regulations, as I read them, open up all the possibilities of welfare fraud and abuse that we thought we were eliminating with this child support enforcement program. Much of them are contrary to the law, and even ignore the law. They allow the States and localities to set their own standards.

The way the law would be without these outrageous regulations, would be if a mother wants the taxpayers to support her and her children she has a choice: She can either go in and ask for support and tell who the father is, or who she thinks the father is, or if she does not want to identify the father, she can say she does not know who the father is. Some women, I am sure, do not know who the father of their children might be. Or she can refuse to cooperate with the agency in obtaining support and establishing paternity because to do so would not be in the best interests of the child and wait for the taxpayer to support her until the agency determines that it would be against the child's best interests.

But, Mr. President, she should not be able to have it both ways. She should not be able to live off the taxpayers all the time, or to apply for child support, get the child support, and have the father living in the home or having a good job and not supporting the children at the same time. She should not have those options available to her unless she is willing to say that she does not know who the father is.

If the mother says she does not know who the father is, she is giving up the right in the future to sue that man for child support, even, if he should prove to be one of these fathers making $60,000 a year with his family on welfare.

It is an utter outrage to encourage people to try to have their cake and eat it, too, to encourage them to chisel and cheat on the program, and to reserve for them the right at some future date to sue the father for support, and also give them the right to live off the taxpayers for a lifetime when we know so well that these fathers, in many cases, are able to support those children.

Now, the State of Michigan had led the way in making fathers do something to help support their children and to cut down on the racketeering in this welfare program. I am very disappointed to see the Secretary of Health, Education, and Welfare going the route of his precedessors, being a Gulliver tied down by a bunch of Lilliputians. He is one of the few men over there, so far as I know, who is in favor of child support. Now the Lilliputians have tied Gulliver down.

I am convinced that it is generally people who were there before he arrived and who will be there long after he has gone who are responsible for the welfare mess and have imposed it on the States. But let us not overlook some of the new people who were not in the Government who were also adding to the welfare mess. These people should be required to go along with some sensible control over the mess in the program. They are responsible for it. They created it.

We had only about one column of regulations, to this program. They substituted seven, the whole purpose of it being to frustrate the program and to help continue the kind of mischief and fraud that has existed in that program for many years.

Here, at a time when it seems everybody, including the Washington Post, have agreed that we are making headway to eliminate fraud and abuse in the program, we now see the Secretary signing a regulation that, in my judgment, will frustrate the purpose. I am told that these regulations will cost about $220 million for the States to comply with and that they will cost us literally a billion dollars in collections that would be paid by these runaway fathers for the support of their children.

Mr. GRIFFIN. I thank the distinguished chairman of the Committee on Finance for his statement. That is absolutely right. It is bad enough that we are not able to agree on some new legislation to reform the welfare mess; but how ridiculous it is that the HEW will not even give effect to the laws that are already on the books to do something about it—this one in particular, sponsored by the Senator from Louisiana and our colleagues here in the Senate 4 years ago.

I might just say that in that period of 4 years, the State of Michigan—and as he has indicated, it has been one of the leaders—has collected more than $150 million from runaway delinquent fathers who have not been supporting their children as they are required to do under the law. We are just going to give that kind of money back, because these bureaucrats are determined, apparently, not to enforce the law.

Mr. LONG. In my judgment, the child support enforcement program, properly administered, could save the taxpayers about $3 billion annually when it is in full operation in all States. Now, these Lilliputians over there in the Department of Health, Education, and Welfare have destroyed the program by their regulation. They did not want to cooperate. They fought it. They planted editorials in the newspapers, by the way, which are now admitting that they were in error when they went along with those editorials planted by the Department of Health, Education, and Welfare. They have done everything they could to prevent this Nation from calling upon parents to support their children. Now they will kill it by regulation. It is an outrage.

In my judgment, Mr. President, it demonstrates how we should refuse to listen to the advice of those characters who believe that you ought to pay everybody a guaranteed annual income whether they need it or not, whether they deserve it or not, or whether they are willing to work or not. It just shows that the kind of people who are in charge of that program over in HEW never did want to do anything but just pay money out, mail out checks. They never did want to protect the interest of the taxpayers.

Mr. GRIFFIN. Let me mention one case in Michigan among the many cases that accounted for the $150 million. One case involved a former law student who had divorced his wife and was $5,000 behind in child support payments. While his family was living on welfare, State officials found that he had advanced considerably in his profession. In fact, he had become a judge. They were able to collect the money that he was owing under the program that the Senator from

Louisiana sponsored. Now HEW wants to come along and gut it.

Mr. LONG. Mr. President, if those people in that department have their way and a mother comes in and asks to be supported, all she would have to do, when asked who the father is, is say, "I am not going to tell you because I am afraid he might come back and beat me up, he might brutalize me." That being the case, she reserves her right, if she ever finds he is making a lot of money, to sue him and make him share the support of those children. At the same time, she puts the children on the backs of the tax payers, even though he is well able, even then, to support the children.

Now, we have all kinds of situations where papa is actually living with mama at the very time that mama is applying to go on welfare. If she is required to identify papa, and you find that papa has a job and plenty of money to support the family, then the family is not eligible. So these regulations fix it up so she can live with papa, enjoy his income and pretend that she is not; decline to admit that he is the father, tell her children, "Look, that is your father, but do not tell anybody, otherwise we might not get our welfare check." She can have her cake and eat it, too.

It was not intended that it should be that way. I am convinced that the people over in HEW who made a mess out of the welfare program, and would, if they could, make the mess twice as big and twice as expensive, are very happy that they made Mr. Califano sign this thing. I think they believe he is their captive and he can now subjugate the President to their rule.

I am saying, Mr. President, this type of thing demonstrates how difficult it is to have any welfare reform if by reform you mean a change for the better; if, by reform, you mean that people who are paying the money are going to have the satisfaction of knowing that they are only paying their money to help people who, through no fault of their own, are destitute and need help.

Mr. President, I promise the Senator, as one Member of this body and one member of the committee, I shall certainly do all in my power to try to see to it that these outrageous regulations are defeated one way or the other. Either we will have to do it by a resolution of disapproval, as the Senator proposes, or else we are going to find it necessary to strike them down by subsequent legislation. In either event, as far as the Senator from Louisiana is concerned, they declared war on us when they did this. We are trying to cooperate and work to make a welfare program of which all can be proud.

I have said before that the only person in that department who really believed in child support was the Secretary. Now I doubt that there is anybody who believes in child support.

Mr. STEVENS. Mr. President, I ask unanimous consent that Donna DeVaronna of the Commerce Committee staff be permitted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2750—CONSOLIDATED BANKING REGULATION ACT OF 1978

Mr. PROXMIRE. Mr. President, Senator RIBICOFF, the distinguished chairman of the Senate Governmental Affairs Committee and I are today jointly sponsoring legislation to consolidate the bank regulatory functions of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Federal Reserve into a single agency to be called the Federal Bank Commission.

Mr. President, this is timely legislation. President Carter has promised the American public to trim the Federal bureaucracy and to make Government more responsive to the needs of people. This legislation will eliminate overlapping and conflicting jurisdictions in the Federal regulation of banking which has proven to be too costly and unable to assure a safe, sound, and competitive banking system. This legislation will eliminate Government waste and the public will benefit by a more sensibly regulated banking system.

Last December the Senate Governmental Affairs Committee after studying regulatory organization issued a report calling for such a consolidation of the bank regulatory agencies. One of the important findings of the study was that banks have a privilege no other regulated industry has—being able to pick which of the three agencies of the Federal Government shall regulate them. As a result, Government regulation of banking is feeble and unable to provide the leadership this dynamic industry needs to move into the next century.

I applaud the quality of that study and commend it to my colleagues for their review and consideration. Both in this Congress and in the last Congress I sponsored legislation in the Senate Banking Committee to consolidate the three bank regulatory agencies. As a result of the Governmental Affairs Committee study a number of significant improvements have been made and incorporated into the legislation which Senator RIBICOFF and I are introducing today.

Chief among these are provisions designed to strengthen the dual banking system. This legislation consolidates the functions of three Federal agencies. Fifty State supervisors will not be affected. Nonetheless, if the Nation's banking system is to be made more responsive to public needs by better regulation, State regulatory authorities will have to be improved. Under the present system virtually all commercial banks are federally insured. State banks pay insurance premiums to the Federal Government, no part of which is returned to State authorities. State authorities are thus shortchanged. This bill will authorize those State authorities which are adequate to insure safety and soundness the right to grant Federal insurance to State chartered banks. Examinations reports of State authorities of State chartered banks will be used by the consolidated agency and the State authorities reimbursed for their costs. These provisions will insure the strengthening of the dual banking system which has served this Nation so well.

Other important improvements in this legislation are the provisions designed to insure that any conceivable action of the consolidated agency that might have a bearing on monetary policy will be subject to the authority of the Federal Reserve—which remains as an independent agency controlling the monetary policy of the Nation—to initiate rulemaking proceedings and statements of policy and to participate in interpretations and adjudications of the Federal Bank Commission.

Mr. President, I ask unanimous consent that this bill be referred jointly to the Committee on Banking, Housing and Urban Affairs and the Committee on Governmental Affairs, with the proviso that if either Committee orders the bill reported, the other committee has 30 days within which to report the bill.

I have cleared this request with the ranking minority member, Senator BROOKE and Senator TOWER, and others on the committee and there is no objection on their part to the joint referral.

The PRESIDING OFFICER. As in legislative session, without objection, it is so ordered.

Mr. RIBICOFF. Mr. President. I am pleased to join my colleague (Mr. PROXMIRE) today in introducing the Consolidated Banking Regulation Act of 1978.

The Committee on Governmental Affairs, pursuant to its mandate under Senate Resolution 71 (94th Congress, 1st session), last December completed an indepth study of the structure of Federal banking regulation. In volume 5 of its Study on Federal Regulation, the committee found that Federal banking regulatory functions are duplicative, confusing, and inconsistent and should be consolidated into a single Federal Bank Commission.

The committee found that the structure of commercial banking regulation is unique. A bank can choose the Comptroller of the Currency to be its regulator by seeking a national bank charter. A bank can choose the Federal Depositor Insurance Corporation as its primary regulator by seeking a State charter. And a State bank which wishes the Federal Reserve Board to act as its primary regulator needs only to join the Federal Reserve System. Nowhere else does a regulated industry have this type of latitude.

This ability to forum-shop has led to an unhealthy competition for membership among the agencies. Confusion and inconsistency are most prevalent in the areas of examination standards, merger policy, and bank holding company policy.

The solution to this problem is consolidation of the three agencies as designed by S. 2750.

I believe this bill represents very careful balancing of the goals of Federal banking regulation, and I hope it will receive early and favorable consideration by Congress and the administration.

GENOCIDE CONVENTION REPRESENTS INTERNATIONAL COOPERATION

Mr. PROXMIRE. Mr. President, the Genocide Convention would make the

destruction, in whole or in part, of a national, racial, religious, or ethnic group, a crime under international law. Human rights is a topic of great concern to each and every Senator, and President Carter has chosen to make the human rights issue a major concern of his administration.

From time to time in the past, issues of such great importance have arisen that nations have joined together under treaty to deal with them. In 1884, there was an international agreement calling for the protection of submarine cables. In 1911, the United States was a party to a treaty calling for the preservation and protection of fur seals in the North Pacific. This country has also joined in international treaties seeking to stifle drug abuse and to abolish the slave trade.

Surely, an international agreement which seeks to protect the most basic of all human rights, the right to live, merits the participation of the United States. Genocide is certainly abhorrent to everything for which the United States stands. President Truman welcomed the opportunity of associating the United States with the Genocide Convention. He signed the treaty in 1948. The Senate, however, has yet to vote on the Genocide Convention. In my view, this is a very serious oversight on the part of this body.

Genocide certainly is a serious international concern. Dean Rusk, who spoke in favor of ratification of the Convention in 1950, pointed out that "crimes like genocide so inflame the international situation as to bring us to the brink of war and are real threats to the peace." I feel strongly that ratification of the Genocide Convention is long overdue. I call upon the Senate to ratify the Genocide Convention as soon as possible.

WINNER OF THE GOLDEN FLEECE OF THE MONTH AWARD FOR MARCH: THE SENATE

Mr. PROXMIRE. Mr. President, today I am awarding the "Golden Fleece of the Month" award for March to the Senate for planning to spend over $122 million of the taxpayers' money on a new Senate office building that would make a Persian prince green with envy. It would include such frivolous frills as a rooftop dining room and a third gymnasium. The cost to the taxpayer is 2½ times the original estimate, or a cost overrun of 154 percent.

This is a building that was supposed to be completed last May, and then it was supposed to be completed in January of this year. Now it is scheduled for 1981. With every month that passes we have thousands and thousands of dollars of escalation in costs. It is a building that, as I say, has gone from about $48 million to $122 million. The irony is that the contract provided to the Senate has no penalty at all for increased costs, because the builder gets 6 percent of the total cost. Now a $50 million building would give him a $3 million profit. A $122,000,000 building gives him a $7.2 million profit.

Like Topsy—and the C5A—it "just growed and growed and growed". And it has not stopped rising.

I give this award every month for the biggest, most ridiculous or most ironic example of waste of the taxpayers' money.

In 1972 to get a foot in the door a proposal for a new Senate office building was presented to the Senate with a projected cost of $47,925,000. Later the scope of the building was broadened considerably, requiring a supplemental appropriation of $20,900,000. In 1975 the total cost figure rose to $85,147,000, and now with another pending appropriation request that total would rise to an astronomical $122,647,000—with still more to come.

The Architect of the Capitol under the direction of the Senate Office Building Commission is charged with carrying out the plans for the office building.

The reasons for the king-sized overrun are several: built-in incentives to spend, delays coupled with rising costs, and the addition of unnecessary luxury features.

Considerable savings might have been made if construction contracts had included clauses to provide incentives for contractors to make every possible savings. Instead, the contracts awarded by the Senate include a built-in incentive to spend since they provide a flat 6-percent fee for the project. This means no penalties for cost increases. To illustrate, if the fees cover the entire building cost, they would be $3 million if the building cost $50 million. But as the building has increased in cost to over $100 million the fees would go up past $6 million. The Senate contract means that any changes or goldplating the Senate provides or the more inefficient or costly the plans are, the more everybody cleans up—except the taxpayer, of course.

With inflation rates running high, each month's delay costs hundreds of thousands of dollars in escalation costs alone. And there have been many months of delay. Completion of the project was originally forecast for May of 1977, was later set for January 1978, and is now expected to be June 1981, but do not count on it. An inordinate amount of time has been taken on preparation of drawings and specifications, on review of same and on letting bids and awarding contracts. As a result, a big hole, half a city block long, has sat waiting for a superstructure for 10 costly months.

The addition of certain luxury features shows an arrogance on the part of the Senate that should make taxpayers livid with anger. For example:

A Senators-only dining room with a rooftop view of Washington. This third dining room is unnecessary; the two we already have are more than enough.

A physical fitness center with a convertible basketball/handball/tennis court. The Senate already has a gym in the Russell Building and a rarely used gym in the Dirksen Building. This would be the third gym. Consider that the average American, whose tax dollars would pay for this luxury, has no access to such facilities. If Senators want to stay in shape, why should not they pay for a membership in a health club, or—better yet—run to work?

Excessive landscaping and artwork.

Use of marble and bronze throughout the building where other, less expensive materials would do.

Wood paneling for Senators' offices. (This item alone costs $1.5 million.)

Elimination of such "goldplating," along with other suggestions which I have made to the Commission, could result in a saving of as much as $9 million.

Ironically, the new office building is to be named for the late Senator Philip A. Hart—of all Senators the most averse to pomp or show.

In fairness the architect does deserve credit for increasing the amount of usable office space and for instituting energy saving design.

But it is interesting to compare the record of the Hart Building to that of the new Air and Space Museum on the Mall, which was completed before its deadline, had no cost overrun and included four additional major features within the original cost estimate.

Fortunately, it is not too late to cut back on some costs. The examples of goldplating which I have mentioned can be eliminated from the plans. Senator DOMENICI has demanded, and the Senate Office Building Commission has approved, a GAO study of the project and a moratorium on further funding until all possible savings have been made.

The Architect has requested a more than $37 million supplemental appropriation to bring the total cost to over $122 million, and I will work as a member of the Appropriations Committee to stop all of that supplemental.

The Senate must make painful and unpopular decisions to turn down some highly appealing requests for spending. How can a Senate which has squandered tens of millions of dollars on its own comfort find the courage to say no to whatever requests are made on behalf of the elderly for social security increases, farmers for higher price supports, the poor for more welfare, New York City for more help?

This Senate fleece must stop.

Mr. President, I think that on this one the Senate is way out front in winning the golden fleece award for the month of March.

RECESS UNTIL TOMORROW AT 9 A.M.

Mr. SARBANES. Mr. President, there being no further business to come before the Senate, I move the Senate stand in recess in executive session until the hour of 9 a.m. tomorrow, in accordance with the order previously entered into.

The motion was agreed to; and at 5:55 p.m. the Senate, in executive session, recessed until Thursday, March 16, 1978, at 9 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 15, 1978:

DEPARTMENT OF THE TREASURY

Evelyn T. Davidson, of Colorado, to be Superintendent of the Mint of the United States at Denver.

Manuel A. Sanchez, Jr., of New York, to be Superintendent of the U.S. Assay Office at New York, N.Y.

Shallie M. Bey, Jr., of New Jersey, to be Superintendent of the Mint of the United States at Philadelphia.

The above nominations were approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066 in grade as follows:

To be lieutenant general

Maj. Gen. Thomas Patten Stafford, [redacted], U.S. Air Force.

The following officers for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of chapter 837, title 10, United States Code:

To be major general

Brig. Gen. Thomas A. Diab, [redacted], Air Force Reserve.

Brig. Gen. Edward Dillon, [redacted], Air Force Reserve.

Brig. Gen. Rex A. Hadley, [redacted], Air Force Reserve.

Brig. Gen. John E. Lacy, [redacted], Air Force Reserve.

Brig. Gen. Robert M. Martin, Jr., [redacted], Air Force Reserve.

Brig. Gen. David L. Stanford, [redacted], Air Force Reserve.

Brig. Gen. Thoralf T. Thielen, [redacted] Air Force Reserve.

To be brigadier general

Col. William A. Anders, [redacted], Air Force Reserve.

Col. S. T. Ayers, [redacted], Air Force Reserve.

Col. Robert V. Clements, [redacted], Air Force Reserve.

Col. James J. Feeney, [redacted], Air Force Reserve.

Col. Donald M. Jenkins, [redacted], Air Force Reserve.

Col. Charles E. Jones III, [redacted], Air Force Reserve.

Col. Paul W. Kadlec, [redacted], Air Force Reserve.

Col. Donald A. McGann, [redacted], Air Force Reserve.

Col. Donald T. Schweitzer, [redacted], Air Force Reserve.

Col. James W. Taylor, [redacted], Air Force Reserve.

Col. Richard A. Wegner, [redacted], Air Force Reserve.

IN THE NAVY

Vice Adm. Howard E. Greer, U.S. Navy (age 56), for appointment to the grade of vice admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

The following-named officer, having been designated for commands and other duties of great importance and responsibility in the grade of vice admiral within the contemplation of title 10, United States Code, section 5231, for appointment while so serving as follows:

To be vice admiral

Rear Adm. Kinnaird R. McKee, U.S. Navy.

The following-named captains of the Navy for temporary promotion to the grade of rear admiral in the staff corps indicated subject to qualification therefor as provided by law:

MEDICAL CORPS

Melvin Museles, John R. Lukas, Stephen Barchet.

SUPPLY CORPS

William J. Ryan, Andrew A. Giordano, Joseph L. Flores.

CIVIL ENGINEER CORPS

Paul R. Gates.

DENTAL CORPS

John B. Holmes.

IN THE MARINE CORPS

Gen. Samuel Jaskilka, U.S. Marine Corps (age 58), for appointment to the grade of general on the retired list, upon his retirement on 1 July 1978.

Lt. Gen. Joseph C. Fegan, Jr., U.S. Marine Corps (age 57), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

The following named brigadier general of the Marine Corps Reserve for permanent appointment to the grade of major general under the provisions of title 10, United States Code, section 5902:

Jack M. Frisbie.

The following named officers of the Marine Corps Reserve for permanent appointment to the grade of brigadier general under the provisions of title 10 United States Code, section 5902:

William C. Groeniger III, Joseph L. Tiago, Jr.

IN THE AIR FORCE

Air Force nominations beginning Bryan Aleksich, to be colonel, and ending John T. Jordan, to be colonel, which nominations were received by the Senate on February 13, 1978, and appeared in the CONGRESSIONAL RECORD on February 20, 1978.

IN THE ARMY

Army nominations beginning Albert A. Ackerman, to be colonel, and ending Jeanne L. Supplee, to be colonel, which nominations were received by the Senate on February 13, 1978, and appeared in the CONGRESSIONAL RECORD on February 20, 1978.

Army nominations beginning Charles S. Horn, to be colonel, and ending Christopher L. Young, to be first lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on February 28, 1978.

IN THE NAVY

Navy nominations beginning Mark A. Battle, to be ensign, and ending William M. Calhoun, to be a lieutenant commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on February 28, 1978.

IN THE MARINE CORPS

Marine Corps nominations beginning Gregory E. Andrews, to be second lieutenant, and ending George W. Watson, Jr., to be second lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on February 28, 1978.

HOUSE OF REPRESENTATIVES—*Wednesday, March 15, 1978*

The House met at 1 o'clock p.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Do your best to present yourself to God as one approved, a workman who has no need to be ashamed, rightly handling the word of truth.—II Timothy 2: 15.

O Lord, our God, who hast brought us through the darkness of night to the light of the morning, we turn from the haste and hurry of the world to open our hearts to Thy quiet presence and to renew our faith to serve Thee and our country with all our being. May Thy spirit be born anew in all our lives that we may face the tasks of this new day with the glory of Thy guidance, the gladness of Thy service, and the genuineness of our faith in Thee and our country.

As the leaders of our Nation keep our minds clean, our hearts pure, our spirits courageous, and our endeavors dedicated to the highest and best we know. In our dealings with other nations may we be just and fair seeking always to work in the ways of truth and love for the benefit of all mankind. Amen.

CALL OF THE HOUSE

Mr. BAUMAN. Mr. Speaker, under rule I, clause 1, of the rules of the House, I make the point of order that a quorum is not present.

Mr. DANIELSON. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 149]

Addabbo	Dent	Metcalfe
Anderson, Ill.	Dingell	Mikva
Andrews, N.C.	Drinan	Murphy, N.Y.
Archer	Duncan, Oreg.	Patterson
Armstrong	Eckhardt	Pike
Ashley	Evans, Ga.	Rahall
Bolling	Foley	Robinson
Brodhead	Forsythe	Santini
Brown, Calif.	Frenzel	Scheuer
Buchanan	Guyer	Shuster
Cavanaugh	Harsha	Teague
Cederberg	Heckler	Thornton
Chappell	Hefner	Tucker
Chisholm	Krueger	Udall
Clay	Lederer	Ullman
Collins, Ill.	Leggett	Waggonner
Conyers	McKinney	Waxman
Corman	Maguire	Wilson, Tex.
D'Amours	Mann	Wolff
Daniel, Dan	Mathis	Young, Tex.
Davis	Meeds	

The SPEAKER. On this rollcall 372 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

Mr. ASHBROOK. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

The question is on the approval of the Journal.

The question was taken; and on a division (demanded by Mr. ASHBROOK) there were—ayes 137, noes 4.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 387, nays 15, not voting 32, as follows:

[Roll No. 150]

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills and a joint resolution of the House of the following titles:

H.R. 1432. An act for the relief of Mrs. Desolina Sciulli;

H.R. 1939. An act for the relief of Meda Abilay Florin;

H.R. 2761. An act for the relief of Su-Hwan Choe;

H.R. 3081. An act for the relief of Mrs. Chong Sun Yi Rauch;

H.R. 4401. An act for the relief of Kwi Sok Buckingham (nee Kim);

H.R. 6975. An act to amend title 5, United States Code, to provide that hearing examiners shall be known as administrative law judges, and to increase the number of such positions which the Civil Service Commission may establish and place at GS–16 of the General Schedule; and

H.J. Res. 715. Joint resolution proclaiming May 3, 1978, "Sun Day".

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 1552. An act for the relief of Oh Soon Yi.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 219. An act for the relief of Samy Ennabe;

S. 222. An act for the relief of Dr. Nazeeh A. L. Abdul-Hadi;

S. 337. An act for the relief of Miriama Jones;

S. 391. An act for the relief of Brigitte Marie Harwood;

S. 511. An act for the relief of Tin Foo Chan (also known as Michael Chan);

S. 513. An act for the relief of Denno Chung-Sang Li, Nicholas Lit-Yung Lam, and Augustine Ka-Cheung Wu;

S. 958. An act for the relief of Ernesto Garcia, Jr.;

S. 1079. An act for the relief of Russell Warren Howe;

S. 1135. An act for the relief of Young-soon Choi;

S. 1335. An act for the relief of Shin Myong Yo Purdom, also known as Myong Yo Sin;

S. 1399. An act for the relief of Kwan Do Sun;

S. 1418. An act for the relief of Sang Soo Lee;

S. 1639. An act for the relief of Shenn-Song Theresa Lee; and

S. 1933. An act for the relief of Anwar.

REQUEST FOR PERMISSION FOR COMMITTEE ON HOUSE ADMINISTRATION TO FILE PRIVILEGED REPORTS

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that the Committee on House Administration have until midnight tonight to file certain privileged reports on funding resolutions that were considered by the Committee on House Administration this morning.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

Mr. BAUMAN. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

REPORT ON RESOLUTION EXTENDING PERIOD DURING WHICH PAYMENTS MAY BE MADE FROM CONTINGENT FUNDS OF THE HOUSE OF REPRESENTATIVES PURSUANT TO PROVISIONS OF HOUSE RESOLUTION 879

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–959) on the resolution (H. Res. 1070) extending to the close of April 30, 1978, the period during which payments may be made from the contingent fund of the House of Representatives, in accordance with the provisions of House Resolution 879, to any standing committee or select committee referred to in the first section or section 2 of House Resolution 879, which was referred to the House Calendar and ordered to be printed.

EXPLANATION OF HOUSE RESOLUTION 1070

(Mr. THOMPSON asked and was given permission to address the House for 1 minute.)

Mr. THOMPSON. Mr. Speaker, House Resolution 1070 extends the continuing resolution previously adopted by the House. That resolution (H. Res. 879) provided interim funding for standing and select committees until March 31.

PARLIAMENTARY INQUIRY

Mr. BAUMAN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BAUMAN. Does not the gentleman have to ask permission to call this up?

Mr. THOMPSON. If the gentleman will yield, I am not calling it up.

The SPEAKER. The gentleman is recognized for 1 minute.

COMMITTEE FUNDING RESOLUTIONS

Mr. THOMPSON. Despite the best efforts of the Committee on House Administration, 11 funding resolutions have yet to be considered by the House. If we recess next Wednesday before consideration of these 11 resolutions, the legislative and oversight activities would be jeopardized. This resolution simply gives the House an additional month to consider the resolutions. Twice, by unanimous consent, the Committee on House Administration has approved this resolution.

QUICK ACTION IS NEEDED ON DEFERRED COMPENSATION LEGISLATION

(Mr. FUQUA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FUQUA. Mr. Speaker, recent action by the Internal Revenue Service threatens to jeopardize plans Florida and many other States have been developing to assist State, county, and municipal employees to better provide for their retirement.

Relying on an existing IRS ruling, the Florida Legislature, in 1976, passed a law calling for the creation of a deferred compensation plan. Under this plan, State employees would be permitted to make voluntary contributions to a fund for their retirement. This program would not interfere with any other employee retirement plan and no State or Federal tax dollars would be involved. Counties and municipalities were permitted, under provisions of the law, to establish similar programs. One stipulation was that the IRS must agree not to tax the contributions until received by the employee in retirement.

The State treasurer of Florida, and a former colleague of ours in the House of Representatives, Bill Gunter, initiated development of such a plan. Prior to implementation, however, the IRS stated its intention to tax such programs at the time the money is paid into the fund by the employee rather than when actually received.

This IRS position is irresponsible and would deny these public servants the opportunity to provide for their retirement in a way not available through present retirement programs. The costs to the employees could potentially reach into the billions of dollars and such IRS action is very demoralizing.

Deferred compensation programs encourage State employees to continue in public service and also provide benefits to the general public not generally recognized.

The time to act is now and I believe Congress has a duty to take affirmative action on the matter. What we need is swift enactment of the deferred compensation legislation that will insure that the IRS lives up to its commitment not to tax these voluntary contributions until such time as the money is actually received by the employee.

"GUINNESS BOOK OF WORLD RECORDS" AND THE HONORABLE WILLIAM H. NATCHER OF KENTUCKY

(Mr. RICHMOND asked and was given permission to address the House for 1 minute.)

Mr. RICHMOND. Mr. Speaker, Representative WILLIAM H. NATCHER has never missed a vote or a day since he has been a Member of Congress. He was elected a Member of Congress in a special election on August 1, 1953, and since the Congress was in adjournment at that time, he was not sworn in as a Member until January 6, 1954. From January 6, 1954 up to and including March 14, 1978, there have been 6,210 rollcall votes. Representative NATCHER has answered every rollcall vote. In addition to the rollcall votes, BILL NATCHER has answered 3,658 quorum calls. When you add the quorum calls together with the rollcall votes, you have a grand total of 9,868 votes. During the 95th Congress, which is the Congress that we are now serving in, there have been 826 rollcall votes and 104 quorum calls. Representative NATCHER has answered every one.

According to the information submitted to me, other than Representative NATCHER, no Member since the beginning of the U.S. Congress on March 4, 1789, up to the present time has ever served in the House of Representatives or in the Senate for 17 consecutive years or longer from the time of their swearing-in without missing one or more votes. NATCHER has completed 24 years and is on his 25th year.

Representative NATCHER knows full well that this is not the sole criteria for a Member of Congress, but he believes that every Member should stand up and be counted. At the close of 10 years of NATCHER'S service, Ralph Roberts, the Clerk of the House of Representatives directed a letter to him setting forth the fact that after a careful check of his voting record from the day he was sworn in on January 6, 1954 and for the following 10-year period, he had not missed a vote. Every year hereafter, the Clerk of the House has directed a letter to NATCHER setting forth the fact that for that particular year just completed, he has never missed a vote. In other words, Mr. Speaker, NATCHER'S record has been certified down through the years by the Clerk of the House of Representatives.

Mr. Speaker, The "Guinness Book of World Records" has been published for many, many years. In this country, starting with the year 1956, by agreement with Guinness Superlatives, Ltd., of 2 Cecil Court, London Road, Enfield, Middlesex, England, the American edition of "Guinness Book of World Records" has been published and distributed. As far as our country is concerned, the 1978 edition of "Guinness Book of World Records" is the 16th American edition. The 16th edition has been brought up to date and this book of world records is recognized as the alltime authority on human achievement and it contains the most amazing records from every corner of the globe.

Mr. Speaker, it is a privilege and an honor for me to advise the Members of the House of Representatives that the voting record achieved by our friend and colleague, BILL NATCHER, has been cited in the 1978 edition of "The Guinness Book of World Records."

Mr. Speaker, I will take just a minute to read that citation:

Attendance Record.—U.S. Congressman William H. Natcher, a Democrat from Bowling Green, Kentucky, served more than 20 years (1954–1975) without missing a single call or vote (3,353 quorum calls and 4,723 roll-call votes).

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. RICHMOND. I yield to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Speaker, I would like, as a member of the Kentucky delegation, to thank the gentleman from New York for his awareness of the gentleman here from Kentucky (Mr. NATCHER) who has been such an important person to our delegation.

It is very hard to speak about BILL except in superlatives. I would like to say the one thing that makes it a problem is the difficulty of following in those kinds of footsteps. He is a very tough act and it is a very tough act to follow.

I join the gentleman from New York in commending the gentleman from Kentucky (Mr. NATCHER) today.

Mr. RICHMOND. I thank the gentleman from Kentucky (Mr. MAZZOLI).

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 7700, ESTABLISHING CONGRESSIONAL REVIEW OF POSTAL RATE DECISIONS, INCREASING CONGRESSIONAL OVERSIGHT, ABOLISHING BOARD OF GOVERNORS OF U.S. POSTAL SERVICE

Mr. DELANEY, from the Committee on Rules, submitted a privileged report (Rept. No. 95–960) on the resolution (H. Res. 1078) providing for consideration of H.R. 7700 to amend title 39, United States Code, to establish congressional review of postal rate decisions, to increase congressional oversight of the U.S. Postal Service, to abolish the Board of Governors of the U.S. Postal Service, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PROPOSED AMENDMENT BY THE GENTLEMAN FROM OHIO, MR. ASHBROOK, WOULD GIVE 2 ADDITIONAL YEARS IN WHICH TO BALANCE THE BUDGET

(Mr. JOHN L. BURTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHN L. BURTON. Mr. Speaker and Members, sometime later today we will be voting on the amendment offered by my distinguished friend, the gentleman from Ohio (Mr. ASHBROOK), that our Nation have a balanced budget by the year 1983. I would consider this a retreat. I am a little chagrined about it since our President has promised to balance the budget by 1981. I wonder why the gentleman from Ohio (Mr. ASHBROOK) wants to give the President 2 additional years in which to do this. I do not know what has happened to the gentleman from Ohio (Mr. ASHBROOK) that would make him do this where he wants to assist the President on his proposed balanced budget.

Mr. ASHBROOK. Mr. Speaker, if the gentleman would yield, I would say to my friend, the gentleman from California (Mr. JOHN L. BURTON), that the President's position is not my position. I am just trying to help him out in a more realistic way. As Mr. Carter said, "Trust me."

Mr. JOHN L. BURTON. I am sure the gentleman is trying to help him out.

CONGRATULATIONS TO REPRESENTATIVE NATCHER

(Mrs. FENWICK asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. FENWICK. Mr. Speaker, I would like to identify myself with the remarks of my colleague the gentleman from New York (Mr. RICHMOND) with reference to the distinguished gentleman from Kentucky (Mr. NATCHER). He is indeed an example to all of us.

I would also wish to identify myself with the remarks of my colleague who just preceded me here in the well, the gentleman from California (Mr. BADHAM). He has spoken to an issue which is certainly a serious matter to all of us. I have always been in favor of public financing of campaigns. I hope very much the action of the majority will make it possible for me to vote for it.

But, Mr. Speaker, I would like to address further the Members of the House on the subject of two brilliant women from Northern Ireland. We must never forget what the former Prime Minister, Mr. Cosgrave, and the present Prime Minister, Mr. Lynch, have said, when they reminded us of our duty as citizens of America and living with others in the world. We must move toward peace, and these two women have shown the way, Catholic and Protestant, natives of Northern Ireland. They received the Nobel Prize, and they richly deserve it. This is something that should be of concern of all. We must not involve ourselves in fomenting and encouraging hatred and disorder and fratricidal strife in Northern Ireland. It is a tragic situation. We should be concerned about the Irish, not only because so many of us have Irish blood. We know where our duty and commonsense and human decency lie. It is not in encouraging violence in that strife-torn and tragic country.

KENTUCKY SENATE RESCINDS APPROVAL OF EQUAL RIGHTS AMENDMENT

(Mr. BUTLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUTLER. Mr. Speaker, during consideration of the District of Columbia full representation constitutional amendment resolution, the gentleman from Kentucky (Mr. HUBBARD) announced his view and prediction that Kentucky would quickly ratify full representation for the District of Columbia. In support of his view he pointed out that Kentucky had already ratified the equal rights amendment.

I note with interest that yesterday the Senate of Kentucky overwhelmingly voted to rescind its approval of the equal rights amendment. I hope the gentleman from Kentucky (Mr. HUBBARD) will take time on tomorrow to advise the House as to whether he has altered his view as to the possibility of ratification of the District of Columbia full representation bill, in view of the action of the Kentucky Legislature on yesterday.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

Mr. HAWKINS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 50) a bill to establish and translate into practical reality the right of all adult Americans able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to combine full employment, production, and purchasing power goals with proper attention to balanced growth and national priorities; to mandate such national economic policies and programs as are necessary to achieve full employment, production, and purchasing power; to restrain inflation; and to provide explicit machinery for the development and implementation of such economic policies and programs.

The SPEAKER pro tempore (Mr. WRIGHT). The question is on the motion offered by the gentleman from California (Mr. HAWKINS).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 380, nays 19, answered "present" 2, not voting 33, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 50, with Mr. NATCHER (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee rose on Thursday, March 9, 1978, section 2 of title I had been considered as having been read and open for amendment at any point. Pending were amendments en bloc offered by the gentleman from Ohio (Mr. ASHBROOK).

AMENDMENTS OFFERED BY MR. BAUCUS AS A SUBSTITUTE FOR THE AMENDMENTS OFFERED BY MR. ASHBROOK

Mr. BAUCUS. Mr. Chairman, I offer amendments as a substitute for the amendments.

The Clerk read as follows:

Amendments offered by Mr. BAUCUS as a substitute for the amendments offered by Mr. ASHBROOK:

Page 60, after line 14, insert the following new subsection:

(e) The Congress further finds and declares that high unemployment and high inflation have been accompanied by large deficits in the Federal budget and that the achievement of full employment is essential to the achievement of a balanced Federal budget.

Page 63, after line 19, insert the following new subsection:

"(g) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to achieve a balanced budget consistent with the achievement of the unemployment goal specified in section 4.".

Mr. BAUCUS. Mr. Chairman, we are presently considering legislation that will establish full employment as a national priority.

The employment engine fashioned by this bill is directed toward a noble goal—meaningful work for Americans. But we must be sure that this engine is equipped with a brake which can be engaged once the full employment machine is in full force. Otherwise, the Government will continue massive deficit spending and potentially inflationary programs.

Mr. Chairman, the amendment that I am offering, along with the gentleman from South Carolina (Mr. DERRICK), provides that one of the purposes of this act is to achieve a balanced budget consistent with the achievement of the unemployment goals enumerated in the bill.

Mr. Chairman, let me supply my reasons for offering this amendment. To begin with, our national economy still suffers from the 1975 recession. Business confidence and capital investment remain at low levels. While recent statistics indicate some improvement, the picture remains anything but bright. Unemployment is still too high, and inflation is beginning to creep up once again. Finally, our balance of payments deficit, prompted by unparalleled foreign imports, is eroding the dollar in international money markets to the point where OPEC threatens to raise crude oil prices in the months ahead.

Mr. Chairman, our first priority in the current situation is to get people back to work. We must do this without driving up the inflation rate and further eroding the value of the dollar. This does not mean, however, that we should ignore the level of the Federal debt. During the first 190 years of our Nation, the Federal debt rose to roughly $300 billion. In the past decade, that figure has more than doubled—with current estimates calling for a debt of about $700 billion by the end of the current fiscal year.

While it is true that the debt is increasing as a percentage of our gross national product, I do not find that comforting. I would be encouraged by our increased potential to repay the debt if we consistently exercised that potential. Unfortunately, we have not.

In future years we will have many opportunities to reduce the debt of today. No one doubts that our unemployment rate will ultimately drop to much lower levels than we are facing at this time, and when that occurs we should be ready to reduce the debt through a surplus budget. If we were to leave our fiscal structure as it is today, a surplus would automatically occur as the economy returns to full employment—at least, that is the conventional, theoretical wisdom in supporting the full employment budget concept. As unemployment recedes, incomes, profits and tax revenues rise while unemployment-related expenditures fall.

I would be a more devout believer in the full employment concept if I were sure that we would have surpluses when the economy returns to low levels of unemployment. Unfortunately, history has demonstrated that surpluses do not "automatically" occur during periods of full employment.

Indeed, Mr. Chairman, in the past 25 years—the most prosperous quarter century in our Nation's history—unemployment has been less than 4 percent in 7 years. Yet, the budget has been in surplus in only 2 of those 7 years. During the period 1966–69, unemployment was at or below 4 percent, but the budget was in deficit 3 of 4 years, for a cumulative total of $13 billion. Had the fiscal structure remained unaltered, the budget would have been in surplus. Instead, Federal spending went up by 51 percent while revenues increased by only 33 percent. This occurred primarily in two areas: The Vietnam war effort, where national defense went up 63 percent, and human resources, where income security went up by 47 percent; education, manpower, and social services went up by more than 200 percent. Given increases in the debt during this period, spending also increased in a third area, with interest on the national debt rising more than 35 percent.

Had there been a check on Federal spending during that period—for example, by providing as Mr. DERRICK and I do in our amendment, that the budget be in surplus in times of low unemployment—the public debt would be nearly $50 billion lower, and perhaps we would not be suffering the inflation we have at this time.

It is this last problem, inflation, which concerns me most deeply. Overspending in the late 1960's caused higher rates of inflation during the early 1970's.

The CHAIRMAN. The time of the gentleman from Montana has expired.

(By unanimous consent Mr. BAUCUS was allowed to proceed for 2 additional minutes.)

Mr. BAUCUS. Recently, the OPEC oil price increases have pushed inflation to double digit rates. Although inflation has been dampened somewhat by the recent recession, it still continues at a relatively high level. Prices are currently rising at about 10 percent annually. Most economists agree that this rate will continue, and if our Nation attains full employment by the early 1980's, we are likely to find high inflation, particularly if we continue budget deficits.

To deal with these problems, the amendment Mr. DERRICK and I are offering will require that one of the purposes of H.R. 50 is the attainment of a balanced budget consistent with the unemployment goals set forth in this bill, which I think will help us during periods of prosperity.

Granted, our amendment does not insure and does not guarantee a balanced budget in times of full employment. Unemployment projections can be hedged, and Congress can always increase a President's budget request. But, our amendment would be an important first step toward fiscal responsibility. The adoption of our amendment will show that, in considering the Humphrey-Hawkins bill, we are looking beyond an

immediate crisis; we are developing a systematic process for dealing with a recurrent problem when times of prosperity are, hopefully, reached.

Mr. Chairman, I very strongly urge the adoption of our substitute amendment as a means to begin to restore some sanity in our fiscal posture.

AMENDMENTS OFFERED BY MR. ASHBROOK TO THE AMENDMENTS OFFERED BY MR. BAUCUS AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer amendments to the amendments offered as a substitute for the amendments.

The Clerk read as follows:

Amendments offered by Mr. ASHBROOK to the amendments offered by Mr. BAUCUS as a substitute for the amendments offered by Mr. ASHBROOK: Amend the substitute to the Ashbrook amendment by inserting at the end thereof the following:

The new section 4 of the Employment Act of 1946, as revised by the Jeffords amendment to section 104 of the bill, is amended as follows: (1) The first sentence of section 4(a)(2)(A) is amended by inserting before the period at the end thereof ", the interim numerical goal of balancing the Federal budget and (2) section 4(b)(1) is amended by inserting before the period at the end thereof ", maintaining a balanced Federal budget,"

Page 69, immediately after line 10, insert the following new subsection:

"(c) In choosing means to achieve the goal of unemployment the President shall first recommend those policies and programs designed to achieve a balancing of the Federal budget within five years after the date of enactment of the Full Employment and Balanced Growth Act of 1978."

Mr. ASHBROOK. Mr. Chairman, it is often said, and I am afraid with some degree of accuracy, that what we do here best is to engage in playing games. An amendment has been offered in the nature of a substitute for my amendment, which was pending when the Committee rose last week. It is a real hooker. My amendment really put deficit spending onto the level of importance that it deserves—and I might add, the importance Members of this body give balanced budgets when they are talking to the home folk.

Let us be honest about what is happening here. There is an effort by the gentleman from Montana (Mr. BAUCUS) to downgrade that importance, and this superfluous amendment is just barely one step ahead of putting a one-line recommendation in the report. We have often heard of the gift for the man or woman who has everything. I think it is fair to say this amendment is in effect a gift for the Member of Congress who wants to talk about deficits but not really do anything about deficits.

In effect what we would be telling the President of the United States is: "Mr. President, pursue goals one and two, and, by the way, while you are at it, give a little thought every now and then to deficit spending." What my colleagues and friends the gentleman from Montana (Mr. BAUCUS) and the gentlemen from South Carolina (Mr. DERRICK) want to do, and let us be honest about it, is to take the important issue of deficit spending and put it on a far depreciated level as far as importance and goals and targets are concerned—in effect pigeonhole it.

I think my original amendment made far more sense and I am offering this amendment at least to bring back up part way to the level that we would have had in my original amendment the importance of deficit spending.

I would remind the Members that if the Baucus-Derrick amendment is passed, we are only putting deficit spending on a policy level. None of the operative provisions of the Humphrey-Hawkins bill H.R. 50 would really mandate more than a mere policy concern over deficit spending. Nothing substantive, just a bit of wishful thinking.

I want to put it back in the operative sections. Otherwise we are doing one thing—and we know it—we are whistling in the dark.

For those who are not serious about deficit spending, for those who did not trust the President when he said he could bring about deficit spending by 1981—and as my colleague, the gentleman from California (Mr. JOHN L. BURTON), said in the 1-minute speech, I am giving 2 more years, until 1983—for any who do not believe that we should curb deficit spending, then I say vote down my amendment.

We must put deficit spending in the specific goals of H.R. 50. Unemployment, inflation, deficit spending—unless it is in there as a specific goal, if it is only going to be something that is a side issue or a line in a report or something that is in general posturing but no substance, then what we are doing is telling the American people that deficit spending is not even among our priority economic and fiscal goals in the Humphrey-Hawkins bill. So we are talking about something very substantive and I think the vote on this amendment will very clearly delineate those who are serious about deficit spending and those who want to talk about it but not really do anything substantive to bring it about in this country.

Mr. DERRICK. Mr. Chairman, I rise in opposition to the Ashbrook amendments.

Mr. Chairman, let me first state what our amendment does, and then explain why I consider it an improvement over the Ashbrook amendment. Our amendment states explicitly that it is the purpose of this act to achieve a balanced budget, and in that sense, it is no different from the Ashbrook amendment. I do not differ with that amendment in purpose—but I do differ with it in the technique for achieving it. The Ashbrook amendment commits us to specific goals and timetables for reaching that target and makes no allowance for the flexibility that is needed to achieve that goal and the other goals in the bill.

If there is one thing that I have learned as a member of the Budget Committee, it is that economics is not an exact science—our ability to achieve the appropriate balance between needed growth and needed budgetary goals is not subject to rigid long-term timetables. Policy choices are not made once and for all; they must be adapted to changing circumstances.

The amendment requiring a balanced budget overlooks the source of recent budget deficits. The large deficits of recent years are primarily the result of a severely unbalanced economy. High rates of unemployment of labor and underutilization of industrial capacity have depressed wages and profits and, thus, reduced the tax base for Federal revenues. High rates of unemployment increase expenditures for unemployment compensation, welfare, food stamps, and medicaid.

A House Budget Committee analysis done a few years ago, just as the economy was beginning to recover from the worst recession since the 1930's, indicated that attempts to balance the 1976 budget would not only have been self-defeating, but would also drive the unemployment rate up from the 8-percent level that prevailed to the range of 12 to 13 percent. Using our econometric models, we find that any attempt to balance the budget by cutting expenditures in fiscal year 1979 will also fail. Revenues would decline, causing a continued deficit, and unemployment would rise from the 5.9 percent projected for next year to nearly 8 percent.

The rising unemployment would cause further losses in revenue and unbalance the budget, even though sharp reductions in expenditures had been postulated under the model.

Budget balancing requires a healthy, vigorous economy. Rates of recovery from recession must be consistent with the twin goals of reduced unemployment and reduced inflation. Public policies that reduced the unemployment rate rapidly would probably require larger budget deficits in the near term and might make inflation worse. Public policies that focus only on reducing inflation may raise the unemployment rate, reducing revenues, and add to the deficit.

In essence our amendment recognizes the need for flexibility. It commits us to the goal of a balanced budget, but recognizes that this is a goal that must be achieved both in a time frame and with a method that is consistent with the achievement of full employment, which is the basic objective of this bill.

The fundamental objective of Humphrey-Hawkins is full employment and balanced growth. The committee report recognizes and I fully subscribe to the view that full employment is a necessary condition for achieving a balanced budget. My substitute, I believe, gives the appropriate recognition to both goals while not changing the basic emphasis of the bill.

The adoption of the Ashbrook amendment would tie the hands of the Budget Committee because it would prejudge the budgetary decisions that must be made in the next 4 years. I am a firm supporter of the need to achieve a balanced budget, but I still recognize that we cannot today chart the specific course by which we will reach that goal which has eluded us for so long. I believe that supporters of the budget process should support my substitute so that that process will remain a

meaningful method of making congressional budget policy.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I thank the gentleman for yielding. I want to compliment the gentleman from South Carolina and the gentleman from Montana for a meaningful amendment. I was going to vote against any balanced budget amendments, because they would throw the whole bill out of context; but these two gentlemen have very wisely conceived of an amendment which balances the budget.

The CHAIRMAN pro tempore. The time of gentleman from South Carolina has expired.

(At the request of Mr. MITCHELL of Maryland and by unanimous consent, Mr. DERRICK was allowed to proceed for 2 additional minutes.)

Mr. MITCHELL of Maryland. Mr. Chairman, if the gentleman will yield further, these gentlemen have managed to put together a meaningful amendment where all things are in place and we do not try for a balanced budget at the cost of not putting people to work. That is the first comment.

Second, I serve on the Budget Committee, as does the gentleman from South Carolina, and for the life of me I do not see how the Budget Committee could function under the Ashbrook amendment. It would be simply impossible to do so.

Mr. Chairman, I fully support the amendment offered by my distinguished colleagues and urge that we vote down the Ashbrook amendment and vote for the Derrick-Baucus amendment.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. DERRICK. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, the gentleman states that the gentleman is concerned because the Ashbrook amendment establishes specific goals and timetables. This resolution is full of those. It does allow a flexibility to the President to unbalance the budget if some of these other goals are not achievable; but the President himself stated all during the campaign in 1976 that he clearly thought that the target date of 1980 was very achievable, and he has not backed away from that very substantially, even in the budget concepts that he has sent up to our Budget Committee.

Now, the gentleman from Ohio has tried to give some flexibility by putting it just a couple years later.

I am absolutely appalled that my colleague, the gentleman from South Carolina, would say that somehow we cannot set this specific goal or target because it is too rigid. It is not rigid at all, and I am appalled.

Mr. DERRICK. Mr. Chairman, as the gentleman from California very well knows, every time the unemployment rate moves by 1 percentage point, it costs the Government somewhere in the neighborhood of $17 billion to $18 billion.

The CHAIRMAN pro tempore. The time of the gentleman from South Carolina has again expired.

(By unanimous consent, Mr. DERRICK was allowed to proceed for an additional 3 minutes.)

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, before the gentleman goes any further, I do not accept that wholly.

Mr. DERRICK. I am not finished.

Mr. ROUSSELOT. Because there are other things that can happen that show that does not necessarily happen. That, too, is not an absolute formula, as the gentleman knows, that is, that an increase in unemployment means that much reduction in revenue. There are other things that cause a reduction in revenue.

Mr. DERRICK. Mr. Chairman, as the gnetleman well knows, every time the employment rate increases 1 percentage point, the Government loses some $17 billion lost in revenue.

Mr. ROUSSELOT. Not necessarily.

Mr. DERRICK. Wait until I get through. It results in additional food stamps, additional compensation. If we take that 6.2-percent unemployment rate and come down to a 3-percent unemployment rate, all you have to do is bring that unemployment rate down to 3 percent and the budget is balanced. To say you can do it without also addressing the matter of unemployment is just a fallacy.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, I thought that is what this bill does is address the issue of unemployment.

Mr. DERRICK. That is right.

Mr. ROUSSELOT. Is the gentleman from South Carolina telling us that the goal set is meaningless?

Mr. DERRICK. The Ashbrook amendment does address the matter of unemployment. That is why I am including it in my amendment, so they can work hand in hand.

Mr. ROUSSELOT. The Ashbrook amendment becomes part of the total package then. If the gentleman is correct, if that is one of the goals set in the bill and if they are as terrific as we are told they are, the budget can be achieved, so I am in total disagreement with the gentleman that we cannot establish a balanced budget under this resolution which is going to take care of all these problems that we have been told. Have we not been told that?

Mr. DERRICK. The gentleman has been told we are going to achieve a balanced budget under the Baucus-Derrick amendment and I am giving the gentleman an opportunity to support it.

Mr. ROUSSELOT. Mr. Chairman, I do not think the amendment offered by the gentleman from Montana (Mr. BAUCUS) is as good as the one offered by the gentleman from Ohio (Mr. ASHBROOK). That is what I am saying.

Mr. DERRICK. It is obvious that is what the gentleman is saying.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the substitute amendments offered by the gentleman from Montana (Mr. BAUCUS) and cosponsored by the gentleman from South Carolina (Mr. DERRICK) and in opposition to the amendments offered by the gentleman from Ohio (Mr. ASHBROOK). I think that the gentleman from Montana and the gentleman from South Carolina are to be commended in what they are trying to do.

The gentlemen are trying to target in on arriving at a balanced budget, and they are putting it into this bill in such a way that it is set forth as a statement of purpose. I seems to me that if we were to follow the suggestion contained in the amendment offered by the gentleman from Ohio (Mr. ASHBROOK), it would make us too rigid in our actions.

I would like to say to the Members that no one would disagree with the gentleman from Ohio (Mr. ASHBROOK) if it were possible that we could today legislate a balanced budget. However, we have not been able to do that for years, whether the administration has been a Republican one or a Democratic one. The fact is that we have to target in on other aspects of the economy.

We have to do what must be done. We have to reduce unemployment, we have to keep inflation under control or eliminate it completely, we have to provide for a healthy rate of real growth in our economy. If we accomplish all these things and, hopefully, some others—for example, reducing our dependence on foreign oil, which would make a substantial contribution to the health of our economy—if we accomplish them, we will have an economy with a balanced budget. But we cannot have it otherwise.

We cannot legislate it, as we would be trying to do under the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

This legislation can set forth targets addressed to the very serious problem of unemployment in our economy. This legislation can set targets as to what the rate of inflation ought to be. We can try to develop a greater rate of productivity in our economy. We can and should try to accomplish all of the goals.

Once we do that, we will have a lower deficit, in 1981 or 1982, if our economy progresses satisfactorily. But we cannot bind this Congress or this Government so rigidly that that would be one of the specific goals and the objectives. The goals must be directed toward unemployment, inflation, and productivity, a healthy rate of growth in the economy—in short, all of the things that make a balanced budget possible.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I thank the gentleman for yielding.

Did I understand the gentleman to say that it is proper and that we should be setting targets for inflation, as well as setting other goals that should be reached?

Mr. GIAIMO. Yes, we should try to do so and must do so for the rate of inflation.

Mr. SARASIN. Mr. Chairman, would the gentleman have a target figure in mind over a 5-year period?

Mr. GIAIMO. Hopefully, I would like to see inflation down to zero.

Mr. SARASIN. And realistically, what would the gentleman set as a figure?

Mr. GIAIMO. Realistically, I would like to see it much less than 6 percent, and there is a very real concern at the present time that we can hold it to that.

Mr. SARASIN. Of course, the gentleman knows that we are probably going to be at 13 percent annually.

Mr. GIAIMO. I do not know that, and I submit that neither does the gentleman know that. However, I am concerned that at the present time the rate of inflation may go higher than 6 percent.

Mr. SARASIN. Would the gentleman support a figure of 3 percent if I would offer such an amendment?

Mr. GIAIMO. I would support a figure of 3 percent. I want to say this, however; at the time the Joint Economic Committee proposes its resolution under this bill, it would have to set a figure for inflation in its recommendations to the House.

The CHAIRMAN pro tempore. The time of the gentleman from Connecticut (Mr. GIAIMO) has expired.

(By unanimous consent, Mr. GIAIMO was allowed to proceed for 2 additional minutes.)

Mr. GIAIMO. Mr. Chairman, I will say to my friend, the gentleman from Connecticut (Mr. SARASIN), that it is very easy for us today to say, "Yes, it should be 3 percent," or, "No, it should not be 4 percent," and so forth. The point is that, at whatever point in time, a resolution is going to be submitted proposing goals and targets for the first 2 years of the 5-year period. At that time, as we address ourselves to the matters of unemployment, real growth, productivity, and so on, we will address inflation as well, and not in a vacuum. I am not certain today whether it should be 3 or 6 percent. Hopefully, it would be zero. But we must look at the particular circumstances of the time.

Mr. SARASIN. Mr. Chairman, does the gentleman argue against setting a numerical target as established in this bill?

Mr. GIAIMO. No.

Mr. SARASIN. Why not?

Mr. GIAIMO. I am saying that at the time we adopt the JEC resolution we will determine what the acceptable goal of unemployment will be and the acceptable goal for inflation as well. I am saying we should not, as the gentleman from Ohio would have us do now, say, "But in any event, we must have a balanced budget."

Mr. SARASIN. But this bill, if the gentleman will continue to yield, is establishing a numerical goal for unemployment, and as I understand the gentleman, and I agree with him, it is difficult to do that.

Mr. GIAIMO. It will provide for the establishment of a numerical goal for unemployment and a numerical goal for inflation.

Mr. SARASIN. We are not leaving the goal for unemployment up to the Joint Economic Committee, or any other committee.

We are saying now what the goal will be.

Mr. GIAIMO. The gentleman knows I am going to offer an amendment to title III which will provide for setting a numerical goal for inflation.

Mr. SARASIN. Of course, as the gentleman knows, I am going to support the amendment.

Mr. GIAIMO. Yes.

Mr. HAWKINS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the bill.

Mr. Chairman, the substitute amendment is simply a ploy to get us back to a single purpose, and that is a balanced budget, without any other thought. I think it should be thoroughly understood that I believe the sponsors of the substitute have never read the bill and do not understand it. They do not understand that the way to achieve a balanced budget—which I understand is the objective of the Baucus-Derrick amendment—is to use the programs and policies within the context of H.R. 50. I think those who oppose that are really opposed to full employment. They are saying, "We want to achieve a balanced budget, but we do not want to put people to work in order to do it. We want to cut out social programs. We want to reduce the Federal budget, regardless of what the needs may be. We would even go so far as to invade national defense in order to get that type of a balanced budget." That is the only way they could do it under the substitute. It is a clever way of saying, "We are against full employment," and that is all that it is.

I think the Members should understand that the Ashbrook substitute treats the balanced budget as a separate goal, without any reference to the other goals within the bill itself, and certainly without any reference to the goal of full employment. It should be understood, it seems to me, that the reason that we are in the present difficulties of rising deficits is that we have so decreased the revenues of this country through not putting people to work, not using factories and the equipment, not using our productive capacity.

That is the reason we have a deficit. In order to remove that problem and to get us back to a balanced budget, then it is necessary to put people to work; and that is what I understand the bill is all about, and that is what I think the Baucus-Derrick substitute amendment would do.

I think this was very well brought out, as I indicated the other night in a discussion with the gentleman from Ohio (Mr. ASHBROOK), in a colloquy on this floor, that even President Ford in 1976, in submitting his budget, made this very point when he said that if the economy were to be as fully employed in 1976 as it was in 1974—and that was when we had 5.6-percent unemployment—to continue, President Ford said that we would have had $40 billion in additional tax receipts, assuming no change in tax rates, and $12.7 billion less in aid to the unemployed. In other words, we would have had more than $52 billion at that time when we did not have 3-percent or 4-percent unemployment; we had 5.6-percent unemployment.

Consequently, if we were to reduce unemployment then to the 4-percent level, if we were to concentrate on the objectives of the act in terms of economic growth in order to put people to work and in order to use their productive capacity, we could then reduce the deficit and get a balanced budget.

That is what we, who favor a balanced budget, are attempting to do, but the opposition does not want to do that. They would like to concentrate on some tax ripoffs. They would like to concentrate on starving economic growth, as we did between 1970 and 1976. They would like to do it their way rather than do it in an integrated, comprehensive manner, as the bill proposes.

Mr. Chairman, we just cannot do it that way.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I appreciate the gentleman's yielding.

The point has been made several times on the floor of this Chamber that full employment would reduce the deficit. I want the gentleman to know that I am one member of the opposition who agrees with him. In fact, I think a majority of the Members on this side do agree that a full-employment, full-producing economy would reduce the deficit.

I think the question that this side of the aisle is raising is, How does anyone reduce the deficit if full employment is achieved simply in the public sector of the economy, which drains the private sector from the resources that it needs to achieve full production?

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. HAWKINS) has expired.

(On request of Mr. KEMP and by unanimous consent, Mr. HAWKINS was allowed to proceed for 2 additional minutes.)

Mr. KEMP. Mr. Chairman, will the gentleman yield further?

Mr. HAWKINS. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, my question to my friend, the gentleman from California (Mr. HAWKINS), is this: Does he suggest that lowering unemployment from 6 percent to 4 percent in the private sector is the same as lowering it in the public sector? Does he think the revenues would be the same?

Mr. HAWKINS. No. I have indicated to the gentleman and I have stated, and I think the bill itself emphasizes, that the jobs should be created in the private sector.

We have indicated—and the bill will bear me out—that it does contemplate the creation of the jobs in the private sector. As a matter of fact, this is consonant with the historical ratio of 1 out of 6 jobs, only 1 out of 6 being in the public sector, no more than that.

I think that is the way it was done last year when we had 4 million jobs created almost exclusively or, at least, let us say,

overwhelmingly in the private sector. That is what I believe in, and that, I think, is the only way of doing it. There is no thought at all in this bill that the budget is going to be balanced by having jobs created in the public sector.

Mr. KEMP. Mr. Chairman, if the gentleman will yield further, I have heard the gentleman say that many times; and I attest to his sincerity.

My only question to the author of this piece of legislation which is now in front of this body is: Will the gentleman give us some idea as to his strategy for expanding the use of the productive resources of the country and putting the Nation back to work in the private sector of the economy?

Mr. HAWKINS. We have stated once, twice, many times, as the gentleman knows, in his presence, that the bill contemplates the combination of fiscal and monetary policies with structural programs and that we could reasonably reduce unemployment by using fiscal and monetary policies, including a proper tax reduction program. I think the gentleman will agree with that, in part at least. Therefore, we need a good monetary policy which, obviously, would take the support of the Federal Reserve Board, and that would be combined with structural programs which would be targeted certainly to some special groups.

It is not the thought that those structural programs would be public jobs. We have countercyclical aid to States and local governments; we have public works; we have a lot of structural programs. The combination of these two can get us, I think, to a balanced budget.

Mr. SIMON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am concerned about the deficit. I had a meeting this morning in the office of the chairman of the Budget Committee (Mr. GIAIMO), where the two of us talked about the deficit. I am cosponsoring a constitutional amendment which our colleague from Indiana, Congressman ANDREW JACOBS, is the chief sponsor of, which says that unless there is a two-thirds majority of Congress to the contrary, we should have a balanced budget. I am concerned that in this next fiscal year we are going to spend $48 billion plus on interest, an increasing percentage of our tax dollars going for interest rather than for goods and services; and that is not a wise way to spend our money.

But, I oppose the Ashbrook amendment because not only does it have the rigidity that my colleagues have talked about, but it does one other thing—and I mention this now because I think this applies to other amendments that are coming before us—it skews the nature of the bill.

What we have is a full employment bill, and that is what we ought to be working on right now. If my colleague from Ohio comes in with a separate bill, with a sound plan for moving step-by-step for reduction of the deficit, I will be pleased to be a cosponsor of that bill. There are many good things that we ought to do, but which should not be part of this bill. I am for reconciling this balance of trade that faces this Nation; that should not be part of this bill. I am for eliminating the problem of crime; that should not be a part of this bill. I am for eliminating cancer; that should not be a part of this bill. There are all kinds of laudable things, but this bill, I fear, is moving toward becoming a Christmas tree, and we are putting all kinds of little goodies on it that should not be on it.

We have here a bill that is a sound bill, that moves us in the direction of employing the people of this Nation and letting them be productive. That is going to help solve the deficit and some of the other problems that we have. But, let us not make promises to people just on the basis of whim, without any hearings whatsoever, like the thing we did the other day on 100 percent of parity, which holds out false promises to the farmers of this Nation, and everyone on this floor knows that is precisely what it did. Let us be realistic. That is what our colleague from California (Mr. HAWKINS) is asking us to do, and I hope we shall do it.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I think that perhaps the cat is getting out of the bag, I say to my friend from Illinois. Our good friend from Maryland (Mr. MITCHELL) said that he would oppose all balanced budget amendments, but he can support this one.

My friend from Illinois just said that he does not really think the issue of deficit spending ought to be dealt with in this bill, but he will support the substitute anyway, so I think at least we are approaching some degree of honesty and are going to vote for an amendment that does not mean anything.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield, since the gentleman mentioned my name?

Mr. SIMON. I yield.

Mr. MITCHELL of Maryland. The gentleman evidently did not have his hearing aid tuned up. I said that it was my original intent to vote against any balanced budget amendments. However, the one that has been put together by my two distinguished colleagues on this side of the aisle has changed my mind because of the way it meshes with the bill. So, I hope that is very clear. I support the amendments.

Mr. ASHBROOK. I think my friend from Maryland makes it very clear, because if it really were an amendment to bring about a balanced budget I think the gentleman would oppose it—and that is an honorable position. I do not claim it is not, just that it should be understood that way.

Mr. MITCHELL of Maryland. If the gentleman will yield further, I want to make it clear that when the gentleman's amendment appeared on this bill as it was written, substitute or original, I would have voted against it because it has already been made clear that it would have been a bill to thrust in a new direction the full employment bill. I will say again, hoping that it will sink through this time, that we have managed on this side, through the gentleman from South Carolina and the gentleman from Montana, to come up with an amendment that meshes in with the concept of full employment and gives a balanced approach with full employment.

How I can make it clearer that I will support that amendment, I do not know.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(By unanimous consent, Mr. SIMON was allowed to proceed for 1 additional minute.)

Mr. SIMON. Mr. Chairman, let me respond briefly. There is a difference between putting added emphasis in here, which our colleagues the gentleman from South Carolina (Mr. DERRICK) and the gentleman from Montana (Mr. BAUCUS) do, and what the gentleman from Ohio (Mr. ASHBROOK) does, that is capturing their bill and making the thrust something that is somewhat different.

If the gentleman from Ohio will introduce his amendment as a separate bill, I will be a cosponsor of that, but I do not think we should skew the basic nature of this bill, and I think that is what the amendment to the substitute does.

Mr. ASHBROOK. Mr. Chairman, if the gentleman will yield, all I was doing was adding a balanced budget to the goals of unemployment and inflation—not ahead of them, not primary, but one of the three goals to be achieved.

I will say to my friend, the gentleman from Maryland, he made it perfectly clear, he has made it clear that if the amendment had any teeth in it as far as a balanced budget is concerned, he would oppose the amendment. Obviously I am coming to the conclusion that a balanced budget is not intended in the Baucus-Derrick amendment. My friend from Maryland (Mr. MITCHELL) would not support it if it did and that does not represent any problem of bearing. I have listened to him on many occasions.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

(On request of Mr. MITCHELL of Maryland, and by unanimous consent, Mr. SIMON was allowed to proceed for 1 additional minute.)

Mr. MITCHELL of Maryland. Mr. Speaker, will the gentleman yield?

Mr. SIMON. I yield to my colleague, the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Speaker, it is absolutely amazing to me to try to understand what my distinguished colleague, the gentleman from Ohio, is suggesting as to what I was reported to have done or recommended. Let me say clearly initially I was prepared to oppose any balanced budget amendment to the full employment bill because I did not think it belonged in there at all. However, my colleagues have come up with an amendment that not only says balanced budget but says balanced budget in terms of reducing unemployment. That is acceptable.

Evidently the climate in Ohio does something to one's hearing.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in favor of the Ashbrook amendment to the substitute amendment, which adds a third element to this bill. Many of my colleagues on

this side of the aisle want to eliminate deficits because deficits create long-range financial problems, especially for the private sector.

I have been on the Budget Committee now for 2½ years. I have sat in this Chamber and listened to a Democrat-controlled Congress tell us the way to full employment was through deficit financing. And where is it? We do not have full employment. We have deficit spending that this Democrat Congress, controlled better than 2 to 1, has given us.

My good friend and colleague, the gentleman from California, has admitted and stated that the overwhelming majority of jobs come in the private sector.

Well, then, let us do the things that will create jobs in the private sector. Let us not continue this tremendous deficit that we constantly have. Let us come up with something and say that at least by the year 1981 or 1982 we can do what our good President said we could achieve in 1980.

Now my colleague the gentleman from Ohio (Mr. ASHBROOK), being a compromiser, said, well, let us go about doing it a couple of years later because the President is running into a little difficulty with the Democratic Congress that keeps adding on these big deficits. So I say to my colleagues let us stop deficit spending which is causing unemployment.

Mr. DERRICK. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. Will the gentleman yield to me first?

Mr. ROUSSELOT. I yield to my colleague the gentleman from Ohio (Mr. ASHBROOK) first and then I will yield to the gentleman from South Carolina (Mr. DERRICK).

Mr. DERRICK. The gentleman has attacked me.

Mr. ROUSSELOT. I am sure I did not attack the gentleman from South Carolina as much as question the value of his amendment, but I did promise to yield to my very distinguished colleague the gentleman from Ohio (Mr. ASHBROOK) first. I was not attacking the gentleman because I know the gentleman is for a balanced budget. He has told me that many times, but has not declared to do it by 1982.

Mr. ASHBROOK. Mr. Chairman, I thank my colleague for yielding to me.

If we could reduce to the simplest form what apparently is the purpose of my friend the gentleman from California (Mr. HAWKINS) and that was repeated by the very able chairman of the Committee on the Budget, the gentleman from Connecticut (Mr. GIAIMO) somehow, someway or other, we will achieve a balanced budget if we do not mandate it.

You see, that is one of the big things in H.R. 50 but they say that it seems to be so delicate that we will achieve it without tinkering with their treasured product by amendment or otherwise but if we put it in as one of the priority items then somehow or other we will not achieve it.

Mr. ROUSSELOT. And we are attempting by your amendment to make it equal to reducing unemployment and making it equal to all of the other objectives of the bill.

Mr. ASHBROOK. Yes. That is so but here comes the mystery. They say they want it, they are going to achieve it, even the report says by 1983 we can probably reach it.

Mr. ROUSSELOT. The report says that?

Mr. ASHBROOK. That is correct. But, if we do this terrible thing that I am suggesting, as our friend the gentleman from South Carolina (Mr. DERRICK) pointed out, the terrible thing of having it included in H.R. 50 as far as timetables are concerned and specific goals are concerned and as a mandated objective—why, then, all of a sudden that kills the deal, we will not have a balanced budget.

So only if we treat it in their way of being only an illusive policy or a fine print principle will we achieve it. If we mandate it we will never get it. That is the effect of what they are telling us. Who can believe that?

Mr. ROUSSELOT. Not me. I appreciate the gentleman's comments and, as I promised, I will now yield to my very distinguished colleague, the gentleman from South Carolina (Mr. DERRICK) who is a supporter of the balanced budget. I know this because he has told me in the committee.

Mr. DERRICK. And I am giving you an opportunity to give it full consideration this afternoon.

Mr. ROUSSELOT. I have read it carefully and it does not get too specific.

Mr. DERRICK. Just give us a few crumbs from the table, please, and I am sure we can work it out.

You will recall that in 1974 we had an inflation rate of around 11 percent and an unemployment rate of 9 percent. Now the unemployment rate is 6.2 percent and the inflation rate is around 6 percent. So give this Democratic Congress credit for something.

Let me get into the question of the balanced budget issue.

Mr. ROUSSELOT. Let me interrupt the gentleman for a moment, just briefly.

Mr. DERRICK. Make it brief.

Mr. ROUSSELOT. How does this gigantic deficit help reduce unemployment in the private sector?

Mr. DERRICK. Let me tell the gentleman the facts of the case.

Mr. ROUSSELOT. Is the gentleman telling me that?

The CHAIRMAN pro tempore. The time of the gentleman has expired.

Mr. ROUSSELOT. Mr. Chairman, I ask unanimous consent that I may proceed for 2 additional minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

Mr. DANIELSON. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Mr. SARASIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. I thank the gentleman for yielding me this time. I really appreciate it. Will the gentleman yield to the gentleman from South Carolina, also?

Mr. ASHBROOK. How about yielding to me first because that side objected to the time extension.

Mr. SARASIN. I will yield to the gentleman from South Carolina.

Mr. DERRICK. I thank the gentleman.

Is the amendment you are offering annually or semiannually.

Mr. ROUSSELOT. Twice a year.

Mr. DERRICK. But if your amendment had prevailed in 1976 when we had revenues of $300 billion and outlays of $375 billion, if we had taken that $75 billion out of outlays what would have happened is that the Federal Government would have lost $40 billion in revenues. We would have gone back to the $260-billion figure. What would have happened would have been that immediately——

Mr. ROUSSELOT. Let me interrupt the gentleman on that point.

Mr. DERRICK. Permit me to finish.

The unemployment rate would have gone up to 12 or 14 percent nationwide, the gross national product would have dropped substantially, the inflation rate would have gone up substantially, and you would have closed down 100 percent of the mills in my district. If that is help then I do not care for that kind of help.

The CHAIRMAN pro tempore. The gentleman from Connecticut (Mr. SARASIN) has the time.

Mr. SARASIN. Mr. Chairman, I yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, if the gentleman recalls, in my balanced budget resolution we also included the concept of the Kemp–Roth tax cut proposal, which now has been endorsed by better than 160 Members of this House. As you may know, that would have reduced personal income tax rates across the board 30 percent and the corporate tax rate 3 percent, phased in over 3 years. Cutting the marginal tax rates would increase the rewards to those who work, save, and invest. Because of additional labor and investment, productivity and output would go up. The economy would create jobs, housing starts would increase, business and consumer confidence would return, wages would go up, and inflation would abate. Furthermore, Federal tax revenues would grow—they would not decrease as my colleague from South Carolina suggested. Cutting tax rates can make Federal receipts go up—witness the Kennedy tax cut in 1964. Employment would have gone up 1.5 million in a year's time. So the gentleman is not correct. There would not have been a loss of revenue as a result of the budget concept that I introduced in 1976.

We would have produced far more revenue in the Federal Government, just as the Kennedy tax cut did in 1964.

Now I think we should yield to the author of that bill, the gentleman from New York (Mr. KEMP).

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I hope those reading this debate 10 years from now will recognize a basic fundamental point of difference between the majority side and our side. During this entire debate I keep hearing the words, "What I have done," "What we have sponsored," or "What the Government has done." There is no credit given whatsoever for the upturn in the economy, to the people who really did it, that is those out there that have nothing to do with the Government, those in the private sector of the economy. Everything we hear is what the Government plans, what the Government can do. Actually those of us out there as employers, and I happen to be a small business employer, do not hire additional people because of Government policies, because of tax policies, because of EPA, and many other things not in this bill, and yet we sit back in an economic debate and sound like H.R. 50 is the big "We." We are going to solve these problems.

I think the gentleman from New York (Mr. KEMP) has done as much to focus on what has made this economy work over the years as anyone. That is the private sector; yet our friends on the majority side will not accept that premise.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, there is one point I think should be made in that debate right now; that is, that what the minority position is basically is that all Government spending is a tax liability on current or future generations; so the Government as a tax liability preempts the resources that otherwise would be used in the private sector of the economy by the worker or the saver or the investor to expand production; so as production is diminished by taxes, you get a shrinking tax base and higher and higher tax rates; but if the tax liability were to be diminished, you would have an expanded amount of revenue, as the gentleman from California points out, on an expanding tax base. We are talking about reducing tax liability to expand revenues and allow tax revenues to make up for whatever loss occurs over a short period of time; so the gentleman from California, to whom I have been listening with great interest, made the point earlier that if we cut spending, somehow you cut revenues, you lose revenues; that is quite wrong.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Ohio (Mr. ASHBROOK) to the amendments offered by the gentleman from Montana (Mr. BAUCUS) as a substitute for the amendments offered by the gentleman from Ohio (Mr. ASHBROOK).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. ASHBROOK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 205, noes 215, not voting 14, as follows:

[Roll No. 152]

NOT VOTING—14

Anderson, Ill.	Foley	Robinson
Buchanan	Krueger	Santini
Clausen, Don H.	Metcalfe	Teague
Collins, Ill.	Murphy, N.Y.	Thornton
	Rahall	Young, Tex.

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Rahall against.

Mr. Krueger for, with Mr. Murphy of New York against.

Mr. Buchanan for, with Mr. Metcalfe against.

Mr. Don H. Clausen for, with Mrs. Collins of Illinois against.

Mr. Robinson for, with Mr. Foley against.

Mr. ASHLEY changed his vote from "aye" to "no."

Mr. KREBS and Mr. BROWN of Michigan changed their vote from "no" to "aye."

So the amendments to the amendments offered as a substitute for the amendments were rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Montana (Mr. BAUCUS) as a substitute for the amendments offered by the gentleman from Ohio (Mr. ASHBROOK).

The question was taken; and the Chairman pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. BAUCUS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 411, noes 3, not voting 20, as follows:

[Roll No. 153]

So the amendments offered as a substitute for the amendments were agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Ohio (Mr. ASHBROOK), as amended.

The amendments, as amended, were agreed to.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Minnesota (Mr. QUIE).

Mr. QUIE. Mr. Chairman, I ask unanimous consent that I may be permitted to modify the amendment which I offered and which was previously adopted by the House.

The specifics of the modification are at the desk, and they have been approved by the chairman of the subcommittee, the gentleman from California (Mr. HAWKINS).

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The amendment, as modified, is as follows:

Amendment offered by Mr. QUIE, as modified: The new section 4 of the Employment Act of 1946, as revised by the Jeffords Amendment to section 104 of the bill, is amended as follows:

(1) The first sentence of section 4(a)(2)(A) is amended by inserting before the period at the end thereof "and the interim goal of obtaining farm income at a rate not less than 100 per centum of parity at the market place during the same period", and (2) section 4(b)(1) is amended by inserting before the period at the end thereof ", and maintaining farm income at a rate not less than 100 per centum of parity at the market place after it has been reached".

AMENDMENTS OFFERED BY MR. BROOKS

Mr. BROOKS. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. BROOKS: Page 76, line 8, strike out the word "or" and insert in lieu thereof "and may establish other".

Page 76, at the end of line 12, add the following: "All boards established under this section shall be subject to the provisions of Public Law 92-463, the Federal Advisory Committee Act."

Page 76, line 21, insert ", in accordance with applicable provisions of law," immediately after "President shall".

Mr. BROOKS (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

The Clerk will read.

(The Clerk concluded the reading of the amendments.)

Mr. BROOKS. Mr. Chairman, my amendments would require essentially the establishment of one advisory committee, as the current bill does, but it would make the President's authority to establish any others discretionary and would make such committees subject to the Federal Advisory Committee Act.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the chairman of the subcommittee.

Mr. HAWKINS. Mr. Chairman, we have seen the amendments and analyzed them. We think the amendments are clarifying and would improve the bill. We will accept the amendments.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to my distinguished friend, the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I concur with the statement of the chairman of the subcommittee. We also agree on this side of the aisle that the amendments are acceptable.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Texas (Mr. BROOKS).

The amendments were agreed to.

PERFECTING AMENDMENT OFFERED BY MR. STANTON

Mr. STANTON. Mr. Chairman, I offer a perfecting amendment to section 108 of the bill. The amendment is at the desk, and I ask unanimous consent for its consideration at this time.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN pro tempore. The Clerk will report the perfecting amendment.

Perfecting amendment offered by Mr. STANTON: Section 108 shall be modified to read as follows:

MONETARY POLICY

SEC. 108. The Employment Act of 1946 is amended by inserting a new section 8 as follows:

"MONETARY POLICY

"SEC. 8. The Board of Governors of the Federal Reserve System shall transmit to the Congress, an independent statement setting forth its intended policies for the year ahead, and their relationship to (i) the short-term goals set forth in the economic report pursuant to subsection 3(a)(2)(B) of section 3, and (ii) medium-term trends in employment, production, and prices for the three calendar years subsequent to the two years referred to in subsection 3(a)(2)(B). The House Committee on Banking, Finance and Urban Affairs and the Senate Committee on Banking, Housing and Urban Affairs shall consult with representatives of the Board of Governors concerning the Board's and the Federal Open Market Committee's intended policies, and each of these committes shall submit to the Joint Economic Committee, pursuant to Title III of the Full Employment and Balanced Growth Act of 1978, a report containing their views and recommendations with respect to the Federal Reserve's intended policies. Thereafter, the Congress shall take such action as it deems necessary to insure closer conformity to the purposes of the Full Employment and Balanced Growth Act of 1978. Nothing in this Act shall be interpreted to require that policies proposed by the Board of Governors of the Federal Reserve System be followed if the Board of Governors and the Federal Open Market Committee determine that they cannot or should not be followed because of changing conditions."

Mr. STANTON (during the reading). Mr. Chairman, I ask unanimous consent that the perfecting amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. BAUMAN. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

The Clerk will read.

(The Clerk concluded the reading of the perfecting amendment.)

The CHAIRMAN pro tempore. Without objection, the gentleman from Ohio (Mr. STANTON) is recognized for 5 minutes in support of his perfecting amendment.

There was no objection.

Mr. STANTON. Mr. Chairman, on March 9, 1978, in the Committee of the Whole House our distinguished colleague, the chairman of the Banking Committee, Mr. REUSS, offered a substitute amendment to section 108 which was adopted by voice vote. The substitute was agreed to and fully supported by Mr. REUSS, Mr. ASHLEY, Mr. NEAL, Mr. MITCHELL of Maryland, Mr. HAWKINS, and myself.

Regrettably the printing of the RECORD misstated the precise language of the amendment. This perfecting amendment will correct the RECORD and properly state the gentleman's intended language. Quite simply, the sense of the perfection is to make certain that the Federal Reserve Board of Governors will be the spokesman for monetary policies of the Board and the Federal Open Market Committee.

In addition the RECORD of March 9 quotes the gentleman's explanation of the amendment in a misleading fashion. It states that the Fed may change its published monetary policy objectives only if it has preadvised the Congress, giving proper reasons.

To set the record straight the amendment states in part that "Nothing in this Act shall be interpreted to require that policies proposed by the Board of Governors of the Federal Reserve System be followed if the Board of Governors and the Federal Open Market Committee determine that they cannot or should not be followed because of changing conditions."

I must emphasize that there is nothing in this language nor is there any intent on the part of parties offering this language that would require the Board of Governors to preadvise the Congress of any change in policy that might be necessitated by changing conditions. To do so would seriously jeopardize the Fed's position in controlling monetary affairs.

I know that I speak for all the Members supporting the Reuss amendment in asking for the adoption of the perfecting amendment and for the clarification of the RECORD as I have stated.

I urge adoption of the perfecting amendment.

Mr. HAWKINS. Mr. Chairman will the gentleman yield?

Mr. STANTON. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, the gentleman from Ohio has, I think, correctly stated the case. It was a misprint, I think, of the original agreement in the RECORD, and we are perfectly willing to accept the amendment as it has been rephrased.

Mr. STANTON. Mr. Chairman, I thank the gentleman.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. STANTON. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, we will be happy to accept the amendment.

The CHAIRMAN pro tempore. The question is on the perfecting amendment offered by the gentleman from Ohio (Mr. STANTON).

The perfecting amendment was agreed to.

AMENDMENTS OFFERED BY MR. QUIE

Mr. QUIE. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. QUIE:

Page 61, strike out lines 22 through 25 inclusively, and renumber succeeding subsections (c) through (f) as subsections (b) through (e), respectively.

Page 63, after line 8, add the following new paragraph:

"(1) expansion of conventional private jobs opportunities through the increase in gross national product, aggregate personal income, savings and investment, and disposable income which would occur naturally from permanent tax rate reductions for individuals and corporations;"

and renumber the succeeding paragraphs (1) through (4) as paragraphs (2) through (5), respectively.

Page 64, after line 13, add the following new paragraph:

"(2) the projections for each year of a 5 year period of increases in employment, annual wage rate, gross national product, capital outlays, consumption, and Federal tax revenues (initial impact and net impact) resulting from permanent tax rate reductions for individuals and corporations of not less than that level of reduction required to offset potential Federal tax revenue gains arising from inflation, such projections to be based upon an econometric model based upon a supply-side fiscalist formula;"

and renumber the succeeding paragraphs (2) and (3) as (3) and (4), respectively.

Page 67, after line 8, insert in lieu thereof the following:

"(5) The medium-term goals in the first Economic Report submitted after the date of the enactment of the Full Employment and Balanced Growth Act of 1978 shall include—

"(A) a permanent reduction in the rate of tax imposed with respect to each bracket found in the tables in section 1 (relating to the tax imposed on individuals) of the Internal Revenue Code of 1954 of 10-percent in each year of the succeeding three tax year period;

"(B) a permanent reduction in the rate of tax imposed by section 11(b) (relating to the tax imposed on corporations) of the Internal Revenue Code of 1954 of 1-percent in each year of the succeeding three tax year period; and

"(C) an increase to $100,000 in the corporate surtax exemption found at section 11(d) of the Internal Revenue Code of 1954.

Mr. QUIE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Minnesota?

Mr. BAUMAN. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

(The Clerk continued to read the amendments.)

Mr. QUIE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

(The Clerk concluded reading the amendments.)

Mr. QUIE. Mr. Chairman, this is an amendment that I have introduced with the gentleman from New York (Mr. KEMP); and most of the Members on this floor have heard him expound on a proposal for a number of months which we believe will bring about an improvement in the economy and an improvement in job opportunities.

What the amendment does is to require that projections be made of increases in employment, in the wage rates, in the gross national product, in capital outlays, in consumption, and in Federal tax revenues resulting from permanent tax rate reduction; and it also provides for a mid-term goal of a 10 percent reduction in individual income taxes per year during each of the 3 years and a 1 percent reduction in the corporate income tax for each of the 3 years plus an increase in the exemption for small businesses within the program.

Mr. Chairman, this is setting out the goal that could be put into effect if that

goal were stated here to be guiding both the President and the Congress.

Mr. Chairman, I yield to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, I appreciate the gentleman's yielding, and I appreciate his helping me get this opportunity to introduce my amendment to the Full Employment and Balanced Growth Act the substance of which is the Kemp-Roth Tax Rate Reduction Act.

Mr. Chairman, this will be the first non-Keynesian amendment to the Full Employment and Balanced Growth Act.

Mr. Chairman, the Keynesian answer to inflation is unemployment, and the Keynesian answer to unemployment is inflation and neither strategy works or is acceptable any longer.

I suggest that the time has come to produce a new strategy for prosperity and economic growth and jobs, one that will restore the reward for working, saving, producing, and investing thus expanding economic growth without inflation.

This "new-old" strategy is based upon the classical economic maxim, which is, that the only real and lasting way to create jobs, the only real and lasting way to raise the standard of living of the people, the only real and lasting way to fight inflation is to increase the amount of employment and investment.

Mr. Chairman, not only is investment impeded by unnecessarily high tax rates, but the after-tax real income for the working people of America is actually declining as Government allows inflation to move working men and women up and up through the steeply graduated and progressive tax rates that occur in the United States. The effect of this is to diminish the after-tax reward not only to the worker, but to the investor as well, and this tax-inflation policy diminishes incentive, throttles ambition, raises the cost of employment, and reduces the output of our American economy by strangling investment.

Mr. Chairman, President Kennedy said in 1963 that the main roadblock to full employment was the heavy burden of taxation on the backs of the American people.

Today Government at all levels consumes 43 percent of the total national income. Of all of the income that is produced by the American people in the private sector of the economy, 43 percent of it is now being consumed at either the Federal, State, or local level. However, what is worse, Mr. Chairman, if one considers how inflation is moving people into higher and higher marginal tax brackets, you realize that in America today the harder you work, the more you produce, the more you save, the more successful you are at investing or the more entrepreneurial instinct you might have as an individual man or woman of ambition, the more you are penalized by a tax code that rewards consumption, leisure, debt and borrowing, and punishes savings, investment, work, and production.

Mr. Chairman, I would like my colleagues to direct their attention to the floor chart, which shows dramatically the marginal tax rates in this country that are going up daily, weekly, yearly without so much as a vote by this body. It is truly taxation without inflation.

Mr. Chairman, by definition, if one is not in favor of reducing the tax rates on the American people right across the board, one must be in favor of raising them because they are not static. They were not handed down from high in tablet form etched in concrete. If one does not vote to lower the rates, across the board, then by definition one is voting to raise taxes and raise the tax rates now and in the future. The result will be more taxes, few jobs, and less output.

I believe this to be one of the most significant votes since 1964 on getting our economy moving again, and I want my colleagues to know the people of America will hold them accountable for raising their taxes.

The CHAIRMAN pro tempore. The time of the gentleman from Minnesota (Mr. QUIE) has expired.

(By unanimous consent, Mr. QUIE was allowed to proceed for 5 additional minutes.)

Mr. KEMP. Mr. Chairman, as this chart points out, these are the marginal tax rates that exist in this country today. In fact, they go on higher, up to 70 percent; beginning at 14 percent on earned income, and going up to 70 percent on investment income. As an example of how margin rates are rising daily, I want to use this example.

For instance, if one earned $20,000 in 1965, as this black line suggests, by 1977, as nominal incomes or wage incomes have gone up almost 100 percent—the Consumer Price Index has gone up 100 percent as well, but taxes have gone up nearly 150 percent because, as nominal incomes rise, it pushes people into a higher and higher tax bracket, thus reducing the after tax, real disposable income.

If one looks at the situation in more detail one will see that in 1965 a family of four earning $20,000 per year was paying $3,428 in Federal income tax and 28 percent tax on each additional dollar earned. If this family's income has kept pace with inflation it will have doubled by 1977 in nominal terms. But its Federal income tax burden has nearly tripled. Today that family is paying $9,416 in Federal income tax and 42 percent tax on each additional dollar earned.

Since inflation has become a way of life in America today I have projected into the future what would happen to a family in New York earning $20,000 today in nominal terms. Today that family is paying a total of $5,080 in combined Federal, social security, and New York State income taxes, or 25.4 percent of its gross income. If we have 7 percent inflation and this family's income grows by the same amount, by 1981 it will be paying $7,218 in total taxes, or 29.5 percent of its gross income. But if the family is to be no worse off taxwise than it is today, it should still be paying only 25.4 percent tax. The result is that taxes will make the family much worse off in real terms by 1981 unless Congress acts.

Perhaps more importantly, the marginal tax rate for this family will increase from 42.05 percent at present to 46.65 in 1981, taking into consideration the increase in all tax rates, including the newly legislated social security tax increase that the majority party now wants to repeal.

I believe that the existing high marginal tax rates, which have already increased greatly since the 1960's, the last time they were reduced, and the impending increase in rates which will result from inflation, are seriously reducing the incentive to work and invest for higher income in America. If the trend continues I have no doubt that the United States will be like Great Britain in a very few years. As we all know, Great Britain is a stagnating country. Innovation, incentive, and inventiveness are all discouraged by the economic system. The result is that many of Britain's productive people are leaving the country in droves—many of them coming to the United States to escape taxation rates of 98 percent on investment income and 83 percent on earned income at about $35,000.

I contend that high tax rates are largely to blame for the high unemployment in the United States which H.R. 50 seeks to redress. And the recent history of the mid-1960's, following the Kennedy tax cuts, indicates that tax rate reduction is a very powerful tool for reducing unemployment. The overall unemployment rate dropped from 6.7 percent in 1961, before Kennedy announced his tax reduction program, to 3.8 percent in 1966, before inflation began to undo the effects of the tax cuts by pushing people up into higher tax brackets.

It is true that Congress has cut taxes since then, but all of these so-called tax cuts have left the high marginal tax rates intact. Indeed, I think you would be hard pressed to find anyone who really believes that Congress has reduced the tax burden even though we had 4 tax cuts in 6 years.

Thus the purpose of my amendment is to specify that tax rate reduction be used by the President to help achieve the goals of the Humphrey-Hawkins bill. I believe that this amendment will greatly strengthen H.R. 50.

In my own State of New York, if we take the Federal income tax progressivity and combine it with New York State tax progressivity, I can show the Members that over the last 10 years the workers' wages per capita in New York today, after taxes and inflation are no higher than they were in 1967. In other words, they have been working for 10 years without a dollar of increase in real, net disposable income. This is intolerable and not only it is intolerable, it is unnecessary, because it really does not help to expand economic growth it actually reduces production and work something upon which the rhetoric of this whole bill is based.

The following table demonstrates what has happened in New York State to real

and nominal wages between 1967 and 1976:

[In dollars]

Year	Gross earnings		Take home	
	Current	1967	Current	1967
1954	71.50	90.16	66.48	83.83
1955	75.17	95.39	69.37	88.03
1956	78.96	98.70	72.40	90.50
1957	81.57	98.63	74.30	89.84
1958	83.07	97.50	75.53	88.65
1959	87.71	101.87	78.96	91.71
1960	89.61	102.06	79.69	90.76
1961	92.21	104.07	81.66	92.17
1962	96.02	106.93	84.57	94.18
1963	98.78	108.07	86.28	94.40
1964	102.44	110.39	91.03	98.09
1965	106.40	112.71	95.02	100.66
1966	111.35	114.32	97.72	100.33
1967	114.44	114.44	99.85	99.85
1968	121.48	116.47	104.56	100.34
1969	128.30	116.11	108.99	98.63
1970	134.59	113.96	114.94	97.32
1971	145.84	117.23	125.05	100.52

1975	191.00	115.83	162.49	98.54
1976	209.35	120.04	176.58	101.25

Thus in New York nominal factory wages have almost doubled since 1967, but real disposable wages, adjusted for higher taxes and inflation, are virtually unchanged. In other words, factory workers in New York State have worked for more than a decade with no increase in pay.

The truth is that tax rates in this country are unnecessarily high and we are paying a heavy price for it. Unemployment is just one of those costs. The reduction in the real standard of living for most Americans is another.

Consider these facts: If you take a worker earning $12,000 per year today in New York, factor in an inflation rate of 6 percent, and State, Federal, and social security taxes, this worker will be in a marginal tax bracket approaching 60 percent by 1981.

These high tax rates do more than just reduce the incentive to work, they reduce the incentive to invest in private industry as well. Yet it is the private sector where the vast majority of all jobs are created. Consider this fact: A resident of New York City today earning more than $100,000 per year would have to get nearly 30 percent return on an investment before tax to get a 7-percent return after tax. In other words, a tax free municipal bond paying 7 percent would give this person the same after tax income as he would get if he bought stocks which gave him a before tax return of 30 percent. No wonder New York is losing investment and jobs.

The reduction in investment and the unemployment which results from such high tax rates ultimately results in a reduction in the supply of goods and services which this Nation can produce. This, in turn, leads to an increase in prices and a reduction in our ability to compete on foreign markets. Thus high taxes can be considered a cause of inflation and the weakening of the dollar on foreign exchanges.

By contrast, consider what would happen if there were a massive reduction in tax rates equivalent to those implemented in the 1920's by Andrew Mellon and in the 1960's by President Kennedy. There would be an immediate increase in the incentive to earn more income through work and investment. Foreign capital would flow into the country, our import situation would improve, the stock market would boom, and there would be a vast increase in employment among all classes of workers.

What I am suggesting is not "pie in the sky." It has happened at least three times this century when marginal tax rates were reduced.

Thus what I am proposing fits in perfectly with the goals of the Humphrey-Hawkins bill. I am merely providing a tested means for achieving the goal of full employment.

Now, our economy today is suffering from economic contraction as the incentive for working and investing and saving is diminished. Real growth in our gross national product is down 71 percent. Annual growth in the Consumer Price Index is up in the last 10½ years by 270 percent at a compounded annual rate of 6.39 percent.

Our competitive position in world markets has deteriorated from a modest surplus in 1969. Our Federal deficit rose to $75 billion in 1976, and is going even higher in the future.

Now, inflation must not become a way of life. I would hope that at some point we could index the tax rates so that we could adjust everybody's tax bracket to inflation proof their earnings each year for the cost of living, but beyond that, we must as a body deal with the lack of incentive in the economy today, both for working and investment, by lowering the rates, with a phased in 30 percent reduction in the personal income tax rates over 3 years; a modest 3-point reduction in the corporate income tax rates; a reduction in the taxation of small businesses by raising the corporate surtax exemption from $50,000 to $100,000. That will, I submit, will accomplish in the economy today many of the same benefits which accrued to the economy under the Kennedy tax policies of 1963 and 1964.

I have mentioned just some of the negative effects that have accompanied the curtailment of personal investment in our country. For another perspective let us look at countries where personal investment is encouraged and given fuller rein.

Japan and West Germany are two of the most powerful economic forces in the world today. In Japan, individuals save and invest 20 to 21 percent of their incomes and in West Germany nearly 14 percent, compared to 5 to 7 percent in the United States. In other words, the Japanese invest three times as much of their incomes as Americans do and West Germans twice as much.

How do the three nations compare in unemployment, productivity, and wage rates? Not favorably for America.

Take unemployment. From 1969 to 1974, unemployment in Japan averaged 1.3 percent of the workforce and in West Germany 0.8 percent. The U.S. average was 4.9 percent.

Take productivity and wage rates. From 1960 to 1975, productivity in Japan increased 8.6 percent annually and workers' hourly pay increased 17.6 percent annually. In West Germany, productivity increased 5.6 percent and hourly pay 14.8 percent each year. In the United States, the productivity increase averaged 2.55 percent and the pay increase 5.8 percent per year.

Since 1967, the Japanese worker's hourly compensation has increased more than 400 percent, the West German's more than 290 percent and the American's just 80 percent.

The figures tell a painful story—for us.

Personal investment and economic progress go hand in hand. America is far behind the leaders.

In its 1976 report, the Joint Economic Committee of the U.S. Congress clearly identifies the problem and its solution. "Our present tax structure," says the report, "encourages consumption and discourages savings and investment by placing a heavier tax liability on dollars saved and invested than on dollars spent." The report calls for "tax incentives that will facilitate capital investment and thereby enhance the ability of our private sector to provide new jobs and to increase productivity and wages to help us achieve energy independence, and, in general, to promote the economic wellbeing of our citizens."

We have the opportunity—indeed, the inescapable responsibility—to provide those tax incentives now. The American people will be watching this vote to see on which side of this issue their Representatives vote. This Kemp-Roth amendment is a signal to them and to the President that the best tax reform is permanent tax rate reduction.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to the amendment.

Let us look at exactly what this amendment would do. The first thing it does is to strike out the language appearing at the bottom of page 61, which is indeed the very heart of this bill. The language this amendment would strike is as follows:

"(b) The Congress further declares and establishes as a national goal the fulfillment of the right to full opportunities for useful paid employment at fair rates of compensation of all individuals able, willing, and seeking to work.

That is what the bill is all about, and that is what the amendment would strike.

Let us see what the amendment would insert in its stead. It would mandate a complicated formula of specific and permanent tax reductions every year. It would commit future Congresses to a series of annual permanent tax reductions for individuals and corporations or not less than that level which is later spelled out in a rather complex equation which I must confess that I do not fully comprehend.

But I do understand the specific language which follows that. This amendment would mandate a permanent corporate and individual income tax reduction of 10 percent in each year of the succeeding 3-year period. That would be an alluring promise to hold out to the

American people, but it could be a cruelly illusory one.

It is estimated by the Congressional Research Service that these reductions, were they to go into effect, would bring about a loss of revenue of more than $150 billion by 1983. I do not know whether that is accurate or not, but that is the estimate of the Congressional Research Service. What I want to say is not dependent upon the accuracy of that statement. But if indeed it would add $150 billion to the deficit, that most certainly would be an extremely serious consequence.

What I want to say more fundamentally is that it would be very unwise for the Congress in this general legislation to mandate specific reductions in taxes to be applicable regardless of what may happen in future years.

To make a statement for tax reduction is an attractive idea. I favor tax reduction wherever and whenever possible. I daresay most Members do. It is a little bit like favoring motherhood. There is little harm in our making a statement that we favor motherhood. But if we should mandate that every mother shall have not less than one child each year, then I think we would have quit preaching and gone to meddling. We would have mandated something which in some cases could not be fulfilled.

That is just exactly what we would be doing by adopting this amendment: Mandating without taking into consideration the right of the Ways and Means Committee or the right of the Congress to make a determination of what the needs and capabilities are in a given future year.

Supposing we got into a crisis of energy where we had to expend unexpected sums to develop alternate sources of energy. Supposing, God forbid, that we got into an international crisis where we had to spend tax moneys to defend the Nation against military aggression. This amendment would mandate a 10-percent reduction in taxes notwithstanding those unforeseeable needs. To set future Congresses in concrete in such a way as that is simply not consistent with the purposes of the bill. The formula the amendment proposes is too specific and of doubtful attainability. I think we ought to vote it down.

Now I will yield to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, I appreciate my friend yielding to me. I hope the gentleman was on the floor when I said this was the first non-Keynesian amendment to the bill that I have seen so far in that the purpose in lowering the rate is not just to pump money out into the economy and reduce revenue, the purpose is to increase the incentive for working, saving, and investing, and thus raise revenues by expanding the tax base, which is what occurred following the tax rate reductions implemented by President Kennedy that we are paralleling today.

Mr. WRIGHT. The gentleman did say that a few minutes ago. What I am suggesting is that, although the theory of the gentleman may in some cases be quite valid, it is not so valid as an absolute to become the "be all" and "end all" of our endeavors. That we at this moment could mandate a 10-percent reduction each year for the next 3 years, and then establish a rigid formula for future reductions is to expect too much.

Mr. KEMP. Will the gentleman yield further?

Mr. WRIGHT. Not just at this moment. The gentleman had his own time.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

Mr. WRIGHT. Mr. Chairman, I will not ask for any additional time.

What I want to suggest is that while I think the gentleman may have a valid theory that certain selective tax reductions can indeed enrich the economy, we must allow succeeding Congresses facing the crises and the conditions of the moment make intelligent decisions that will fit the needs of each succeeding moment. Let us not put them in a straightjacket for the next 3 years and mandate what they have to do regardless of future conditions without the orderly legislative process being permitted to work.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I believe my time is about up, but I will yield to my friend the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, I appreciate the gentleman yielding. There is just one minor correction. I had the same sheet the gentleman had that contained the error and the loss of revenue is not by 1983 but in 1983, according to the Congressional Research, it is $151.2 billion. The total increase in the deficit, were this amendment to be adopted, would be $570 billion by 1983.

So, in a very real sense, this is a "hike the deficit" amendment.

Mr. WRIGHT. I thank the gentleman from Illinois ((Mr. SIMON) for his comment. The figure he cites is alarming indeed. While I cannot personnally vouch for any of these figures, I do know that the Congress has never committed itself to such a sweeping promise as that encompassed in this amendment, and I do not feel we should do it today. So I suggest that we vote down the amendment.

Mr. STOCKMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment, because it is based on the only convincing explanation that we have had thus far as to why we do not have full employment today, and why we need the bill at all.

I was disappointed in hearing the distinguished majority leader oppose the amendment, because I had listened very attentively to his very able and learned lecture last week on macroeconomics. I think the gentleman is to be commended for a fundamental point he made, and that was that he effectively refuted the hoary notion that we cannot have full employment and price stability at the same time.

The Members will recall that last week the majority leader displayed a chart showing we have had periods during the 1950's and 1960's where we had a stable basis or very low rates of inflation at the same time.

I believe that his remarks were especially commendable because it needs to be said that this idea that there is an unemployment-inflation tradeoff, and that you cannot have one without the other, did not arise on our side of the aisle. It has never been argued by conservative economists. The whole notion that there is a tradeoff between full employment and a maintenance of price stability is an artifact of the Keynesians; the "Phillips curve," in fact, was conceived, hatched, and projected from the Brookings Institute by the same people who today are making the administration's economic policy.

But just as the majority leader was refuting all of this in his lecture last week, and leading us down the path of enlightenment, he turned to the more fundamental question as to why in the 1970's if we had the opposite situation: very high rates of inflation and very high rates of unemployment; that is, he was trying to explain the stubborn problem of "stagflation."

Instead of continuing to press the case forward, the majority leader suddenly did an abrupt about face and went galloping off into the past. He did not even stop at 1946 or even 1932. He went all the way back to 1896, to William Jennings Bryan, and knowing the majority leader's great oratorical ability, I thought we would hear a modern rendition of the "Cross of Gold" speech. That was his whole explanation for the fix we are in today: tight money and high interest rates. That is not a very good explanation, but let us take a close look at it. High interest rates do not cause inflation. They cause deflation. They cause a slowdown of the rate of investment, of borrowing, a contractionary spiral in the economy.

Beyond that, we have not had high real rates of interest in the last 7 or 8 years. If we look at the current rate for Treasury bills, it is 6 or 7 percent. The inflation rate is 6 percent, so that means the real interest rate on short-term borrowing is about 0.7 percent. That is not a high interest rate. That is not causing a slowdown in the economic growth rate. It is not causing the high unemployment we have. The same is true for other rates today, the prime rate, the mortgage rate and so on.

On the other side of the coin, the gentleman further said that the high unemployment we have today is caused by tight money; but that is not true either. Tight money occurs when the money supply is growing at a lower rate than the real growth rate of the economy, a growth rate of 3 to 5 percent. If the money rate is growing at a lower rate than that, we have tight money, but we have not had that in the 1970's. The average rate of money growth in the 1970's has been 7 or 8 percent. We have had loose money. We have had an expansionary policy, not a tight money policy.

The point is that the fact of simultaneous high inflation and high unemployment, the stagflation problem we are addressing in this bill, is not explained at all by the notion that we have had high interest rates or tight money, because we have not; but what it is explained by, is shown in this chart right here. There has been a substantial increase in the tax burden on the economy, but particularly there has been an enormous increase in the marginal rates on procedures and investors in this economy.

I think many of the Members are familiar with the numbers, but let us look at them specifically.

In 1965, we were taxing 29 percent of our national income. Today we are taxing at about 37 percent. That is a substantial increase in the tax burden on economic activity in just one decade. If we look at it more specifically in terms of marginal rates, that is where the tax burden really has impact on determining people's economic activities, the case is even more dramatic.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(By unanimous consent, Mr. STOCKMAN was allowed to proceed for 2 additional minutes.)

Mr. STOCKMAN. Mr. Chairman, in 1965 if we put this in constant dollars and constant purchasing power, in 1965 you did not get the 50-percent marginal rate on the income tax until you were earning $104,000 a year. Today in 1978 you get to the 50-percent bracket, where 50 cents of each new dollar you earn is taken away, at $42,000. That is how much the marginal rates have increased in just 10 years, from $104,000 to just $42,000.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. STOCKMAN. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, the gentleman is making an extremely important point in answering the gentleman from Texas, Mr. WRIGHT is suggesting we are trying to mandate lower rates. He is right, because right now the Congress is mandating higher taxes and higher rates. If you do not vote the lower rates, you are mandating high rates, so you have only one choice, between high and lower rates.

Mr. STOCKMAN. The steadily increasing tax rates in the economy have reduced the supply of goods and services available; that has caused higher inflation and that has reduced the rate of investment.

It slowed down the rate of productive growth, and that caused an increased import penetration into our market and fewer domestic jobs.

So the point is that if we want fuller employment in this country, we should include in the bill a policy goal of dealing with that one factor, that one dynamic source—rising marginal tax rates—which I think is responsible for the problems we have today.

Mr. WAGGONNER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendments.

Mr. Chairman, I want to say that I agree in principle with everything this amendment proposes to do. There is no doubt but that we should try to reduce individual and corporate rates.

There is much more to be achieved by reducing individual and corporate rates than there is by employing some of the gimmickry which we utilize in the code today. It would leave dollars in the productive sector that we here in Congress are prone to place in the consumptive sector. We badly need more capital for investment.

But who here today among us has the wisdom to do what this amendment proposes? None of us do. We should not cause the people to believe taxes will be reduced when they might not.

As I understand it, the purposes of the amendment are threefold: First of all, for 3 years they would reduce the personal rate 10 percent a year—and that would be over a period of 3 years—looking toward a median term goal. Another purpose would be to reduce the corporate rate 1 percent a year for 3 years. The amendment provides, third, for an immediate increase in the surtax exemption to $100,000.

I would hope that this could be done. I happen to be one of the Members of this House who was not expected to vote for the Kennedy rate reduction proposal, as it was often referred to, during President Kennedy's administration. However, I thought it made sense. I know now that it did make sense. But that judgment then was based upon circumstances which existed at that point in time. I cannot see 3 years ahead.

For example, let us say this Congress enacts the administration's present tax proposal it has recommended, offering personal tax reductions to us. If that happens, by the judgment and in the opinion of the administration itself, including the Treasury Department, we are going to take 6 million taxpayers off the tax rolls. How long can we continue to increase the burden on some by removing others from the rolls?

How many more taxpayers would we take off the tax rolls if we went full speed ahead and reduced rates by 30 percent over a period of 3 years? I do not know. I really do not know, and I do not believe anybody else does.

I am simply saying to you that the principle is good, but those judgments must be made at a specific point in time, giving consideration to what the circumstances of the economy are at that time. They are tax judgments which must be made, giving consideration to the circumstances which surround our economy at that particular point in time. We cannot make those judgments now. If we did, we would create a greater uncertainty and more doubt in the economy by saying now that it is the goal of the Congress to reduce taxes or personal tax rates by 30 percent over the next 3 years than we would if we made those judgments as the judgments need to be made.

We cannot make such judgments this far in advance. Why should we mislead the people into thinking something is going to happen that may not happen? This bill is intended to establish goals; not the details of how we achieve those goals.

Mr. Chairman, to me as a member of the Committee on Ways and Means, this does not pose a problem. I am not going to be here next year; I am not seeking reelection. Let me tell you though, what this does remind me of—and I resent it—it reminds me of the efforts of the Democratic caucus to dictate to me as a member of the Committee on Ways and Means what I should report out in the way of legislation. I resent that sort of thing. It is contrary to the principle of representative government.

We should make these judgments as we take the individual matters up. I would resent—and I do resent it now—having to be guided by some provision made this far in advance. I agree with the goal but I have an honest procedural disagreement.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. WAGGONNER. I am happy to yield to my friend, the gentleman from New York.

First, let me say again that I do not have any disagreement with him, except that I believe we should make the judgments at some other point in time.

Mr. KEMP. Mr. Chairman, I recall the gentleman said he was here at the time and voted for this in 1963 and 1964.

Mr. WAGGONNER. And it worked.

Mr. KEMP. I agree and that is why we are phasing it in while it was done in just 1 year under President Kennedy.

Why does the gentleman suggest that this would be that much of a trauma to the economy?

Is it not true that we were raising more revenue, but we were raising it with lower tax rates and a larger tax base?

And all I am trying to do and all this amendment seeks to do is to expand the productive capacity of the American economy.

I would like to note that Mr. Walter Heller, chairman of the Council of Economic Advisers under President Kennedy recently testified as to the effect of the Kennedy tax cuts on tax revenues. As he said before the Joint Economic Committee:

> What happened to the tax cut in 1965 is difficult to pin down but insofar as we are able to isolate it, it did seem to have a tremendously stimulative effect, a multiplied effect on the economy. It was the major factor that led to our running a $3 billion surplus by the middle of 1965 before escalation in Vietnam struck us. It was a $12 billion tax cut which would be about $33 or $34 billion in today's terms, and within one year the revenues into the Federal Treasury were already above what they had been before the tax cut. . . . Did it pay for itself in increased revenues? I think the evidence is very strong that it did.

Mr. WAGGONNER. The purposes of the amendment are completely noble.

The CHAIRMAN pro tempore. The time of the gentleman from Louisiana (Mr. WAGGONNER) has expired.

(By unanimous consent, Mr. WAGGONNER was allowed to proceed for 1 additional minute.)

Mr. WAGGONNER. Mr. Chairman, what I am saying to the gentleman is

simply this: I do not believe any of us have the foresight at this point in time to say what tax rates ought to be, not knowing what the state of the economy will be that far out in advance.

Mr. KEMP. If the gentleman will yield further, what does the gentleman think would happen in America today, if we told the people that in the future those men and women of ambition, those men and women in investment and entrepreneurial activity, those men and women who are working, if we told them they would have an increase in their after-tax income?

Mr. WAGGONNER. I think the same thing would exist with those people that exists with other people today when we pass authorizations here authorizing programs with a certain amount of money, and the Committee on Appropriations does not give it to them. They say, "It is authorized. We want full funding." They say, "You said you were going to cut taxes 10 percent. Where is it this year?"

I think that is the end result of it. It is a tax judgment which must be made at a point in time, giving consideration to the economic circumstances at that time.

Mr. HAWKINS. Mr. Chairman, I ask unanimous consent that all debate on title I and all amendments thereto terminate at 5:45 p.m.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from California?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, may I ask how many amendments are pending at the desk at this time?

The CHAIRMAN pro tempore. The Chair would like to advise the gentleman from Maryland (Mr. BAUMAN) that there are 15 amendments pending at the desk.

Mr. BAUMAN. To title I alone?

The CHAIRMAN pro tempore. The Chair, of course, does not know as to whether or not they will all be offered.

Mr. BAUMAN. Mr. Chairman, under those circumstances I think that is a totally unreasonable request.

Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Mr. HAWKINS. Mr. Chairman, I move that all debate on title I and all amendments thereto terminate at 5:45 p.m.

Mr. Chairman, may I say that, while there seem to be a great number of amendments at the desk, my estimate is that at least seven of them will be accepted, certainly on this side, most of them, and half of those amendments are amendments from the other side. So that reduces it to only three or four specific amendments. I do not think that the number is quite as large as the gentleman would seem to think.

Mr. Chairman, I therefore make the motion to terminate all debate on title I and all amendments thereto at 5:45 p.m.

The CHAIRMAN pro tempore. The question is on the motion offered by the gentleman from California (Mr. HAWKINS).

The question was taken; and the Chairman pro tempore announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN pro tempore. The Chair will count. Sixty-nine Members are present, not a quorum.

The Chair announces that pursuant to rule XXIII, clause 2, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN pro tempore. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN pro tempore. The pending business is the demand of the gentleman from Maryland (Mr. BAUMAN) for a recorded vote.

Does the gentleman from Maryland insist upon his demand?

Mr. BAUMAN. I do, Mr. Chairman.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 237, noes 170, answered "present" 1, not voting 26, as follows:

ANSWERED "PRESENT"—1

Jacobs

NOT VOTING—26

Anderson, Ill.	Evans, Colo.	Metcalfe
Buchanan	Heckler	Murphy, N.Y.
Burton, Phillip	Holland	Rahall
Collins, Ill.	Krueger	Robinson
Cornwell	McKay	Roncalio
Dodd	Mahon	Santini

Simon	Thornton	Wylie
Steed	Tucker	Young, Tex.
Teague	Wiggins	

Messrs. COCHRAN of Mississippi, HORTON, MADIGAN, SCHEUER, LUJAN, FOUNTAIN, and McCLOSKEY changed their vote from "aye" to "no."

So the motion was agreed to.

The result of the vote was announced as above recorded.

PARLIAMENTARY INQUIRY

Mr. BAUMAN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state the parliamentary inquiry.

Mr. BAUMAN. Mr. Chairman, am I correct in my understanding that at the conclusion of the 45 minutes of debate that is remaining any amendments that have been printed in the RECORD prior to this date allow the Member to have 5 minutes of discussion today and 5 minutes for the opposition?

The CHAIRMAN pro tempore. The gentleman from Maryland is correct.

Mr. BAUMAN. Further, Mr. Chairman, if a motion were made for the committee to rise at that time, those amendments would still be under the limitation tomorrow?

The CHAIRMAN. The gentleman is correct.

Mr. BAUMAN. Further, Mr. Chairman, would amendments printed in the RECORD tonight to title I also be in order tomorrow?

The CHAIRMAN. The gentleman is again correct.

The Chair now recognizes the gentleman from Missouri (Mr. COLEMAN).

Mr. COLEMAN. Mr. Chairman, the arguments that have been set forth today are that we cannot cut taxes because we would create a bigger deficit in our budget, and then when we try to balance the budget, we are told we are going to create unemployment.

We have unemployment in this country because we do not have the investment capital to create jobs and put people to work. The reason we do not have the investment capital is because of high taxes.

It seems to me that this whole argument goes in one big circle. If the Congress does not stand and take firm action on this amendment, we are going to miss a fine opportunity.

It was said earlier that we are being asked in this Congress to make commitments to lower taxes in the future, regardless of what the economic situation might be. Let me suggest the we have already been called upon to make decisions regarding commitments on taxes in the future when this House raised taxes to fund the Social Security System for the next 10 years. The Congress did this not knowing what the economic circumstances might be in the future.

Mr. Chairman, I would like to congratulate the gentleman from New York (Mr. KEMP) for his leadership and his work on this particular amendment, and offering us this opportunity of lowering taxes in order to get this country moving economically.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Chairman, this amendment that has been offered would be bad tax policy in a tax bill. In this bill it is not only bad tax policy, it is extremely bad procedural policy. It does not belong here under any circumstances.

We are hearing from 400 witnesses now on basic tax reform, and that includes all the subject matters covered here. The committee will deliberate on these matters and will bring the Members a tax program that will give us the kind of incentives we need.

Mr. Chairman, I urge the Members of this body to reject this amendment and to follow orderly procedures in adopting tax policy.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, I wholeheartedly support the Quie amendment.

I am a cosponsor of this measure which was introduced as a bill earlier in this Congress.

This amendment recognizes the basic problem with our economy today—overburdensome high taxes that have been imposed upon the American people as the result of irresponsible Government spending and Federal deficits.

Both American taxpayers and the American productive enterprise sector need a tax cut and tax incentives for expansion in the productive sector of our economy.

This will create the jobs and reduce the unemployment, as envisioned in the goals of the Humphrey-Hawkins bill.

But the Quie amendment is a real solution, which will result in the creation of real jobs.

The Humphrey-Hawkins bill is a public jobs bill which will be funded by the imposition of even more burdensome taxes on the working men and women of our country—further suffocating their productive capacity.

Mr. Chairman, the respected Arizona businessman and banker, Sherman Hazeltine, has brought to my attention an excellent analysis of the basic error of the Humphrey-Hawkins approach to reducing unemployment, and the genius of the Kemp approach to creating jobs, which many of us support instead.

The analysis was written by Norma Pace, senior vice president and chief economist of the American Paper Institute, Inc.

Norma Pace states in part:

More investment in job creation is needed and this requires a better investment climate. Taxes are burdensome and should be reduced to encourage private spending and investment. If companies were convinced that their businesses would expand in the year ahead—and reduced taxes will help assure them of such growth—aggressive manpower recruitment and training programs would be undertaken.

A tax cut and tax incentives for economic growth and job creation in the private productive sector of our economy is what the Quie amendment is all about. Who would deny the American people the economic solution that it will provide by voting against a tax cut for the American people—or tax incentives for private investment?

Mr. Chairman, I urge adoption of the Quie amendment.

Mr. Chairman, the brief analysis by Norma Pace of the error of the Humphrey-Hawkins approach to which I referred is included in the RECORD, as follows:

SUMMARY STATEMENT ON HUMPHREY-HAWKINS BILL (H.R. 50)

(By Norma Pace)

An economic system ought to provide job opportunities for all who wish to work. That is why the Humphrey-Hawkins bill has such a nice sounding ring to it. It promises full employment in precise statistical measures; it is concerned with price stability and worries about urban problems as well as those of the chronically unemployed. So why should anyone even question such a worthy piece of legislation?

Looking at the practical aspects of this legislation, however, one finds that it simply cannot deliver what it promises.

1. It sets an unrealistic target of 3 percent unemployed for adults (individuals over 20) and 4 percent for the total population to be achieved within a five year period. The problem with the target is that the low figures ignore the realities of the composition of the present labor force. The current large inflow of work seekers is in part the echo of the early Post World War II baby boom, and in part results from the larger participation of women and minorities in the labor force. Despite the bulge in the size of the labor force last year, the economic recovery reduced unemployment by 1.1 million people. About 4.1 million more people were employed at the end of 1977 than at the beginning of that year.

With the larger participation of women and minorities in the labor force expected to continue, it is more difficult to project changes in the labor force than before. So how can one plan for a specific number when that number cannot be predicted with a reasonable accuracy? More significantly, the discretionary aspects of the present mix of unemployed people makes an evaluation of appropriate policies difficult. Do women want to work full-time or part-time? What jobs would they like to have and at what pay?

While a system should provide opportunities for all who wish to work, it cannot guarantee a job for all who wish to work under his or her own conditions.

A numerical target must take account of these nuances in the quality of unemployment if it is to be realistic. Such minute adjustments are not possible.

2. The existence of an unrealistic target will be frustrating. The target creates an expectation of fulfillment, an expectation that cannot be met with the economic tools now available. It will focus attention on a statistic rather than performance. Furthermore, as it becomes apparent that the numerical goal is not being reached, more government action will be called for. Harmful trade-offs can result as the Administration and Congress seek quick ways to meet the targets.

3. It creates distortions in wage rates, with the government determining the wage rates as well as the job opportunities for millions of people who cannot find the jobs they want in the private sector.

4. It will prove to be inflationary. The government will be forced to make decisions that involve a trade-off of inflation for what it considers equity.

The solution to the problems raised in the Humphrey-Hawkins bill is basically a two-fold one:

1. More investment in job creation is needed and this requires a better investment climate. Taxes are burdensome and should be reduced to encourage private spending and investment. If companies were convinced that their businesses would expand in the year ahead—and reduced taxes will help assure them of such growth—aggressive

manpower recruitment and training programs would be undertaken.

Regulations should be made compatible with growth. Many of our important government regulations are tuned in to the philosophy of sharing scarcity and taxing output. Why should industry plan for growth or more jobs in this climate?

2. A better focus on some of the structural problems in unemployment is urgently needed. Overall teenage unemployment, now a major part of total unemployment, will probably ease after 1981 when the number of teenagers grows more slowly. In the meantime, the steady increase in the labor cost of teenagers built-in by the rising minimum wage and advancing payroll taxes acts as a deterrent to aggressive hiring of youths. The proposed programs of job credits and wage subsidies are expensive and can lead to abuse. Waiving the minimum wage for teenagers and substituting more liberalized tax treatment for their earnings may be a way to encourage more employment of teenagers.

But minority unemployment has remained "sticky" and needs special attention. The varied and profuse programs now in existence should be coordinated under two policy groups, one centered in the Administration and one in the White House. This would improve the efficiency of the individual programs as well as communication.

Finally, there is merit in having one monitoring agency that coordinates and summarizes the monitoring activities now performed by many disparate groups in the federal government. This would minimize conflicts and result in an orderly flow of actionable information.

In short, the passage of this bill will clearly reveal that the tools for meeting the full employment target do not exist; that forcing the economy to overperform will result in actions that would retard the higher confidence so badly needed in the private sector to achieve growth, job opportunities and a better standard of living in the U.S. Why fool the American public?

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Minnesota (Mr. QUIE).

Mr. QUIE. Mr. Chairman, what we have noticed in our economy is this—and we can see it on that chart we have before us—we have had rapidly increasing taxes that have brought about a lack of capital accumulation that is necessary to provide the jobs needed in our economy.

More jobs are needed at this time, a time when we have such a huge increase in the number of people coming into their employable years. When we consider the fact that we reached a peak in births in 1959, (4.3 million in 1959, 3.1 million births now) we see that those individuals are 19 years of age this year. It will be necessary to provide job opportunities for them.

It takes about $25,000 to create a job. How are we going to get the capital so that all the young people can find jobs in the private sector of our economy?

I think it behooves us to make a move in this direction, and that is what this amendment provides, through a reduction in taxes.

A reduction in taxes will enable the people to offset the increases brought about by inflation, and in this way there will be something that the people can retain for investment purposes and thereby provide jobs for the people who are coming into their employable years.

Mr. Chairman, when we examine this legislation, we find it does not provide new programs or give any hope for improved employment. This would at least give us some hope that these jobs will be available to the people.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. MARKS).

PARLIAMENTARY INQUIRY

Mr. MARKS. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state it.

Mr. MARKS. Mr. Chairman, I have an amendment at the desk to title I. It has been printed in the RECORD. My understanding is that I will have 5 minutes tomorrow.

The CHAIRMAN pro tempore. The gentleman from Pennsylvania is correct—unless we reach the gentleman's amendment tonight.

Mr. MARKS. I thank the chairman.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Vermont (Mr. JEFFORDS).

(By unanimous consent, Mr. JEFFORDS yielded his time to Mr. LIVINGSTON.)

Mr. LIVINGSTON. Mr. Chairman, this amendment before the House is extremely important. We have been talking about unemployment over the last few days and it seems to me that this particular amendment is one of the few items which has been suggested that makes sense for solving the very serious problem of unemployment. This particular amendment will create more spendable income through the saving of taxes for every working person throughout this country. That spendable income will enable them to spend more money for goods and services for their families. The increased demand will in turn mean that more goods and more services will have to be produced. If more is produced, more people will be employed, fewer people will be on the unemployment lists, and fewer people will be on the welfare lists. In my opinion, the free market should be given a chance to work. Adoption of this amendment will go far toward relaxing the ties that are strangling this economy.

Mr. Chairman, I urge the Members of this body to accept this amendment.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, I would like to clear up the impression that has been given by the chairman of the Committee on Ways and Means that somehow this type of a goal for a so-called full employment bill is not consistent. We are simply saying as an interim goal that by 1981 the Congress will lower the tax rates of the American people by 30 percent to help foster full employment without inflation.

The second point I want to clear up is that we are not lowering tax revenues by 30 percent. We are reducing the tax rates. We are increasing the after-tax reward for working, saving, and investing, and by doing so we are getting an expanded tax base that will not lead to a revenue loss. Indeed, it will lead to a revenue gain because economic output and growth are encouraged.

Another point I would like to make is that 4 times in this century we have had dramatic reduction in taxes and tax rates. In the 1920's, under President Harding and under President Coolidge; in 1946, under President Truman; in 1952, under President Eisenhower; and in 1963 and 1964, under President Kennedy. It is not a radical, Republican, conservative approach, nor is it a Keynesian liberal approach. It is not Keynesian because it works on the supply and productive side of the economy not just the demand side.

Mr. Chairman, I ask the support of my colleagues.

The CHAIRMAN pro tempore. The Chair would like to inquire again whether, in addition to those Members who appear on the list, there are other Members who would like to speak on the Quie amendment.

The Chair recognizes the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, this particular amendment takes Humphrey-Hawkins out of Humphrey-Hawkins. It removes the very heart of the legislation by striking the sentence which states that the goal of our national employment policy, as established by the Congress, will be fulfillment of the right to full opportunities for gainful and productive employment. It is contrary to the legislation and it will make our efforts over the last few days—and over the last couple of years—a total farce.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. Mr. Chairman, I oppose this amendment because it is a means to an end instead of an end. The original Humphrey-Hawkins legislation bothered some people because it guaranteed the people of this country a job. This amendment would guarantee the people of this country a tax cut. The discussion has been interesting, but it is irrelevant. The discussion should take place on this floor when the tax cut legislation, which is now before the Committee on Ways and Means, reaches this floor. Then it will be relevant. Then it will be appropriate. It is not today. It does not belong in this bill.

The CHAIRMAN pro tempore. The Chair now recognizes the gentleman from Ohio (Mr. ASHBROOK).

(By unanimous consent, Mr. ASHBROOK yielded his time to Mr. KEMP).

Mr. KEMP. Mr. Chairman, I appreciate my friend's yielding.

I was interested in the remarks of my colleague, the gentleman from New York, who said that this amendment guts the Humphrey-Hawkins bill.

Mr. Chairman, this does not gut the bill. This complements the bill.

As President Kennedy said so many times, "The main block to full employment is an unrealistically heavy burden of taxation."

Mr. Chairman, is it not conceivable to the gentleman from New York today that the tax rates on the people of New York State and the tax rates at the Fed-

eral level on their incomes are combining to discourage investment and savings and thrift and work in that State and throughout the country?

We are not trying to gut the bill. We are trying to complement it.

The only way to reach full employment without inflation is to increase the reward for the expansion of the economy, to increase the reward for production, to increase the reward for savings and for investment. New Yorkers are, per capita, in nominal income brackets higher than 42 or so other States, but after taxes and cost of living their net disposable incomes are 45th or 46th in the United States. Lowering taxes will, dollar for dollar, help New York the most.

Mr. Chairman, I would suggest that that is the purpose of this amendment to help New York and New Yorkers and any attempts to suggest contrary purposes are completely irrelevant and totally false.

The CHAIRMAN pro tempore. The Chair now recognizes the gentleman from Connecticut (Mr. SARASIN).

Mr. SARASIN. Mr. Chairman, I rise in strong support of the Kemp amendment.

I think all of the comments made here today are absolutely correct; and if we do intend to put people back to work and use this bill as a vehicle for that purpose, then the Kemp amendment is complementary and not inconsistent.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I thank the gentleman for yielding.

There is one other point that must be made in this debate.

Our distinguished majority leader, the gentleman from Texas (Mr. WRIGHT), said that we are attempting to mandate lower tax rates.

I want my colleagues to recognize that the author of the amendment agrees with the assessment of the gentleman from Texas (Mr. WRIGHT). The gentleman is right. We are trying to mandate lower tax rates because the mandate now in the Congress, with the heavily and steeply graduated, progressive income tax rates, is to raise those rates by about 50 or 60 percent or so in the next 10 years unless we do something about it now.

Therefore, Mr. Chairman, the Kemp amendment does mandate lower tax rates as a goal, and, I would suggest, as a proper goal, just as trying to achieve full employment, to balance the budget, and to lower inflation are proper goals.

As for huge deficits predicted by those who think in static economic and Keynesian terms let me say that it is patently absurd to suggest that lower tax rates means lost revenues particularly at the level suggested by the majority.

Because of this increase in employment and GNP, Government tax revenues will increase also. Indeed, within a short time the Government will be collecting more tax revenues than it would have in the absence of a tax cut, because the tax base itself will be expanded. This is exactly what happened following the Kennedy tax rate reduction, as this table demonstrates:

Treasury estimated revenue losses:	
1963	−2.4
1964	−5.2
1965	−13.3
1966	−20.0
1967	−23.7
1968	−24.4
Total	−89.0
Actual revenue gains:	
1963	+7.0
1964	+6.0
1965	+4.0
1966	+14.0
1967	+19.0
1968	+4.0
Total	+54.0

No objective economist reviewing this history can fail to come up with the same conclusion we reluctantly came to: The best economic record of any Government in the past 26 years was under John F. Kennedy, from 1960 to 1965. During this period, which included one Eisenhower budget and four Kennedy budgets:

Real investment growth was the highest in modern history.

Inflation was the lowest in modern history.

Real industrial output growth was the greatest of any period.

Money supply grew less 60 percent as fast as output.

Real disposable income grew the fastest.

Government spending grew the least.

In short, the period from 1960 to 1965 was the fiscal conservative's dream economy—with capital investment growing very fast, real output more than keeping pace, while Government spending was very modest, and the money supply was under tight control. Both workers and consumers benefited with good wages and stable prices.

The CHAIRMAN pro tempore. The Chair now recognizes the gentleman from Delaware (Mr. EVANS).

Mr. EVANS of Delaware. Mr. Chairman, when facts are available upon which to base a decision, I think one should take a look at those facts.

The facts are that back in the early 1960s a Democratic President, President Kennedy, proposed a tax reduction. That tax reduction worked, and it moved our economy forward. This particular amendment parallels what was done at that particular time.

Mr. Chairman, we need to encourage savings; we need to have more permanent jobs. We cannot have permanent jobs without capital formation.

The CHAIRMAN pro tempore. The Chair now recognizes the gentleman from Ohio (Mr. MILLER).

Mr. MILLER of Ohio. Mr. Chairman, I support the Quie amendment that is now before us.

I believe this amendment is one of the most important items we will take up in this entire bill. An across-the-board tax cut for all Americans is one of the best ways to create the capital the private sector needs to end unemployment.

Today it costs more than $30,000 to provide one manufacturing job in American industry, double what it cost 10 years ago. How is the economy going to form the capital to create the new jobs our country will need if the Government keeps taking more and more money, through taxes and inflation, out of the private sector?

The government, consisting of Federal, State, and local, claimed 42 percent of the national income in 1976. No wonder we have an unemployment problem.

Based on statistics from the U.S. Department of Commerce's national income and products accounts, over the past 10 years the average wage in this country has risen 77.3 percent. During the same period inflation was 75.4 percent. It appears then that wage earners kept ahead of inflation, if but barely, until you look at what has happened to their taxes. During this 10-year period the tax burden rose 144 percent. Last year Americans spent $16.7 billion more in taxes than they spent on food, clothing, and housing combined.

Mr. Chairman, by reducing the tremendous burden of taxation on the American people and increasing the aftertax reward for work and investment, the Government will be encouraging the real output of goods and services thereby stimulating the economy and creating more jobs.

The CHAIRMAN pro tempore. The Chair now recognizes the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, in the colloquy in the Joint Economic Committee which the gentleman from Michigan (Mr. BROWN) and I had with Secretary Blumenthal, we asked him this question:

> If you take into account these marginal tax rate increases, the Social Security increases that were passed by the Congress in December, and the President's proposal for tax reductions amounting to $25 billion, what will the average family income be where the family will be paying more in taxes in 1979 rather than less?

The answer was $17,000, which will be the median family income. Above that, in 1979 everybody will be paying more in taxes. Below that—and that includes people having no family income whatsoever, people who are merely the recipients of the social programs that the country offers them—below that, there will probably be some tax reductions or the same tax.

Mr. Chairman, that is what we face. Everybody above the median family income in this country in 1979 will be paying more taxes, even with the President's $25 billion proposed tax cut.

Mr. Chairman, we need this tax cut, and I support this amendment.

The CHAIRMAN pro tempore. The Chair would like to inquire again, are there Members on the list whose names were called who desire to speak on the Quie amendments?

If not, the Chair will put the question on the Quie amendments.

The question is on the amendments offered by the gentleman from Minnesota (Mr. QUIE).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. QUIE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 194, noes 216, not voting 24, as follows:

[Roll No. 155]

NOT VOTING—24

Anderson, Ill.	Maguire	Roncalio
Buchanan	Mahon	Teague
Collins, Ill.	Metcalfe	Thornton
Delaney	Murphy, N.Y.	Tucker
Dodd	Patten	Ullman
Erlenborn	Rahall	Whitten
Holland	Risenhoover	Wiggins
Krueger	Robinson	Young, Tex.

The Clerk announced the following pairs:

On this vote:

Mr. Krueger for, with Mr. Murphy of New York against.

Mr. Buchanan for, with Mr. Metcalfe against.

Mr. Erlenborn for, with Mrs. Collins of Illinois against.

Mr. Robinson for, with Mr. Risenhoover against.

Mr. Wiggins for, with Mr. Rahall against.

Mr. Teague for, with Mr. Patten against.

Mr. Whitten for, with Mr. Delaney against.

Messrs. MILFORD, ROBERTS, and MATHIS changed their vote from "no" to "aye."

So the amendments were rejected.

The result of the vote was announced as above recorded.

FURTHER LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RHODES. Mr. Chairman, I take this time to inquire of the distinguished majority leader as to the program for the balance of the day and the balance of the week.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. RHODES. I yield to the gentleman.

Mr. WRIGHT. I thank the gentleman for yielding.

I think surely it would be the desire of everybody on both sides of the aisle to finish this bill tomorrow and not have to have it on Friday.

Friday is March 17.

Therefore, if it is agreeable with the Members, I will ask unanimous consent that we come in at 10 o'clock tomorrow, finish this bill tomorrow, and perhaps have only a pro forma session on Friday.

Mr. RHODES. Is it necessary to have a pro forma session on Friday? I certainly am in accord with finishing the bill on Thursday, but I do not see the necessity for a pro forma session on Friday. It is not apparent; maybe the gentleman can make it apparent.

Mr. WRIGHT. Well, we are operating upon the assumption that a pro forma session never hurt anybody.

Mr. RHODES. Mr. Chairman, is the majority leader saying there will be no votes and no quorum calls on Friday?

Mr. WRIGHT. Mr. Chairman, if the gentleman will yield further, I believe we might find general acceptance for no session of any kind on Friday, assuming we finish this bill tomorrow.

Mr. Chairman, when the appropriate time comes I will ask unanimous consent that when we adjourn today, we shall come in at 10 o'clock tomorrow.

It would be our intention to pursue this pending bill to conclusion tomorrow, and if we can accomplish that, we would not come in on Friday at all. Thus insuring a happy St. Patrick's Day for all.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, I get the feeling that we are about to wrap up the day's business. I would like to make sure that those of us who have amendments pending to title I of the bill will be protected and we will not go over to title II automatically.

Mr. WRIGHT. Mr. Chairman, if the gentleman will yield, all pending amendments will be voted on presumably tomorrow as the first business. Any of them that are in the RECORD will be entitled to all the rights to which they are normally entitled under the rule adopted earlier providing for 10 minutes of debate each.

Mr. RHODES. Mr. Chairman, I assume there would be no debate on amendments which will go over until tomorrow.

Mr. WRIGHT. Mr. Chairman, if the gentleman will yield further, the gentleman is correct, except as otherwise stipulated under the rule, because all debate will have concluded on title I in approximately 4 or 5 minutes.

AMENDMENT OFFERED BY MR. SKELTON

Mr. SKELTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SKELTON: Page 71, lines 6, 9, and 11, redesignate subparagraphs (E), (F), and (G) as subparagraphs (F), (G), and (H) respectively, and immediately after line 5 insert the following new subparagraph:

"(E) proper attention to the relationship between foreign imports and unemployment in the United States;".

Mr. SKELTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is

there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. SKELTON. Mr. Chairman, my next door neighbor is an auto worker who works in the Kansas City area. On the rear bumper of his automobile is a bumper sticker that says, "Buy a foreign car and put 10 Americans out of work."

Versailles is in the eastern part of my district in the Ozarks area. There is a shoe factory that just shut down because of foreign imported shoes.

Mr. Chairman, I think in this bill we should address one of the main causes of American unemployment and that is nothing else than foreign imports. The amendment that I have offered and I hope will be adopted requires that the national priority policies and programs contained in the President's first economic report include proper attention to the relationship between foreign imports and unemployment.

In this bill which has as one of its goals full employment, it is necessary that the factor of imported products be considered in formulating policies and programs to achieve this goal.

For instance, imported foreign cars have increased from 1966 to 1976, by over 600 percent. Shoe imports are up, during this same period, over 700 percent. Clothing imports are up in excess of 400 percent. Steel imports have doubled. Beef and dairy products from foreign countries have hurt the cattle industry and dairy farmers, When farmers' prices are down, they are less able to purchase new tractors, new trucks, or other products manufactured in America.

It is high time we addressed this problem of imports causing job layoffs in this country. My amendment will address this problem and require proper attention to the relationship between foreign imports and unemployment.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, we have seen this amendment. We agree with it and accept it on this side.

Mr. SARASIN. Mr. Chairman, my understanding of the amendment is that it would simply require the President to pay attention to the problem of foreign imports. We certainly have no objection to that part of it and would accept it on this side.

PARLIAMENTARY INQUIRY

Mr. GARY A. MYERS. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state his parliamentary inquiry.

Mr. GARY A. MYERS. Mr. Chairman, has the Chair ruled that all debate time has been eliminated, or do we still have time to speak against the pending amendment?

The CHAIRMAN pro tempore. The Chair will advise the gentleman that all debate has ended as of 5:45 p.m.

Mr. GARY A. MYERS. I thank the Chair.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Missouri (Mr. SKELTON).

The amendment was agreed to.

Mr. HAWKINS. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 50) to establish and translate into practical reality the right of all adult Americans able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to combine full employment, production, and purchasing power goals with proper attention to balanced growth and national priorities; to mandate such national economic policies and programs as are necessary to achieve full employment, production, and purchasing power; to restrain inflation; and to provide explicit machinery for the development and implementation of such economic policies and programs, had come to no resolution thereon.

REPORT ON RESOLUTION PROVIDING FOR EXPENSES OF INVESTIGATION AND STUDY BY COMMITTEE ON INTERNATIONAL RELATIONS

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–966) on the resolution (H. Res. 996) to provide funds for the expenses of the investigation and study authorized by a resolution adopted on February 3, 1977, by the Committee on International Relations, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FUNDS FOR AD HOC COMMITTEE ON ENERGY

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–972) on the resolution (H. Res. 1051) providing funds for the Ad Hoc Committee on energy, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FUNDS FOR AD HOC SELECT COMMITTEE ON THE OUTER CONTINENTAL SHELF

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–970) on the resolution (H. Res. 1045) providing funds for the Ad Hoc Select Committee on the Outer Continental Shelf, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FUNDS FOR SELECT COMMITTEE ON CONGRESSIONAL OPERATIONS

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–964) on the resolution (H. Res. 1045 providing funds for the Ad Hoc Select Committee on the Outer Continental Shelf, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FUNDS FOR COMMITTEE ON INTERNATIONAL RELATIONS

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–971) on the resolution (H. Res. 1047) providing funds for the Committee on International Relations for expenses incurred in connection with visits to the United States by foreign heads of state and other foreign officials and for similar expenses incurred for meetings with senior U.S. Government officials and other dignitaries to discuss matters relevant to U.S. relations with other countries, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR EXPENSES OF INVESTIGATIONS AND STUDIES BY SELECT COMMITTEE ON POPULATION

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–965) on the resolution (H. Res. 989) to provide for the expenses of investigations and studies to be conducted by the Select Committee on Population, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FUNDS FOR COMMITTEE ON POST OFFICE AND CIVIL SERVICE

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–969) on the resolution (H. Res. 1041) providing funds for the Committee on Post Office and Civil Service, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FUNDS FOR FURTHER EXPENSES OF INVESTIGATIONS AND STUDIES OF COMMITTEE ON SMALL BUSINESS

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–967) on the resolution (H. Res. 997) to provide funds for the further expenses of the investigations and studies of the Committee on Small Business, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FUNDS FOR EXPENSES OF INVESTIGATIONS AND STUDIES BY COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. THOMPSON, from the Committee on House Administration, submitted a

privileged report (Rept. No. 95–963) on the resolution (H. Res. 978) to provide funds for the expenses of the investigations and studies to be conducted by the Committee on Interstate and Foreign Commerce, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR EXPENSES OF INVESTIGATIONS AND STUDIES CONDUCTED BY COMMITTEE ON MERCHANT MARINE AND FISHERIES

Mr. THOMPSON, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–968) on the resolution (H. Res. 1000) to provide for the expenses of investigations and studies to be conducted by the Committee on Merchant Marine and Fisheries, which was referred to the House Calendar and ordered to be printed.

HOUR OF MEETING ON TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 10 a.m. on tomorrow, Thursday, March 16, 1978.

The SPEAKER pro tempore (Mr. McKAY). Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, is it the intention of the gentleman from Texas (Mr. WRIGHT) to set a time at which the House will conclude its business tomorrow, or will we stay until whatever hour is required to complete our business?

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the majority leader.

Mr. WRIGHT. Mr. Speaker, we will establish the time for adjournment upon the completion of consideration of the bill that has just been before the House and will be before the House tomorrow. We intend to finish that bill tomorrow.

Mr. BAUMAN. So we will stay in session until whatever hour is required?

Mr. WRIGHT. The gentleman is correct. And if we come in at 10 o'clock a.m., we will be through that much sooner.

Mr. BAUMAN. And may I ask the gentleman further, is my understanding correct that there will not be a Friday session?

Mr. WRIGHT. That is the case. Depending on the completion of consideration of this bill tomorrow, we will not come in on Friday.

Mr. BAUMAN. Mr. Speaker, I thank the majority leader, and I wish him a happy St. Patrick's Day.

Mr. WRIGHT. And the top of the day to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON AVIATION OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO MEET TOMORROW DURING 5-MINUTE RULE

Mr. ANDERSON of California. Mr. Speaker, I ask unanimous consent that the Subcommittee on Aviation of the Committee on Public Works and Transportation may be permitted to meet and continue markup sessions during the 5-minute rule tomorrow.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

HUMPHREY-HAWKINS—NO SOLUTION

(Mr. COLLINS of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. COLLINS of Texas. Mr. Speaker, as we continue our debate on the Humphrey-Hawkins spending bill, we must consider that this bill, backed by the administration, is designed to carry through on the President's campaign promises to reduce unemployment. H.R. 50 will actually increase inflationary spending, the main worry of Americans today. Last week Gallup survey found that inflation is of more concern to the American people than unemployment. Asked to cite the serious problems facing this country today, 35 percent of the public responded inflation which 24 percent responded unemployment. The New York Times recently called this bill a "Cruel Hoax." Although the Times editorial noted that there are numerous instruments to create jobs, the article went on to say—

> The riddle no one can answer is how to use these tools to drive unemployment down to the promised land of four percent without triggering worse inflation and, perhaps, an accompanying deep recession.

When has America experienced full employment? Only during wartime periods, and this is no answer to our current employment situation. How have the Communist nations achieved full employment? China has placed 80 percent of their working population on government farms, Cuba has done the same with 50 percent of their workers, while in America only 4 percent of the employed are farmers. That is the question I wish to address—the "hoax" this bill will play on the American taxpayer. You cannot have public employment without higher taxes which is the main cause of this country's current lack of capital. Somebody has to finance the money the Government spends. This debt falls on the shoulders of the private sector, usually through taxes, which add to the cost of production and the cost of living.

Like other major spending bills, tax dollars financing Humphrey-Hawkins would increase the available money supply above that of a parallel increase in goods and services, the major cause of inflation today. According to a Heritage Foundation Study, as a result of our Federal deficit and additional money added to the deficit by tne Federal Reserve Board, money supply rose by 55 percent during the period 1971–76 at a time when the output of goods and services grew by only 15 percent. The result was an increase in consumer prices of almost 40 percent. The Humphrey-Hawkins spending bill will add considerably to this ever-spiraling increase.

A major cause of the spending increase will be the "equal pay for equal work" clause in the bill which will double the minimum wage and place an additional hardship on private industry. Many private sector taxpaying workers will be earning less than the subsidized public service workers and this is unfair. According to the U.S. Chamber of Commerce, CETA jobs now cost more than $8,500. Two million more jobs would cost $17 billion in a budget which will be in deficit over the entire Humphrey-Hawkins program period. Another problem is the prevailing municipal wage which is paid under public jobs programs and is highly inflated in a large number of cities. Public service jobs do not provide workers with the skills they need to enter the private job market. There would be no incentive for them to leave Government subsidized work for jobs with private companies as long as they are overpaid for these political jobs.

The recurring urban policy in this country favors the Northeastern cities and H.R. 50 is no exception. Title II requires the President to set up programs to achieve the employment goals of the act—programs emphasizing public works, public service employment, skill training, community development, and youth employment.

Similar urban programs have discriminated against economically stable cities like those in my home State of Texas. These Government programs emphasize and encourage permanent unemployment. In the CETA programs, which establish similar public service jobs to the Humphrey-Hawkins proposals, many slots go unfilled because of the difficulty in locating persons who want to take part in the program. There are many who try to qualify, but do not fall below the poverty level or receive welfare payments or have been out of work for a specified amount of time. These limitations discriminate against cities which do not have the high unemployment or welfare rolls of the Northeast.

To receive the benefits of the Humphrey-Hawkins bill, private business will be encouraged to locate in regions of high unemployment. This follows the pattern of existing urban reform targeting the majority of Federal funds to "distressed" cities through "metropolitan renewal" strategies.

As the Humphrey-Hawkins spending bill comes to a vote, I urge my colleagues to consider the inherent problems of increased Government spending which will further confiscate the American taxpayer's income. We cannot take the taxpayer's money for a nonincentive, nonproductive program. A vote against this

bill is a vote for a stronger, economically sound America.

NO RATIONAL ARGUMENTS FOR THE NEW PANAMA CANAL TREATIES

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RUDD. Mr. Speaker, many arguments have been offered by proponents of the proposed Panama Canal treaties—with little justification—in their attempt to win ratification.

The biggest insult to our intelligence is the often used one that turning over the canal to Panama will be a valuable demonstration of how a big nation ought to treat a small nation, therefore endearing the United States to all other countries, particularly in Latin America. Not true.

By giving up our sovereignty and control over the canal under threat of riots and sabotage from Panama's military dictator, the United States will lose the respect and affection of all Latin Americans, who want strong U.S. leadership and presence in their part of the world.

William Rusher notes in his recent column from the Arizona Republic that there is no rational argument for the new treaties.

I include it at this point in the RECORD:

[From the Arizona Republic, Mar. 14, 1978]

BANKERS ARE BACKERS OF CANAL PACT

(By William A. Rusher)

NEW YORK.—An open letter to members of the Senate:

All signs indicate that you will soon ratify the Panama Canal treaties by slightly more than the necessary minimum of 67 votes.

Their proponents, realizing that certain amendments were essential if ratification was to be obtained, consented to two of them before the Senate Foreign Relations Committee even reported the treaties to the floor. Further amendments will be accepted if absolutely necessary, but test votes to date suggest that this may not be required.

It has been a strange business. In the first place, the controversy is almost wholly nonpartisan. It has fallen to President Carter to see the treaties through the ratification process, but if Gerald Ford had been elected instead, the treaties would only have been ratified more promptly, and by a substantially larger margin.

For many Republican senators now opposed to the treaties would have endorsed them out of loyalty to their president, while Democratic support would not have shrunk materially.

Still stranger is the fact that these treaties will be ratified in the teeth of what remains, to this day, the steadfast and articulate opposition of a solid majority of the American people.

It is not merely a matter of conservative opposition, though the treaties are indeed opposed by the overwhelming majority of conservative leaders and spokesmen. It is clear, however, that many independent-minded Americans of no definable idealogical predisposition also oppose these treaties.

Virtually every poll of public opinion has reported that opponents of the treaties significantly outnumber supporters, despite a lavishly financed effort to change their minds.

Yet the treaties will be ratified. This curious fact, so at variance with the usual Democratic assumptions—and at variance too with your own well-known disinclination to ignore public opinion when it is as vociferous as this—cries out for explanation.

We can dismiss the notion that the treaties have intrinsic merits that simply compel their ratification. They have been debated for several months now, and the best their apologists have been able to say for them is that their ratification will be a valuable demonstration of how a large nation ought to treat a small one, and will result in an uprush of affection for the United States on the part of Panama and Latin America generally.

I hope you will not insult the intelligence of the American people by expecting them to take such poppycock seriously.

It is precisely the absence of any apparent rational explanation for the clout behind these unpopular treaties that has tempted many people to blame them on "the banks." This explanation, while simplistic, is near enough to the truth to warrant a little discussion.

My own investigation indicates that various American banks are indeed up to their eyebrows in loans to the Torrijos regime. The debt service alone on Panama's foreign obligations consumes 39 percent of the country's annual budget, and repayment of the principal is quite out of the question unless the treaties are ratified and President Torrijos receives his windfall.

But the great majority of these loans—which were reckless enough to make Bert Lance look like a solid pillar of virtue—were made in and after 1973: Or, in other words, long after the treaty negotiations began, and at a time when they seemed certain of swift success. Torrijos' American bankers, in short, are indeed very much a part of the treaties' lobby; but they are accessories after, rather than before, the fact.

The true sponsors of the canal treaties are those members of America's international business community, who have important interests in Latin America: Interests on which surrender of the canal to Panama will lend to ease popular pressures. It is this broad bipartisan community, members of the Senate, whose complaisant servitors your vote for these treaties will reveal you to be.

No doubt there are worse disgraces; but do not assume that the American people will readily forgive, or soon forget, your cool disregard of their own clearly expressed wishes.

PARTISAN ACTION BY COMMITTEE ON HOUSE ADMINISTRATION ON FEDERAL ELECTION ACT AMENDMENTS

(Mr. BADHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BADHAM. Mr. Speaker, newspapers, television stations, and radio stations across the Nation are beginning to editorialize on the purely partisan action of the House Administration Committee on the Federal Election Act amendments. I am sure that our colleagues will be hearing from the media in their districts in the days and weeks ahead and I am equally sure that the chorus of editorial opinion will approach unanimity in opposition to blatantly partisan manipulation of the election laws of this Nation. Today I would like to share with my colleagues by printing in the RECORD at this point the editorial of the Los Angeles Times on this subject which was aptly entitled "In Front of God and Everybody."

[From the Los Angeles Times, Mar. 10, 1978]

IN FRONT OF GOD AND EVERYBODY

The Republican National Committee, which intends to mount a major challenge to Democratic incumbents, has $6 million in the bank to spend on this year's congressional elections. The Democratic National Committee, which has been floundering for want of guidance from President Carter, has only $1.5 million in reserve.

The prospect that the GOP might outspend his party 4 to 1 has sent House Speaker Thomas P. (Tip) O'Neill Jr. (D-Mass.) scurrying to his bag of stealthy political tricks. He is pushing hard for legislation that would scuttle the present maximum of $50,000 that a national party can contribute to one of its candidates for the House, and substitute a new limit of $15,000.

To protect his Democratic pals in the Senate, O'Neill proposes to halve the allowable party contributions to either incumbents or challengers.

Abracadabra! All shall be equal—except that the Democrats, already in power, shall be a little more equal.

If the Speaker and his band of Democratic footpads succeed in cutting the minority party off at the pockets, the GOP's energetic fund-raising will have been a waste of time, because none of its candidates would have more party funds than the Democratic incumbents or challengers.

Even O'Neill admits that his plot is baldly partisan. He points out that the GOP's hefty bank account was a factor in that party's victories in four of six recent special elections for congressional seats—and he intends to put a stop to it, by God!

O'Neill might have a little cause for worry, but certainly not for panic. Democratic incumbents in marginal congressional districts would, of course, be in greater peril if their opponents could count on greater bounty from the Republican National Committee.

But there is nothing at all marginal in the Democrats' overwhelming 2–1 majority in the House, where, apparently, the presence of even a single Republican is offensive to the Speaker.

We cannot imagine that O'Neill's clumsy attempt to change the rules on the eve of the congressional elections will pass either the House or the Senate, or that the President would sign it if it did.

But then we could not imagine either that a politician—even a survivor of the back-alley brawls of Massachusetts politics—would attempt to mug the opposition in broad daylight in front of the Capitol.

REMEMBERING OUR TAIWAN COMMITMENT

(Mr. DERWINSKI asked and was given permission to address the House for 1 minute.)

Mr. DERWINSKI. Mr. Speaker, of late, the People's Republic of China, (PRC) appears to be escalating its propaganda war against Taiwan. For example, Chairman Hua Kuo-Feng, speaking to the rubberstamp People's Congress, called upon the Chinese Army to "make all the preparations necessary for the liberation" of Taiwan. This threat, coupled with Peking's recent reward offerings of more than $2 million in gold to any Nationalist Chinese Air Force and/or Naval officer defecting to the Communist mainland, should give pause to those who continue to push for full diplomatic relations with the PRC at the expense of our allies on Taiwan.

I have never been able to comprehend why some feel there is such a great urgency to normalize our relations with

Peking. The best suggestion as to what our current posture should be was stated 12 years ago by that noted Sinologist, Prof. John K. Fairbank of Harvard University. At that time, as columnist John P. Roche recalled in a thoughtful Washington Star article entitled "Getting to 'Normal' with Peking" Professor Fairbank counseled that we should "relax on the issue of Taiwan and let the parties concerned work it out within the present framework, that is, with our 7th Fleet still patrolling the Taiwan Straits."

Policymakers within the administration must be continually reminded of the probable consequences of terminating a security pact with a longtime ally to garner favor with the Communist rulers. How would such a move be interpreted by our other friends in Asia and elsewhere whose economic and security interests are closely linked to ours? What, for example, would that say about the value of our defense commitments to Japan, South Korea, Israel, and our NATO allies? Many of these nations are already concerned about our ability and desire to come to their assistance in a time of need. Establishing relations with Peking at the expense of Taiwan will do nothing to allay those fears.

Given the foregoing, one must ask what we expect to gain from full diplomatic relations with the PRC that we could not have without sacrificing a treaty-tied relationship with Taiwan. The Washington Star, in a discerning editorial some months ago, provided the best answer I have seen yet to that question when it stated that—

> The final irony is that it's so hard to think of anything we will gain by abandoning Taiwan that we couldn't have without disavowing a long friendship and a lot of high-sounding pledges. Trade? The Chinese are as eager for it as the American companies. Good will in the Third World? Looking weak next to a large Marxist nation won't win us points with a small one. And abandoning allies under pressure never looks good to anybody.

In short, let us stop being so anxious to strike a lopsided deal with a paper tiger that has so little to offer in return.

Finally, and most importantly, we also must ask ourselves about the morality of negotiating an agreement that could lead to the consignment of the 17 million people on Taiwan to a way of life very few of them want. In view of its high-profile human rights policy, this administration should be especially sensitive to this aspect of the normalization question.

Our Nation played a major role in the development of Taiwan into what it is today—a viable State with a thriving economy. The human rights and economic situations on the mainland vis-a-vis those in Taiwan are like the difference between night and day. To accede to Peking's conditions for normalization, and thereby risk Taiwan becoming a province of a Communist country with an abysmal human rights record, would so undermine the credibility of the President's human rights campaign that it would never again be taken seriously.

Mr. Speaker, that in itself should be sufficient reason to maintain the diplomatic status quo with the PRC, and I strongly urge the administration to continue to resist any pressure to do otherwise.

UNITED STATES TO WAIVE THIRD WORLD DEBTS?

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute.)

Mr. ASHBROOK. Mr. Speaker, the giveaway artists are at it again. The latest effort to throw more U.S. tax dollars down the drain is a proposal that the United States write off the official debts of many Third World nations.

Authority for this move would come under a provision of a foreign aid bill introduced by the late Senator Hubert Humphrey. It would allow a waiver of both principal and interest on outstanding loans to some 29 least developed countries. All in all, the waiver could result in a net loss to the Federal Treasury of as much as $500 million.

To make matters worse, the Carter administration has decided to give its support to the controversial debt moratorium plan. At a time when we are having our own troubles with balance-of-payments deficits, budget deficits, inflation, and a deteriorating dollar overseas, the administration would have us blithely forgive the money owed to us by these beggar nations.

Of course, we have seen this type of thing before. So-called loans to other nations are later treated more like gifts.

Remember the rupee settlement with India back in 1974? India owed the United States $3.3 billion in loans repayable in nonconvertible rupees. The State Department worked out an agreement whereby India would prepay the $3.3 billion and the United States would give back to India $2.2 billion for "mutually agreed economic development purposes." The other $1.1 billion would be spent in India for expenses we had there. So much for the argument that these loan programs are something different than the normal foreign aid programs.

What makes the proposed cancellation of debts even more incredible is the rationale that has been given for this action. The purpose is to provide Third World nations with some relief from the burden of high oil prices.

As you may recall, this is the same rationale which was used to justify a $1.7 billion U.S. contribution to the International Monetary Fund just a few short weeks ago. Now American taxpayers are going to be hit in the pocketbook once again in order to bail out countries injured by the irresponsible pricing policies of the oil exporting nations.

It is time that we stopped kicking the American taxpayer in the teeth. We should stop wasting vast sums of money on foreign aid, so-called loans or other giveaway programs.

PANAMA CANAL TREATIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. EDWARDS) is recognized for 60 minutes.

GENERAL LEAVE

Mr. EDWARDS of Oklahoma. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in connection with my special order today on the Panama Canal treaties.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. EDWARDS of Oklahoma. Mr. Speaker, not since the day President Woodrow Wilson presented the Senate with the Treaty of Versailles has this country been embroiled in a foreign policy debate like the debate over the Panama Canal treaties. No community, no matter how small, has not heard the pros and cons of these treaties. And the voice that we are hearing so clearly from the American people is the voice of opposition.

Why is it that Americans in every part of this country are so opposed to these treaties? Why when taxes are so high and regulation so oppressive, when government is so big and hope is so slim, with all of our problems—unemployment and inflation and farmers facing bankruptcy and the coal mines shut down—why, in the midst of all this do the Panama Canal treaties grip and hold the attention of the American people?

First of all, because the treaties are perceived not as standing alone but in context—in the context of a decision to cancel the B-1 bomber; in the context of a possible agreement to limit the range of the cruise missile; in the context of a new SALT treaty, and a slowdown in deployment of the new MX mobile missile system; of pulling our troops out of Korea and setting the stage for the abandonment of Taiwan; in the context of a massive Russian military buildup and Russian troops in Cuba and a Soviet presence in Ethiopia at the Horn of Africa; of Cubans in Panama, in Angola, and near the Suez. Because during the Cuban missile crisis President Kennedy used the Panama Canal to move American ships into the waters off Cuba and because history would not be the same if the Canal had not been there. And it is in that context that the Panama Canal is so important.

And because the American people see President Carter embrace General Torrijos and they see the beginning of an American foreign policy with the backbone of a chocolate eclair; because they see the United States backing down to a country half the size of Oklahoma.

The question before the American people, and the question before the Senate, is not do we need to improve our relations with Latin America; not do we need to revise our treaty with Panama; there is only one question before the Senate and that is: Is this treaty in the best interests of the United States? Not does it help Panama. Not does it make Panama happy, but is it in the best interest of the United States. We in government have one obligation—one sworn constitutional responsibility—and that responsibility is to this country.

A couple of points need to be made clear. The United States did not rip off the Panamanian people. Yes, we have benefited from the 1903 treaty. Back in those days our Government thought that

if we signed a treaty we were supposed to benefit from it. But Panama benefited, too.

There would be no Panama without that agreement. We created Panama—and we created it as the only country in the history of the world to start business in the black. And we created it with a treaty negotiated by a Frenchman, true, but a Frenchman appointed by the Panamanian government; a treaty signed by a Frenchman and by every leading Panamanian government official; a treaty ratified by the Panamanian Congress. A treaty ratified while American gunboats stood off shore, true, but at the invitation of Panama, to protect the Trans-Isthmian railroad, as we were bound by treaty to do.

And the canal today provides 12 percent of the gross domestic product of Panama—18 percent of its foreign exchange earnings—provides Panama with the highest per capita income in all of Central America.

There is no moral argument for giving the canal to Panama. The moral argument is for keeping the canal. For keeping the canal because our guarantee of low tolls has improved the economy of every country in Latin America. Because we preserve an alternate court system—a system in which an accused is charged and tried and not tossed into jail at the whim of a dictator or a sergeant in the Guardia Nacional. Because if we give Panama the canal we will lock into power a dictator with the worst record of oppression and violation of human rights in all of Latin Ameriac.

You know, Torrijos says if drug charges are proven, he will produce brother Moises—but when I was in Panama recently to speak to 3,000 people in a stadium in the Canal Zone—3,000 Americans against the treaties—I said fine, produce brother Moises—and while you're at it, produce Father Gallego, the young priest who spoke out against Torrijos in 1971 and was arrested by the Guardia Nacional and has never been seen again.

You know we do own the Panama Canal. And we own two-thirds of the land in the Canal Zone. We did buy it. We bought it from Panama. We bought it from Colombia. We bought it from the individual landowners. Fee simple. Outright legal title. And we paid more for it than we paid for Alaska. More than we paid for the Louisiana Purchase. More than we paid for any other territory we ever purchased anywhere.

And are we sovereign? Are we, in fact, sovereign? The 1903 treaty says the United States has all—all rights, power and authority—with no exceptions—to the entire exclusion—the entire exclusion—by Panama of any sovereign rights, power or authority.

We need the canal. We need it economically. We need it because of what losing the canal or increasing tolls will do to the price of wheat and coal and peanuts and oil—more than 400,000 barrels of Alaskan oil that go through the canal every day.

And Latin America needs it economically, too. I stood at the locks and I watched a Peruvian ship go through. And before it, a Chilean ship went through. The countries of Latin America, particularly the countries on the Pacific coast of South America depend on the canal. And if Torrijos gets control of the tolls he will have an economic stranglehold on all of Latin America. And keep in mind that the Panamanian G–2, the secret police of the Guardia Nacional, are passing out bumper stickers in the Panamanian high schools—bumper stickers with pictures of Castro and Torrijos—and I saw one—I held one—Castro and Torrijos—and it says Castro y Torrijos—Unidos Venceran—together we will conquer. And we would give Torrijos an economic stranglehold over Latin America.

And the canal is militarily necessary. Every single leading military authority in the United States, from the Joint Chiefs of Staff to the field generals, agrees that the canal is still essential to the military security of the United States. And I have talked to Admiral McCain, who was head of the Pacific Fleet, and Admiral Moorer, of the Joint Chiefs of Staff, and General Graham, who was head of military intelligence, and General McAuliffe, the head of the Southern Command, based in the zone, and they all say, they all agree, that we need the Panama Canal for our national defense.

But we are told we cannot defend it. We are told little old ladies in tennis shoes can destroy the canal with a hand grenade. My friends, each gate in the locks is approximately 80 feet tall. Each gate is steel and concrete. Each gate weighs over 700 tons. It would take a platoon with a truck to carry in enough explosives to put one lock out of commission—and that platoon would have to move through 5 miles of American territory containing 14 U.S. military installations. According to General McAuliffe and the President we can defend the canal. So that is no excuse to give it way and to pay $10 billion as a bonus to a country that still owes us $9 million in unpaid water bills, sanitation bills, hospital bills, dating back nearly 20 years.

But if we go in to defend it, we will need pilots—pilots who can navigate the ships through the canal. And the pilots are Americans—and they are not going to stay in Panama. One American at the locks, a former Hungarian freedom fighter, said: "I've lived under one dictator—I won't live under another."

And one last point about intervention. The President says the Baker-Byrd amendment gives us the right to intervene to protect the neutrality of the canal. But the Panamanians say that is not so. They say we cannot intervene, even with a treaty, without their invitation. And they are right, because to go in without their invitation is a violation of international law—and when Nasser nationalized the Suez Canal, and Britain and France intervened to guarantee the neutrality of the canal, the United States stepped in and said that regardless of past agreements they could not intervene without the expressed permission of the Egyptian Government. That is what our own national policy has been.

We need the Panama Canal. It is ours. I, for one, am sick and tired of the United States being the fireplug for every foreign dog, and I think this is the place to draw the line.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank my colleague for yielding.

Mr. Speaker, as the vote nears in the Senate on the first of the two Panama Canal treaties, the neutrality pact, it becomes even more important that Members of the House take to the floor to debate this issue as this may be the only forum we have to fully air our views. As a member of the House, Banking, Finance and Urban Affairs Committee, I have been particularly concerned about the heavy stake U.S. banking interests have in the canal.

Over the past few months, it has become apparent that certain officials of these institutions are looking to the treaties as a way to pay back over $2.2 billion in claims and bail out Dictator Torrijos' economy which is falling apart. Mr. Speaker, allow me to go into detail on this issue.

When Omar Torrijos took over Panama, he reorganized the banking laws of the country making it a haven for U.S. banking interests by providing generous tax advantages and perks. American financial institutions responded overwhelming to the move. As shown in a June 1977, survey on bank exposure conducted by the Federal Reserve, 20 unidentified large banks in the United States have total claims on Panama totaling $2.2 billion. This figure includes loans made to the Government as well as individuals and businesses.

However, even in this bankers' paradise, there have been some drawbacks—the principal one being the insatiable appetite of the Torrijos regime for money. As a State Department memorandum of last year pointed out, Torrijos' policies have decreased productivity, pushed public spending through the ceiling and made labor costs so high that Panamanian products are grossly uncompetitive. Panama's own Department of Planning has noted with alarm that debt service alone eats up almost 40 percent of annual revenues and the nation's financial problems have made it creditors extremely nervous. In short, unless Torrijos can get his hands on the canal and the millions we are promising to pay him to take it, he is in serious financial trouble and so are the 20 banks surveyed by the Federal Reserve last June. If the Torrijos government were to fall, it would mean the end of the bankers' haven and the end of any hopes for repayment of the $2.2 billion in claims on Panama. So. Mr. Speaker, many of us here in the House of Representatives are now asking whether the short-range interests of these financial institutions to recoup their funds should now be subordinated to the long-range interests of the United States. I for one believe they should be.

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Speaker, I congratulate my colleague, the gentleman from Oklahoma (Mr. EDWARDS), for his special order today.

Mr. Speaker, the Carter administration is attempting to get the new Panama Canal Treaty accepted by Congress and the American people. One of the main arguments used by the President and his associates is that the United States will be able to defend the neutrality of the canal.

Taking a look at that assertion does not give much confidence. Who honestly thinks that an American President would dispatch American troops to the Panama Canal once this country turned over the canal to the Panamanians? Of course, the answer is, very few.

In spite of rhetoric about the United States guaranteeing "the security and defense of the Panama Canal," the reality is clear. The new treaty would give up the canal to an unstable country ruled by a dictator. How that country will be able to protect the canal better than the United States is a question that has not been answered.

Proponents of giving the canal away argue that it is no longer as important to the United States. However, this overlooks the fact that the number and average size of ships using the canal is growing. In addition, during the Vietnam period the number of Government ships passing through it grew from 284 in 1965 to 1,504 in 1968. According to figures that I have from a few years ago, about 70 percent of the traffic through this waterway either originates or terminates in U.S. ports.

Stripped to their essentials, the agreements reached are little more than a surrender of American sovereignty over the U.S. owned zone and canal. The Panama Canal is far too important to give away to the anti-American Panamanian dictator. It is vital to the defense of the Americas. Last year, when I asked the Department of Defense how many American naval vessels could not navigate the waterway, I was told 13. The use of the canal for defense purposes is obvious.

Hanson W. Baldwin, a former military correspondent for the New York Times and Pulitzer Prize winner, has written an excellent article in opposition to a Panama Canal giveaway. According to Baldwin, "The future security and well-being of the United States are threatened by the administration's proposed abandonment of sovereignty over the Panama Canal and the Canal Zone."

Not only does President Carter want to give the canal to Panama but he also would have us pay the Panamanians for the privilege of taking it. In addition to increasing payments from the operation of the canal to Panama to as much as $70 million a year, the U.S. negotiators have pledged up to $200 million in Export-Import Bank credits; up to $75 million in AID housing guarantees and a $20 million Overseas Private Investment Corporation loan guarantee. It makes one wonder who our negotiators were negotiating for.

This becomes even more the case once the treaty terms are read. The terms of the treaty show what a sellout it really is. Following is a summary of those terms from the Washington Star:

SUMMARY OF TREATY TERMS

(Note.—Here is a summary of major principles of the two Panama Canal treaties signed last night by President Carter and Panamanian leader Omar Torrijos.)

CONTROL

The United States and Panama would administer the canal jointly until the expiration of the new treaty on Dec. 31, 1999, turning control, management and maintenance of the canal at that time over to the Panamanian Government. The old treaty, signed in 1903, gives the United States perpetual control over the canal and the Canal Zone.

DEFENSE

For the duration of the treaty the United States has primary responsibility for defense of the canal. A board of U.S. and Panamanian military officers is established to consult on defense matters and every five years review military resources made available by both countries. The United States may decide on its own how and when to reduce its 9,000-man military force in the Canal Zone and schedule the closing of 14 bases there during the life of the treaty.

COMPENSATION

The United States will pay Panama $50 million to $60 million annually from canal revenue and an additional $10 million a year for the canal's operation. Panama also will receive $50 million in military assistance over the next 10 years.

LANDS AND WATERS

About 70 percent of the 500-square-mile Canal Zone reverts to Panama as soon as the treaty is ratified with the United States retaining temporary control over the rest, including areas considered vital to running the canal.

JURISDICTION

Within three years of ratification, the 3,500 American civilian employes in the Canal Zone would be subject to Panamanian law instead of American law. Panama after three years would take responsibility for public and social services, including schools, the Canal Zone police force and postal service.

NEUTRALITY

Under a separate treaty, the two countries agree to a guarantee that the canal will remain open to ships of all nations and that the canal's neutrality will be respected "in times of war as in times of peace." American and Panamanian warships and other vessels are given priority to use the canal.

Mr. COLEMAN. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from Missouri.

Mr. COLEMAN. Mr. Speaker, I welcome this opportunity to rise in defense of the Constitutional right of the House of Representatives to participate in any decision to dispose of a strategic piece of American property. In this case, the Panama Canal.

Article IV, section 3, clause 2 of the U.S. Constitution provides:

That Congress shall have the Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States.

I would just like to quote from two legal opinions on this issue. In a 1924 memorandum requested by the Secretary of the Navy, Attorney General Harlan Fiske Stone commented:

Property once acquired by the Government may not be sold, or title otherwise disposed of, except under the authority of the Congress, and in the manner provided by law, and this prohibition extends to any attempt to alienate a part of the property or in general, in any manner to limit or restrict the full and exclusive ownership of the United States therein . . .

In a recent letter to the chairman of the House Merchant Marine and Fisheries Committee, Congresman MURPHY, the Comptroller General stated:

We fully realize that in accordance with Article IV, Section 3, Clause 2 of the Constitution, United States' real or personal property interests in the Canal Zone can ultimately be divested only through an Act of Congress.

We not only have these legal opinions to support our right to participate in this important decision, but the House of Representatives has consistently asserted its authority over all dispositions of property within the Canal Zone. A few examples are noteworthy:

First. In a 1932 dispute over a boundary line modification between Panama and the Canal Zone, both the House and the Senate had to approve the legislation.

Second. In 1942, sewers, waterworks systems, and railroad lots were transferred to Panama. An act of Congress was sought and obtained.

Third. In a 1955 treaty providing for the transfer of real property to Panama, the need to have both the House and Senate pass upon the transfer was explicitly recognized:

The United States of America agrees that, subject to the enactment of legislation by the Congress, there shall be conveyed to the Republic of Panama.

Mr. Speaker, we cannot close our eyes to such clear precedent. You and I are trustees for the preservation of the constitutionally appointed powers of Congress which the President would ignore. More than 94 percent of the people of the Sixth Congressional District of Missouri who responded to my issue questionnaire expressed opposition to the treaty the President has signed. They know only too well of the tragedies that occur when Congress allows the President to usurp power. I urge you to join us in making sure that the responsibilities and prerogatives of the House are not ignored.

Mr. LENT. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from New York.

Mr. LENT. Mr. Speaker, I thank the gentleman from Oklahoma (Mr. EDWARDS) for his efforts in arranging for a debate in the House of Representatives on the vital issue of the Panama Canal. It is a significant step in the continuing effort to increase the awareness of our colleagues, and of every citizen of this Nation, to the dangers encompassed in the two Panama Canal treaties. I have been proud to join the gentleman from Oklahoma in the legal action we have taken to insure that the Members of the House of Representatives will be able to exercise their constitutional right to vote on this giveaway of billions of dollars worth of U.S. property.

I am equally proud to take part in this indepth examination of the Panama Ca-

nal treaties to place in the record of the House proceedings, the serious defects in the treaty documents which President Carter and General Torrijos have signed. Some of the defects are so glaring that the Carter administration already has accepted two major amendments to the treaties, and they have been approved by the Senate. According to newspaper reports, the administration now is negotiating on language for still a third amendment. All of these deal with only one aspect of the treaties—the U.S. rights to defend and to traverse the canal from the year 2000, when the treaties would hand the canal over to Panama.

In my view, this issue highlights one of the two most crucial flaws in the treaties. The so-called second treaty—concerning the permanent neutrality and operation of the Panama Canal—would set for all time from the year 2000 the conditions for Panama's maintenance and operation of the canal. This treaty is so full of ambiguous and/or meaningless diplomatic language that it can serve only as a source of perpetual international conflict. Before the Senate added amendments, the treaty made no mention whatsoever of U.S. rights to defend the canal, saying only that the United States would agree with Panama to "maintain the regime of neutrality," whatever that means. That language, incidentally, might still be used by Panama to bar any U.S. forces from the canal area, despite Senate amendments.

Another example of cloudy language in the second treaty concerns tolls to be charged once Panama takes over. It says:

> Tolls and other charges . . . shall be just, reasonable, equitable, and consistent with the principles of international law.

And who finally decides whether the tolls actually are just, reasonable, and equitable? Why, Panama, of course, sets the tolls.

Such contradictions, meaningless legalisms and obfuscations comprise a large proportion of the treaty language. They would be laughable if they did not involve such a vital issue for the future wellbeing of our country. The cloudy language in the second treaty is cause enough for its rejection.

But the first treaty, covering the period from now until the year 2000, is even more disastrous to the United States. This treaty should be of special concern and interest to the Members of the House of Representatives and to the citizens of the United States they represent. It is this document which gives away billions of dollars worth of U.S. property. It is this treaty which is the basis for our legal action to bar the President from putting the treaty into force without an affirmative vote on the part of the House of Representatives.

To even list the huge amount of U.S. property and installations being turned over to Panama, in addition to the canal itself, might take up pages in the CONGRESSIONAL RECORD. But it is sufficient to say that it adds up to billions upon billions of dollars in value. It is being turned over to Panama lock, stock, and canal gate, without seeking any guarantees to the United States. Oh, yes, we do get one guarantee: The right to operate the canal, pay all of its operational costs, and pay Panama at least $50 million per year for 22 years for the privilege. What a guarantee.

It is no wonder that a distinguished Member of the House, Representative ROBERT LEGGETT, Democrat of California, testified that the treaty language reads as if the United States had fought a war with Panama and lost. It is, indeed, a multibillion-dollar tribute paid by the United States to Panama, if the treaties go into effect. Article IV, section 3, clause 2 of the Constitution clearly gives to the Congress and to the Congress alone, the power to dispose of U.S. property. The House of Representatives has a clear and vital constitutional role to play in the approval of these treaties.

We must insure that our constitutional rights as Members of the House are protected and preserved. The House must vote on the Panama Canal treaties.

Mr. WINN. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from Kansas (Mr. WINN).

Mr. WINN. Mr. Speaker, I, too, want to congratulate the gentleman from Oklahoma (Mr. EDWARDS) for asking for this time for his special order on the Panama Canal.

Mr. Speaker, with Members of Congress embroiled in controversy over whether we should—or should not—give the Panama Canal away, it is somewhat difficult to remember that there exists an issue which is much more important: the constitutional prerogatives of Congress in the disposition of U.S. property.

The Constitution states that the President "shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur." The Constitution does not authorize the House of Representatives to intrude into either treaty negotiations or the advise and consent powers of the Senate. It does, however, grant Congress—that is, both Houses—jurisdiction over the disposal of U.S. property.

Article IV, section 3, clause 2 states that—

> The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States.

The issue at hand is whether, by virtue of article IV, Congress exercises exclusive or concurrent power over the disposition of U.S. property. The administration, as illustrated by the way the text of the treaties was handled, believes that the power is concurrent. This interpretation allows for disposal of U.S. property by treaty alone, by joint resolution, or by a combination of treaty and implementing legislation.

Conversely, some members of Congress, including myself, believe that Congress exercises exclusive power over the disposal of U.S. property. It is imperative that the House of Representatives play a legislative role in any decision concerning the granting of property to Panama.

For this reason, I have become a cosponsor of House Concurrent Resolution 347. This resolution expresses a sense of Congress that—

> Any right to, title to, or interest in the property of the United States Government agencies in the Panama Canal Zone or any real property and improvements thereon located in the zone should not be conveyed, relinquished, or otherwise disposed of to any foreign government without specific authorization of such conveyance, relinquishment, or other disposition by an Act of Congress.

In plain words, this means the House of Representatives should have a chance to vote on the pending Panama Canal treaties.

Furthermore, I have become a coplaintiff in a lawsuit seeking a declaratory judgment that the Panama Canal treaties must be submitted to the House for a vote on the proposed disposition of property.

Federal District Judge Barrington Parker recently granted the Justice Department's motion to dismiss the case on the basis that the plaintiffs have no standing to sue. The judge ruled that at this point in time, the plaintiffs have not suffered a concrete nonspeculative injury in fact to their right to vote on the Panama Canal treaties.

I was disappointed by this decision. I am certain the Kansas residents who wrote me regarding this lawsuit also were disappointed. I would like to emphasize, however, that the constitutional dispute over the Panama Canal treaties is by no means over. We subsequently filed an appeal with the District of Columbia Federal Court of Appeals. If necessary, I think we should be prepared to take this case all the way to the Supreme Court.

Prof. Raoul Berger, resident fellow at Harvard University and respected constitutional scholar, testified before the House Merchant Marine and Fisheries Committee that the Chief Executive of the United States does not have the power to dispose of U.S. property by treaty unless both houses of Congress have enacted implementing legislation authorizing that transfer. I agree with Professor Berger, and I think it would be a mistake to concede the power to dispose of U.S. property to the executive branch at the expense of the legislative branch.

To do so would set a dangerous precedent which could possibly upset the balance of all three branches of Government. What would stop a President from using this case as a precedent for future dispositions of U.S. property?

By dismissing the case on a procedural point, the district court did not consider the greater constitutional issue. I certainly hope that the Court of Appeals will recognize the importance of this case and will reverse the district court's decision.

If the Panama Canal treaties are good treaties, if they are in the best security and economic interests of the United States, they will stand the test of a vote on the floor of the House of Representatives. The constitutional and legislative role of the House of Representatives transcends the entire Panama Canal issue. It is not a political question, but an issue involving the fun-

damental separation-of-powers principle of American Government.

This is a matter which should concern proponents and opponents of the treaties. I firmly believe that, regardless of the treaties' faults or merits, we should reaffirm the prerogatives granted to Congress by the Constitution of the United States.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from Arizona.

Mr. RUDD. Mr. Speaker, I would like to take this opportunity to commend the gentleman from Oklahoma (Mr. EDWARDS) for his sincere effort in attempting to bring some of the facts out on the Panama Canal treaties at this very critical time, a time when by tomorrow, I presume, this decision will probably be made.

Mr. Speaker, I recently heard that one of the compelling reasons for voting for the treaties was that we had to preserve the ability of the President to perform for the next 2½ years. To me, that is a very spurious reason for voting for the treaties. If the President becomes ineffectual because he makes a decision that is rejected or because he makes a wrong decision when he should have made a right decision before signing the treaties, then I think that if he makes one serious mistake like that, we might expect him to make other serious mistakes. I do not think we should bail him out.

However, Mr. Speaker, beyond that, the bottom line on the treaties is just this: If we reject them, there is no question that we can expect spontaneous outbreaks of violence and probably some manifestations of violence on the part of Castro's Cuban agents, et cetera.

But, that will pass. The real tragedy will be if we do accept the amendments, because at that point we will have lost sovereignty over the Canal Zone and the canal, and we will also have lost control of that part of the entire Caribbean area, and of the Western Hemisphere. When I say lose control, it is just that. We will be on the road to being a second-rate nation.

Of course, the Soviet Union has been busy for years attempting to replace us in the Caribbean through Cuba. This will be the opportunity they have been asking for. Currently, the Soviet air arm, along with the rest of the military, is in Cuba training for the purpose of the eventual and expected takeover when we leave Panama and allow that void to occur there. They will fill our presence there with theirs to make sure the vacuum is filled.

The other very spurious argument, to me, for accepting the amendments is indicating that we will make friends in Latin America. Of course, nothing could be further from the truth, Mr. Speaker. No one can depend upon a blackmailer, and if we are going to be blackmailed into doing this for the sake of friendship, of course, this just is not going to occur.

I spent a career in Latin America, and I am convinced that the people of the countries of Latin America, together with the governments, want a strong United States in order to provide the leadership necessary to preserve our hemisphere as we know it.

Mr. Speaker, I thank the gentleman from Oklahoma for this opportunity to join him in this effort.

Mr. EDWARDS of Oklahoma. I thank the gentleman.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to my friend from California, Mr. LAGOMARSINO, who has been so active in participating in this issue all along.

Mr. LAGOMARSINO. Mr. Speaker, I thank the gentleman for yielding to me. I would like to compliment him on arranging this special order, and even more to compliment him on his efforts, as well as those of several of our colleagues, in trying to bring this matter to the attention of the Federal courts to determine just exactly whether or not the House of Representatives has a role to play in the disposition of U.S. territory.

Mr. Speaker, the issue of the Panama Canal is certainly the most important, complex, and hotly debated issue before Congress today. During the past several months various arguments—both for and against the treaties—have been presented by countless individuals, organizations, and interest groups. After a careful study of all the arguments, I have reached the conclusion that these particular treaties are not in the best interests of either Panama, the United States, Latin America, or the rest of the world.

My first concern is that of defense. According to the Carter administration, the right of the United States to intervene—under these treaties—after the year 2000 to maintain the neutrality and accessibility of the canal is stated in article IV of the Neutrality Treaty. However, a close examination of this article reveals that the language is extremely vague and subject to numerous interpretations. While on the one hand General Torrijos has signed an article of understanding with President Carter asserting that the United States does have the right to intervene militarily, on the other hand he and his chief negotiator Dr. Romulo Escobar Bethancourt are telling the Panamanian people that the United States does not have that right.

Can we trust our long-term security interests to such a vague provision? I, and the great majority of the American people, say that we cannot.

Article IV does not offer the United States a satisfactory moral or legal base from which to maintain a neutral and accessible canal.

I have other reservations. I am very concerned about the potential financial burden these treaties will place on the American taxpayer. In addition to the $60 million annual payment to Panama, no one really seems to know how much the treaties will cost the American people. Estimated costs over the life of the canal treaty have ranged from several million to several billion dollars. Again, I do not believe that the American people are willing to bear these high costs in giving—or should I say paying—the canal away to Panama.

The closing of all American bases in Panama also worries me. The United States has numerous security bases throughout the world. These bases benefit not only American interests, but those of the host countries. I strongly believe that the idea of a neutral canal, open to all nations, can best be achieved by a continued U.S. military presence, even after the year 2000. Why not have a base provision in the treaties or, at least a separate bilateral bases agreement, as we have with many other countries?

During my visit to six South American nations, I discussed with the Presidents of Colombia, Ecuador, Peru, Chile, and Argentina, and with other government officials and private businessmen the impact that new treaties would have on their countries. There was nothing in their comments which influenced me to change my opposition to these proposed treaties. A number of the officials said that, although they publicly supported the treaties, they privately have serious reservations about a number of the provisions, especially those which call for an increase in tolls.

Also, at the last organization of American States meeting in July, a resolution was passed indicating that canal tolls should only reflect the cost of operating the canal and not be a source of monopoly revenue for whoever runs it. The proposed payments to Panama out of canal tolls would clearly violate this resolution and raise transportation costs for all countries that use the canal.

On the other hand, practically nobody has ever quarreled with the way in which the United States has managed the canal. American administration has been the epitome of fairness and efficiency. Since it was opened in 1914, accidents have been extremely rare and no ships have ever sunk in the canal proper. I seriously doubt if these same standards could be maintained if the canal operations were handed over to Panama.

I find it hard to believe that some of my colleagues can vehemently criticize Chile, Argentina, and other U.S.-leaning South American countries, while on the other hand supporting a treaty which spiritually and financially bolsters the corrupt, totalitarian, and Marxist regime in Panama.

However, regardless of one's opinion about the treaties, there are two issues over which all the Members of this body should be deeply concerned. First, Congress was not consulted and little informed by the Carter administration during the negotiating process. What makes this a complete slap in Congress' face is that the administration, apparently in return for the endorsement of the AFL–CIO, permitted a labor adviser to participate in the negotiations. It seems that the Carter administration values the support and opinions of labor over that of the Congress.

The second issue concerns the right of this body to make a decision on the disposition of U.S. property. I firmly believe that article IV, section 3, clause 2 of the Constitution explicitly gives the House such a right. The Senate and/or the President should not take final action on these treaties until the House

has exercised its constitutional right to dispose of U.S. property.

Mr. Speaker, the question of Panama and the canal is indeed complicated and complex. It cannot be solved overnight or by a set of inartfully drafted treaties. Although I favor some reasonable settlement of the Panama issue, I feel that ratification of these particular treaties would not be in the best interests of either the United States, Panama, or the rest of the world.

Mr. MARTIN. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from North Carolina.

Mr. MARTIN. I thank the gentleman for yielding to me. I want to say to the gentleman that I agree with the points that he has been making about the issue that is before the other body at the present time, namely, the proposed treaties which would give away our jurisdictional rights under the 1903 treaty, and would give away our property rights, the point upon which the gentleman from California has just elaborated.

I want to commend the gentleman from Oklahoma for his efforts to force the issue here in the House of Representatives, where we should be involved in any decision that would involve the disposition of property that we have installed and have operated and have paid for in the Canal Zone, because I think the real issue here, more than the question of sovereignty, is the question of jurisdiction and the question of our rights to operate and maintain the canal under the existing treaty.

The real issue is the best way to keep the canal open so that it functions, so that not only military supplies and not only military craft but also the commercial shipping of this country and others can continue to use the available access to the Panama Canal.

In connection with that question I am somewhat intrigued and was initially, I would say to the gentleman, somewhat attracted by a proposal that has been made in the U.S. Senate, in the other body, to amend these treaties so as to spell out by this amendment the rights of the United States to intervene militarily so as to establish its right to protect the neutrality of the Panama Canal.

While that has a certain superficial appeal and while it has been sufficient to persuade many people, having that assurance, to go along with the treaties which the President has submitted to the other body, it seems to me that is an illusion, that it is a self-delusion to propose to amend the treaties in that way to guarantee our right to intervene.

Would the gentleman consider how we would intervene after the year 1999, after we have removed our forces from all the bases in the Panama Canal so that we no longer have occupation of those bases in the Panama Canal Zone? What if the Panamanian Government invited some other government to come in and occupy and fortify those bases? How then would we preserve our neutrality? What if the Government of Panama invited the Government of Cuba to bring its troops into those bases, and perhaps they would have available some of the troops that have been stabilizing Africa in recent years and they would be able to come in and stabilize the Panama Canal, and how then would we go in and exercise our right to defend the Panama Canal if we had to attack it first? Then we would be the invader.

It seems to me if we cannot exercise our rights we have now, we would not be able to exercise any rights under this amendment which would require us to attack the canal in order to defend it.

I think that point has to be made and I thank the gentleman for taking this opportunity to give us this time to discuss the issue.

Mr. EDWARDS of Oklahoma. I thank the gentleman from North Carolina.

As the gentleman knows, military authorities, including Admiral Moorer, pointed out if we had to come in later to intervene militarily, not only would we have to come in from a great distance, from Florida, for example, but also we would have to bring in trained pilots to operate the ships in the canal. And if that is so, in the future after our pilots have left the Canal Zone and are doing other things, we will not have trained pilots available, because they are not going to stay in the Canal Zone under a dictator like General Torrijos, so we will have lost the ability to operate the canal after we take it over.

Mr. CRANE. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from Illinois.

Mr. CRANE. Mr. Speaker, so far as the gentleman's comment and paralleling the United States capability to use that canal at our discrimination in a time of emergency, allegedly the two cosmetic amendments involving the right to intervene to preserve the neutrality and perhaps during a time of emergency are supposed to suffice to give us continued guarantees of use regardless of a lack of ownership, I recently had the opportunity to appear on a Boston television station with one of our career State Department people. He of course along with I guess about 500 or 600 other Government employees was advocating the case for the treaties at the instigation of the administration. When I raised this question of the contingency plans that we now have to move sizable elements of the Pacific fleet to the Atlantic in the event of any kind of confrontation in Western Europe, he reassured me that with that right to preserve neutrality and passage under the treaties, that we would have nothing to worry about in terms of getting our fleet ready or to move.

I asked him what would happen if after elements of the Pacific Fleet were moving toward the canal the Panama Canal workers walk out on strike, would that be a violation of the neutrality of the canal?

And he smiled blandly and he said:

Well, that is a delicate question and, to be sure, they don't have the Taft-Hartley Act down there.

The point I endeavored to bring home to him was that under a dictatorship, and particularly one hostile to the U.S. interests, that orchestrating some such scenario as that would be the easiest thing in the world to do, and the time we would probably be most in jeopardy would be the time we needed it most.

So I believe the concern registered by the gentleman from North Carolina (Mr. MARTIN) and by my distinguished colleague now in the well, the gentleman from Oklahoma (Mr. EDWARDS) is of extreme importance. I again commend the gentleman from Oklahoma (Mr. EDWARDS) for taking this special order so as to call attention to these dangers and to these concerns and reservations that so many of us have and particularly the overwhelming majority of the people back home have, because they are real and they are valid.

Once again I want to congratulate my colleague for taking this special order and to thank him for yielding me this time.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I thank the gentleman from Illinois (Mr. CRANE) not only for his comments here, but upon his leadership on this issue, upon his leadership in helping to organize the Panama Canal truth squads that have traveled around the country, and for his leadership in writing his brilliant new book on the principles of the Panama Canal treaties.

Mr. REGULA. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I am happy to yield to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, as debate on the proposed Panama Canal treaties has developed, it has become increasingly evident that a few votes may determine the fate of the canal and the Canal Zone. This is assuming the Senate alone votes to ratify or reject the treaties.

However, because of the importance of this vote, from the standpoint of the Nation's security and economic interest, and its historical impact, it clearly is desirable to expand the decisionmaking relative to the Panama Canal treaties to include the House of Representatives.

The constitutional justification for this has been clearly and forcefully set forth by some of our foremost constitutional authorities. Article IV, section 3, clause 2 of the Constitution is unmistakably clear in assigning to the Congress the power to dispose of U.S. property and territory.

And there can be no question that the United States is the owner of property in the Isthmus of Panama. This has been established indisputably in Senate debate.

I personally find three major problems with the proposed treaties:

They do not protect the security of the United States nor provide adequately for the right of the United States to defend the canal;

They provide for payment of more than a billion dollars to Panama as a consideration for taking over the canal. I cannot understand why the United States should pay to give away an asset of great value;

Lastly the treaties give Panama the right to veto construction of any new canal by the United States, a totally un-

warranted delegation to Panama of a right to interfere in U.S. military and foreign policy.

I join more than 230 of my colleagues in calling for debate and legislative action in the House of Representatives before the final historic decision is made on the future of the Panama Canal.

Mr. DORNAN. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. Mr. Speaker, I am most happy to yield to the distinguished gentleman from California (Mr. DORNAN).

Mr. DORNAN. Mr. Speaker, I thank the gentleman for yielding me this time.

I wish to commend the gentleman for doing what I recommend that every Member of this esteemed body do and that is to take a trip down to the Canal Zone and see for themselves what the situation is; talk to the people who have given not only a lifetime of service there but who sometimes are fourth generation residents of that zone and to seek the truth about the overall corruption of that administration down there. Senator CRANSTON in the other body said it makes no difference whether we give the Canal Zone and its tremendous trade assets, and its defense assets to Torrijos because he will not be around there 20 years from now. That may be true, but maybe his nephew Senor Leonard will have taken over or any of the other 44 members of the Torrijos family down there who are on the "public dole" because this government, I charge, is the most corrupt piece of nepotism and cronyism in the entire hemisphere.

I draw your attention to the facts regarding the prevailing drug trafficking question. It is a question which has been given merely surface scrutiny by too many members of the Senate on this, the 11th hour before your fateful vote on the treaties.

Despite the statements and earlier pretrial verdicts by Senator MCGOVERN and others that the matter is not worth exploring, many distinguished members of both the House and Senate who have been studying the matter think otherwise. For example, our venerable colleague, Representative JOHN MURPHY, in his capacity as chairman of the House Merchant Marine and Fisheries Committee on which I serve, submitted a report to the Congress which was read on the Senate floor by Senator LAXALT on March 3d. The committee report concludes that the Republic of Panama is a major drug smuggling center, a point from which illicit drug traffic flows into the United States. Officials at the highest levels of the Panamanian Government and economy profit by and actually administer the drug smuggling. "Of particular concern to the interests of the United States," to quote from the report, "in connection with the flow of illicit narcotics are allegations of personal involvement of Gen. Omar Torrijos and the members of his immediate family in drug trafficking." The report cites the activities of Hugo Torrijos, Director of Panama's Government Gambling Casinos; Marden Torrijos, Traveling Ambassador Extraordinaire, Berta de Arosamena Torrijos, Panama's Artistic Expression Director; and others including the General's brother, Moises Torrijos, who has since been indicted by a U.S. Grand Jury for the Eastern Division in New York.

Given these and other facts concerning Panama's role as a continental trading post and pitstop for Western hemispheric drugrunning, major consideration must be given to how the proposed Panama Canal Treaties affect U.S. drug enforcement and intelligence on the Isthmus of Panama. Again, to quote from the published Congressional report,

> Staff investigators can only conclude that the capability of the United States to interdict the flow of narcotics into the U.S. or to provide intelligence resulting in the seizures of illicit drugs in the U.S., will only be diminished under the terms of the proposed treaties.

With ratification of the proposed treaty arrangement, all repeat all customs authority reverts to the Government of Panama. The Government of Panama will accede to all authority of a jurisdictional nature, including the authority to inspect vessels and try U.S. citizens for any alleged offenses committed within the presently constituted Canal Zone.

Aside from these findings by congressional investigators and other independent sources, there is a growing accumulation of firsthand testimony by Panamanian defectors confirming the nature and extent of the Panamanian Government's continuing orchestration of a Panamanian connection to international drugrunning. Señor Alexis Watson Castillo testified before the House Merchant Marine Committee of which I am a member earlier this year. The testimony has since been published, and the highlights were inserted into the CONGRESSIONAL RECORD on March 3 by Senator LAXALT.

Mr. Castillo was a former member of the Torrijos government who worked in close liaison with Colonel Noriega, chief of the Panamanian intelligence services. Castillo's testimony, along with a separate deposition submitted to Gen. Daniel O. Graham, former Deputy Director of the CIA, clearly highlights the allegations of systematic drugrunning by the Panamanian Government as well as the close working relationship between the intelligence services of Panama, Cuba, and the Soviet Union.

It is incredible for any reasonable person to appreciate much less understand why Mr. Castillo's full testimony as well as the proffered evidence by other defectors attracts such little notice. It is similarly difficult to uncritically accept the judgment by the U.S. Drug Enforcement Agency as well as other administrative units of the White House which have chosen to censor or withhold entirely the mountain of evidence they have accumulated which clearly link the largest drug smuggling operation in the history of our hemisphere to the Government of Panama.

I made past inquiries under 5 U.S.C. 522(b)(7)(D) of the Freedom of Information Act to release this body of information on the Panamanian connection for the public to review. Largely because the executive branch agencies concerned chose to use national security exemptions to keep this information secret, I have called upon the Justice Department to cooperate with the House and Senate Judiciary Committees in a full-scale investigation of this whole matter. Whether or not any additional allegations questioning the integrity of the Torrijos government are to be verified or not, we owe it to ourselves as well as to the good names of all involved to clear up this serious matter rather than let the body of uncorroborated charges fester.

In the interim, the already released material as well as the testimony by the former Panamanian officials in question indicate that ratification of the proposed treaties would be a mistake. At least, it is a mistake to ratify them at this time when so many questions remain unanswered. I ask all the Members of the House and Senate to join me in asking for full-scale investigation by the appropriate U.S. departments and agencies into this whole matter.

As one who vehemently opposes ratification of the pending Carter-Torrijos treaties for many reasons, I recognize that there are differences of belief on sovereignty on this one particular issue. However, I also recognize that all of us share a mutual regard for the cardinal virtue of prudence, one never so needed to be demonstrated than in international affairs. So in the name of prudence, I once again urge all Senators to reconsider support for the pending treaties or at least support a delay until such time as a full investigation can be made into the matters discussed herein.

I thank the gentleman for yielding and again commend him for his stick-to-itiveness on this critical issue.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I want to thank the gentleman from California for emphasizing a point that so badly needs to be made at this time when we are, ostensibly, as a nation, concentrating our claims on the need for human rights throughout the world, that in giving the Panama Canal to Panama we are surrendering this property that is so important to the national security of the entire Western Hemisphere to a nation that has such a terrible record of violating human rights.

Mr. RUDD. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I am happy to yield to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Speaker, I would like to ask the gentleman from Oklahoma and the gentleman from California, because he has exhibited a great deal of interest with regard to the proposed Panama Canal treaties, a question.

The distinguished gentleman from Oklahoma (Mr. EDWARDS) mentioned a well-respected admiral during the course of this colloquy. Does the gentleman believe that if Panama goes that perhaps Guantanamo is next on the list?

Mr. EDWARDS of Oklahoma. I will say to the gentleman, from my conversations with members of the military who are held in great esteem, men like Admiral Moorer and Admiral McCain and General Graham and others—there is no

question in their minds that surrender of the canal could lead to loss of Guantanamo and loss of important waterways all around the world that can have grave implications for this country militarily.

Mr. RUDD. I think the effort that apparently is being made in recent times seems to be sort of a masochistic effort on the part of this administration, and perhaps previous administrations, to give up acquisitions and advantages that have been acquired by the people of this great country. This seems to be part of that overall picture, so this has to be our last line of defense in that area, not only politically but geographically and geopolitically. Does that mean, then, that the next line of defense will be, if we do not finally take a firm stand, with history behind us indicating what has happened in history before, if we fail to take a firm stand on this, then the next time we will have to take a firm stand, will it be in the streets of Oklahoma City, or the streets of Los Angeles, Calif.? Could we go that far?

Mr. EDWARDS of Oklahoma. If we look at the direction we are going in the Caribbean, I think it could very well be argued that the next line of defense will be in the streets of Miami Beach.

Mr. DORNAN. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman from California.

Mr. DORNAN. I thank the gentleman for yielding.

I just want to add that the missile crisis of October 1962, which most biographers of President John F. Kennedy called his shining hour, and which is now represented on prime time television in one of the so-called documentary dramas, was repeated in a cycle 8 years later when President Nixon was in office, again in the month of October 1970 when a U-2 photograph showed that they were building soccer fields on the southern areas of the island of Cuba, which was ready to receive the crews of the Soviet nuclear submarines. Because Cubans play baseball and they do not play soccer, it was then called to the attention of the President, and National Security Adviser Dr. Kissinger handled the whole issue quietly, more quietly than Kennedy, and told the Soviets, frankly no détente unless this Soviet base is dropped immediately, which the Soviets purportedly did.

Here we are coming up on another October in another 8-year cycle. I think we are going to again be presented with the missiles of October. If we pull out of the Panama Canal Zone without a whimper, I am sure that Ambassador Young has already drawn up the plans for wiping out Guantanamo, and he will probably initiate it on the floor of the United Nations before the Carter administration is aware of the decision.

If we give up the Guantanamo Base, the first Soviet nuclear sub will be on its way across the Atlantic to make that its base line. So the situation begs the question, and the answer is, yes, Guantanamo is next, and it will happen most instantaneously after we remove our forces from the Canal Zone.

Mr. RUDD. I have a letter to the editor of our daily newspaper in Phoenix, Ariz., the Phoenix Gazette, which sets out in very good detail the recent decision by the Supreme Court, indicating that this is another example of the Federal judiciary flouting the Constitution which by solemn oath they are bound to uphold. He sets out in the Constitution important items regarding the authority of the Congress and the House of Representatives to be involved in this.

The letter is as follows:

[From The Phoenix Gazette, March 2, 1978]

DISASTROUS DECISION

In an isolated item on Page A-4 of The Phoenix Gazette, Feb. 21, a 15-line dispatch of the Associated Press announced that a U.S. District Court judge ruled against 60 members of the House of Representatives who had sued to prevent the United States from turning over property in Panama without the consent of Congress.

This is another example of the federal judiciary flouting the Constitution, which by solemn oath they are bound to uphold.

Article IV Section 3 reads: "The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; . . ."

The key phrase in this section is "dispose of".

Article 1, Section 1 grants all legislative powers to the Congress and then defines Congress, "which shall consist of the Senate and the House of Representatives."

It is granted that Article II, Section 2 of the Constitution gives the President the "power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the senators present concur . . ."

The Constitution further provides in Article VI that ". . . all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land."

The key to this provision is the treaties, to be among the supreme laws of the land, must be made under the authority of the United States.

It would seem obvious, under the plain and unambiguous language of the Constitution, that a treaty, which purports to dispose of the property of the United States must be approved by the Congress, which includes the House of Representatives.

In addition, "no money shall be drawn from the treasury but in consequence of appropriations made by law . . ." (Article I, Section 9). This constitutional provision simply means that the President and those senators too, who suffer from political armtwisting cannot use public funds to make payments, as proposed in the Canal treaties, without an appropriation by the Congress.

It would seem most appropriate for you to editorialize on this disastrous decision of a federal district judge.

Judge KENNETH C. CHATWIN,
Maricona County Superior Court.

Mr. EDWARDS of Oklahoma. I thank the gentleman.

Mr. BADHAM. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Oklahonma. I yield to the gentleman from California.

Mr. BADHAM. Mr. Speaker, there has been an enormous quantity of both written matter and lengthy discourse pertaining to the new Panama Canal treaties now pending before our colleagues in the other body.

Of the arguments presented thus far, the one that most concerns me is the effect of these treaties on our Nation's long-term security. Along that line, the historical instability of the Government of Panama coupled with the ambiguity of the so-called Neutrality Treaty enhances my belief that ratification would severely cripple the security, and on a global scale, the stature of the United States among the nations of the world.

The instability of the Panamanian Government is dramatized by the fact that there have been 32 chiefs of state of Panama since its establishment in 1903. That is a change in leadership every 2.3 years; not all of which have been under peaceful circumstances.

Should an unfriendly regime come to power in Panama, decide to expropriate the canal and demand that the United States vacate the zone, under the new treaties there is little if anything the United States could do without drawing world criticism. However, the 1903 treaty gives us the unquestioned right to maintain, operate, and defend the Canal Zone. I quote from the 1903 treaty—

The Republic of Panama grants to the United States all the right, power and authority within the Zone which the United States would possess and exercise if it were the sovereign of the territory.

Clearly the 1903 treaty creates the stability that is so vital to our access to the canal, along with the other countries of the world.

The topic of access to the canal brings me to the ambiguity of the Neutrality Treaty. The administration insists that our warships in a time of emergency will have the right to proceed to the front of line, Panamanian officials seem to interpret the treaty differently, as witnessed on several occasions. We can ill-afford to take anything for granted that is not specifically spelled out in the treaties. I would hope such specifications would be clearly defined prior to serious consideration of the treaties.

I will conclude with a statement by Gov. Ronald Reagan:

The Panama Canal is vital to the free world, and the world depends on us. It's part of our rendezvous with destiny. We must not shrink from it, for the ultimate price we pay may one day be our own freedom.

● Mrs. HOLT. Mr. Speaker, the administration has demonstrated some concern about the Soviet threat to the Horn of Africa on the southern flank of the oil-rich Middle East States. The administration has also been demonstrating a little concern about the monstrous Soviet buildup in Eastern Europe that threatens NATO.

What amazes me, Mr. Speaker, is the absence of administration concern about conditions on the southern flank of the United States. Latin America has a variety of unstable regimes which are extremely vulnerable to subversion and terrorism sponsored by the Communist powers.

True, we face no threat of military invasion from the regions south of our border. But we have watched Marxist saboteurs, guerrillas, and political activists penetrate Latin American States. We know that Fidel Castro and his Cuban regime are committed to the advancement of Soviet goals in Latin America.

The point I would stress, Mr. Speaker, is the importance of an American presence in Latin America. Cuba is a Soviet colony, Jamaica slips more and more into the Cuban-Soviet orbit, and Marxist agents are operating relentlessly to bring other Latin American States into the Soviet empire.

We should also reflect on the enormous Soviet buildup of naval forces capable of operation in Latin American waters. Their reach extends far from their home bases. Their purpose is not defensive.

Against such circumstances we must evaluate the decision of the Carter administration to surrender U.S. control of the Panama Canal. It is not enough to concentrate on the wishes of the Panamanians to control the waterway we built. That cannot be our only consideration.

When we cut through all the legalistic talk about sovereign rights and whether we own the Canal Zone property in fee simple, it comes down to an issue of our national security.

The canal is important to our military and commercial shipping, and our presence in the Canal Zone is important as a deterrent against further Soviet intrusions into Latin America.

That summarizes the issue, Mr. Speaker, and we should not be entering treaties guaranteeing that we will leave the Canal Zone by a date certain in the future. For the foreseeable future, we must be concerned with maintaining stability on our southern flank.

In a safer and saner world, this would not be necessary; but we live in a hostile world with powerful enemies.●

● Mr. KASTEN. Mr. Speaker, for over a month now the Senate has been engaged in debate over the Panama Canal treaties.

Unfortunately, those of us in the House of Representatives have not had an opportunity to debate these treaties which are of such critical importance to the United States. That is why I am pleased to join my colleagues today in an effort to build a solid record of opinion as to the position of the House on the debate now underway.

With much public fanfare, President Carter signed the new Panama Canal treaties last September, and then submitted them to the Senate for ratification. The negotiations that culminated in the signing of these treaties had been underway for more than 13 years. The final product, drafted by the current administration and the government of Omar Torrijos, proposes the transfer of a multibillion dollar American investment to the Panamanian Government. The Panama Canal—longstanding symbol of American engineering genius and international prestige—would cease to be managed or operated by the United States.

The debate over ratification has been long and intense. It has also been confusing with legal scholars, military experts, political figures, and news commentators offering differing opinions. There is, however, only one standard by which these treaties should be judged. Do they adequately protect the legitimate interests of the United States in the Panama Canal and the Canal Zone?

Based on that standard, the answer is clearly, no. I am opposed to the Panama Canal treaties and if given the opportunity, will vote against ratification.

The continued smooth and secure operation of the Panama Canal is vital to our national security interests and those of the entire Western Hemisphere. We need to be guaranteed a permanent right to use the canal. We have that right now. If we approve these treaties, we will in effect be exchanging that right for the mere hope that all will go well under the provisions of the new agreement. I do not think we can take that risk. I would like to summarize the basis for my opposition:

The Panama Canal is crucial to our defense of the Western Hemisphere. By the terms of the 1903 treaty, which currently governs our relationship with Panama, we exercise the rights of sovereignty in the Canal Zone. We have the unquestioned right to operate, maintain, and defend the Panama Canal.

We can be proud of the way we have exercised that right. For 64 years we have operated the canal at no profit and kept it open to all peaceful shipping of the world. Through four wars, it has been an important link in our hemispheric defense. We have established bases in the zone where our forces receive training, and where we have given training to the soldiers of our allies in this hemisphere.

Since 1914 the canal has served the United States through several wars while at the same time denying our enemies access to the waterway. An impressive 99 percent of the total United States naval fleet and its reserve can use the canal and do so effectively. During the Vietnam conflict, as high as 70 percent of the yearly cargo destined for the combat zone moved through the canal. Contingency plans in the event of a crisis in NATO currently call for the movement of 60 Pacific Fleet ships to the Atlantic.

The Panama Canal has been and remains an integral part of our Nation's defense structure. Yet, the treaties would relinquish our control to a country riddled with a history of unstable government. Promises of the current regime may be ignored by a subsequent government. We cannot assume that risk.

The Panama Canal is an important economic asset with much of the traffic originating from or destined for U.S. ports. It is a key supply line for U.S. commercial and naval vessels with the shortest, cheapest, and safest passage between the Atlantic and Pacific Oceans. Passage through the canal and toll charges are of critical importance to our export market. The Gulf Ports Association, representing 23 U.S. ports through which move nearly 40 percent of our water-borne commerce, has indicated that anticipated toll increases may price some American exports—notably grain and machinery to eastern and Pacific markets—out of world competition.

The current Panamanian leader, Gen. Omar Torrijos, is a leftist-leaning nationalist dictator. He gained power by overthrowing the elected civilian government of Panama in 1968. He has since denied Panamanians their basic human rights. His regime has plummeted Panama into the worst economic chaos in its history. There is absolutely no reason, in spite of the general's campaign to win public support, for the United States to entrust control of the Panama Canal to him.

The treaties not only give Panama the canal, lands, and improvements, but also finance Panama's future economic mismanagement through millions of dollars of U.S. aid and guaranteed loans. In essence, we are giving Panama the canal, and "paying them to take it off our hands." The logic cannot help but be baffling to the average American taxpayer.

In conclusion, Mr. Speaker, I think the President made a serious mistake in presenting these treaties for ratification. While we must always be cognizant of our Latin American neighbors and be willing to negotiate new terms with individual nations, including Panama, we must never negotiate in a manner that would sacrifice key national interests. That is why I oppose these treaties.

I hope the Senate will defeat the Panama Canal treaties. But, I also hope that we in the House, the body closest to the people of the United States, will have an opportunity to vote. The American people have made a major commitment in the building and maintaining of the Panama Canal. Their voices should be clearly heard in the ratification process. A vote by the House would insure that their voice is, indeed, heard.●

● Mr. DEL CLAWSON. Mr. Speaker, it is a pleasure to participate in this record of opinion on an issue of concern to the House of Representatives, the disposition of U.S. property and territory in the Panama Canal Zone.

In their daily lives, most Americans are forced to obey certain basic rules of commonsense. The rules dictate that naturally they do not jeopardize their security unnecessarily; that they protect their investments, whether investments of time and effort or of cash; and that in return for fairness in dealing with their neighbors, reciprocal respect for rights, privileges, and property will be accorded to them. Most Americans also have a healthy awareness that to ignore the reality of a lawless element in society primed to seize the property of others at the first sign that vigilance has been relaxed is to invite personal loss and disaster.

Therefore, it is only reasonable for the same citizens to expect their leaders to apply similar principles in negotiations affecting the welfare of the United States. But if the opinion polls or letters from the people at home are to be believed, a majority of Americans are convinced that far from protecting our legitimate national interests, the Panama Canal treaties presented to the Senate for ratification following 13 years of bargaining, leave us open to strategic as well as economic disaster.

One resident of the 33d District of California, Mr. Grattan Guerin of Whittier, a retired songwriter, was even moved to come out of retirement temporarily, placing his considerable talent to work to emphasize his point of view in punchy lyrics and music. His song title, "Keep the Panama Canal," leaves no question regarding his position. Another constituent observed in a recent letter that although the Panamanians had the opportunity to approve the treaties through a national plebiscite, the opinions of millions of Americans for all intents and purposes are being disregarded.

I believe it is safe to say that those of us in the House who are participating in this special order today are convinced that the opinions of these Americans should count. In fact, there is every reason to believe that the instincts which move these citizens to opposition are sharper and surer than the reactions of some of the diplomats which seem to have been dimmed by years at the negotiating tables.

The canal treaties in all their complexity and profundity raise certain baffling questions. For example, the effects militarily and economically upon our country and society, our position of world leadership, the attitudes of the people of our Nation and those of other nations regarding the canal's future.

There may be differences of opinion as to how important the canal is to U.S. trade, now and in the future, but there can be no argument about the economic significance of the existence and the efficient operation of the canal. However, we are asked to place that economic interest in the hands of another government without any accompanying airtight assurance that the interest will be protected into the foreseeable future. The efficient operation of the canal is tied to the stability of the Government of Panama.

How has that government operated in the past? How is it presently functioning? Would a new government be any better, more stable, or worse? If the government fails in its operation of the canal what happens then? What about the costs of increased subsidy? Or what about the danger of financial dabbling by less friendly or potential enemy nations if they offer or are approached by the new owners for the bailout rather than the United States?

The political and defense-security concerns aroused by the treaties are not unrelated to the economic concerns over the stability of the Panamanian Government. But relinquishment of sovereignty over this crucial waterway in our hemisphere arouses other deeper anxieties. In justification for the treaties it is emphasized that there is smouldering resentment over U.S. defense and economic superiority by other Latin American nations and that the 1903 treaty with Panama is a symbol or rallying point for that resentment. But is the United States required by any logic to abandon all of its advantages? In the event we do so, who would stand to benefit the most, other Latin American countries, or those stronger nations outside our hemisphere, including the Soviet Union, who are attempting to establish any kind of strategic foothold wherever they can in this part of the world?

These are only a few of the more obvious, broader questions of concern regarding the Panama Canal treaties. That the treaties also dispose of U.S. holdings which have tremendous historical and emotional significance for our people and that the disposition of that property is slated to occur without a vote by both Houses of Congress is a matter of constitutional concern which cannot be emphasized too strongly.

Generations to come may well question whether in eagerness to bring the negotiations with Panama to a successful conclusion, to mollify U.S. friends and foes alike, what is done and left undone in the treaties is to "strain at a gnat and swallow a camel." A dangerous precedent will be established and we must ask whether or not we are undermining our international position, our political and economic status in our own hemisphere and the principles established in our Constitution simultaneously.●

● Mr. McDONALD. Mr. Speaker, it seems to me that the question of House concurrence to the proposed Panama Canal Treaty is no longer debatable. The Subcommittee on Separation of Powers of the Senate Committee on the Judiciary has deliberated and issued its report. Its finding was as follows:

The Subcommittee on Separation of Powers of the Committee on the Judiciary, having studied the issue of the authority of Congress to dispose of territory or property belonging to the United States as set forth in article IV, Section 3, Clause 2 of the Constitution, finds that the said power of Congress is exclusive and that the Constitutional prerogatives of Congress require that Congress authorize, by the enactment of appropriate legislation, any disposition of the property of the United States in the Isthmus of Panama.

The idea that the United States has been paying the Panamanians rent all these years should finally be put to rest. Not only has Panama been receiving an annuity all these years, but, we purchased land from each and every property owner and even the squatters in the Canal Zone. We won title to the Canal Zone by any legal definition.

At this point I would like to insert the article by Mr. Jeremiah O'Leary concerning the testimony of Mr. James C. Luitweiler, who was secretary of the U.S. Panama Land Commission in the Washington Star of Sunday, March 12, 1978. The story follows:

CANAL REFLECTIONS: THE WAY WE WERE IN 1913

(By Jeremiah O'Leary)

The tableau evoked memories of Teddy Roosevelt, the Great White Fleet and the days half a century ago when the Panama Canal was the Big Ditch and the United States could do anything it liked in the private preserve called Latin America.

James C. Luitweiler, 88, was up from North Carolina to tell the Senate subcommittee on separation of powers what it wanted to hear about how the United States bought the Canal Zone in pieces from people who had to sell whether they wanted to or not.

And in support of Luitweiler's recollections of the gunboat days was Doris McClellan, clerk of the U.S. District Court for the Panama Canal Zone, with her three crates full of deeds for the property that was bought for the canal.

Chairman James Allen, D-Ala., and his ally, Sen. Jesse Helms, R-N.C., were out to prove a serious point. Allen is making a case that the Constitution requires the consent of the House as well as the Senate if there is to be disposal of property owned by the United States.

Luitweiler, who was secretary of the Joint U.S.-Republic of Panama Land Commission, said he didn't specially recognize this document or that in McClellan's collection. But he offered some remarkable insights into how Americans thought about Panama and the canal in 1913, just before the path between the seas was opened.

"President Woodrow Wilson had declared that the whole zone was necessary for the benefit of the United States, not just bits and pieces of it," Luitweiler said.

"When we arrived in Panama, there were thousands of Negroes and others who had dug the canal and were living as squatters where the zone is now. They had no title to the land but they lived there. Panamanian law said that anyone who squatted for 24 hours could be paid for the improvements and we decided to follow the law of Panama," he recalled.

"We set up a yardstick for payments. We paid $50 for a thatched hut with a banana tree beside it. We paid $50 if there was a man and wife. And we paid $50 for each child. If the man was a Panamanian citizen, the fee was doubled.

"We didn't want another case like Acadia where the British forced the French people to move."

Luitweiler was asked, "What if the people on the land didn't want to sell to the United States?"

"They didn't have any choice," he said. "It was a matter of eminent domain. And the Panamanians were happy at the deal they got. I can't remember any dissent at all."

"How could the United States exercise the law of eminent domain over somebody else's country?"

"It wasn't another country," he said. "It was the Canal Zone as the result of the treaty (of 1903)." And he added later with some asperity, "Teddy Roosevelt did a good job of turning the area into a fit place for Americans to live."

When McClellan handed him a list of the names of all the more than 3,000 persons to whom the United States paid money for their land in the Canal Zone, Allen said triumphantly, "This is the missing link."

McClellan, sister of the late Sen. John McClellan, D.-Ark., told the subcommittee before a sparse audience yesterday that the contents of the crates were original records of U.S. purchases of land in Panama from 1903 and 1914.

"I didn't send these to the National Archives with the rest of my records because I thought the committee might want to see them," said McClellan in a soft Southern drawl. "My office is right on the border. You never know from day to day when there's going to be a riot."

"You feared for their safety?" asked Allen, the master parliamentarian and arch-foe of the canal treaties.

"Yes sir," said the court clerk.

Allen said the recollections of Luitweiler and the three crates of records are documentary proof that the United States owns title to the Canal Zone. He said the witnesses performed a great public service.

"The testimony and the documentary evidence which the subcommittee will examine should lay to rest forever the idle and ill-informed recent assertions that the United

States merely rents its property in Panama," Allen declared.

"Nothing could be further from the truth. Not only is the Panama Canal Zone unincorporated territory of our country, but additionally the actual fee simple title to a major part of the lands in the Canal Zone has directly vested in the United States by purchase.

"The fee simple title to the land itself has become public property as a result of the government's decision to buy up all private land holdings in the Canal Zone."

Therefore, it should be evident to everyone that the House of Representatives will have to agree to the disposal of this property. And, if the House is really concerned over the erosion of its powers in the area of foreign policy it will send a message loud and clear. For the House to do less would be a disservice to this great Nation. Certainly, the majority of the House—220 of them—have indicated their agreement with this stand. As the great constitutional law professor, Raoul Berger of Harvard, when asked about the power of the Congress in this regard stated in part:

. . . My study of the cases had led me to conclude that the power is indeed exclusive in the Congress. Certainly the face of the Constitution itself indicates that the power is exclusive and nothing has been summonded by the Department of State or the Department of Justice, in my judgment, which vitiates that view.●

● Mrs. LLOYD of Tennessee. Mr. Speaker, the Panama Canal treaty debates are properly being conducted in the Senate at this time. The Senate alone has the constitutional power to consent to the ratification of treaties. However, the debate also belongs in the House which shares a legitimate role with the Senate with respect to the disposition of U.S. property and territory in the Canal Zone.

In view of the imminent vote in the Senate on at least the first of the two treaties, it is imperative that the will of the House, which has been expressed on a number of previous occasions with respect to the disposition of U.S. property, be expressed once again.

This is not an issue of partisan politics—this is a constitutional issue. It is our duty as the elected Representatives of the people to assume that their voice is heard. Our stand must be perfectly clear to the President and all of America—we cannot accept a transfer of a major U.S. asset without House as well as Senate consent—and I might add—that stand must be strong opposition to any agreement that will eventually lead to the relinquishment of the U.S. sovereign right of control over this vital waterway.

It is unconstitutional and inappropriate for the multibillion-dollar investment of the United States in the Canal Zone to be transferred to the Republic of Panama by treaty alone. Article IV, section 3, clause 2 of the Constitution gives to the Congress the exclusive power to dispose of U.S. property and territory. Failure to exercise that power in this crucial question of the Canal Zone will be a disastrous precedent for the separation of powers in our Government.

On two occasions in the 94th Congress, the House passed language that made it clear that a negotiated compromise of U.S. sovereignty over the canal was unacceptable.

The Panama Canal is commercially and strategically of vital importance to the United States. In recent years, approximately 16 percent of all goods shipped to or from the United States go through the canal—any closing of it would mean an extra 8,000-mile trip for much of our trade—a trip which would only drive up the price of consumer goods.

American claims to the canal have not only statutory basis but judicial approval. The Hay-Bunau-Varilla Treaty of 1903 gave the United States the right to act as if it were sovereign, in perpetuity, to the entire exclusion of any claims by Panama to sovereign rights, power or authority. These provisions substantiate an undisputed U.S. title to the canal and canal zone, an interpretation confirmed by the Supreme Court in Wilson against Shaw (1907) and never overturned. In addition, the United States has paid over $166 million for its rights, not to mention the more than $6 billion invested in construction, maintenance and defense costs—an investment which would virtually be unrecoverable if U.S. control is relinquished.

In addition, Panamanian defense forces alone do not have the capability to withstand a sharp attack on the canal should one occur. If the United States were to turn over the Panama Canal to an unelected military dictatorship that has shown itself to be friendly to Fidel Castro, the canal could become a pawn in international politics. The canal as well as a substantial part of the shipping world could be subjected to unreasonable political demands.

It is clearly in the best interest of our Nation and the American people to maintain our present policy with respect to the Panama Canal and the Canal Zone and to reject the Panama Canal treaties which would relinquish this country's sovereign right of control over this vital waterway.●

● Mr. ZEFERETTI. I am opposed to relinquishing our control of the Panama Canal and the Canal Zone because it reflects a sellout of the American public who, if recent polls are accurate, overwhelmingly oppose the treaties. The canal is a duly paid for territory of the United States. Should the treaties be approved, we would not only be selling out our multibillion dollar interests in Panama, but we would be paying that country heavily to the tune of $10 million per year to take over the operation of the canal.

The fact is the canal is vital to our international trade, commerce and defense interests. I believe that any renegotiation or relinquishment of our rights to this strategic waterway would be a grave mistake for the United States to make.

Those who support giving up the canal assert that "sovereignty and ownership" are not issues because the United States never had either. I could not disagree more with this argument. On December 2, 1903, the United States agreed to pay the Republic of Panama $10 million, plus a yearly annuity, for "in perpetuity the use, occupation and control" of this 10-mile-wide Canal Zone. This treaty also granted the United States "all rights, power and authority * * * as if it were the sovereign of the territory."

Continued U.S. presence is also a necessity to the military interests of our country. One of my major concerns is the vagueness of the sections in the treaty dealing with our defense of the canal and our use of the waterway should the United States become involved in a military conflict.

The Republic of Panama is unqualified to assume the grave responsibilities involved in operating, maintaining, controlling and defending the canal. Their government is currently in deep financial trouble as a result of its own mismanagement. I believe it is disastrous to attempt to insure stability in this zone by turning over control of the area to a government headed by a military dictator, who seized power in a 1968 coup.

We have been neither imperialistic nor exploitive in our relations with Panama. Benefits have accrued to the Republic as we have spent in excess of $6.8 billion in maintaining and defending the Panama Canal. The Republic of Panama now boasts the highest per capita income in Central America.

Perhaps the most outrageous aspect of this controversy is the fact that this body will not have the opportunity to even vote on the treaties. I feel that the Constitution dictates a House vote on the issue because the treaties involve the payment of money to Panama and deal with the disposition of American property. However, despite my protests and the protests of many of my colleagues, President Carter has submitted the treaties to only the approval of the Senate.

I am a member of the Merchant Marine and Fisheries Committees' Panama Canal Subcommittee which has been carrying out an ongoing investigation of the treaties and their possible ramifications. I was part of a congressional delegation that visited the Canal Zone to conduct oversight hearings on the treaties. Therefore, I feel that I have had a firsthand look at the Panama Canal issue.

The Panama Canal has global significance involving the security of the entire Western Hemisphere, and I will continue to oppose giving up U.S. control of this area.●

● Mr. BOB WILSON. Mr. Speaker, once again I rise to voice my total opposition to the proposed Panama Canal treaties, and emphasize that this is the worst kind of an international deal I have seen our Government involved in since I came to Congress over a quarter of a century ago. If the United States should give up control of the canal, the damage to the economic and national defense interests of our country will be enormous—far beyond anything I have heard in public discussions.

A main concern of mine has always been our national defense, and the arguments that have been made that downgrade the importance of the canal to our defense I consider dangerously flawed. Contrary to the opinion of some, we no longer have a two-ocean Navy. We all

know how drastically the number of ships in our fleet has dropped, and under the current budget proposal that number will continue to dwindle.

However, all U.S. ships other than 13 aircraft carriers can transit the canal, which means an expeditious shifting of military assets from one side of the globe to the other, should the need arise. Any interruption in our ability to use the canal would tack on about 25 percent to our planning time to mount an assault in the event of an emergency.

But no matter how the treaties are worded, it will still be possible for those in control to close the canal for "repairs," or to "prevent sabotage," or for a variety of other reasons at a time when the United States may need it most urgently.

But putting national defense interests and economic interests aside, we in the House of Representatives have a legal and moral responsibility with regard to the Panama Canal treaties—legal, in that article IV, section III, clause 2 of the Constitution gives unequivocally to Congress—and that means the Senate and the House—"the power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States," and moral in that we have been elected by the people of this country to represent their interests here in Washington, and are ourselves sworn to uphold the Constitution.

The prohibitions of the Constitution were designed to apply to all branches of the Federal Government and they cannot be nullified by the executive. Article IV of the Constitution contains clear restraints on the President's treaty-making power, and the Supreme Court in literally dozens of cases over two centuries has consistently ruled that the power of the Congress under that article is exclusive.

Therefore, to be legal, any agreement signed by U.S. representatives must be consented to by the Senate, and, if it contains provisions for the disposal of U.S. territory or property, we in the House also have a say in the processing of the agreement. And, if the Panama Canal does not consist of U.S. territory, as some would argue, I sure do not see much doubt that U.S. property is involved.

These proposed treaties have to be among the most expensive in our history. Through these agreements, the United States would be giving up a considerable amount of real property—not to mention the future economic costs. In return, what we are said to be getting—and I use that word advisedly—would be largely intangible. The American people want to keep the canal. They are right to want to keep it, and they will support policies necessary to keep it. I think the commonsense nature of our citizens will lead them to object even more strenuously than they have so far to the disposal of billions of dollars of assets in Panama, plus the future drain on their pocketbooks in payments to Panama, unless they are sure that every constitutional process will be adhered to in implementing any treaties.

Since the Constitution invests in Congress the power to dispose of U.S. property, it follows that congressional authorization is required prior to the disposal of an investment of the magnitude we have in Panama. The President, by proceeding to press for senatorial consent to a treaty that transfers U.S. property without the participation and approval of the House of Representatives, is in my view on an unconstitutional course.

This whole treaty agreement question is especially important in view of the fact that the United States is negotiating with a military dictatorship in Panama whose treaty agreement on property rights could be overturned tomorrow.

Mr. Speaker, I have opposed this deal many times in the past. I oppose it now, and will continue to oppose it in the future. I would hope that when the issue comes before us, and I am confident that it will, a thundering majority of my colleagues will do likewise and defeat it soundly.●

THE 75TH ANNIVERSARY OF THE NATIONAL WILDLIFE REFUGE SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. CONTE) is recognized for 5 minutes.

● Mr. CONTE. Mr. Speaker, I wish to rise today to commend our National Wildlife Refuge System, on the 75th anniversary of its founding. It was 75 years ago that President Theodore Roosevelt signed the Executive order which authorized the Federal Government to provide refuge for the endangered brown pelican. In compliance, the Government purchased Pelican Island on the east coast of Florida, and thus began the system of refuges which have been of inestimable assistance in mankind's quest to protect various species of wildlife from the ravages of man and nature alike. Over these 75 years, the original program has grown, until today the system, under the U.S. Fish and Wildlife Service, encompasses the various programs designed to identify and protect our vanishing species of wildlife.

Today, we have a total of 384 national refuges, encompassing nearly 33 million acres, all dedicated to this worthy goal. Of particular concern to the managers of the national refuges is the protection of the international migratory waterfowl. To facilitate this particular effort, the Migratory Bird Commission was established in 1929. The Commission, which is a part of the National Wildlife Refuge System, has been extremely instrumental in protecting the threatened species of migratory waterfowl.

Mr. Speaker, it is with pleasure that I was chosen to serve on this Commission. This week, the Commission held its semiannual meeting, at which time the members approved the acquisition of an additional 589 acres of prime refuge land in four separate States. This recent acquisition is just another example of the diligent efforts that the managers of the National Wildlife Refuge System have undertaken in their pursuit of this laudable goal, that of protecting our endangered species. I applaud the program, its supporters, and the program managers, who all possess the foresight to anticipate the obligations we have to future generations, not to mention the enjoyment derived from the 30 million visitors who venture into these refuges.

Mr. Speaker, in closing I would suggest that my colleagues reflect on the words of one conservationist, the catalyst in this worthy endeavor, President Theodore Roosevelt, who stated:

> We loved a great many things—birds and trees and books and all things beautiful
> And horses and rifles and children and hard work and the joy of life.

Mr. Speaker, I submit that in its 75th year, the National Wildlife Refuge System has given us all these things. I am confident that future generations will also sing its praise.

Thank you, Mr. Speaker.●

RATIFICATION OF PANAMA CANAL TREATIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WALKER) is recognized for 15 minutes.

● Mr. WALKER. Mr. Speaker, my views regarding the ratification of the Panama Canal treaties is best expressed in a speech I gave at Franklin and Marshall College in Lancaster, Pa., last spring.

Those remarks follow:

In his testimony before the House Committee on International Relations, Secretary of State Cyrus Vance listed four main reasons why the new Panama Canal treaties should be approved. Those reasons were, and I quote the Secretary,

"The treaties will make the canal easier to operate and easier to defend.

"They assure for us continued access to the canal, for military and commercial purposes.

"They advance our position throughout Latin America and, in important respects, throughout the world.

"And they fulfill the expectations of every American that this country will continue to act as a world leader should."

End of quote.

As a firm opponent of the negotiated treaties now under consideration in the United States Senate and hopefully later in the House of Representatives, I chose to lead off with Secretary Vance's assessments because I believe they can be challenged in each and every instance. The substance of the argument in favor of the treaty concept is open to question and certainly the substance of the treaties themselves is very questionable.

The controversy regarding the treaties centers around several basic difficulties.

At the center of the argument against the new treaties is their fundamental purpose: namely, the transfer of control of the canal and the Canal Zone to Panama over the next 22 years. From the time when the first outline of general principles for a treaty was released, this goal has been questioned. Yet few, if any of the objections were taken into account by our negotiators, a situation which has led to this almost inevitable conflict over ratification.

The creation of a jointly run Panama Canal Commission to replace the present Panama Canal Company may lead to serious problems in the efficient operation of the canal. The treaties mandate more Panamanian employment and a five-year limit on future non-Panamanian workers. These provisions along

with the transfer of control of the Canal Zone to the Panamanians government in a short 30 month period will result in a mass exodus of skilled American employees. Many will leave because of their questions about job tenure while others will refuse to live under the jurisdiction of the military dictatorship currently ruling Panama.

The economic terms of the treaties are mind-boggling. They call for Panama to receive approximately $60 million in revenue per year, or over a 2500 percent increase from their present direct benefits. Because their share of the revenue is tied to the American wholesale price index, the rate will steadily rise over the next 22 years. The economic minister of Panama estimates the windfall benefit to his government at $2.3 billion expressed in 1977 dollars. These new payments are to come out of the operating expenses of the canal which will mean a 25–40 percent increase in tolls right away—the biggest single toll increase in history and an amount which could significantly alter prices in America's export and import trade. And if these increases fail to meet the payment demands, the Panama Canal Commission, as a U.S. government agency, may have to seek appropriations from Congress to make up the difference. And we are locking ourselves into a monopoly situation in the economic sections of the treaties because any future canal building we might wish to do could be vetoed by Panama.

Severe questions have arisen with regard to American rights to defend the canal and assure its international neutrality. These were questions that the proponents of the treaty hoped to address with the joint Carter-Torrijos clarification statement of October 14, 1977. While apparently resolving differences over the meaning of "expeditious passage" of the U.S. warships in times of international emergency, the statement raises other questions about the capability of the United States to act to protect the Canal if denied access to Panamanian territory which, after the year 2000, will encompass all lands surrounding the Canal and the Canal itself.

Those are the demerits of the controversy which treaty advocates would like to dismiss as the last remnants of American jingoism. They are, in fact, serious problems which have not been adequately answered and, I believe, are at the base of the overwhelming public sentiment in opposition to approval of the agreements. Several different polls have indicated that the American people by at least a 2 to 1 margin reject the treaties, a fact which cannot and should not be ignored in the context of the political aspect of the approval process now underway.

But, let us examine the major arguments in favor of the treaties as put forth by Secretary Vance and deal with those arguments from the viewpoint of the loyal opposition.

First, the Secretary tells us the treaties will make the canal easier to operate and defend.

A canal without an assurance of skilled personnel will become inoperative. The canal, while a technological miracle of its day, is by our standards a labor intensive operation, and skilled labor at that. The treaties, at the very least, jeopardize the job standing of many of the present skilled employees and at their worst will result in a mass exodus of those people from Panama. The potential for operational chaos is certainly evident with no specific assurances of the means to meet such a crisis.

Easier defense of the canal is based upon the often-stated premise that the waterway is quite vulnerable to sabotage and continued U.S. presence in the canal operation increases the chances for such sabotage. Perhaps. But there is another side to the sabotage coin. The canal treaties are a centerpiece of the Torrijos government, a government whose human rights and other policies have generated substantial dissent in Panama. The recent plebiscite held on the treaties in that country highlighted these problems when 35% of the population showed courage enough to stand up against their dictator and vote "no." Turning the canal over to Torrijos could very well increase the chances of sabotage based upon this substantial opposition to his rule. The opposition could easily feel that the only way of bringing down Torrijos is to bring down his canal. And under the terms of the treaties, the U.S. will have an ever diminishing role in defending against such eventualities.

Second, Secretary Vance claims better assurances of access to the canal, both military and commercial. This point, of course, is a key to the whole argument. Without military access to the canal, the United States would be in a position of having to develop, at monumental expense, a two-ocean navy. Our modern Navy stresses smaller, speedier ships, nuclear power and independent missile capability. The Panama Canal is an important aspect of our assurance of speed and mobility. Except for the largest aircraft carriers, our Naval fleet can travel through the Canal, thus allowing our Naval planners a great deal of flexibility and versatility.

On the commercial side of things, the importance is just as obvious. On an average about 70% of all the cargo sent through the canal either originates in or is bound for the United States. Particularly now when the canal is becoming the chief route for Alaskan oil to get to the East Coast, the vital nature of it to the American economy cannot be ignored.

The idea that the treaties offer better access in these regards can be challenged by the apparent Panamanian differences of opinion regarding our concept of what the agreements say. We say that they say that the expeditious passage wording means our warships go to the head of the line whenever needed. The Panamanians obviously have a different understanding. The head of the Panamanian negotiating team has been quoted as saying about this phrase, "if . . . the gringos with their warships say, 'I want to go through first,' then that is their problem with the other ships there." In other words, our naval commanders would be in a position of negotiating for passage in emergency situations.

But wait, the proponents say that was clarified in the Carter-Torrijos statement and now our ships are assured of priority treatment. But when General Torrijos returned home after issuance of the clarification, he told his countrymen in response to criticism that he sold out key elements in the treaties that he had signed nothing. In fact, he did not, and the ambiguity of the whole situation makes it imperative that the clarification language be included in the treaty texts. Certainly, however, the assurances of military access is useless otherwise.

Commercial access is also a problem. We know that toll rates will rise astronomically in the next 22 years, and no one will even guess what may happen after the year 2000. Access could be denied through cost considerations. But even more disturbing is the apparent attitude of the Panamanian negotiators toward keeping the canal open for commercial trade. The definition of open as understood by Panama was stated again by Dr. Escobar in his report to the Panamanian National Assembly on August 19. He states that when the United States proposed that Panama be obliged to keep the canal permanently open and neutral, Panama cited grounds for not keeping it open: because of earthquakes, because of a landslide or because the canal was not making money. Hardly a firm commitment in my view.

Secretary Vance says the treaties enhance our position in Latin America and the world. In my opinion, this argument ignores some valid lessons from history, namely, that international success cannot build on a foundation of appeasing and accommodating hostile ideological elements. In past months we have managed, as a nation, to alienate nearly every traditional ally in Latin America. To contend now that by acceding to the demands of the Panamanian dictator that we can establish a basis for future cooperation with all countries in the Western hemisphere strikes me as bankrupt. Instead, the action will likely reveal to most countries in Latin America that only vehement hostility to the United States generates a favorable response in Washington.

On a broader front, the complete abandonment of the human rights of the Panamanian people (and our willingness to swiftly expand that totalitarianism to the Canal Zone as well) reveals the total duplicity of the principles as they apply to Latin America. And perhaps most ironically, the enormous $50 million a year political reparation payment to General Torrijos will be extracted most heavily from the other Latin American nations using the Canal.

And what of the rest of the world? Will they respect us for abandoning our responsibilities for such a vital trade link? Japan sends about one-third of its oceanic trade through the Canal, and when viewed in terms of specific trade patterns, any curtailment of its use of the Canal could bring economic disruption not only to Japan, but the U.S. and the Western World as well. Great Britain is consistently the 2nd or 3rd largest user of the Canal sending more than 60% of British registered shipping through its locks. Latin American nations, as stated before, are particularly dependent on the Canal. Nicaragua, El Salvador and Ecuador send respectively 55.1%, 68.1% and 72.4% of their oceanic trade through the waterway. Pacific friends such as Australia and New Zealand rely on the Canal to reach vital European markets. Our standing in the world is not likely to be enhanced if these treaties result in disruption of world trade.

Finally, Secretary Vance says that the treaties fulfill American expectations of leadership. But, if we relinquish the canal, our power and standing in Latin America and throughout the world would diminish. Our leadership will be again called into question. This is particularly true in light of recent retreats from other points on the globe. And, how can it be termed a high point in moral leadership to pull the rug out from under the Panamanian economy at a particularly low ebb in its history? During 1976 the United States infused over $29 million into Panama by direct purchases from U.S. government agencies; over $108 million in wages to non-U.S. citizens employed in the Zone; over $39 million in personal expenditures by U.S. employees—not to mention major construction, obliteration of yellow fever, and countless apprentice and job-training programs. We do not have any reason to be ashamed of our role in Panama and can even take a measure of pride in what we have done. In fact, per capita income in that country is currently the highest in Central America—thanks to you-know-who.

Clearly, opposition to the Panama treaties is not based on mere emotionalism or sloganeering. The idea that we stole the canal fair and square and therefore should keep it has little or nothing to do with the issue at hand. The issue is whether or not the treaties before us are a good bargain from the standpoint of our national interest, because a poor treaty is worse than no treaty at all. What we have before us gives no guarantee that the United States will be able to defend our security interests in Panama, no guarantee that our military and commercial needs will be met, no guarantee that detrimental economic consequences will not result and no guarantee that our world role

will be enhanced. Therefore, the sensible answer, in my opinion, is rejection of the proposed treaties.●

HAS THE FEDERAL RESERVE BOARD TURNED CONSUMER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, consumers of this country received a boost from an unexpected source the other day. If the first open meeting chaired by recently confirmed Federal Reserve Board Chairman G. William Miller is any indication of things to come, it appears that the Board may finally be ready to recognize the importance of its consumer protection responsibilities and give these matters the attention they deserve.

In the past, the Board has relegated consumer protection to the bottom rung of its ladder of priorities. Former Chairman Arthur Burns placed such a low emphasis on consumer matters that he rarely bothered to attend the open-to-the-public Board meetings at which consumer affairs issues were discussed.

At the first open meeting of the Board since he was confirmed as Chairman, Mr. Miller spoke up for consumers and generally served notice that, under his chairmanship, the consumer view will receive fair representation and not be taken lightly or ignored.

Three consumer issues were on the Board's agenda. One issue dealt with the right of a consumer whose credit card is not accepted at the point of sale to receive notification of the reasons for the rejection. Mr. Miller supported a proposal that would have required notification except in certain specified situations, but the Board rejected that proposal in favor of one which basically held that a turndown at the point of sale does not require notification to the consumer of the reasons for the rejection.

A second issue concerned a proposal which would have made it easier for creditors to take security interests in consumers' homes to secure credit card indebtedness. Chairman Miller spoke against this proposal voicing concern that the proposal might encourage this practice which could prove extremely harmful to consumers. The proposal was sent back to the staff for further study.

A third issue concerned whether certain information which normally could not be requested under the Equal Credit Opportunity Act could be sought strictly for marketing purposes. The Board permitted this practice in the specific case before it, but tightly restricted the practice and indicated that, if challenged, the burden would be on the creditor to prove that the information had not been used for credit purposes.

Mr. Miller is off to an auspicious start as Chairman of the Federal Reserve Board and consumers have good reason to be optimistic.

Mr. Speaker, as chairman of the Consumer Affairs Subcommittee, I am indeed heartened at the approach taken by Chairman Miller to consumer problems. I sincerely hope that his devotion to these important issues will not waiver, and based on his past record as a man who fights for his beliefs, I do not think his convictions will waiver.

I applaud Chairman Miller for taking such a strong consumer stand and for doing it right off the bat. It is good to know that at least the man at the top at the Federal Reserve Board wants to help the consumers and with a little missionary work, I think that Chairman Miller can convert the rest of the Board into becoming card-carrying consumers.●

THE PANAMA CANAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. BOWEN) is recognized for 5 minutes.

● Mr. BOWEN. Mr. Speaker, as a member of the Panama Canal Subcommittee, I have been very deeply concerned since we learned in late 1974 and early 1975 of the negotiations expedited by President Ford and Secretary of State Kissinger which led to the treaties between the Republic of Panama and the United States concerning turning over control of the Canal Zone to Panama by the year 2000.

In addition to my very grave reservations about the wisdom of relinquishing effective American control of the Canal Zone and the operations of this yital international waterway, I am also concerned that the American people, through their elected Representatives in this august body, have an opportunity to be heard on such an issue of major import.

Unfortunately, we may not have an opportunity directly to vote on this crucial foreign policy issue, since the administration is opposed and the courts have not looked with favor on our position.

As one who is personally familiar with the situation in Panama, and one who is opposed to giving up effective American control of the canal, I want to go on record again as saying that I firmly believe the House of Representatives should be allowed to exercise its constitutional authority to vote or otherwise act on the disposition of American property if the Senate does ratify these treaties with the Republic of Panama.

I do not quarrel with the constitutional prerogative of the U.S. Senate to debate and either ratify or reject treaties such as those promulgated with the Republic of Panama.

But by the same token, I feel very strongly that the House of Representatives should not forgo its own constitutional responsibilities in this case.

The issue of American control of the Canal Zone is one of paramount importance, not only to our Nation and the free world, but it is one that evokes great concern among the people of my own congressional district, and the entire State of Mississippi.

Those of us who represent States in the Gulf South, and realize the substantial flow of goods and commodities from this nation through the Panama Canal, and the dire consequences if this critical waterway were to fall into unfriendly or unstable hands, are very much concerned about the implementation of these treaties.

A majority of this House has already expressed its sentiments, one way or another, on this issue.

Those in Congress, the administration, or among the public at large who discount any potential interloper in the Canal Zone adverse to the interests of the United States cannot, however, discount what is happening at this time in the Horn of Africa.

The disturbing, and significant, intervention by the Soviet Union and Cuba in the difficulties between Ethiopia and Somalia cannot be ignored with respect to the vulnerability of areas in the Western Hemisphere such as Central America, or what is now the Canal Zone, at some point in the future, if the times, circumstances, and temptation combine to entice such intervention.

I do not predict this is going to happen, only to mention the possibility if a change in political climate or an unstable situation were to develop in Panama after American control of the Canal Zone was relinquished.

In conclusion, let me state, as I have stated repeatedly since this issue first began developing in 1975, that I am firmly opposed to the United States giving up effective control of the Canal Zone and the operation of the Panama Canal. I feel very strongly that the House of Representatives, as the clearest voice of the American people, should have an opportunity to, in some way, express its sentiments on this issue.●

NEED FOR THOROUGH STUDY OF CRIMINAL CODE REVISION PROPOSALS BEFORE ENACTMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

● Mr. WEISS. Mr. Speaker, on March 8 I introduced House Resolution 1066 urging the Committee on the Judiciary to disapprove S. 1437/H.R. 6869, the Criminal Code Reform Act and to conduct full hearings on revision of the Criminal Code. I hope that my colleagues share my concern about this far-reaching legislation and will support this resolution as cosponsors.

As currently written, S. 1437/H.R. 6869 allows the Federal Government to increasingly infringe upon the rights of every American. The bill's enactment would result in a "fivefold increase in Federal prosecutable offenses" according to Ohio State University law professor, John Quigley. Federal jurisdiction would be newly established over crimes such as extortion, blackmail, arson, and riot that are now prosecuted primarily at the State level. Such an increase in Federal prosecutorial authority is especially inappropriate in view of recent House action limiting Federal court jurisdiction (H.R. 9662). Additionally, Chief Justice Warren Burger has specifically emphasized the need for a re-

duction in the Federal caseload for a viable judiciary.

S. 1437/H.R. 6869 poses a serious threat to the guarantees and protections afforded by the Bill of Rights and the Constitution.

The first amendment's guarantee of the people's right of free speech and assembly is repeatedly threatened throughout S. 1437. Picketing or parading is prohibited within 200 feet of a Federal courthouse or any building occupied by a judicial official. (Section 1328.) It would be a criminal offense for an individual to participate in a peaceful demonstration which "obstructs" a Government employee in performance of his official duty. (Section 1302.)

Any designated Federal employee would be empowered to disperse a gathering, forbid picketing, parading, and leafletting when in his/her judgment there is a risk of injury to person or property. (Section 1861) These provisions broadly interpreted could mean the end of all mass demonstration and peaceful protest. S. 1437/H.R. 6869 poses a serious threat to the freedom of the press. Section 1311 would expand the definition of "hindering law enforcement" as to provide for prosecution of a reporter for refusing to reveal the identity of a news source. The bill codifies repressive espionage laws which prohibit the release of documents for public information. As a result, those who disclose information without the intent to violate the national security, such as Daniel Ellsberg would be criminally liable for espionage.

Enactment of this bill would effectively eliminate the right to strike. In labor disputes the Federal Government could intervene and prosecute strikers under an expanded definition of extortion and blackmail. Federal interference would be justified in any situation where the employee action threatens an employer with "economic loss or injury" or property damage.

Section 3713 is a further erosion of rights guaranteed by the Miranda ruling, which requires that an individual be read his rights prior to interrogation. The judge is now given complete latitude in determining if a confession can be admitted as "voluntary."

For the first time it would become a criminal offense for an individual to make a false oral statement to a law enforcement agent. Enactment of this provision, which does not require the presence of a corroborating witness or counsel will serve to pit the word of the private citizen against that of the law enforcement officer.

Constitutional rights guaranteed under the double-jeopardy clause of the fifth amendment are endangered in section 3725 when the prosecution is granted the right to appeal to increase a sentence thought to be too lenient.

A floor amendment to S. 1437 reenacts the old Comstock law which states that—

> Mailing, importing or transporting . . . any article or thing designed . . . to produce *abortion* is a Class D felony . . . (Section 6035)

Not only is this an unconstitutionally broad provision, but it would revive the abortion controversy.

Parole is virtually eliminated and "good time" credit for time already served is reduced to a maximum of 10 percent of the sentence. These harsh policies are especially unsound at a time when the average prison sentence in the United States is longer than that of any other industrialized Western nation except South Africa.

These are some, but certainly not all, of the objectionable features of S. 1437/H.R. 6869. The bill is dangerously vague, undefined, and disturbing in its implications. I hope you will agree that there is a need for a thorough study of any criminal code revision proposals before enactment. I hope my colleagues will cosponsor House resolution to disapprove S. 1437/H.R. 6869. Please contact Heather at 55635.

The resolution follows:

RESOLUTION

Whereas the United States Senate has passed S. 1437 on January 30, 1978; and

Whereas S. 1437, if agreed to by the United States House of Representatives and signed into law by the President, will have far-reaching effects upon the rights of all Americans; and

Whereas S. 1437 is intended to revise the United States criminal code to maintain and preserve the principles of the Constitution; and

Whereas S. 1437 fails to maintain and preserve the constitutional rights of all Americans: Now, therefore, be it

Resolved, That the House urges the Committee on the Judiciary to disapprove the bill S. 1437 and to conduct full and complete hearings regarding the revision of the Federal criminal code.●

REPORT ON PUBLIC EMPLOYEE RETIREMENT SYSTEMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. DENT) is recognized for 5 minutes.

● Mr. DENT. Mr. Speaker, this morning the Subcommittee on Labor Standards, of which I serve as chairman, approved the issuance of an extensive report on public employee retirement systems. The importance of this subject matter, I am sure, is clear to us all. Hardly a day goes by without the publication of a newspaper or magazine article in which some problem area of some public employee pension plan is extensively discussed. Because these governmental retirement systems are of such vital concern to both public employees and the taxpayers, I would like to briefly discuss the subcommittee report which was approved this morning.

The genesis of the report, Mr. Speaker, is found in the Employee Retirement Income Security Act of 1974 (ERISA). In enacting ERISA, we generally excluded from its coverage the retirement plans of State and local governments. We did not in 1974 believe that public pension systems were free of many of the deficiencies in the private system that had generated ERISA. We knew there were problems. But we also knew we lacked sufficient information regarding the design and operation of governmental plans to resolve whether Federal standards were appropriate, and if so, what the nature of that Federal regulation should be. To gain sufficient information, we directed, in ERISA itself, that a study of State and local plans be undertaken.

We began that study effort in 1975. A discussion bill was introduced into the House, and extensive hearings, both here in Washington and around the country, were conducted. Every segment of the governmental pension community was given an opportunity to testify and assist in our effort to gain a full understanding of the public pension plan universe. We undertook an extensive survey of 800 public employee retirement systems, probing into every aspect of their design and operation. Extensive legal research was conducted, in an effort to gain an understanding of the Federal laws, as well as the State laws, that affect public plans.

The first part of this effort is now concluded, and the report which was approved by the Subcommittee on Labor Standards represents the product of the most extensive study effort ever conducted into this vitally important area.

I would like to take the opportunity to relate some of the report's findings and conclusions:

First. Most governmental jurisdictions, at all levels, have not developed an overall policy framework to serve as a guide for dealing with public pension issues;

Second. Federal, State, and local governments annually contribute more than $23 billion to public employee pension plans;

Third. There are approximately 7,000 public pension plans, covering 12.7 million State and local plan participants and 9.5 million Federal plan participants;

Fourth. There are 68 separate plans for Federal Government employees among the States. Pennsylvania has the most plans—1,400—while Hawaii has but a single retirement plan covering all public employees in the State;

Fifth. Nearly 80 percent of all plans have 100 or fewer active members, 390 plans have 1,000 or more active members.

Sixth. Approximately 2 percent of State and local employees are members of defined contribution plans; 16 percent of State and local employees are in plans with both defined contribution and defined benefit features; 82 percent of State and local government employees are in conventionally defined benefit plans;

Seventh. Nearly 75 percent of all State and local government pension plans require employee contributions. Only 44 percent of the Federal plans require employee contributions;

Eighth. Nearly 85 percent of all State employees receive social security coverage, although among police and fire personnel, the figure is only 36 percent.

Ninth. Auditing procedures among public employees plans are often deficient. Five percent of State and local plans and 29 percent of Federal plans are never audited. Nearly one-third of all State and local plans and 37 percent of the larger plans do not provide for an annual audit. Far less than one-half of all plans are annually audited by outside auditors;

Tenth. Fiduciary guidelines are often deficient. It must be made clear that plan fiduciaries owe their exclusive loyalty to the plan's participants and beneficiaries, and that plan assets must be invested prudently and exclusively for the benefit of participants and beneficiaries;

Eleventh. Plans often fail to disclose vital plan information to plan participants in an understandable form and on a regular basis. Less than 50 percent of State and local plans make a practice of updating and distributing plan descriptions of one form or another; and

Twelfth. Nearly 40 percent of all public employee pension plans fail to meet what many pension experts regard as a "bare minimum" funding level. Public employee pension plans generally are funded at levels significantly below those levels required for private sector plans.

Mr. Speaker, the publication of this report gives the Congress for the first time the information it needs in order to decide whether Federal standards for State and local government retirement systems are appropriate and necessary. I urge my colleagues to carefully study the material contained in this report, for the subject matter—public employee retirement systems—is of concern not only to public employees but to taxpayers and Government officials as well.●

LEGISLATION DESIGNATING VA HOSPITAL IN TEMPLE, TEX., AS THE "OLIN E. TEAGUE VETERANS' HOSPITAL"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ROBERTS) is recognized for 5 minutes.

● Mr. ROBERTS. Mr. Speaker the entire Texas delegation to the House of Representatives has joined me in sponsoring a bill to designate the Veterans' Administration Hospital in Temple, Tex., the "Olin E. Teague Veterans' Hospital," after our distinguished colleague's retirement from Congress at the conclusion of his present term.

This is a modest proposal. Every hospital, clinic, nursing home, and regional office in the VA system could, appropriately, bear his name for without him few would exist. As the chairman of the Senate Veterans' Affairs Committee, ALAN CRANSTON has said:

> As one of the most decorated combat soldiers of World War II, a disabled veteran, and chairman of the House Veterans Affairs Committee for 18 years, (Tiger Teague) has been the veterans most steadfast friend and ally for the last quarter century.

My feelings about my colleague are well known. He is my valued friend and counselor. I will greatly miss his presence in this body but, more importantly, our Nation will have lost a respected, wise, and vigorous Representative from its Government.

Because of his achievements we can expect to see public buildings, spaceships, and scholarships named for him. There is nothing, however, that would give this Nation's veterans more pride and pleasure than seeing "TIGER" TEAGUE's name on an institution dedicated to healing their ills.

It is particularly appropriate that the Temple VA Hospital bear his name. When it was known as McClosky Army Hospital, young OLIN TEAGUE spent 2 years there recovering from the severe combat wounds that have brought about his untimely retirement. Upon discharge from the Army in 1946 he entered the U.S. House of Representatives where he has served continuously since.

Mr. Speaker, I will not review here the illustrious record of service to our country that has been compiled by "TIGER" TEAGUE. It is well known to all our colleagues. I know it will be given full consideration, however, when they take up this proposal.●

CHANGE IN EX-IM FINANCING PROPOSED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognzied for 5 minutes.

● Mr. NEAL. Mr. Speaker, on September 15, 1977, I inserted in the RECORD two financing notifications from the Export-Import Bank relating to the construction of a natural gas pipeline in Mexico.

Today I call to the attention of my colleagues additional information concerning one of these projects that I received from the Export-Import Bank. I am inserting the letter at this point in the RECORD and I welcome any comments any of my colleagues may wish to offer.

EXPORT-IMPORT BANK OF THE UNITED STATES,
Washington, D.C., February 9, 1978.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D.C.

DEAR MR. SPEAKER: On September 9, 1977, the Bank informed Congress it was prepared to authorize a $250 million line of credit in favor of Petroleos Mexicanos at an interest rate of 8½ percent per annum, repayable in eight semiannual installments, beginning on March 31, 1984. The Bank has authorized the credit at an interest rate of 8¼ percent because we reduced our standard interest rate schedule between the date of our notice to Congress and the date of final authorization of the credit; the appropriate rate for the term of this line of credit is 8¼ percent.

Also, because of the delay in giving final approval to the line of credit, the availability date has been extended from September 30, 1979 to March 15, 1980, and the first repayment date of the commercial bank credit portion of the line of credit will be on March 31, 1980, instead of September 1, 1979.

Sincerely,

JOHN L. MOORE, Jr.●

THE 125TH ANNIVERSARY OF ST. PATRICK'S PARISH

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. OAKAR) is recognized for 5 minutes.

Ms. OAKAR. Mr. Speaker, it is fitting on this St. Patrick's Day that this year the people of Cleveland will be celebrating the 125th anniversary of the founding of St. Patrick's Church, the second oldest parish in the city. When St. Patrick's was built back in 1853 under the leadership of Father James Coulon, no one could have foreseen that this church would become a haven not just for Irish immigrants, but for displaced and impoverished people of all faiths and nationalities. Father Coulon erected his church with the bricks of faith and held it together with the mortar of love. And today we commemorate the achievement of this heroic priest and pay tribute to the church which still stands as a living testament to one man's courage and faith to provide shelter for the homeless Irish immigrants who fled their famine-ravaged land in the late 1840's and early 1850's.

When we speak of St. Patrick's, we speak not only of history and tradition, but we speak also of faith, of love, and of courage. Especially courage. Imagine, if you will, what it must have been like crossing a vast ocean on a masted schooner in the 19th century. Frightened families from County Cork and County Armaggh, driven from their home and land because potatoes rotted in the earth and would not grow, huddled together in cramped and open quarters with all their worldly belongings stuffed into three cloth sacks. Turbulent waves lashing at the ship's sides and splashing on the wooden decks, the howling winds of sudden rainstorms, the infinite spreading of darkness of the night sky, the fevers and pneumonia from exposure to the cold, the sickness and diseases from a diet consisting mainly of stale bread and water, and all the while, the steady, knowing, dreading drift toward a strange land in a far part of the world. But these people endured and survived this suffering, and came to this country impoverished in material goods, but immeasurably enriched in spirit from the experience of having lived through the horrors of poverty and starvation in Ireland to sail through the dangers of an ocean crossing in search of the promise of America.

As more and more immigrants flooded into Cleveland during the 1850's and 1860's, St. Patrick's increased in size accordingly, so that in 1871, St. Patrick's School alone had 950 pupils and the congregation numbered 2,100 families. In time, St. Patrick's would expand into a larger church on a piece of land facing Bridge Avenue, but only after the death of Father Coulon in 1875 and after the depression which lasted from 1872 to 1879. A new pastor would arrive, Father Eugene O'Callaghan, and his dedication would inspire the parishioners of St. Patrick's to travel by horse-drawn wagon to Sandusky to cut stone from a quarry and haul it back to Cleveland. In that way, enough stone was quarried to build the new St. Patrick's.

Thus was the present structure built. This is the story of the building of one church. People who were poor, but devoted to the heritage, their community and their church, donated their energies to their families and to the community. The history of St. Patrick's Parish has been eloquently narrated more than sev-

eral times by Fr. Nelson Callahan, Historian of the Diocese of Cleveland.

Many Irish immigrants came to Cleveland hoping for the chance to begin their lives anew, and they turned to the Church to help them in this effort. The jobs were often hard to get, but the work that was available demanded strenuous physical exertion and usually paid very little. Most of the men and boys worked on the docks down by the old riverbed or at "Irishtown Bend." Up and down inclined wooden ramps, they pushed wheelbarrows loaded with iron ore shipped into Cleveland from the mines at the western end of Lake Superior. The back-breaking work of these men and boys helped to build the steel mills that would become a major industry for Cleveland. The Irish families whose fathers and sons worked on the docks settled together on the bluffs above the Cuyahoga River and in that way developed into a close-knit community in which St. Patrick's Church played a leading role.

St. Patrick's today continues to serve the near west side community. It is a diverse community made up not only of the Irish, but of every race and ethnic origin. St. Patrick's continues to serve its needy. Those of us who were educated at St. Patrick's grade school and who consider it to be their parish, are proud of the devoted parishioners, pastor, Father Patrick McManamon and the pastoral staff. We join with the entire Cleveland Community in saying on this St. Patrick's Day, "All Praise to St. Patrick!" ●

RAILROAD SAFETY

(Mr. SKUBITZ asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SKUBITZ. Mr. Speaker, in the last several weeks, there have been a number of disastrous railroad accidents. These accidents have highlighted the fact that our Nation's railroads lack sufficient capital for proper maintenance. Poor track continues to be the major cause for derailments, even though other factors such as faulty equipment or human error do cause some accidents.

As part of the 1976 authorization bill for railroad safety, I had an amendment adopted which required the Office of Technology Assessment to conduct an indepth study as to the adequacy of our Federal railroad safety laws and their administration. This week, that office will release its comprehensive study. I have carefully gone over a draft of the study and find that the Office of Technology Assessment has done a superb job. While the study relied on some outside consultants, the primary work was done inhouse by Lee Dickinson, the project director and Lucia Turnbull, the assistant project director. The industry—both management and labor—served on the advisory panel which made important contributions toward the success of the study. All of these individuals deserve the appreciation of the industry and the Nation for laying the framework necessary for us to really achieve railroad safety.

Among other findings made in the study are the following:

First. We have failed to develop a systematic and comprehensive approach toward railroad safety;

Second. Existing law, while perhaps adequate, is improperly focused for achieving safety performance.

Third. The jurisdictional dispute between OSHA and FRA for the safety of railroad employees in their workplace should be resolved;

Fourth. The economic condition of the railroad industry needs to be improved to obtain the capital necessary for safety performance;

Fifth. Accident data has not been adequately used in determing the nature, extent, or reasons for specific safety problems and in setting priorities for addressing problems prior to the initiation of Federal action.

Sixth. Measures of effectiveness for the current program (regulation, inspection, and research and development) have not been designed into the program;

Seventh. Alternative approaches to the regulatory process, such as incentive programs, have not been readily or systematically considered; and

Eighth. In certain areas, the divided jurisdictions among Federal agencies and among Federal, State agencies and railroads have impaired administration of safety efforts.

In addition, this study points out that the inspection programs resulting from the 1970 Safety Act do not appear to have affected the accident rate.

Finally, the report urges that increased cooperation in addressing railroad safety problems among all concerned parties and Government agencies would provide substantially greater opportunity for sizable reduction in both property and casualty losses.

The Subcommittee on Transportation and Commerce of the Interstate and Foreign Commerce Committee begins hearings on this matter on Wednesday. Yesterday, I introduced a bill which uses a different approach for achieving railroad safety. Basically, it would emphasize safety performance and require each railroad to certify to the FRA that it has a program and plan for achieving railroad safety. The approach in my bill draws heavily from the findings contained in the Office of Technology Assessment report. I believe it creates a climate for cooperation, ends uncertainties as to who is in charge of what, and places much more of the responsibility for policing the enforcement of safety laws on the industry.

I included a title in the bill which addresses the economic problems facing the railroad industry. I have used the attack of having a separate title because I believe that railroad safety requires a two-pronged approach.

First, our approach to the regulation of safety needs to be comprehensive and based on safety performance rather than the current system which tends to be piecemeal and based on regulations which may or may not affect safety. Second, I recognize the fact that the industry cannot do the job of rebuilding the Nation's railroads alone. Therefore, I have added title IV to the basic bill which provides such Federal funds as necessary to be given to those railroads which have a certified safety plan and propose track improvement and other projects which are primarily related to safety.

As ranking minority member of the Transportation and Commerce Subcommittee, I am deeply concerned that we must promptly move to implement the OTA report. I know the chairman of that subcommittee, Mr. Rooney, shares my concern and determination to effectively deal with the problem of needless railroad accidents. ●

LEGISLATION TO RETURN CONTROL OF THE POSTAL SERVICE TO THE GOVERNMENT

(Mr. SKUBITZ asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SKUBITZ. Mr. Speaker, I want to share with my colleagues a rather disturbing letter I received relating to the operations of the U.S. Postal Service from Spud Cabbagehead, a constituent of mine:

DEAR CONGRESSMAN JOE: You may never receive this letter but I feel compelled to write you nevertheless.

I say you may never receive this, Joe, 'cause I think I have discovered a plot by the Postal Service to hold all the country's mail for ransom.

I'm serious, Joe, now you may think I'm kidding but I'm not. Them boys at the Postal Service are phasing in their ransom plan right now. The mail just gets slower and slower, soon Joe, it's just going to stop. I mean right in its track, every letter in the country.

Why Joe, they have slowed down the mails now to the point a jackass could move it faster. I wrote you a very important letter on February 1st about our town council meeting. We didn't get no response from you till February 21st, three days after our meeting.

Joe, them town council members was furious, they thought you just didn't care about our sewer problem. Why old Thelma, she give a speech about that old Congressman Joe thinking he was too important to answer mail from our little town.

Then we got your letter and we seen what happen, why Joe it took 9 days for your letter to get to us, it was dated February 13th and it arrived February 21st. I called your girl in the office and she said my letter took 9 days to get to you. It took 3 days to find our information, and 9 days to get back.

Boy Joe, I sure was glad to learn you really do care about our sewer but I'm scared to death about the Postal Service.

If we hadn't done some checking on our own, most of the town council would be ready to vote you right out of office, 'cause if there is one thing this country don't need it's a Congressman who thinks he's too important to answer mail from us common folks.

Well, anyway Joe, do what you can about this Postal Service Plot. We need help.

Sincerely,

SPUD.

Spud's letter may be a bit on the humorous side, but it is extremely disturbing to me.

I think it is about time this body begins thinking in terms of defending itself. You may think the loyal opposition party—Democrat or Republican—is your chief threat to continued service as a Member of Congress, and you may be wrong.

The Democratic Party has not been able to touch me for 16 years in Kansas, but if I were running again, I would give odds that the Postal Service could do me in.

Let me give you an example. I live 18 miles from the Capitol. For the past 2 weeks my office has mailed weekly schedules to my home on Friday. They have been arriving on Tuesday. This week the schedule still has not arrived.

I checked with my administrative assistant about mail from Kansas. He pulled a handful of letters out of the incoming mail and I was shocked at what I discovered.

Letters arriving today, March 14 were as follows:

First. The Kansas Grain and Feed Dealers wrote me, March 7, regarding their membership.

Second. A constituent from Eureka, Kans., wrote, March 8, about a veteran's pension problem.

Third. The Derby, Kans., Public Library wrote, March 3—12 days ago—on pending social security rulemaking.

Fourth. The Johnson County Airport Commission wrote, March 8, about the President's tax package.

Fifth. The Altamont, Kans., Board of Education wrote, March 7, about social security legislation.

It takes my staff 2 or 3 days to turn around mail. If you add another week to 10 days delay for return postal handling—you have close to a month delay.

I would highly suggest each of my colleagues check his own mail service. The Members of this body who have been here for a few years—know the truth of what I am saying.

You stay elected because you are responsive to the needs of your constituents. If it takes a month to answer constituent mail, you are in trouble.

The postal service can do more to sabotage your reelection than any opponent you will ever face.

I feel it is time for us to take a closer look at legislation to return control of the Postal Service to the Government.

The Postal Service has already lost parcel post to UPS because they do a better job. They would lose utility billing business, if the law did not lock in that business.

In truth, our Postal Service is about on par with mail service in Papua, New Guinea, where they will agree to take your letter with no guarantees it will ever end up where it is going.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. GILMAN (at the request of Mr. RHODES), for March 17, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. EVANS of Delaware) to revise and extend their remarks and include extraneous material:)

Mr. MILLER of Ohio, for 10 minutes, today.
Mr. COLEMAN, for 10 minutes, today.
Mr. CONTE, for 5 minutes, today.
Mr. WALKER, for 15 minutes, today.
Mr. WINN, for 15 minutes, today.

(The following Members (at the request of Mr. KILDEE) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. MCDONALD, for 5 minutes, today.
Mr. BOWEN, for 5 minutes, today.
Mr. WEISS, for 5 minutes, today.
Mr. DENT, for 5 minutes, today.
Mr. ROBERTS, for 5 minutes, today.
Mr. NEAL, for 5 minutes, today.
Ms. OAKAR, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SKUBITZ, in two instances.

Mr. RUDD, and to include extraneous material, following his remarks on the Quie amendment in the Committee of the Whole on H.R. 50 today.

(The following Members (at the request of Mr. EVANS of Delaware) and to include extraneous matter:)

Mr. FREY.
Mr. DICKINSON.
Mr. BROWN of Ohio.
Mr. ANDERSON of Illinois.
Mr. SARASIN.
Mr. DERWINSKI.
Mr. STEERS in two instances.
Mr. O'BRIEN.
Mr. COLEMAN.
Mr. SCHULZE.
Mr. WHALEN.
Mr. KELLY.
Mr. LAGOMARSINO.
Mr. EVANS of Delaware.
Mr. DORNAN in two instances.

(The following Members (at the request of Mr. KILDEE) and to include extraneous matter:)

Mr. DRINAN.
Mr. SHIPLEY.
Mr. LONG of Louisiana in two instances.
Mr. FARY in two instances.
Mr. GONZALEZ in three instances.
Mr. ANDERSON of California in three instances.
Mr. EDWARDS of California.
Mr. OTTINGER.
Mr. SIMON in two instances.
Mr. LEHMAN.
Ms. KEYS.
Mr. HAMILTON.
Mr. EDGAR in four instances.
Mr. UDALL.
Mr. WAXMAN in two instances.
Mr. NOLAN.
Mr. WRIGHT.
Mr. NEAL.
Mr. ST GERMAIN.
Mr. RICHMOND.
Mr. EILBERG in two instances.
Mr. TEAGUE.
Mr. RANGEL.
Mr. WEAVER.
Mr. ALEXANDER in two instances.
Ms. OAKAR.
Ms. HOLTZMAN.
Mr. WALGREN.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 219. An act for the relief of Samy Ennabe; to the Committee on the Judiciary;

S. 222. An act for the relief of Dr. Nazeeh A. L. Abdul-Hadi; to the Committee on the Judiciary;

S. 1639. An act for the relief of Shenn-Song Theresa Lee; to the Committee on the Judiciary; and

S. 1933. An act for the relief of Anwar; to the Committee on the Judiciary.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 21 minutes p.m.), under its previous order, the House adjourned until tomorrow, Thursday, March 16, 1978, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3567. A letter from the Comptroller General of the United States, transmitting a report on the status of the Army's Stinger surface-to-air missile program (PSAD-78-20, March 15, 1978); jointly, to the Committees on Government Operations and Armed Services.

3568. A letter from the Comptroller General of the United States, transmitting a report on the status of the Navy's next generation aircraft carrier (PSAD-78-24, March 15, 1978); jointly, to the Committees on Government Operations and Armed Services.

3569. A letter from the Comptroller General of the United States, transmitting a report on the status of the Navy's FFG-7 guided missile frigate shipbuilding program (PSAD-78-28, March 15, 1978); jointly, to the Committees on Government Operations, and Armed Services.

3570. A letter from the Under Secretary of Defense (Research and Engineering), transmitting the annual report for fiscal year 1977 on independent research and development and bid and proposal costs, pursuant to section 203(c) of Public Law 91-441; to the Committee on Armed Services.

3571. A letter from the Under Secretary of Defense (Research and Engineering), transmitting supplemental detailed data to the annual report for fiscal year 1977 on independent research and development and bid and proposal costs, pursuant to section 203 (c) of Public Law 91-441; to the Committee on Armed Services.

3572. A letter from the Acting Staff Director, Commission on Civil Rights, transmitting a report on the Commission's activities under the Freedom of Information Act during Calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3573. A letter from the Records Officer, Postal Service; transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

3574. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend section 5(a) of the Wild and Scenic Rivers Act by designating a segment of the North Umpqua River and its Steamboat Creek tributary in Oregon as potential additions to the National Wild and Scenic Rivers System; to the Committee on Interior and Insular Affairs.

3575. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the act of July 19, 1940 (Domestic Travel Act), to authorize additional appropriations and for other purposes; to the Committee on Interstate and Foreign Commerce.

3576. A letter from the Comptroller General of the United States, transmitting comments on proposed legislation regarding the Federal regulation of lobbying; to the Committee on the Judiciary.

3577. A letter from the Comptroller General of the United States transmitting a report on needed reforms of the Military Retirement System (FPCD-77-81, March 13, 1978); jointly to the Committees on Government Operations, and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. THOMPSON: Committee on House Administration. House Resolution 1070. Resolution authorizing funds for the standing and select committees of the House of Representatives (Rept. No. 95-959). Referred to the House Calendar.

Mr. SISK: Committee on Rules. House Resolution 1078. Resolution providing for the consideration of H.R. 7700. A bill to amend title 39, United States Code, to establish congressional review of postal rate decisions, to increase congressional oversight of the U.S. Postal Service, to abolish the Board of Governors of the U.S. Postal Service, and for other purposes (Rept. No. 95-960). Referred to the House Calendar.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 985. Resolution to provide funds for the Select Committee on Congressional Operations; with amendment (Rept. No. 95-964). Referred to the House Calendar.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 989. Resolution to provide for the expenses of investigations and studies to be conducted by the Select Committee on Population; with amendment (Rept. No. 95-965). Referred to the House Calendar.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 996. Resolution to provide funds for the expenses of the investigation and study authorized by a resolution adopted on February 3, 1977, by the Committee on International Relations; with amendment (Rept. No. 95-966). Referred to the House Calendar.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 997. Resolution to provide funds for the further expenses of the investigations and studies of the Committee on Small Business; with amendment (Rept. No. 95-967). Referred to the House Calendar.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 1000. Resolution to provide for the expenses of investigations and studies to be conducted by the Committee on Merchant Marine and Fisheries; with amendment (Rept. No. 95-968). Referred to the House Calendar.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 1041. Resolution providing funds for the Committee on Post Office and Civil Service; with amendment (Rept. No. 95-969). Referred to the House Calendar.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 1045. Resolution providing funds for the ad hoc Select Committee on the Outer Continental Shelf; with amendment (Rept. No. 95-970). Referred to the House Calendar.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 1047. Resolution providing funds for the Committee on International Relations with expenses incurred in connection with visits to the United States by foreign heads of state and other foreign officials and for similar expenses incurred for meetings with senior U.S. Government officials and other dignitaries to discuss matters relevant to U.S. relations with other countries; with amendment (Rept. No. 95-971). Referred to the House Calendar.

Mr. ANNUNZIO: Committee on House Administration. House Resolution 1051. Resolution providing funds for the ad hoc Committee on Energy (Rept. No. 95-972). Referred to the House Calendar.

Mr. TEAGUE: Committee on Science and Technology. H.R. 11401. A bill to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, for other purposes (Rept. No. 95-973). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE: Committee on Science and Technology. H.R. 11495. A bill to authorize research, development, and demonstration projects relating to aviation, and for other purposes. (Rept. No. 95-974). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FISH: Committee on the Judiciary. H.R. 3995. A bill for the relief of Habib Hadded (Rept. No. 95-961). Referred to the Committee of the Whole House.

Mr. HARRIS: Committee on the Judiciary. H.R. 5612. A bill for the relief of Irene Hoffman (Rept. No. 95-962). Referred to the Committee of the Whole House.

Mr. EILBERG: Committee on the Judiciary. H.R. 8449. A bill for the relief of Lourdes Marie Hudson (Rept. No. 95-975). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rules X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRINKLEY (for himself, Mr. ROSTENKOWSKI, Mr. FRENZEL, Mr. ABDNOR, Mr. CONTE, Mr. EMERY, Mr. ANDREWS of North Dakota, Mr. FRASER, Mr. WOLFF, Mr. JACOBS, Mrs. SCHROEDER, Mr. LEDERER, Mr. BOLAND, Mr. SCHEUER, Mr. BRODHEAD, Mr. STEERS, Mr. WATKINS, Mr. JEFFORDS, Mr. QUIE, Mr. HARSHA, Mr. YOUNG of Florida, Mr. ADDABBO, Mr. DAVIS, Mr. GAMMAGE, and Mr. HANSEN):

H.R. 11556. A bill to incorporate the Gold Star Wives of America; to the Committee on the Judiciary.

By Mr. BROYHILL:

H.R. 11557. A bill to amend the Administrative Procedure Act to require the performance and publication of economic impact analyses in the Federal Register for all proposed and final rules which are subject to the provisions of that act; to the Committee on the Judiciary.

By Mr. CARNEY:

H.R. 11558. A bill to amend the Internal Revenue Code of 1954 to allow a taxpayer to deduct, or to claim a credit for, amounts paid as tuition to provide an education for himself, for his spouse, or for his dependents; to the Committee on Ways and Means.

By Mr. CARNEY (for himself and Mr. HILLIS):

H.R. 11559. A bill to pay tribute to those members of the U.S. Armed Forces who served honorably in Southeast Asia during the Vietnam era; to the Committee on Veterans' Affairs.

By Mr. CONYERS (for himself, Mr. DANIELSON, Mr. FASCELL, and Mr. MCCLOSKEY):

H.R. 11560. A bill to translate into practical reality the right of all Americans who are able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to assert the responsibility of the Federal Government to use all practicable programs and policies to promote full employment, production, and real income, balanced growth, adequate productivity growth, proper attention to national priorities, and reasonable price stability; to require the President each year to set forth explicit short-term and medium-term economic goals; to achieve a better integration of general and structural economic policies; and to improve the coordination of economic policymaking within the Federal Government; to the Committee on Education and Labor.

By Mr. CRANE:

H.R. 11561. A bill to require the Environmental Protection Agency and all other Federal regulatory agencies to evaluate, prior to the issuance of a regulation, the potential economic effect and environmental impact of such regulations; to the Committee on Government Operations.

H.R. 11562. A bill to amend the Antidumping Act of 1921; to the Committee on Ways and Means.

H.R. 11563. A bill to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes; to the Committee on Ways and Means.

By Mr. DERRICK:

H.R. 11564. A bill to amend the Consolidated Farm and Rural Development Act to provide an alternative method of financing the land, equipment, and operating expenses of qualified farm families, including young farmers, and to help provide the farm family with adequate standards of living and the consumer with reasonable prices for agricultural products, and for other purposes; to the Committee on Agriculture.

H.R. 11565. A bill to provide emergency assistance to producers of wheat, feed grains, upland cotton, and soybeans, and for other purposes; to the Committee on Agriculture.

By Mr. DICKINSON:

H.R. 11566. A bill to amend section 218 of the Social Security Act to require that States having agreements entered into thereunder will continue to make social security payments and reports on a calendar-quarter basis; to the Committee on Ways and Means.

By Mr. ECKHARDT:

H.R. 11567. A bill to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1979–81, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. EDWARDS of Oklahoma:

H.R. 11568. A bill to require the Environmental Protection Agency and all other Federal regulatory agencies to evaluate, prior to the issuance of a regulation, the potential economic effect and environmental impact of such regulations; to the Committee on Government Operations.

H.R. 11569. A bill to amend the Antidumping Act, 1921, to expedite procedures for making certain findings under such act and for imposing special dumping duties, and for other purposes; to the Committee on Ways and Means.

H.R. 11570. A bill to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes; to the Committee on Ways and Means.

By Mr. FRASER (for himself, Mr. AKAKA, Mr. AuCOIN, Mr. BALDUS, Mr. BONIOR, Mr. CARNEY, Mr. CONYERS, Mr. DUNCAN, of Tennessee, Mr. EILBERG, Mr. GUYER, Mr. HARKIN, Mr. KILDEE, Mr. LaFALCE, Mrs. LLOYD of Tennessee, Mr. McHUGH, Mr. MIKVA, Mr. MOSS, Mr. NOLAN, Mr. PANETTA, Mr. RAHALL, Mr. ROE, Mrs. SPELLMAN, Mr. THOMPSON, and Mr. TSONGAS):

H.R. 11571. A bill to establish a comprehensive program of long-term care services for aged individuals, and to provide for the creation of community long-term care centers and State long-term care agencies as part of a new administrative structure for the organization and delivery of such services; jointly, to the Committees on Agriculture, Education and Labor, Interstate and Foreign Commerce, the Judiciary, and Ways and Means.

By Mr. FRASER (for himself, Mr. VENTO, Mr. WALGREN, and Mr. CHARLES H. WILSON of California):

H.R. 11572. A bill to establish a comprehensive program of long-term care services for aged individuals, and to provide for the creation of community long-term care centers and State long-term care agencies as part of a new administrative structure for the organization and delivery of such services; jointly, to the Committees on Agriculture, Education and Labor, Interstate and Foreign Commerce, the Judiciary, and Ways and Means.

By Mr. HYDE (for himself and Mr. GEPHARDT):

H.R. 11573. A bill to amend the Rehabilitation Act of 1973 with respect to the definition of a handicap; to the Committee on Education and Labor.

By Mrs. KEYS:

H.R. 11574. A bill to amend the Internal Revenue Code of 1954 with respect to the treatment of an involuntary conservation of real property to which the special farm valuation provisions of the Federal estate tax apply; to the Committee on Ways and Means.

By Mr. MOSS (for himself, Mr. BUCHANAN, Mr. D'AMOURS, Mr. DUNCAN of Oregon, Mr. LE FANTE, Mr. LIVINGSTON, Mr. MATTOX, Mr. NOLAN, Mr. MITCHELL of Maryland, Mr. PATTERSON of California, Mr. RYAN, Mr. SIMON, Mr. SISK, Mr. STEIGER, Mr. STEERS, Mr. CHARLES WILSON of Texas, and Mr. WIRTH):

H.R. 11575. A bill to exercise the power of the Congress under article IV of the Constitution to declare the effect of certain State judicial proceedings respecting the custody of children; to the Committee on the Judiciary.

By Mr. MICHAEL O. MYERS (for himself, Mr. HAWKINS, Mr. LEDERER, Mr. NIX, Mr. PERKINS, Mr. VENTO, Mr. EILBERG, Mr. EDGAR, Mr. CLAY, Mr. GEPHARDT, Mr. EDWARDS of California, Mr. RICHMOND, Mr. PATTISON of New York, Mr. RANGEL, Mr. MURPHY of Pennsylvania, Mr. COUGHLIN, Mr. GAYDOS, Mr. CHARLES H. WILSON of California, Mr. THOMPSON, Mr. STOKES, Mr. FAUNTROY, and Mr. STEERS):

H.R. 11576. A bill to provide a special program of financial assistance to Opportunities Industrialization Centers in order to provide new motivational and skills training opportunities for welfare recipients, and new incentives for business and industry to coordinate their employment plans and job creation efforts with Opportunities Industrialization Centers and national community-based organizations which have demonstrated effectiveness in developing cooperative relationships with the private sector; to the Committee on Education and Labor.

By Ms. OAKAR:

H.R. 11577. A bill to establish a Council on Judicial Tenure in the judicial branch of the Government, to establish a procedure in addition to impeachment for the retirement of disabled Justices and judges of the United States, and the removal of Justices and judges whose conduct is or has been inconsistent with the good behavior required by article III, section 1, of the Constitution, and for other purposes; to the Committee on the Judiciary.

By Mr. PRESSLER:

H.R. 11578. A bill to regulate interstate and foreign commerce in agricultural products, to promote the general welfare by providing price and income protection to agricultural producers by securing to producers a price for agricultural commodities of not less than 100 percent of parity for such commodities; jointly, to the Committees on Agriculture, and Ways and Means.

By Mr. ROBERTS (for himself, Mr. MAHON, Mr. POAGE, Mr. BURLESON of Texas, Mr. BROOKS, Mr. WRIGHT, Mr. YOUNG of Texas, Mr. GONZALEZ, Mr. PICKLE, Mr. de la GARZA, Mr. WHITE, Mr. COLLINS of Texas, Mr. ECKHARDT, Mr. KAZEN, Mr. ARCHER, Miss JORDAN, Mr. MILFORD, Mr. CHARLES WILSON of Texas, Mr. HALL, Mr. HIGHTOWER, Mr. KRUEGER, Mr. GAMMAGE, and Mr. MATTOX):

H.R. 11579. A bill to designate the Veterans' Administration hospital located at 1901 S. First Street, Temple, Tex., as the Olin E. Teague Veterans' Hospital; to the Committee on Veterans' Affairs.

By Mr. SAWYER:

H.R. 11580. A bill to amend title 18 of the United States Code to make lawful certain activities concerning certain foreign and domestic legal lotteries; to the Committee on the Judiciary.

By Mr. UDALL:

H.R. 11581. A bill to provide for the seizure, forfeiture, and disposition of vehicles used to illegally transport persons into the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. WIGGINS:

H.R. 11582. A bill to amend title 18, United States Code, and title 39, United States Code, to limit the application of certain penalties and prohibitions relating to foreign lotteries; jointly, to the Committees on the Judiciary, and Post Office and Civil Service.

By Mr. YATRON:

H.R. 11583. A bill to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. BONIOR:

H.R. 11584. A bill to amend title 38, United States Code, to provide for the payment by the Veterans' Administration of special assessments levied against the real property of any veteran, or the surviving spouse of any veteran, with a permanent and total service-connected disability to establish a Federal lien on such property for the amount of such payment, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. CAPUTO:

H.R. 11585. A bill to provide that the U.S. District Court for the Southern District of New York shall be held at New York, N.Y., and White Plains, N.Y.; to the Committee on the Judiciary.

By Mr. DINGELL (for himself and Mr. MARKEY):

H.R. 11586. A bill to amend the Natural Gas Pipeline Safety Act of 1968 to provide for the safe operation of pipelines transporting natural gas, petroleum, petroleum products, and certain other materials, to provide standards with respect to the siting, construction, and operation of liquefied natural gas and liquid petroleum gas facilities, and for other purposes; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. McKINNEY:

H.R. 11587. A bill to repeal provisions of law which prohibit banks which are federally insured or members of the Federal Reserve System and savings and loan associations which are federally insured from participating in lotteries; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ROUSSELOT (for himself, Mr. BEDELL, and Mr. SYMMS):

H.R. 11588. A bill to amend chapter 49 of title 10, United States Code, to prohibit union organization in the armed forces, and for other purposes; to the Committee on Armed Services.

By Mrs. SPELLMAN (for herself, Mr. BRADEMAS, and Mr. RICHMOND):

H.R. 11589. A bill to require that from one-half to 1 percent of any funds appropriated for the construction of certain public buildings be used for artwork for such buildings, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. STEIGER:

By Mr. BAFALIS (for himself, Mr. BAUMAN, Mr. BLANCHARD, Mr. BURKE of Florida, Mr. DEL CLAWSON, Mr. ROBERT W. DANIEL, Jr., Mr. DUNCAN of Tennessee, Mr. EDWARDS of Alabama, Mr. HARRIS, Mrs. HOLT, Mr. ICHORD, Mr. KETCHUM, Mr. LATTA, Mr. LOTT, Mr. MARRIOTT, Mr. MILLER of Ohio, Mr. MOTTL, Mr. ROUSSELOT, Mr. TREEN, Mr. WAMPLER, Mr. YATRON, and Mr. YOUNG of Florida):

H. Res. 1079. Resolution to amend the Rules of the House of Representatives to require that reports accompanying certain bills and joint resolutions reported by committees contain computations of the potential tax impact of such bills and resolutions on the individual taxpayer; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

331. By the SPEAKER: Memorials of the Legislature of the State of California, relative to student tuition for residents of U.S. possessions; to the Committee on Education and Labor.

332. Also, memorial of the Legislature of the State of California, relative to service pensions for veterans of World War I; to the Committee on Veterans' Affairs.

333. Also, memorial of the Senate of the Commonwealth of Massachusetts, relative to the transfer of Federal funds from military spending to human needs programs; to the Committee on Appropriations.

334. Also, memorial of the Senate of the Commonwealth of Massachusetts, relative to restricting certain import and travel activities which benefit Uganda; jointly, to the Committees on International Relations, and Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. JEFFORDS introduced a bill (H.R. 11591) for the relief of Camille Joseph Paul; which was referred to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 50

By Mr. ASHBROOK:

Page 97, line 5, insert after the comma "balancing the budget".

By Mr. BAUMAN:

Page 72, beginning on line 4, strike out "The national priority" and all that follows down through and including line 7 and insert in lieu thereof the following: "Such national priority policies and programs may include, but are not limited to the following:".

Page 72, strike out line 19 and everything that follows through line 8 on page 73.

Page 65, line 7, strike out "currently" and insert in lieu thereof "at such time".

Page 73, line 5, strike out "The Congress" and all that follows down through and including line 14 and insert in lieu thereof close quotation marks and a period.

Page 64, line 15, insert "private sector employment,". after "unemployment,".

Page 73, line 5, insert immediately before the period the following: "and the objective of reasonable price stability pursuant to section 5(b)".

Page 65, line 8, after "labor" insert the following: ", except that any such rate shall not include employment in any public service employment or training program authorized by an Act of Congress, such as the Comprehensive Employment and Training Act of 1973, the Public Works Employment Act of 1976, or any other existing public employment or training program or any new program or training authorized by this or any other Act of Congress which provides employment or training in the public sector in excess of the permanent public work force".

Amend the substitute to the Ashbrook Amendment by inserting at the end thereof the following:

Page 69, immediately after line 10, insert the following new subsection:

"(c) In choosing means to achieve the goal of unemployment the President shall first recommend those policies and programs designed to achieve a balancing of the Federal budget within five years after the date on enactment of the Full Employment and Balanced Growth Act of 1978.".

Page 63, strike out lines 14 through 19.

Title IV on "General Provisions" is amended by adding at the end thereof the following new section:

"FIVE-YEAR AUTHORIZATION

"SEC. 405. The provisions of this Act shall be effective only for the fiscal year ending September 30, 1982, unless reauthorized for a longer period by an Act of Congress.".

Page 71, line 19, strike out lines 19 through line 25; on page 72, strike out lines 1 through line 18.

Page 105, beginning on line 5, strike out "equal wages for equal work" and insert in lieu therof the following: "not to exceed the minimum wage for a workweek of forty hours, as provided under section 6 of the Fair Labor Standards Act of 1938, or if higher, not more than the applicable State or local minimum wage".

Page 105, line 14, strike out "less" and all that follows down through "1938" on line 21 and insert in lieu thereof "more than the minimum wage for a workweek of forty hours as provided under section 6 of the Fair Labor Standards Act of 1938, or if higher, not more than the applicable State or local minimum wage".

Page 106, beginning on line 2, strike out "appropriate wage provisions based upon existing wage standard legislation" and insert in lieu thereof "wage standards which are not in excess of those provided for in this section".

The new section 4 of the Employment Act of 1946, as revised by the Jeffords amendment to section 104 of the bill is amended by inserting before the period at the end of the first sentence in section 4(a)(2)(A) the following: "interim numerical goals designed to reduce the Federal tax burden on American citizens".

By Mrs. HOLT:

On page 70, immediately after line 7, add the following:

"(A) national defense;"

And redesignate the succeeding paragraphs accordingly; and

On page 71, line 9, strike out the words: "national defense and".

By Mr. GARY MYERS:

Amendments to the bill H.R. 50:

Title I: Strike the last word. Strike the requisite number of words.

Title II: Strike the last word. Strike the requisite number of words.

Title III: Strike the last word. Strike the requisite number of words.

By Mr. PIKE:

Page 65, line 8, After "Labor" strike out the period, replace it with a comma and insert "reduced by not counting as unemployed those who are unemployed because of strikes, those who have been unemployed for less than four weeks, those who have jobs waiting but for their own convenience are not ready to enter employment, those who are not seeking full-time work, and those who voluntarily left their last jobs.".

By Mr. QUIE:

Strike out everything after the enacting clause and insert in lieu thereof the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Economic Revitalization Act of 1978".

GENERAL FINDINGS

SEC. 2. (a) The Congress finds that Americans have suffered the cruel ravages of high inflation, an ever-increasing tax burden and substantial unemployment and underemployment, low farm income, idleness of other productive resources, and inadequate productivity growth, imposing numerous economic and social costs on the Nation.

(b) The Congress further finds—

(1) that unemployment is a personal tragedy, that the unemployed should be treated as people rather than just statistics and have adequate counseling and assistance looking toward retraining, if necessary, which will lead to permanent employment in the private sector of the economy;

(2) that maximum employment, reduced inflation, increased production and real income, and adequate productivity growth all accomplished under the free enterprise system are important national requirements that will promote the economic security and well-being of all citizens of the Nation;

(3) that business and industry are deprived, as a consequence of the circumstances described in subsection (a), of the production, sales, capital flow, and productivity necessary to maintain adequate profits, undertake new investment, create jobs, and contribute to meeting society's economic needs;

(4) that inflation is eroding the buying power of Americans, reducing their standard of living, and jeopardizing individual savings for family necessities and retirement;

(5) that an increasing tax burden coupled with high inflation places earnings in double jeopardy, as "tax bracket creep" moves wage earners into higher brackets and inflation erodes the buying power of after-tax income, and as a result earnings buy less and the Government takes more in taxes;

(6) that job creation and capital formation in the private sector is inhibited by tax disincentives and a Federal tax program which discourages the savings and investment necessary to stimulate economic expansion; and

(7) that excessive deficit spending by the Federal Government fans inflation, boosts interest rates, crowds the private sector out of the money market, and reduces capital formation for economic expansion necessary to create permanent, nonsubsidized jobs.

(8) that the Nation's farmers have not received sufficient income for their produce sufficient to maintain an adequate standard of living and to assure full use of our Nation's agriculture resources.

(c) The Congress further finds that an effective policy to promote maximum employment, reduce inflation, increase production and real income, and provide adequate productivity growth should be based on the development of explicit policies by the President and Congress for the full use of the resources and ingenuity of the private sector of the economy.

TITLE I—AMENDMENTS TO THE EMPLOYMENT ACT OF 1946 ECONOMIC REPORT OF THE PRESIDENT

SEC. 101. Section 3(a) of the Employment Act of 1946 is amended to read as follows:

"SEC. 3. (a) The President shall transmit to the Congress not later than January 20 of each year an economic report (hereinafter called the 'Economic Report') setting forth current and foreseeable trends in employment and unemployment, with particular attention to private sector employment and unemployment; the rate of inflation; the Federal tax burden both corporate and individual; real income; farm income; purchasing power; Federal deficits, energy consumption, and levels of energy imports; and other indices which will assist the Congress in determining the health of the economy.

"(b) To assure that the Congress pursues a balanced approach to reach the full economic health of the nation, the President shall transmit to the Congress annual numerical goals, and the programs and policies which he or she deem necessary, consistent with achieving within five years after the date of enactment of the"

"the following:

"(1) a reduction in unemployment without the use of public service employment, among Americans age 16 and over to not more than three per centum of the labor force and a reduction of unemployment among Americans age 20 and over to not more than three per centum of the labor force;

"(2) an annual rate of inflation, without the use of any control of wages or prices in the private sector, not to exceed three per centum;

"(3) a reduction of the Federal tax burden to a level not greater than the Federal tax burden during calendar year 1965;

"(4) obtaining farm income at not less than 100 per centum of parity at the marketplace;

"(5) the balancing of the Federal budget;

"(6) the reduction of minority youth unemployment age 16 to 24 to that of nonminority youth and unemployment among all youth age 16 to 24 to that among adult males age 24 and over

"(c) In setting forth the goals and programs and policies specified in subsection (b), the President shall present an analysis of:

"(1) the effect of inflation on the real income of Americans, on marginal tax rates, and the percentage change of tax returns filed in each bracket and the effects of such changes on employment, real income and purchasing power;

"(2) the effect of unemployment, underemployment, idleness of other productive resources, inadequate productivity growth, declining real income, Federal deficits, and inflation on private sector productions, sales, capital flow, productivity, new investment, job creation;

"(3) and the cost of such unemployment to the American people in terms of increased Federal outlays, loss of personal income, health and other related costs and other such costs;

"(4) the extent to which Federal policies encourage or discourage business investment in areas of high unemployment;

"(5) any other analysis which the President deems necessary to further describe the state of the economy and justify the specific recommendations called for in subsection (b).

"(d) For the purposes of this section,

"(1) the percentage rate of unemployment shall be the rate of unemployment as a percentage of the civilian labor force as set forth currently by the Bureau of Labor Statistics in the Department of Labor, except that such shall not include any individual hired into public service employment,

"(2) the term 'public service employment' includes employment in any public service employment or training program authorized by any act of Congress, such as the Comprehensive Employment and Training Act of 1973, or any other new program in training authorized by this or any other Act of Congress which provides employment or training in the private sector in excess of the permanent public work force,

"(3) the term 'inflation' shall mean that the rate of increase in consumer prices as measured by the Consumer Price Index as set forth currently by the Bureau of Labor Statistics in the Department of Labor,

"(4) the term 'Federal tax burden' shall be the ratio of the total Federal tax collections in a calendar year to national income for such year as such term is used in the income and products accounts of the United States as published by the Department of Commerce."

COUNCIL OF ECONOMIC ADVISERS TO THE PRESIDENT

SEC. 102. Section 4(a) of the Employment Act of 1946 is amended to read as follows:

"SEC. 4. (a) There is hereby created in the Executive Office of the President a Council of Economic Advisers (hereinafter called the 'Council'). The Council shall be composed of three members who shall be appointed by the President, by and with the advice and consent of the Senate, and each of whom shall be a person who as a result of his training, experience, and attainments is exceptionally qualified to analyze and interpret economic developments, to appraise programs and activities of the Government in the light of the policy declared in section 2, and to formulate and recommend national economic policy to promote full employment, production, and purchasing power under free competitive enterprise, and, specifically, a program to determine the effect of inflation on the income tax structure, the effect of inflation on marginal tax rates and the percentage change of tax returns filed in each bracket, the level of employment, production, real income, farm income, the Federal deficit, and purchasing power under free competitive enterprise and to assist the President in developing the goals and policy recommendation set forth in section 3. The President shall designate one of the members of the Council as Chairman".

TAX IMPACTS OF INFLATION

SEC. 103. (a) Paragraph (2) of section 4(c) of the Employment Act of 1946 is amended to read as follows:

"(2) to gather timely and authoritative information concerning economic trends, both current and prospective, including the effect of inflation on the income tax structure, the effect of inflation on marginal tax rates and percentage of tax returns filed in each bracket, the levels of employment, production, real income, farm income, purchasing power, and federal deficits, to analyze and interpret such information in the light of the policy declared in section 2 for the purpose of determining whether such developments and trends are interfering or are likely to interfere, with the achievement of such policy and to compile and submit to the President studies relating to such developments and trends;".

(b) Paragraph (4) of section 4(c) of the Employment Act of 1946 is amended to read as follows:

"(4) to develop and recommend to the President national economic policies to foster and promote a program to determine the effect of inflation on the income tax structure, the effect of inflation on marginal tax rates and the percentage change of tax returns filed in each bracket, the level of employment, production, real income, farm income, purchasing power, Federal deficits and to promote free competitive enterprise, to avoid economic fluctuations or to diminish the effects thereof and thus to maintain employment, production, purchasing power and full farm income, and a balanced Federal budget;".

TITLE II—ESTABLISHMENT OF A PRESIDENTIAL TASK FORCE ON YOUTH UNEMPLOYMENT

GENERAL FINDINGS

SEC. 201. The Congress finds that—

(1) notwithstanding improved economic growth and a continuing reduction in the overall rate of unemployment, youth unemployment continues to represent nearly half of overall unemployment and the rate of such unemployment has not been reduced;

(2) existing structural policies have been ill designed and ineffective in reducing youth unemployment; and

(3) the reduction in the rate of unemployment among the young, but particularly minority youth, would greatly alleviate and reduce the overall rate of unemployment.

PRESIDENTIAL TASK FORCE ON YOUTH UNEMPLOYMENT

SEC. 202. (a) There is hereby established in the Executive Office of the President a Presidential Task Force on Youth Unemployment, hereafter referred to as the "Task Force", to furnish recommendations to the President pursuant to section 103, which shall consist of eleven members appointed by the President, by and with the advice and consent of the Senate. Two of the members shall be representatives of business but shall be selected on the basis of their experience and knowledge of the labor market problems of youth, particularly in regards to wage and employment standards, collective bargaining agreements, and other such factors, and who have worked with labor in developing employment and training efforts for youth. Two of the members shall be representatives of labor, but shall be selected on the basis of their experience and knowledge of labor-sponsored apprenticeship and other such youth programs, wage and employment standards, collective bargaining, and who have worked with business in providing employment and training opportunities for youth. Two members shall be representatives of State and local government, but shall have had experience in carrying out the provisions of section 327 (a)(3), section 327(b), section 342(a)(3)(b), and section 352(3)(A) of the Comprehensive Employment and Training Act. Three members shall be from the public at large, but one will either represent youth and have a thorough knowledge and understanding of the labor market problems of youth or shall represent an organization which has a special understanding of the labor market problems of youth, and one who shall have a special understanding of the labor market problems of rural youth. In addition, the Secretary of Labor and the Secretary of Health, Education, and Welfare shall serve as members of the Task Force.

(b) Except when six members of the Task Force shall vote to hold an executive session for a particular purpose, the Commissioner of Labor Statistics, the Director of the Bureau of the Census, the Chairman of the National Commission for Manpower Policy, the Chairman of the Council on Economic Advisors, the Chairman of the National Commission on Employment and Unemployment Statistics, or in each case a designee, shall assist and participate in the hearings, deliberations and preparations of Task Force recommendations.

(c) The President shall designate a Chairman from among the appointed members of the Task Force.

(d) The Chairman, with the concurrence of the appointed members of the Task Force, shall appoint an executive director, who shall be the chief executive officer of the Task Force. The executive director may appoint, with the concurrence of the Chairman, such professional, technical, and clerical staff as are necessary to carry out the provisions of this section. The executive director and staff shall be appointed without regard to the provisions of title 5, United States Code, governing appointments to the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at rates not in excess of the maximum rate of GS-18 of the General Schedule under section 5332 of such title. The executive director, with the concurrence of the Chairman, may obtain temporary and intermittent services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code. The Task Force may utilize such staff, with or without reimbursement, from the Department of Labor, the Department of Commerce, and such other appropriate Federal agencies as may be available to assist the Task Force in carrying out its responsibilities.

(e) The Task Force shall determine its own internal procedures, including the constituting of a quorum.

(f) The Task Force is authorized to accept and utilize voluntary and uncompensated services notwithstanding the provisions of section 665(b) of title 31, United States Code.

(g) Members of the Task Force who are not officers or employees of the Federal Government shall be paid compensation at a rate not to exceed the per diem equivalent of the rate for GS-18 of the General Schedule under section 5332 of title 5, United States Code, when engaged in the work of the Task Force, including traveltime; and, while serving away from their homes or regular places of business, shall be allowed travel expenses including per diem in lieu of subsistence, in the same manner as such expenses are authorized by law (5 U.S.C. 5703) for persons in the Government service employed intermittently.

FUNCTIONS

SEC. 203. The Task Force shall—

(1)(A) identify the specific labor market problems of youth, but in particular minority youth;

(B) determine the extent to which existing structural policies of the government, including Federal, State, and local policies, work to mitigate such problems;

(C) identify the extent to which labor market barriers exist, including the effects of civil service, collective-bargaining arrangements, lack of education and training, and wage standards which create labor market problems for youth;

(D) identify the extent to which macroeconomic policies, such as tax and fiscal policy, have on labor market problems of youth, both nationally and regionally;

(E) identify long-range projections on labor market activity for youth;

(F) determine the extent to which the public education system relates youth to the labor market;

(G) determine the extent to which existing Federal programs, such as the Comprehensive Employment and Training Act, the Public Works Employment Act, contribute to alleviating the labor market problems of youth; and

(H) the extent to which federally mandated wage standards, such as those authorized under the Fair Labor Standards Act, the Davis-Bacon Act, Walsh-Healey, and the Service Contract Act contribute to the labor market problems of youth; and

(2) make a report to the President and the Congress within twelve months after the date of appointment of the first five members of the Task Force, which shall include:

(A) the findings of the Task Force under paragraph (1) and shall provide explicit programmatic recommendations to achieve the following:

(i) reduction of minority youth unemployment age sixteen to twenty-four to that of nonminority youth unemployment within five years; and

(ii) a reduction of youth unemployment age sixteen to twenty-four equivalent to that of adult males age twenty-four and over within five years;

(B) shall include recommendations for changes in macroeconomic and microeconomic fiscal and tax policies, in existing Federal and State employment programs;

(C) shall include a feasible schedule for the implementation of the Task Force recommendations, including a feasible schedule for their implementation, cost estimates and any appropriate draft regulations and legislation to implement such recommendations; and

(D) shall include recommended amendments to existing structural unemployment programs, such as those provided in the Comprehensive Employment and Training Act, the Public Works Employment Act of 1976, to redirect such programs to reducing the unemployment problems of minority youth in general.

ADMINISTRATIVE PROVISIONS

SEC. 204. (a) Each department, agency, and instrumentality of the Federal Government is authorized and directed to cooperate fully with the Task Force in furnishing appropriate information to assist the Task Force in carrying out its functions under this section.

(b) The head of each department, agency, or instrumentality of the Federal Government is authorized to provide such support and services to the Task Force, upon request of the Chairman, as may be agreed between the head of the department, agency, or instrumentality and the Chairman.

(c) There are authorized to be appropriated such sums and eighty days after submission of its final report as required under section 105 of this section.

(d) The Task Force or, on the authorization of the Task Force, any subcommittee or members thereof, may, for the purposes of carrying out the provisions of this section, hold such hearings, take such testimony, and sit and act at such times and places as the Task Force deems advisable. Any member authorized by the Task Force may administer oaths or affirmations to witnesses appearing before the Task Force or any subcommittee or members thereof.

(e) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

REPORT

SEC. 205. (a) Upon submission of the final report, the President shall take steps to ascertain the views of each affected executive agency, and shall make a report, so at the time of the next submission of the Economic Report required under section 3 of the Employment Act of 1946, but in no event later than January 20, 1980, which sets forth the President's recommendations for reducing youth unemployment. Such report shall comment on—

(1) the desirability, feasibility, and cost of implementing each of the Task Force recommendations and the actions taken or

planned with respect to implementation; and

(2) recommendations with respect to any legislation proposed by the Task Force, the need for any alternative or additional legislation to implement the recommendations of the Task Force, and any other proposals to strengthen and reach the goals delineated in section 103 (2) (B).

(b) In no event shall the President alter the established goal as outlined in section 10 (2) (B) and any change in the Task Force recommendations shall be made in furtherance of that goal. However, the President shall establish for both minority youth unemployment and youth unemployment in general a specific numerical goal which in terms of labor-market tightness is equal to 3 per centum adult unemployment.

APPROPRIATIONS

SEC. 206. There is authorized to be appropriated such sums as may be necessary to carry out the purposes of this title.

By Mr. ROUSSELOT:

Page 105, beginning on line 5, strike out "equal wages for equal work" and insert in lieu thereof the following: "not to exceed the minimum wage for a workweek of forty hours, as provided under section 6 of the Fair Labor Standards Act of 1938, or if higher, not more than the applicable State or local minimum wage".

Page 105, line 14, strike out "less" and all that follows down through "1938" on line 21 and insert in lieu thereof "more than the minimum wage for a workweek of forty hours as provided under section 6 of the Fair Labor Standards Act of 1938, or if higher, not more than the applicable State or local minimum wage".

Page 106, beginning on line 2, strike out "appropriate wage provisions based upon existing wage standard legislation" and insert in lieu thereof "wage standards which are not in excess of those provided for in this section".

By Mr. SARASIN:

Page 65, after line 8, insert:

(c) For all the purposes of this Act the term 'reasonable price stability' shall be the annual numerical goal as provided under subsection 2(A) of this section except that any such goal shall be consistent with achieving within five years after the date of enactment of this Act an annual rate of increase in consumer prices as measured by the Consumer Price Index as determined by the Bureau of Labor Statistics in the Department of Labor not to exceed three per centum.".

By Mr. SKELTON:

Page 71, lines 6, 9, and 11, redesignate subparagraphs (E), (F), and (G) as subparagraphs (F), (G), and (H) respectively, and immediately after line 5 insert the following new subparagraph:

"(E) proper attention to the relationship between foreign imports and unemployment in the United States;".

By Mr. STOCKMAN:

Page 64, line 16, strike the first "and" and immediately after "Productivity" insert "and the Federal tax burden".

Page 64, line 22, strike the "and".

Page 64, line 23, after "priority" insert "and limiting the Federal tax burden to a level consistent with the requirements of section (4) (b) (1) (A).

Page 65, immediately after line 8, insert the following new subsection:

"(c) For all the purposes of this Act, the term 'Federal tax burden' shall be the ratio of total Federal tax collections in a calendar year to national income for such year as such term is used in the income and products accounts of the United States published by the Department of Commerce."

The new section 4 of the Employment Act of 1946 as revised by the Jeffords amendment to section 104 of the bill, is amended as follows:

"(1) The first sentence of section (4) (a) (2) (A) is amended by inserting before the period at the end thereof "the interim goal of reducing the Federal tax burden to a level not greater than the Federal tax burden during calendar year 1965 within the same period and (2) section (4) (b) (1) is amended by inserting before the period at the end thereof "the goal of achieving such further reductions in the burden of Federal taxation as may be necessary to achieve the employment and income goals of this Act and to meet appropriate national needs;".

Page 77, line 9, insert after the first comma "limiting the Federal tax burden,".

Page 97, line 5, strike "and" and after "productivity" insert "and the Federal tax burden".

H.R. 7700

By Mr. DERWINSKI, to the substitute amendment by Mr. HANLEY:

On page 8, beginning in line 9, strike out section 6, headed "Legal Representation", in its entirety and redesignate the succeeding sections accordingly.

On page 17, beginning in line 7, strike out section 10, headed "Surplus and Excess Property", in its entirety and redesignate the succeeding sections accordingly.

By Mr. MCCLOSKEY:

Strike section 12, beginning on page 42, line 6, through page 44 line 5.

H.R. 11274

By Mr. FRENZEL:

Add the following:

SEC. 9. CREDIT FOR EDUCATIONAL EXPENSES.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting before section 45 the following new section:

"SEC. 44C. EDUCATIONAL EXPENSES.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this subtitle for the taxable year an amount equal to 50 percent of the educational expenses paid by him during the taxable year to one or more eligible educational institutions for himself, his spouse, or any of his dependents (as defined in section 152).

"(b) LIMITATIONS.—

"(1) MAXIMUM DOLLAR AMOUNT.—The amount of educational expenses taken into account under subsection (a) for any taxable year with respect to any individual may not exceed—

"(A) $500, in the case of educational expenses incurred before August 1, 1980, and

"(B) $1,000, in the case of educational expenses incurred after July 31, 1980.

The $1,000 limitation contained in subparagraph (B) for any taxable year shall be reduced by the amount of educational expenses described in subparagraph (A) which are taken into account for that taxable year.

"(2) CERTAIN PAYMENTS EXCLUDED.—

"(A) SECONDARY AND ELEMENTARY SCHOOL EXPENSES.—Educational expenses paid or incurred before August 1, 1980, attributable to education at a secondary school (including a vocational secondary school) or elementary school shall not be taken into account under subsection (a).

"(B) GRADUATE AND PART-TIME STUDENTS.—Educational expenses paid or incurred before August 1, 1981—

"(i) attributable to courses of instruction which are not general courses of instruction, or

"(ii) with respect to any individual who is not a full-time student,

shall not be taken into account under subsection (a).

"(C) GENERAL COURSES OF INSTRUCTION.—For purposes of this paragraph, the term 'general courses of instruction' means courses of instruction offered by an elementary or secondary school or for which credit is allowable toward a baccalaureate or associate degree by an institution of higher education or toward a certificate of required course work at a vocational school but does not include any course of instruction which is part of the graduate program of the individual.

"(D) FULL-TIME STUDENT.—For purposes of this paragraph, the term 'full-time student' means any individual who, during any 4 calendar months during the calendar year in which the taxable year of the taxpayer begins, is a full-time student at an eligible educational institution.

"(c) DEFINITIONS.—For purposes of this section—

"(1) EDUCATIONAL EXPENSES.—The term 'educational expenses' means tuition and fees required for the enrollment or attendance of a student at an eligible educational institution, including required fees for courses. Such term does not include any amount paid, directly or indirectly, for—

"(A) books, supplies, and equipment for courses of instruction at an eligible educational institution,

"(B) meals, lodging, transportation, or similar personal, living, or family expenses, or

"(C) education below the first-grade level, or for attendance at a kindergarten or nursery.

In the event an amount paid for tuition or fees includes an amount for any item described in subparagraph (A), (B), or (C) which is not separately stated, the portion of such amount which is attributable to such item shall be determined under regulations prescribed by the Secretary.

"(2) ELIGIBLE EDUCATIONAL INSTITUTION.—The term 'eligible educational institution' means—

"(A) an institution of higher education;

"(B) a vocational school;

"(C) a secondary school; or

"(D) an elementary school.

"(3) INSTITUTION OF HIGHER EDUCATION.—The term 'institution of higher education' means an institution described in section 1201(a) or 491(b) of the Higher Education Act of 1965 (as in effect on January 1, 1978).

"(4) VOCATIONAL SCHOOL.—The term 'vocational school' means an area vocational education school (as defined in section 195 (2) of the Vocational Education Act of 1963, as in effect on January 1, 1978) which is located in any State.

"(5) ELEMENTARY AND SECONDARY SCHOOLS.—The terms 'elementary school' and 'secondary school' mean, respectively, any elementary or secondary school (as defined in subsections (c) and (h) of section 801 of the Elementary and Secondary Education Act of 1965 as in effect on January 1, 1978)—

"(A) of a local educational agency (as defined in section 801(f) of such Act as in effect on such date); or

"(B) which is privately operated but only if it is—

"(i) accredited or approved under State law (or, in the case of a school in a State which has no procedure for the accreditation or approval of privately operated schools, which meets the requirements of State law relating to compulsory school attendance), and

"(ii) exempt from taxation under section 501(a) as an organization described in section 501(c)(3).

The terms 'elementary school' and 'secondary school' include facilities which offer education for individuals who are physically or mentally handicapped as a substitute for public elementary or secondary education.

"(6) MARITAL STATUS.—The determination of marital status shall be made under section 143.

"(d) SPECIAL RULES.—

"(1) ADJUSTMENT FOR CERTAIN SCHOLARSHIPS AND VETERANS BENEFITS.—The amounts otherwise taken into account under subsection (a) as educational expenses of any individual for any taxable year shall be reduced (before the application of subsection (b)) by any amounts received with respect to such individual for the taxable year as—

"(A) a scholarship or fellowship grant (within the meaning of section 117(a)(1)) which under section 117 is not includible in gross income,

"(B) an educational assistance allowance under chapter 32, 34, or 35 of title 38, United States Code, or

"(C) a payment (other than a gift, bequest, devise, or inheritance within the meaning of section 102(a)) for educational expenses, or attributable to attendance at an eligible educational institution, which is exempt from income taxation by any law of the United States.

"(2) TAXPAYER WHO IS A DEPENDENT OF ANOTHER TAXPAYER.—No credit shall be allowed to a taxpayer under subsection (a) for amounts paid during the taxable year for educational expenses of the taxpayer if such taxpayer is a dependent of any other person for a taxable year beginning with or within the taxable year of the taxpayer.

"(3) SPOUSE.—No credit shall be allowed under subsection (a) for amounts paid during the taxable year for educational expenses for the spouse of the taxpayer unless—

"(A) the taxpayer is entitled to an exemption for his spouse under section 151(b) for the taxable year, or

"(B) the taxpayer files a joint return with his spouse under section 6013 for the taxable year.

"(e) DISALLOWANCE OF CREDITED EXPENSES AS CREDIT OR DEDUCTION.—No deduction or credit shall be allowed under any other section of this chapter for any educational expense to the extent that such expense is taken into account (after the application of subsection (b)) in determining the amount of the credit allowed under subsection (a). The preceding sentence shall not apply to the educational expenses of any taxpayer who, under regulations prescribed by the Secretary, elects not to apply the provisions of this section with respect to such expenses for the taxable year.".

(b) REFUND OF EXCESS CREDIT.—Subsection (b) of section 6401 of such Code (relating to excessive credits) is amended—

(1) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44C (relating to credit for educational expenses),", and

(2) by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44C".

(c) LIMITATION ON EXAMINATION OF BOOKS AND RECORDS.—Section 7605 of such Code (relating to time and place of examination) is amended by adding at the end thereof the following new subsection:

"(d) EXAMINATION OF BOOKS AND RECORDS OF CHURCH-CONTROLLED SCHOOLS.—Nothing in section 44C (relating to credit for educational expenses) shall be construed to grant additional authority to examine the books of account, or the activities, of any school which is operated, supervised, or controlled by or in connection with a church or convention or association of churches (or the examination of the books of account or religious activities of such church or convention or association of churches) except to the extent necessary to determine whether the school is an eligible educational institution within the meaning of section 44C(c)(2).".

(d) EXPEDITED REVIEW OF CONSTITUTIONALITY OF EDUCATIONAL EXPENSE CREDIT.—

(1) CERTIFICATION OF QUESTIONS OF CONSTITUTIONALITY.—In any action brought in a district court of the United States, including an action for declaratory judgment or injunctive relief, concerning the constitutionality of any provision of section 44C of the Internal Revenue Code of 1954 (relating to credit for educational expenses) or any other provision of such Code relating to such section, the district court shall certify immediately all questions of constitutionality of such provision to the United States Court of Appeals for the circuit involved, which shall hear the matter sitting en banc.

(2) APPEAL TO SUPREME COURT.—Notwithstanding any other provision of law, any decision on a matter certified under paragraph (1) shall be reviewable by appeal directly to the Supreme Court of the United States. Such appeal shall be brought no later than 20 days after the decision of the Court of Appeals.

(3) EXPEDITED CONSIDERATION.—It shall be the duty of the Court of Appeals and of the Supreme Court of the United States to advance on the docket and to expedite to the greatest possible extent the disposition of any matter certified under paragraph (1).

(4) SEPARABILITY.—If any provision of section 44C of the Internal Revenue Code of 1954 (or any other provision of such Code relating to such section), or the application thereof to any person or circumstances, is held invalid, the remainder of the provisions of such section and the application of such provisions to other persons or circumstances shall not be affected.

(e) DISREGARD OF REFUND.—Any refund of Federal income taxes made to any individual, and any reduction in the income tax liability of any individual, by reason of section 44C of the Internal Revenue Code of 1954 (relating to credit for educational expenses) shall not be taken into account as income or receipts for purposes of determining the eligibility of such individual or any other individual for benefits or assistance, or the amount or extent of benefits or assistance, under any Federal program of educational assistance or under any State or local program of educational assistance financed in whole or in part with Federal funds.

(f) CONFORMING AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting immediately before the item relating to section 45 the following:

"Sec. 44C. Educational expenses.".

(2) Subsection (c) of section 56 of such Code (defining regular tax deduction) is amended by striking out "credits allowable under—" and all that follows and inserting in lieu thereof "credits allowable under subpart A of part IV other than under sections 31, 39, and 43.".

SEC. 10. EFFECTIVE DATE.

The amendments made by section 2 of this Act shall apply to taxable years ending after July 31, 1978, for amounts paid after such date for educational expenses incurred after such date.

EXTENSIONS OF REMARKS

FUELS TRANSPORTATION SAFETY ACT AMENDMENTS OF 1978

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. MARKEY. Mr. Speaker, it is with great pleasure that I join today with Congressman JOHN DINGELL in sponsoring the Fuels Transportation Safety Act Amendments of 1978.

Chairman DINGELL deserves great credit for the leadership he has shown in this important area. I also want to take the opportunity to praise his excellent staff for their tireless and creative efforts.

Mr. Speaker, this legislation will provide for the safe operation of pipelines transporting natural gas, petroleum, petroleum products, and certain other materials. These measures are vitally needed to protect the public health and safety.

Yesterday's Jack Anderson column in the Washington Post underlines the urgent need for this legislation. In his column, entitled "Decaying Pipelines a Disaster Risk," Anderson points out that the Department of Transportation has "flagrantly neglected" our pipeline system. DOT's Office of Pipeline Safety has had no permanent director for 7 of the last 10 years. As Anderson states,

The tremendous danger of explosions in heavily populated areas has been largely ignored.

Mr. Speaker, we cannot allow this to continue. The legislation we are introducing today is an essential response to this disaster risk.

A major component of our bill provides for the establishment of safety standards with respect to the siting, construction, and operation of liquefied natural gas (LNG) and liquefied petroleum gas (LPG) facilities.

I have been very concerned with LNG safety issues since my election to Congress. Last May I joined Congressman DINGELL in sponsoring H.R. 6844, the Liquefied Natural Gas Facility Safety Act. That legislation has been incorporated in the measure we have introduced today.

Mr. Speaker, LNG is a valuable energy resource. It is created by super-cooling natural gas to a temperature of minus 259 degrees Farenheit. At that temperature, natural gas is compressed in volume over 600 times. It is this remarkable reduction in volume that makes LNG so useful and makes possible the storage of natural gas for peak seasonal needs. Natural gas is liquefied in many dozens of facilities across the country, stored, and later regasified to meet peak demand needs.

Also because of its reduced volume, LNG makes possible the marine trans-

port and import of natural gas. As of Monday, there are two functioning LNG importation facilities in the United States—the new facility at Cove Point, Md., and one in my district in Everett, Mass. Several additional such facilities are planned for the future.

But LNG also represents a very real potential danger. The evidence of these serious dangers is now mounting. A September 1977 study by the Office of Technology Assessment, entitled "Transportation of Liquefied Natural Gas," detailed a series of safety dangers and the inadequacy of Federal regulation. In an appearance before the Energy and Power Subcommittee on February 21, 1978, Monte Canfield, Jr., Director of the Energy and Minerals Division of the General Accounting Office testified that:

Because LNG is the dangerous substance it is, and because its potential for damage is so great, serious consideration needs to be given to intensified safety measures.

Mr. Speaker, at those LNG safety hearings conducted 3 weeks ago, witness after witness testified as to the failure of the Federal Government to develop a coordinated LNG policy to protect the public health and safety. Despite repeated questioning, representatives of various agencies were unable to say when the administration will develop a coherent LNG policy.

Mr. Speaker, it is astonishing to me that this administration and those before it have failed to develop a national LNG safety policy. I believe Congress must provide vitally needed national leadership in this area. I urge all my colleagues to look closely at the legislation we have introduced today. The stakes in this issue are very high. The risks are clear. The time is short.●

HEARINGS BY THE HOUSE SELECT COMMITTEE ON AGING IN DELAWARE COUNTY, PA.

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. EDGAR. Mr. Speaker, on Friday, March 3, the Select Committee on Aging, represented by Congressmen MIKE BLOUIN and DAVE EVANS, held field hearings in my district to gather testimony regarding the Older Americans Act. I participated in these hearings which, in my view, were quite productive. For the past few days I have inserted into the RECORD portions of the testimony we received. The eighth section follows:

TESTIMONY ON NUTRITION PROGRAMS FOR OLDER AMERICANS DELAWARE COUNTY

(Submitted by Corinne H. Robinson, D.Sc., R.D.)

I am Corinne H. Robinson, president of the Advisory Council of the Delaware County Program for Services to the Aging, Professor of Nutrition, Drexel University, and a registered dietitian. I appreciate the opportunity to present this testimony relating to the nutrition programs of Delaware County. Through my involvement in these programs since their inception in our county in 1974 I am convinced that they significantly help people in their later years to maintain their health, independence, and dignity, and thereby are cost effective by preventing or delaying expensive care in institutions.

NEEDS

Poor nutrition is a fact of life for many older Americans. For some, starvation has become reality. Older Americans in Delaware County are also faced with these problems.

1. The fixed low incomes do not permit the purchase of sufficient amounts and kinds of food for an adequate diet;

2. Transportation to markets is often not available;

3. Isolation and loneliness are not conducive to the preparation of adequate meals;

4. Illness and physical disability interfere not only with the appetite but also the effort needed to prepare satisfactory meals;

5. Many older Americans lack knowledge of what they require for good nutrition and are misled by those who would profit through expensive foods or food adjuncts.

GOALS

Important goals for the nutrition program for older Americans in Delaware County and indeed for all nutrition programs are these:

1. To provide a noon meal in centers at least five days a week that furnish one third of the Recommended Dietary Allowances;

2. To serve a breakfast at centers for those who are especially in need of a second meal;

3. To deliver two meals—a hot noon meal, and a packed supper—at least five days a week to persons who are temporarily or permanently homebound and who are without the financial or physical resources to otherwise meet their nutritional needs. For those who cannot meet their meal needs on weekends, meals should be delivered seven days a week.

4. To provide nutrition education and dietary counseling on a group or individual basis, according to specific needs.

RECOMMENDATIONS

1. Nutrition programs in the centers not only should be continued but should be expanded. In 12 centers in Delaware County we now serve 575 noon meals daily, and through the use of food commodities about 200 breakfasts. With the existing facilities we could serve an additional 200 daily if we had the funds. Needless to say, there are areas in our county with a high target population that we are not now serving because we do not have the funds to open new centers.

2. There is a continuing and urgent need for home-delivered meals throughout the entire county. When center participants are ill, the delivery of a meal can ease distress and encourage return at an early time to the centers. For other persons who have long been isolated and homebound, the home-delivered meal affords not only nutrition but some contact with the outside world. If such a person with assistance can be brought to a center even once or twice a week, his outlook can be greatly improved and resocialization can begin. But there are also those who cannot leave their homes at all and who have neither relatives nor friends upon whom they can rely. Many of them require a range of services, of which the delivery of meals is an important component.

Presently we deliver 190 meals daily to the homebound; about 20 of these who are in desperate need receive two meals a day. With our existing facilities we could deliver an additional 150 meals daily, if funds were available. There exists in Delaware County an unknown, but no doubt large number of persons desperately in need of these services but we cannot do outreach to find them because we cannot provide them with the service. Thus, a need also exists for new centers.

3. Each nutrition program should provide modified diets such as those required for obesity, diabetes mellitus, hypertension, atherosclerosis, and gastrointestinal disturbances. We have provided such diets according to physician's prescriptions. Many of our participants have been advised to modify their diets, and also require dietary counseling on an individual or group basis. With few exceptions, physicians have neither the time nor the expertise to give the practical advice that their patients need.

4. Nutrition education should be mandatory in all programs. By this I mean an informal, practical approach that helps participants to plan easy-to-prepare nutritious meals to supplement their noon meal; to purchase foods of highest nutritional benefit within their limited incomes; to maintain food safety within the home; and to avoid the exaggerated claims made by health food vendors who promise so much and deliver so little in terms of dollars spent. Men, as well as women, benefit substantially from such food talks, for many men too live alone and must arrange for their own meals.

5. The direction of the nutrition program by a professionally qualified dietitian/nutritionist should be mandated. The professional and technical expertise of the dietitian is essential to efficient administration of the program; to the determination of menu plans and supervision of food quality in terms of nutritive values, palatability, and wholesomeness; to the training of paid and volunteer staff; and to the development and supervision of the program for nutrition education and dietary counseling. For the larger projects one or more dietitians employed on a full time basis is essential. For small projects a consultant dietitian can serve effectively on a part-time basis.

6. Each nutrition program should have its own project advisory council made up primarily of participants. The older American who eats his/her meals at the centers remains the best single monitor of the program. The participants make suggestions for menus according to their ethnic and social backgrounds, evaluate the quality of the food that is served, and make decisions concerning the suggested meal contributions as well as the ways in which these contributions may be used. Because of the many concerns directly related to nutrition it is not practical to combine such a project council with an overall center advisory council.

RECOMMENDATIONS PERTAINING TO ADMINISTRATION AND FUNDING

1. The present act states that the programs are open to all persons over 60 years of age. Such a broad statement becomes misleading to many older Americans who find that indeed only a limited number can be served and that priorities must be given to persons of low income, who belong to minority groups, who live alone, who are 75 years or older, and/or who are in frail health. There are, indeed, persons who can afford to pay the full costs of services but who do not know where to turn for assistance; these, too, must be helped to use the available resources.

2. Funds should be specifically earmarked for the nutrition programs. With block grants to the state or area agency, there could be pressures to meet other needs of older Americans at the expense of the fundamental need for better nutrition. However, the proportion of funds allocated to group meals and to home-delivered meals should be a decision of a local area agency, and not mandated by either federal or state agencies. The present Title VII allocation of 80 per cent for meals and 20 per cent towards supportive services seems appropriate.

3. The home-delivered meals and group meals should be administered through the center meals program. To separate them would involve duplication of administrative procedures and staff, fragmentation of services, and increased costs.

4. Funding for the nutrition programs should be through area agencies, and not separately funded. This permits area agencies to incorporate the nutrition programs in comprehensive planning, encourages coordination of all services, reduces duplication of administrative procedures, and assists in monitoring of the programs. However, the Area Agency should not be the direct provider of the nutrition services, but should arrange for these services through subcontract.

5. Integrated funding accomplished through Title VII, Title XX of the Social Security Act, Title III, and participant contributions has been valuable in our program. I would emphasize the importance of the voluntary, confidential contributions by participants. Only through the application of $106,000 of such contributions are we able in 1978 to maintain the services existing in 1977. In addition we commend the valuable contributions made by the Food Commodity Program; these foods are used as part of the noon meals and are the mainstay of our breakfast program. Whether food commodities are provided, or whether a cash subsidy is given in place of the food commodities should be a decision for each nutrition project.

6. Finally, the urgent need is for increased funding of these programs. In Delaware County, if we were to increase our group meals in existing facilities by 200 and our home-delivered meals by 150, we would need approximately 50 percent increase in funds. If we were to open new centers and make some of these services available in other parts of the county, an increase in funding would be an additional 15 to 25 percent. Thus, optimistically, 75 per cent increase in funding would be assisting us to increase our services to so many who urgently need them.

Thank you for your careful consideration.●

TRIBUTE TO PETER CAPUTO

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. OTTINGER. Mr. Speaker, Peter Caputo, Sr., will be honored by his friends in appreciation of the many years of service to the city of New Rochelle. The retirement dinner will take place at the Riviera Shore Club in New Rochelle on Sunday evening, April 9.

Mr. Caputo was appointed assistant custodian on April 9, 1951 and became a head custodian on July 1, 1959. He served at Isaac Young Junior High School and Stephenson Elementary School before coming to New Rochelle High School as the secondary school plant supervisor in 1963; he retired in May of last year.

Mr. Caputo was recognized for his distinguished service—above and beyond the call of duty—during the New Rochelle High School fire of 1968 and subsequent rebuilding. He was a founder and first president of the Civil Service Association in the New Rochelle School System. The many benefits known by the employees of the Civil Service Association were fought for and implemented by Peter Caputo. His dedication and work for the youth of New Rochelle has been shown by the countless hours he has given to the Feeney Park Boys' Club. He was also one of the founders of the Mom and Dad's Club of New Rochelle and served as its president for 2 years; this organization promotes funding for the school's football and other athletic teams. He is also an active member of the Casa Calabria Society and American Legion Post No. 8. He has given hours of his time to the United Fund and was responsible for running the New Rochelle High School blood bank.

It is a great pleasure to join with the residents of New Rochelle to pay Peter Caputo this tribute.●

HEARINGS BY THE HOUSE SELECT COMMITTEE ON AGING, DELAWARE COUNTY, PA.

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. EDGAR. Mr. Speaker, on Friday, March 3, the Select Committee on Aging, represented by Congressmen MIKE BLOUIN and DAVE EVANS, held field hearings in my district to gather testimony regarding the Older Americans Act. I participated in these hearings which, in my view, were quite productive. For the past few days I have inserted into the RECORD portions of the testimony we received. The seventh section follows:

SENIOR CENTER

(By Mary Hall, Darby Township Senior Center)

We know that Title V originally contained sections for the funding of:

(1) New Equipment
(2) Renovations
(3) Construction
(4) Mortgage
(5) Personnel Costs

Unfortunately, we are now only funded for new equipment and any renovations needed to be done on the building. Our Center, however, cannot properly be taken care of by simply renovating one area. We are desperately in need of a new building. A new building would provide us with much more room to do things we would like to do. Right now, there is hardly any room to do anything but sit at the tables and talk. If we would like to do our arts and crafts, we would take up practically the entire center's space. It leaves those wishing not to participate no alternative but to join us or feel totally left out. Our two sewing machines are of hardly any benefit to us because to open them up without disturbing anyone else is almost impossible.

Yes—the size definitely determines what activities are going to be installed. The more rooms there are, the greater choice among the people to choose as to what they would prefer to do. At our center, the people are so jam-packed in one small area, they have no choice.

We enjoy coming to the center because it provides us with a place to meet and socialize, talk among friends, and do things we might not usually do if alone.

We want very much to find a new place with more room, giving us choices for activities and a place to bring friends. Why—at present—how can we bring any new people when there is no room to put them.

In order to expand our facilities, we need funds other than those that we now receive. The Title V Act does have a mortgage and a construction section, which at present is not being acted upon. If these were to be opened up for our use, we could begin plans for a new center, in order to meet the needs of its people and fulfill the center's purpose. We need to make a place for people to come and gather together, to keep us active in society, providing us with necessary friendships and activities. Only by the implementing of funds from Title V can we ever hope to see such a thing accomplished to and for our center.●

NEED FOR SAFE NUCLEAR POWER

HON. WILLIAM L. DICKINSON

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. DICKINSON. Mr. Speaker, Joel Starling, editor-publisher of the Andalusia Star-News, Andalusia, Ala., wrote a very thought-provoking editorial in the March 1, 1978, issue of the Star-News about the need for the development of safe nuclear power. With "dire" news abounding in the world today about energy scarcity—and we are presently in the midst of a coal strike that appears to be far from settled—we had better get moving on the development of safe nuclear energy. I commend to my collegues Joel Starling's thoughts on the subject:

NEW NUCLEAR REACTOR SHOULD BE EXAMINED

(By Joel Starling)

The energy crisis is a problem in the United States, and it is not a problem of the United States alone, it is a world problem. It seems that the citizens of the United States forget there is an energy crisis. Our only concern is the cost. We complain about the high cost and continue to use up our energy supply.

One of the main parts of any U.S. energy conservation is the use of coal instead of oil. The reason being that the United States' supplies of coal are plentiful. But the fact has been very vividly brought to our attention, by the coal strike, that no matter how much of anything you have, it is no good unless you can get the product. With the miners on strike we find that we are running short of coal.

This seems to indicate that we need to move rapidly into ways of finding other sources of energy. Two sources that are most mentioned are solar energy and nuclear energy.

Effective use of solar energy is said to be some years down the line. But research should continue in developing this source of energy.

Nuclear energy is already here. The dangers of the nuclear breeder reactor seem to be the major drawback to this. The main danger is the production of plutonium pure enough to be used in bombs.

American and British scientists announced this week that they developed a new nuclear breeder reactor and fuel processing system that can virtually eliminate the threat of atomic weapons proliferation. At the same time the new reactors permit the reprocessing of spent fuel from conventional reactors and would make the world's supply of uranium last almost indefinitely.

With the problems we have with our supplies or energy this new development offers another avenue solving our problem.

The new breeder reactor should be thoroughly studied to see if it can do what its developers claim. We need all the help in the energy crisis we can get.●

REMOVINC ARCHITECTURAL BARRIERS

HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr NOLAN. Mr. Speaker, on Monday, March 6, the House of Representatives passed House Joint Resolution 578 authorizing the President to declare the third week of May in 1978 and 1979 as National Architectural Barrier Awareness Week. The bill was officially cosponsored by 219 of my colleagues; in addition, Mr. GOLDWATER, Mr. FORSYTHE, and Ms. HOLT contacted me after the final introduction and I want to acknowledge their support.

I have been receiving calls from my colleagues on various aspects of the accessibility problems and during the coming weeks, I will be inserting information in the RECORD to help them in furthering the goals outlined in that resolution.

The 1973 Rehabilitation Services Act created the Architectural and Transportation Barriers Compliance Board to enforce the 1968 Architectural Barriers Act. The following letter from Mr. Robert Johnson, Executive Director of the Compliance Board, provides a very informative explanatior of their role in helping our society move toward total accessibility. Mr. Johnson's letter is followed by the text of a pamphlet entitled "Access America," available from his office in HEW.

The inserts follow:

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD,
Washington, D.C., March 9, 1978.

Hon. RICHARD NOLAN,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. NOLAN: I congratulate you on successfully sponsoring House Joint Resolution 578 making the third week in May during 1978 and 1979 "National Architectural Barrier Awareness Week."

As you know, the Federal Architectural and Transportation Barriers Compliance Board (A&TBCB) enforces Federal law requiring that every building or facility designed, constructed, leased, or altered by the Federal government since August 12, 1968—whether financed wholly or in part with Federal grants or loans—must be free of architectural barriers to all people.

Because the A&TBCB is new (it was established by section 502 of the Rehabilitation Act—P.L. 93-112), its role is not yet well known. There has been some misunderstanding about the A&TBCB, so I'd like to further clarify its responsibiilties and scope of authority.

The A&TBCB, which is composed of the cabinet-level representatives of nine Federal agencies, is the major Federal force ensuring accessibility wherever the Federal dollar is involved in providing facilities: schools, hospitals, colleges, recreation facilities, housing, office buildings. It is authorized by Congress to conduct investigations to ensure compliance with the Architectural Barriers Act (P.L. 90-480). The A&TBCB can issue orders of compliance which may include directions for corrective action or the withholding or suspension of Federal funds.

The A&TBCB always tries to amicably resolve complaints about inaccessibility. But if there is no solution to the problem, legal action is unhesitatingly taken against the Federal agency responsible. Recently, for example, I have issued legal citations—or administrative suits—against the departments of Transportation; Interior; Housing and Urban Development; Health, Education, and Welfare; and the General Services Administration.

We are most anxious for all people—handicapped or not—to know they have a right of independent access to and use of federally involved buildings and facilities throughout the nation. Anyone unable to enter or use any such building should write to me at the Architectural and Transportation Barriers Compliance Board, Washington, D.C. 20201, and tell me about it.

Although compliance with Federal law requiring access is its major duty, the Architectural and Transportation Barriers Compliance Board may also recommend to the President and to the Congress legislative and administrative actions necessary to eliminate architectural, transportation, and attitudinal barriers. It works to bring together in a cooperative effort any agencies, organizations, or groups with this goal.

We share your belief that ". . . once people begin to fully realize the extent to which our society places obstacles in the paths of the disabled"—and the able-bodied too—"changes will be forthcoming." "National Architectural Barrier Awareness Week" will play a major role in creating concern and action leading to a nation free of environmental barriers.

To support "National Architectural Barrier Awareness Week," the A&TBCB will launch a national public awareness campaign on architectural barriers. A national television spot about barriers will launch the campaign entitled "Access America."

We are excited about and commend your efforts for "National Architectural Barrier Awareness Week."

Sincerely,

ROBERT JOHNSON,
Executive Director.

ACCESS AMERICA: THE ARCHITECTURAL BARRIERS ACT AND YOU

Any person in America—including those who are handicapped—has the right of independent access to buildings and facilities constructed, leased, or altered for the Federal government or with the use of Federal funds. If, because of a physical handicap you or someone you know cannot enter or use any such buildings constructed since passage of the Architectural Barriers Act of 1968 (Public Law 90-480), you have the legal right to register a written complaint against the responsible parties.

Most Federal buildings or federally funded facilities must at least meet the Federal minimum standards for accessibility and useability. This means they must have audible and visual warning signals to aid blind and deaf people. There must be ramps, wide restroom doorways, and lower switches for those in wheelchairs.

The Architectural and Transportation Barriers Compliance Board (A&TBCB) is the Federal agency created to enforce the standards. While not all government buildings and facilities are covered by the Architectural Barriers Act, it does include most post-1968 buildings designed, constructed, altered, or leased as well as those funded with Federal loans, grants, or contracts. In any case, the A&TBCB is concerned about all barrier-related problems. It encourages and promotes access even for those buildings and facilities over which it has no jurisdiction.

If you have a complaint about an inaccessible building, write the A&TBCB. No special form or format is required, but only written complaints are accepted. Your name will not be disclosed unless you give written consent. Just give your name, address, and as much of the following as you can:

1. Exact description of the barrier-related problem. It may be a doorway too narrow for a wheelchair or the lack of raised numerals on an elevator for blind persons.

2. Exact location of the barrier-related problem. Give the name and address of the inaccessible building or facility—the floor, room, or wherever. It can be a major Federal complex or a small rest area.

3. Name and telephone number of the person responsible for the building or facility. The A&TBCB will make every effort to get all the information necessary to understand and resolve the problem.

4. Names of the building owner and tenant. A Federal agency may be either the building owner or a tenant of a facility.

5. Name of the Federal agency involved. The A&TBCB must determine if it has jurisdiction. Even if it does not have jurisdiction, the A&TBCB may be able to work with an agency to help solve the problem.

6. Your suggestions for solving the problem. Though expense is not an excuse for noncompliance with the law, the least expensive solution could be the quickest and best.

Complaints should be addressed to the Executive Director, Architectural and Transportation Barriers Compliance Board, Washington, D.C. 20201.

Your complaint will be handled even if you are not able to provide all of the information. The A&TBCB will try to get the information it needs, but this takes time and may delay processing your complaint.

The A&TBCB investigates every complaint it receives. The precise nature of the problem is confirmed and every effort made to amicably resolve it. Flexibility and creativity are used to reach the best answer for all parties. In any case, the A&TBCB's responsibility is to ensure compliance with the law.

When the A&TBCB receives a complaint, it determines which Federal agency is involved. A copy of the complaint is then sent to the agency and to other parties involved, such as a government grantor, or contractor if the building is under construction, or the owner of a leased building.

The A&TBCB will discuss and try to negotiate the matter. But no later than 60 days after receipt of the complaint, the executive director of the A&TBCB will make either of two decisions: (1) a "determination not to proceed," which states the reasons why the A&TBCB will not prosecute the alleged violation, and thus ends A&TBCB involvement (for example, the case may be referred to a more appropriate authority such as a state or local agency if no Federal agency is involved); or (2) to prosecute the case by serving the first formal legal pleading—"citation"—on the involved parties. (The 60 days is not the period for corrections to be made. It is the maximum time allowed to draw up an acceptable voluntary compliance plan.)

A citation will contain a concise statement of the provisions of the Rehabilitation Act of 1973 and the 1968 Architectural Barriers Act under which the action is being brought. It will list all documents provided for an administrative law judge to make a decision on the alleged noncompliance, possibly including items such as the contract, drawings and specifications, and key correspondence. The citation will also fix a time and date, usually about 15 days after it is issued, with-

in which any party may request a hearing. Copies of the citation and documents are filed with the A&TBCB docket clerk, who maintains all records for the judge.

Parties receiving the citation have 15 days to respond to the charges and file any documents in addition to those initially filed with the citation. If the A&TBCB executive director or any party receiving a citation does not request a hearing, the judge may decide the case on the record of documents submitted.

You, the complainant, need not be a party to the proceedings. You will receive a copy of the A&TBCB's formal rules under which your case will be processed. You will be kept up to date on its status. At any time after the proceedings have begun, any individual, including the complainant, may ask in writing to join the proceedings. This person need not have an attorney.

After a citation is issued and responded to, parties may engage in prehearing activities as in the courts. If a hearing is held, all parties have the opportunity to make their views known in writing, present and cross-examine witnesses, and submit evidence to support their claims. To prove a violation of the Architectural Barriers Act, it must be shown that the standards required by that act have not been complied with.

Official transcripts are made of all A&TB CB hearings. The law judge may also direct, in addition to the hearing, that the parties file briefs and proposed findings. The judge will set the time for such filings, but they must be submitted within 30 days after all parties receive a transcript of the hearings. Such filings, like the transcripts, become a part of the permanent case record.

Based on the record, the judge will issue a recommended decision and include findings of fact and conclusions of law. Such a decision may recommend action to be taken by an agency and may contain such terms, conditions, and other provisions to ensure that the intent of the Architectural Barriers Act is met. As an example, the judge may issue a decision that a particular federally financed building: (a) was designed and built after the effective date of the Architectural Barriers Act; (b) is covered by the act; (c) that specific sections of the applicable standards have not been complied with; (d) does not therefore comply with the standards issued under the Architectural Barriers Act. The judge may direct that specific remedial action to be taken within a specified period of time. If it isn't, the judge may recommend that Federal funds be suspended or withheld.

Copies of the judge's decision are given to all parties including the original complainant, even if the complainant did not participate in the proceedings. The judge's recommendation becomes a final decision unless appealed to the A&TBCB within 14 days. If it is appealed, the A&TBCB must make its final decision based on the administrative law judge's entire record and any added legal briefs that may be required of the parties.

The decision of the A&TBCB is binding on all Federal agencies. The Rehabilitation Act of 1973, which established the A&TBCB, does not allow Federal agencies to appeal to the courts. However, a complainant, Federal contractor, grantee, or lessor of a federally financed building may seek judicial review of an A&TBCB opinion.

Other features of the A&TBCB rules:

1. Provisional expedited relief (PER)—When the executive director knows that immediate and irreparable damage will occur because of noncompliance with the standards of the Architectural Barriers Act, he may issue a citation asking that provisional expedited relief be ordered by the judge. In such situations there will be a hearing before the judge within eight days after a citation is issued. PER proceedings are the same as regular compliance proceedings but on an accelerated basis. They are less formal and there is a likelihood that formal legal briefs will not be required. PER proceedings can minimize costs to all parties, provide timely resolutions, and avert potentially expensive corrective action to achieve compliance. Provisional expedited relief such as suspending or withholding funds can severely disrupt an agency program. Therefore, the judge must decide on the need for PER.

2. Conflict of interest—If any member of the A&TBCB or an agency of a member is a party in a proceeding, whether as a complainant or a respondent, or if it participates in the litigation, that member or agency may not participate in the consideration or decision of an appeal of that proceeding.

3. Consolidating cases—The judge may order a group of cases which relate to the same problem to be consolidated and heard together. The A&TBCB is concerned that a just and inexpensive determination of cases be made without unnecessary delay.

4. Post-order proceedings—When any party believes corrections ordered by the court have been made, the party may ask the A&TBCB to remove the sanction. All parties will be sent a copy of the request and may comment for or against it. In the same manner as the original compliance hearing, a judge's preliminary decision on any post-order proceedings becomes final if it is not appealed to the A&TBCB.

5. Documents—The A&TBCB has established a docket file where all required documents (except the complainant's name) are available for public inspection. Documents are served on individual parties by certified mail or by hand delivery.●

TRIBUTE TO MAYOR JAMES BALENTINE

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. EDWARDS of California. Mr. Speaker, I want to bring to my colleagues' attention the outstanding record of community involvement and support of Mayor Jim Balentine of the city of Newark. Jim has been serving the residents of Newark for over 20 years, first as a police officer, then as a parks and recreation commissioner and city councilman. In 1972 Jim became the first directly elected mayor for the city and has held that post since then.

Newark has thrived during Jim Balentine's tenure of service and much of the credit must be given this extraordinary public servant. Many millions of dollars of commercial and industrial development has taken place in Newark, capped by development of a regional shopping center of over 1 million square feet. All of the development has been marked by excellent planning and balance as evidenced by a city-wide system of parks comprised of over 100 acres of land.

Perhaps Jim's greatest contribution to the people though has been as an advocate of Newark's interest outside the city. His strong determination and unceasing personal effort played large roles in securing funds for replacement of the Dumbarton Bridge and, in halting an airport development south of the city which would have devastated portions of the city by noise from aircraft. These two decisions will have a lasting impact on every resident of the city now and in the future.

Mayor Balentine is not running for reelection this year. Nobody doubts that he would have been reelected easily but he has decided to leave public office so that others may also serve. While this is sure to be a great loss for the Newark Council, I am sure that Jim will continue to serve and participate in the community's affairs as private citizen Jim Balentine. I know that everyone in Newark joins me in extending Jim wishes of success in his future endeavors. Success has certainly been the hallmark of his time spent in service of Newark.●

AIRLINE REGULATORY REFORM LEGISLATION

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. NEAL. Mr. Speaker, as the Congress continues to discuss the proposed airline regulatory reform legislation, I think it would be wise for us to consider comments on this issue from the State level.

The North Carolina Aeronautics Council has recently endorsed a position paper by the State's department of transportation concerning airline regulatory reform. I think the paper sets forth a commonsense approach which seeks to eliminate unnecessary regulations and economic restrictions while maintaining the present high standards of safety and service.

Our ultimate airline regulatory reform goal should be the improvement of services to the consumer. The main thrust of such reform, I think, should be prudent and reasonable, as outlined in the North Carolina Department of Transportation's position paper. I would like to commend it to the attention of my colleagues:

DEPARTMENT OF TRANSPORTATION,
Raleigh, N.C., February 15, 1978.

NORTH CAROLINA DEPARTMENT OF TRANSPORTATION POSITION OF AIRLINE REGULATORY REFORM

The North Carolina Department of Transportation has encouraged and supported the development of a safe and efficient system of airports and airways, and the furtherance of air commerce in order to extend the benefits of a highly mobile and efficient air transportation system to North Carolina's citizens and businesses. The Department strives through funding, promotional efforts, and technical assistance to develop existing airports to their fullest justifiable potential, to stimulate the construction of new airports in desirable locations, and to increase the delivery of air transportation services to North Carolina by airlines, charter operators, fixed base operators, and other aviation service organizations. In witness thereto, the Department has obligated close to $9,000,000 since 1974 for development of the air transportation system in North Carolina.

All of the Department's efforts are aimed at seeing that North Carolina benefits from a safe balanced multi-modal transportation system which meets the needs of her people and her economy. Accordingly, the controversial subject of Airline Regulatory Reform has been thoroughly studied.

The Department supports the principles of regulatory reform that will remove artificial and unnecessary regulations and economic restraints, thereby encouraging increased efficiency in the airline industry, and at the same time providing consumers better air transportation services at lower costs while maintaining the present high level of safety. However, reform must be reasonable, and not bring about sudden change and instability to a successful industry. Reform legislation should be enacted as soon as feasible so that the airlines, labor, and banking institutions may set clear future objectives, and the financing commitments for extensive new-generation equipment acquisitions may be made in a stable statutory climate.

The Department favors reform which fosters the introduction of prudent price competition and expedited market entry. Routine cases before the Civil Aeronautics Board should be processed in an expeditious manner with a maximum time deadline set for the consideration of all cases. The legislation should call for a phased approach and an adequate transition period and should preclude ruinous competition between the trunk and regional carriers.

The Department continues to encourage adequate air service for small communities. It has placed high priority on airport development at small community airports having scheduled air service, be it 2nd or 3rd level air carriers. The Department worked closely with Wheeler Airlines (a Raleigh based commuter) and the Coastal Plains Regional Commission to provide technical assistance for commuter service to the Eastern part of the State. The Department is currently conducting a "Small Community Air Service Study" within the State which will provide valuable information for air transportation companies operating in the State.

The Department considers that service to the majority of small communities can be provided in a cost-effective, energy-efficient manner by commuter/feeder airlines or by an "Alleghany Commuter" style of operation. Such a third level air carrier operation must be fully recognized as part of the National Air Transportation system. Voluntary, modified certification by the Civil Aeronautics Board (CAB) for this third level of air carriers with appropriate route protection, joint fare privileges, guaranteed loans for modernizing equipment, and simplified reporting procedures are essential to the further development of such a system. Legislation must allow for eased entry of new service points to be served by third level air carriers, points which should be eligible for subsidy.

In summary, the North Carolina Department of Transportation believes that the United States' system of airlines has done a good job in providing air transportation services. However, the system can be improved through moderate regulatory reform to benefit both the consumer and the air transportation companies.●

ENERGY CONSERVATION WEEK AT WILLIAM JEWELL COLLEGE

HON. E. THOMAS COLEMAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. COLEMAN. Mr. Speaker, the Congress and the American people are acutely aware of the crisis in energy this country faces. While we debate the various proposals before us, however, there are many fine groups across the country who are taking an active interest in exploring the vast alternatives in energy that could help us meet the crisis.

I would like to take this opportunity to inform the Congress that my alma mater, William Jewell College, of Liberty, Mo., is sponsoring an "Energy Conservation Week," on March 21–23, 1978. During this period, the William Jewell student senate and the physical plant department have organized seminars on such topics as solar heating, heat pumps, insulation, and general conservation.

These actions show that William Jewell College is taking the challenge of energy seriously. In addition, student and faculty are taking steps to reduce wasted consumption of natural gas, gasoline, water, and electricity.

It is with personal pride that I recognize the efforts of William Jewell College. I further urge all my colleagues to join me in listening to, and learning from, the many Americans who are seriously exploring ways to conserve our precious resources.●

FIRST-YEAR ANNIVERSARY OF ANATOLI SCHARANSKY'S ARREST

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

● Mr. LEHMAN. Mr. Speaker, today marks the first-year anniversary of Anatoli Scharansky's arrest and isolated incarceration in Moscow awaiting trial on charges of treason. The arrest of Anatoli Scharansky and the denial of his right to counsel with family or friends and to a lawyer of his choice is the kind of harassment which has resulted from his desire to emigrate from the Soviet Union to Israel. Anatoli's arrest and imprisonment is an example of how Jewish dissidents and others who actively resist the Soviet Union's violations of the Helsinki Accord are treated.

I have recently been informed by my constituents in South Florida that Dina Beilina, an active dissident and one of the strongest witnesses who would give strong testimony in defense of Anatoli at his trial, has now been ordered to leave the Soviet Union. Her application to emigrate to Israel was first made 6 years ago, and she now has 2 weeks to leave the Soviet Union. Dina Beilina is, therefore, prevented from giving testimony in defense of Anatoli at his trial. I, therefore, would like to take this opportunity to make public her statement in defense of Anatoli Scharansky, which appeared in the September, 1977 issue of The Vigil, a publication of the Washington Committee for Soviet Jewry. Dina Beilina may be forced to remain silent in the Soviet Union but her defense of Anatoli Scharansky will not be doomed to silence in the international community where human rights are not ignored.

The South Florida Conference on Soviet Jewry has informed me that over 600 people in Miami, including Miami Mayor Maurice Ferre, are participating in a 1-day hunger strike to commemorate the 1-year anniversary of Anatoli Scharansky's arrest. Our thoughts and prayers and efforts for Scharansky will not cease until he is free and reunited with his family.

I would also like to share with you a resolution adopted by the Board of County Commissioners of Dade County, Fla., on February 15, 1978, urging the President and Congress to use their persuasive powers to bring an end to the harassment of Soviet Union to grant Anatoli Scharansky immediate freedom and recognition of his right to emigrate.

[From The Vigil, September, 1977]

STATEMENT OF DINA BEILINA

It is almost impossible to testify in a case that is kept in utmost secrecy. But I would like to state the facts that may prove useful for Anatoly Scharansky's defense, as well as for disproving the accusations, whatever they are, which I consider absurd regardless of the manner in which they are stated.

My name is Dina Beilina. I am 38. In 1972, my family and I were refused exit visas to Israel. The denial was motivated by reasons of "state security." Yet, the reasons have changed frequently, and to this day I am not aware of the actual reason why I am not allowed to emigrate. I am a cybernetics engineer.

My husband and I met Anatoli Scharansky in 1973. After the departure of Alexander Goldfarb, who now resides in Israel, Anatoli took upon himself the difficult task of being the translator for the refuseniks. He frequently had to communicate the facts pertaining to persecution of Jews wanting to exercise their right to emigrate to Israel to all those interested in our condition, including the foreign correspondents in Moscow. Quiet, modest, of medium height, wearing a torn jacket in which he was arrested four years later, Anatoli said "I'll try." Since then he had become our translator at all press conferences, and meetings with religious leaders and politicians interested in the conditions of emigration from the Soviet Union. Moreover, Anatoli had devoted his mind, his energy and kindness to all those who, like himself, were persecuted for their intentions to emigrate. He took part in drafting the reviews characterizing the problem of emigration, the reviews which we wrote every six months, and in which we informed our friends about the lawlessness of the Soviet emigration policy, persecution of Jews conducted within as well as outside of the courtrooms, persecutions imposed upon them solely for their desire to emigrate.

Anatoli frequently traveled to other cities where he met with Jews, attempting to aid them and give details of their condition to all those whose help could be counted on. He understood that without such flow of information we would again turn into the Jews of Silence, and he did all he could to publicize the problems of emigration and its handling. As a translator for American lawyers interested in specific cases of Prisoners of Conscience, he accompanied them to the courts, offices of defenders and prosecutors, particularly in the cases of Nashpitz, Tistlionak, Roitburd, Stern, and Zavurov.

It was with his aid that the press conference for Babi Yar was organized. Babi Yar is the place of mass murder of Jews during World War II. For many years the grounds were vacant, but subsequently the authorities erected a monument, the inscription on

which in no way reminds one of the tragedy suffered by the Jews. Refuseniks who want to conduct mourning services in accordance with Jewish traditions, are usually not admitted to the monument. There Anatoly was arrested and warned that he will get into trouble unless he stops his activities. The second warning of this kind he received as a result of his participation in peaceful demonstrations aimed at improving the conditions of the Prisoners of Conscience. For participation in these demonstrations, Scharansky served four fifteen-day jail terms. He was warned that his activity would lead to a long jail term. A reason, they said, would be found. Anatoly never did anything illegal, and he considered it impossible to keep quiet.

Brilliant, and having perfect command of English, Scharansky helped us write complaints about the lawlessness with which the emigration matters are being treated. His presentations at the seminars in Dr. Lerner's apartments were outstanding and we shall forever remember his report about the Entebbe raid—a report that ended with an ovation.

The clouds over Scharansky began to mount. First, the magazine New Times, the newspaper Voice of the Motherland, a T.V. film Traders of Souls, characterized him as a hooligan who is capable of everything, even a fist fight; and later as a "soldier of Zionism." "I'm growing," he said jokingly. But all of us, and Anatoly especially, fully understood that anything could happen.

In the summer of 1975, the Group of Assistance to the Soviet Implementation of the Helsinki Agreement was formed in Moscow. Anatoly had joined the group. He considered the Helsinki Agreement an important development that could change decisively the Soviet treatment of the matter of emigation.

He took part in drafting the documents of that group, such as the one about violation of our telephone and mail communications, about lawlessness surrounding matters of emigration.

In November 1976 the authorities began to prepare a case against him under charges of parasitism, similar to the one brought against Joseph Begun. Despite testimony that Anatoly made a living by giving lessons in English and Physics (I also testified since he gave my daughter lessons in Physics), the authorities refused to register him as a private instructor and only because Professor Maiman managed to engage him as a private secretary was he saved from prison.

Scharansky was subjected to uninterrupted surveillance. In October 1976, it had become demonstrative. I suggested that Anatoly write an open letter describing this fact. He refused saying that there are others whose situation is worse and that there is no need to call attention to his case and divert attention from them.

Many foreigners had seen the KGB agents sleeping under the door of Slepak's apartment. The KGB had kept an eye on Slepak night and day. Anatoly slept at Slepak's apartment.

The reason for my writing this in detail is that Anatoly is most likely being accused of espionage. Try to imagine a man who is being watched by agents; who lives in a bugged apartment; who lives in apartments which are searched without warrant or warning; who communicates only with others in a position similar to his—and you will see that under such conditions a spy cannot possibly exist. Ordinary Soviet people are afraid to even walk up to people like Anatoly Scharansky, to say nothing of talking to him about classified matters. It is also common knowledge that it is he who talks and not he who listens that is responsible for giving of information. It is not a recipient of such information that must be brought to trial.

On March 4, 1977, the apartments of five Jewish refuseniks, as well as my own, were searched. The protocol of violations of the Criminal Procedural Code did not describe all the confiscated papers, but said, for instance, "three pages of addresses, five files of papers." The typewriters were confiscated, not just sealed, as the law requires. So this provides a lot of leeway for those preparing any case. Also searched was the apartment which Lipavsky rented in Moscow. (He previously lived elsewhere. He told us that he moved because he wanted to live in the center of events and to work night and day for the benefit of Aliyah.) He invited Scharansky to move in with him, but I and others protested, because it would not be wise for Scharansky who was constantly followed to live in someone else's house without registration. We were afraid of provocations like ones carried out in the case of Alexander Ginzburg. I said, "If you live with one of us, then the responsibility will rest with us, and it would not make sense for the authorities to plant evidence."

Scharansky lived at the apartment of Vladimir Slepak and it was there that he was arrested. Hit on the back, he was shoved into a car by six agents, who were probably trying to avoid showing the arrest warrant. It was only on May 30, that his seventy-year old mother had learned that he was being accused of violating Article 64A.

By now everyone has probably learned who and what Lipavsky is. I would like to give one example that disturbed me very much. Lipavsky would make daily visits to Professor Lerner and his wife, who had suffered from a serious hypertension crisis at the end of February. He measured their blood pressure, gave them shots. He then signed a letter in the newspaper that he well knew he could kill unsuspecting seriously ill people. And this man will be a witness against Anatoly?

On the day Lipavsky's letter was printed in Izvestia, we didn't know which one of us would be arrested. But all of us, including Anatoly, made statements that we would not take part in this case even after arrest, for we consider this case a reprisal, and only in open proceedings, if such are allowed, would we give testimony.

Moscow, July 10, 1977.

RESOLUTION URGING THE PRESIDENT AND THE UNITED STATES CONGRESS TO USE PERSUASIVE POWERS TO BRING AN END TO THE HARASSMENT OF SOVIET JEWS; AND URGING THE APPROPRIATE OFFICIALS OF THE SOVIET UNION TO GRANT THE IMMEDIATE FREEDOM AND RIGHT TO EMIGRATE TO ANATOLY SCHARANSKY

Whereas, Jews in the Soviet Union are subjected to harassment and imprisonment when they attempt to exercise their basic human and legal rights as guaranteed under the Constitution of the USSR and the Universal Declaration of Human Rights, ratified by the Soviet Union; and

Whereas, Jews in the Soviet Union are being denied their rights to emigrate and be reunited with their families, a right guaranteed to them by the Helsinki Accord, 1975; and

Whereas, trials continue to be staged against Soviet Jews who have attempted to live full Jewish lives in the Soviet Union or who have applied to emigrate to Israel; and

Whereas, Anatoly Scharansky is being held on unspecified charges without adducing any evidence that might indicate complicity in criminal acts, and without access to legal counsel and without trial,

Now, therefore, be it resolved by the Board of County Commissioners of Dade County, Florida:

Section 1. That this Board respectfully requests and urges the President and Congress of the United States to use persuasive powers to end the harassment and imprisonment of Soviet Jews and to allow all Soviet Jews to exercise their right to emigrate.

Section 2. That this Board urges the appropriate officials of the Soviet Union to grant the immediate freedom and the right to emigrate and be reunited with his wife to Anatoly Scharansky as guaranteed by the Helsinki Accord, 1975; and that if the Soviet authorities bring Anatoly Scharansky to trial, that he be given an open and public trial, and that prominent representatives of major Bar associations and of the Criminal Bar of the United States be permitted to be present throughout the trial of Anatoly Scharansky.●

TURKISH VIOLATIONS OF HUMAN RIGHTS

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. STEERS. Mr. Speaker, this year, the House will be considering the question of foreign assistance to Turkey. At the base of this debate is the question of whether or not the human rights record of Turkey has improved.

A constituent of mine, Mr. George Spring, has sent me an interesting article on this very subject that I would like to insert into the CONGRESSIONAL RECORD for the benefit of my colleagues.

A "DELIBERATE WHITEWASH" ON HUMAN RIGHTS IN TURKEY

(By Jack Anderson)

The Carter administration is so worried about declining Turkish military power that it has falsified its report on human rights practices in Turkey and has portrayed the country as a virtual human rights paradise.

The false account, part of the State Department's "Country Reports on Human Rights Practices," was delivered to Congress several weeks ago. The department claimed it had little "conclusive proof" or "significant evidence" to support allegations of human rights abuses in Turkey.

A more enigmatic statement, worthy of master diplomat Henry Kissinger, was issued on Turkish-controlled northern Cyprus. Human rights questions in Cyprus, stated the report, "cannot be treated in isolation from political considerations."

These conclusions are disptued by the State Department's own files, which contain abundant evidence of the harsh treatment of minority groups and political prisoners. Indeed, the Turks have a reputation for brutality, which makes them fierce fighters and cruel jailers.

American citizens, who have had the misfortune of landing in a Turkish lockup, have told of vicious beatings. A favorite Turkish torture is to batter the soles of a prisoner's feet with truncheons, which causes excruciating pain and leaves him unable to walk.

The Greek government, taking exception to the State Department's fairy tale, lodged formal protests both in Athens and Washington. And Cypriot Ambassador Nicos Dimitriou marched into the State Department and indignantly delivered an official letter of protest.

The official view of human rights in Turkey, insiders suspect, is a deliberate whitewash intended to tip-toe around Turkish sensitivities. The Turks are still smarting from an arms embargo imposed by Congress after Turkish troops invaded Cyprus with U.S. weapons.

The Turks retaliated by closing U.S. intelligence installations in their country. These electronic listening posts monitored Soviet missile tests and military maneuvers. At Sinop on the Black Sea, for example, sophisticated radar devices could zoom directly on Soviet missile launch sites.

At the time the bases were closed, intelligence sources claimed they were responsible for about a fourth of the clandestine information gathered about Soviet military activities. American technology and ingenuity, however, have produced substitutes for most of the Turkish installations.

Far more important, in the Pentagon's view, is Turkey's role as the Mediterranean anchor of the NATO alliance. One worried general told us: "The big question is whether they can perform their NATO responsibilities without military aid. We get a real buy with the Turks. Give them a few weapons, and you buy a bunch of divisions. They've got the manpower, and they proved they could use it in the Korean War."

Our sources say that President Carter has adopted the military view. He has been strongly influenced by the joint chiefs, who meet with him frequently. In fact, the president recently boasted to his Cabinet behind closed doors that he "has generated a compatibility among the strategic planners of our government unknown in former administrations."

He reportedly is preparing, therefore, to ask Congress to approve the $1-billion defense agreement that was signed in 1976 between Turkey and the United States. The State Department soft-pedaled Turkish human rights abuses, our sources say, to avoid irritating a Congress that is already sympathetic to the Greek and Cypriot causes.

In any event, the human rights reports on Turkey simply do not reflect the truth. Particularly galling to the Greeks is the statement that "there does not appear to be any official discrimination against individuals belonging to minority groups" and that they enjoy, among other rights, "freedom of worship."

There has been a history of religious discrimination against the Greek Orthodox Church in Turkey. The best evidence can be found in the statistics: the Greek Orthodox population in Turkey has dwindled from 111,700 in 1924 to 13,500 today. A confidential diplomatic document, reporting on the oppression of Greeks in Turkey, cites these flagrant abuses:

A deliberate campaign of harassment has been reported against Greek Orthodox clerics in Istanbul, the very city where the head of the church traditionally resides. Greek religious leaders have been denied passports to travel abroad, even for pressing personal reasons. Editorials in the Turkish press have railed against the church. Following one series of articles, demonstrators laid a "black wreath on which were pinned slogans asking for the expulsion of the [Greek Orthodox] Patriarchate from Turkey."

Turkish authorities are cracking down on Greek minority schools. Teaching of the Greek language has been "severely curtailed," and Turkish official have refused to appoint principals to Greek high schools. All repair requests in excess of $15 were refused last year. And the Turks have begun assessing heavy taxes on Greek schools, though they are owned by charity institutions, which are supposed to be tax-exempt.

Last year, Turkish officials began "the close surveillance of persons who visit the Greek General Consulate in Istanbul" and "systematically ask for [their] identity cards." Leaders in the Greek Orthodox minority have also begun to "receive anonymous letters, threatening the property and lives of the recipients and containing demands for ransom."

There is other evidence, which we lack the space to recount, that the State Department deliberately deceived Congress about human rights in Turkey.

Footnote: A spokesman for the Turkish embassy said his government would prefer to eschew "polemics" and discuss "issues" instead. Turkish authorities, he said, do not want to expel the Greek Orthodox Church from Istanbul, and they do not tax the church illegally. With respect to passports, the spokesman said that all Turkish citizens are limited to a single trip out of the country every two years, in order to conserve "hard currency." He also claimed that the Turkish minority in Greece is harshly treated.

RISK/BENEFIT DECISIONS AND THE PUBLIC HEALTH

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. BROWN of Ohio. Mr. Speaker, 6 years ago, the Committee on Government Operations issued a report on the regulation of food additives, particularly nitrites and nitrates, under the Food, Drug and Cosmetic Act.

As a member of that committee, I submitted additional views relating to the arbitrary effect of the Delaney clause on the Federal Government's efforts to protect the public health and safeguard the Nation's food supply.

In those additional views, I specifically addressed myself to the need for a risk/benefit trade-off, rather than an arbitrary approach, to complex scientific and technological questions affecting our food supply. To quote briefly from the views I expressed in that August 1972 committee report:

We all want to assure that the food people eat will not harm them. And, insofar as it is posible, government should assure this. But it must be recognized that absolute guarantees may not always be possible—and for something as big, pervasive and powerful as the Federal Government—in an area where, surprisingly, so little is scientifically provable.

In view of my position on this issue, it was with considerable interest that I recently read the remarks of the chairman of the Senate Health Subcommittee on the need for a Government approach to these problems based on a realistic appraisal of the limitations of existing Federal operations in the health field.

In an address delivered February 15, 1978, at the Food and Drug Administration symposium on "Risk/Benefit Decisions and the Public Health," Senator KENNEDY made a major contribution toward moving Government policy on this said:

We must begin educating the public to the reality that there is no such thing as absolute safety. Regulation can never completely and totally protect the public. Large segments of the American public already accept this fact. But it is time for persons in positions of leadership to strengthen this understanding with more candid discussion of the limits of regulation.

Senator KENNEDY's complete remarks delivered at this FDA symposium held at the Air Force Academy should be read in their full context to appreciate the cogency of his call for a new approach to an increasingly urgent problem. I commend them to the attention of the Congress, the Executive, and all citizens concerned about the present and future health of the American people.

I insert the remarks of the chairman of the Senate Subcommittee on Health at this point in the RECORD.

REMARKS OF SENATOR EDWARD M. KENNEDY

I am pleased to be able to join you here today at this symposium on risk-benefit analysis in the area of health care. And I am especially pleased to find a distinguished group like this, under the auspices of the FDA, grappling with a subject which is of great importance to the public health and which is becoming more current and controversial with each passing year.

You have available at this conference the main ingredients for dealing with a complex issue of great public value. You have fine leadership from Don Kennedy of FDA and Doug Costle of FPA. You have a distinguished group of participating scientists and analysts. And you also have the additional ingredients of distance from Washington and the fine, cool mountain air of this outstanding setting.

With these advantages already in place, I am confident that your deliberations will help promote our understanding of more effective ways in which we can use risk/benefit analysis to improve the public health. Especially at this time of growing challenge to the traditional techniques of governmental regulation, the effective application of such analysis is essential if we are to preserve the proper balance between free competition and wise regulation in sensitive areas like health care.

I also detect a sense of urgency about this symposium that has been missing for too long in discussions of this type. I speak now as an elected official and as chairman of a Senate Subcommittee whose prime responsibility is the protection of the health of our citizens. I deal daily with the political consequences of regulation and the people it affects. I am concerned that our regulatory health authorities are growing more and more distant from the people. Our citizens no longer fully understand or trust the agencies created by Congress to protect their health. And these negative developments come at a time when the number of preventable threats to the public health is growing larger each day.

Our major challenge—yours and mine—is to enhance their strengths and eliminate the weaknesses of these agencies and their missions. Part of the challenge is to perfect the methodology of risk/benefit analysis, so that regulatory decisions of the FDA, EPA, and other agencies can more accurately reflect our public goals. The challenge also requires us to do more to educate the public about regulation and its limits, and to involve the public more directly in the regulatory process.

I need hardly remind this audience of certain facts that underlie the regulatory dilemmas we face today. We live in an expanding sea of man-made chemicals—drugs, food additives, industrial chemicals, and pesticides.

American industry manufactures 70,000 chemicals a year. One to two thousand new chemicals enter the market annually. An average auto worker is exposed each day to between 100 and 500 different chemicals.

We know that some of these substances are dangerous. Six million Americans are regularly exposed in the workplace to chemicals known to have caused cancer in animals. One million Americans have been ex-

posed to asbestos, of whom 200,000 may die of lung cancer. Approximately two million Americans are regularly exposed to benzene, which has now been demonstrated to be a very potent carcinogen.

But clearly, these cases are only the tip of the iceberg. The real or potential dangers of these myriad substances may not be known until we have much more information—whose collection may take years or even generations.

I am reminded of a story which Dr. Irving Selikoff told last spring before our Health Subcommittee. When cigarette smoking was first becoming widespread, a physician asked a distinguished cancer expert whether the practice worried him. Not at all, the expert replied. Cigarette smoking would reduce the smoking of clay pipes. And the smoking of clay pipes was known to cause cancer of the *lip*!

It took more than twenty years of massive experimentation with cigarettes on an unwitting American public to demonstrate that society was the loser in that trade-off. Whether we are now losing on a comparable scale on any other substances remains to be seen.

The problem is clear, but the solution is much less so. The American people have reacted by giving the Federal government a mandate to screen chemicals for hazards, and to regulate their distribution and use as drugs, food additives, or industrial chemicals.

But this is only half the answer. For we lack both the money and the manpower to test all these man-made substances for all their possible consequences. Even if we could test all these substances, available methodologies could not tell us with certainty which are dangerous to humans and which are not. And even among the dangerous compounds, we would not know precisely the magnitude of the threat.

This uncertainty is a central element in the regulatory dilemma we face. It is difficult to believe that cigarettes and asbestos are unique in their enormous adverse public effects. But which other chemicals will turn out to be the gross offenders? So far we can only speculate. There is no such thing as a simple, straight-forward answer. But we face the alarming possibility that among the enormous number of substances that our highly industrialized society is spewing into the environment are some that even now may be causing massive cancer epidemics for the current and future generations of Americans.

The dilemma is also complicated by our increasing technical ability to detect the presence of chemicals at smaller and smaller concentrations. In our preset state of partial knowledge, *potential* dangers are everywhere, but *certain* dangers are rare. We are in the impossible position of walking through a minefield blindfolded, with the knowledge that the devices we trigger today may not explode for many years, or even decades.

Moreover, as science and technology advance, there are increasing numbers of products and activities that pose potential threats to the public health. Recombinant DNA is a case in point.

For the first time in history, scientists voluntarily ceased their work out of fear of potentially harmful effects of their work on public health. That issue has become a case study of the pitfalls we encounter when scientists and public officials try to work together to apply the risk/benefit calculation. In large measure, this difficulty results from dealing with a novel scientific technique whose ultimate implications are probably impossible to know at the present time.

Even when we find that risks exist, however, the federal government too often treats them inconsistently. On one hand, we subsidize tobacco-growing, and we ship tobacco abroad as foreign aid. On another hand, we speak of banning saccharin, when medical opinion is widely split on whether it may confer potential health benefits.

And we quite appropriately restrict the use of laetrile, even for patients dying with known cancer. But we allow millions of healthy Americans to be unwittingly exposed to a pesticide like toxaphene, which clearly causes cancer in animals.

In most cases, these inconsistencies are not exclusively the fault of regulators. They also reflect the contradictory mandates and inconsistencies in regulatory law, which in turn are often the product of pressures by special interest groups that are capable of swamping the public interest. Congress has a special responsibility to review these laws to ensure they reflect the public's wishes. We cannot tolerate a situation in which inconsistent regulatory actions heighten the public's confusion and skepticism.

With all these problems, it is no surprise that America's public faith in government regulation is strained to the breaking point. Our private capacity to generate hazards to health has outstripped our public ability to evaluate and control the hazards.

One step we can take to deal with this deteriorating situation is to commit more resources to perfecting the methodology of risk benefit analysis. In particular, we need more research aimed at improving our ability to evaluate the risks of chemicals. We must reduce the uncertainty involved in these risk assessments, and we must make these assessments cheaper and faster.

In particular, we need to devote more resources to perfecting alternatives to animal testing as a mean of assessing the toxic potentil of chemicals. This work goes on now at the Cancer Institute, at the FDA, at the EPA, and at the National Institute of Environmental Health Sciences. But it is research that needs better support and better coordination.

In the long term, research on risk and benefit analysis will probably prove more important than any other single step we can take to improve our capacity to protect the public health through regulation. It is work that will allow legislators and regulators to speak with much greater confidence when they warn of the hazards of a drug, a pesticide or a food additive. In this way, our research work will enhance the scientific credibility of our regulatory institutions.

But research is a long-term strategy. There are also short-term solutions that are equally important, but more difficult.

One key element is to improve the way regulatory agencies set priorities. It is clear that FDA, EPA and other regulatory institutions do not have the people or the money to carry out the huge job assigned by current law.

But it is not clear they are taking maximum advantage of the resources they now have. Our regulators need to plan better. They should publish and circulate more understandable plans and priorities for dealing with the multiple chemical threats for which they are responsible. This action will enable them to carry out their missions more effectively. And it will enable Congress and the public to deal more effectively with the isolated chemical hazards so frequently reported in the media.

Another key element in strengthening our regulatory approach is improved public education. Unfortunately, public education is often seen today as a tired and meaningless concept. It is our responsibility to give it new life and content. Public understanding of the regulatory process has always been the cornerstone of successful regulation in the past, and it will be essential for the success we hope to achieve in the future.

We must begin educating the public to the reality that there is no such thing as absolute safety. Regulation can never completely and totally protect the public. Large segments of the American public already accept this fact. But it is time for persons in positions of leadership to strengthen this understanding with more candid discussion of the limits of regulation.

This approach does not mean we should leave open the chemical flood-gates and let Americans drift in the rising flood of toxic substances. We should give the benefit of the doubt to the public. The burden of proof should be on those who profit from the sale of chemicals to show that their distribution and use should be permitted.

But we must be honest in discussing the limits of our current resources and techniques. Risk/benefit analysis is, after all, an imperfect art. Its application will necessarily prove fallible. But the American people will accept this result and be more tolerant and supportive of regulation, as long as they understand the basis on which the decisions have been reached.

Perhaps our greatest national resource is the informed common sense of the American people. Inevitably, we shall encounter situations in which the known risks and benefits of substances are closely balanced. When these situations occur, and when citizens can control their own exposure to such substances, the correct approach is to inform the public about the nature of the risks and benefits, and to let them make their own decisions about exposing themselves to the chemicals involved.

Americans are ready for this responsibility. In fact, they are demanding it, as the lesson of the saccharin controversy now makes clear. A recent poll showed that 76 percent of Americans continue to oppose a ban on saccharin manufacture and that 77 percent of those who use it plan to keep on doing so.

By contrast, in the case of laetrile, the saccharin precedent does not apply. As proposed for use in cancer treatments, laetrile is a drug, and it should be held to the same strict tests of safety and effectiveness which all prescription drugs are required to meet.

We should also remember that the population using laetrile is an especially sensitive group. Cancer patients are ill with a dread disease. They are much more prone to grasp at straws, and to choose a treatment without proven effectiveness, especially when the alternatives are as grim as chemotherapy or surgery or radiation. As a result, these patients are entitled to a degree of regulatory protection which the average American may not require.

Informing the public, however, does not mean printing a few lines in the Federal Register, while manufacturers fill America's living rooms with enticing advertisements for potentially hazardous products. Regulators must fight fire with fire. They must start using the print and broadcast media to inform the public in ways effective enough to make their message heard and understood.

In doing so, they must show a creativity and ingenuity they have shown too seldom in the past. They must make the esoteric concept of risk and benefit analysis understandable to ordinary citizens by using terms and images which relate to their daily lives.

This aspect of public education is essential to successful regulation in our increasingly complex modern world. By this approach, public education will become a way of involving citizens in regulatory decisionmaking. They will become partners in protecting themselves from potential hazards.

We must also search for other ways to promote this public partnership. In particular, we must find better ways of directly including the public in regulatory decisions.

The Environmental Protection Agency has considered experiments with public participation in its regulatory process, and the National Academy of Sciences recently made

recommendations along these lines in its study of EPA decision-making. We cannot overestimate the importance of public participation in regulation.

It is increasingly clear to the average American that there is a large dose of subjective judgment in the rules which pour out of EPA, FDA, OSHA and other regulatory agencies. Even under the best circumstances, this subjectivity is inevitable. It reflects the limits of risk/benefit analysis and the realities of politics. It is nothing to apologize about.

But if decisions are subjective, then the process by which these decisions are made becomes of great importance. That process will not be accepted as legitimate unless it is open and understandable. And the way to make it open and understandable is to ensure that representatives of the public have direct access to it.

Regulation has become one of the foundations of modern public health in the United States. The legitimacy and strength of FDA and EPA and other regulatory institutions are national health resources. They deserve far greater emphasis and attention by Congress and the public than they have received in recent years. I look forward to the recommendations and suggestions of this symposium as a useful step in meeting the growing challenge. And I also look forward to working with you, as we build a wiser and more effective future for our nation's system of public health.●

THE 130TH ANNIVERSARY OF HUNGARIAN INDEPENDENCE

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. FARY. Mr. Speaker, today marks the 130th anniversary of the Hungarian Revolution of 1848, in which the people of Hungary rose up against the domination of the Hapsburg Empire. Early in March of that year, the great patriot leader, Louis Kossuth led the national demand for parliamentary government. Just a year before, national elections had supported the movement for autonomy, culminating the famous ten points, including responsible government, popular representation, religious liberty, abolition of serfdom, equality before the law and other principles basic to a free society. These were adopted by the deputies of the Hungarian diet on March 15, 1848, and they thereby became equivalent to a constitution.

Tragically, the new government was to be ruthlessly suppressed by invading armies, which occupied Budapest in January of 1849. Resisting to the bitter end in the face of overwhelming odds, the Hungarian diet proclaimed a republic in April, electing Kossuth as "governor-president." The republic collapsed under the combined assault of Austrian and Russian troops, but Kossuth escaped.

Nevertheless, the people's will for freedom lived on, and in 1867, only 16 years after the uprising, the constitution of 1848 was restored peacefully and Hungary acquired responsible government. After the First World War, the political union with the Hapsburg dynasty ended, and Hungary became a wholly independent nation.

In celebrating Hungarian Independence Day, we honor the courage and vision of those who led their people's struggle for national freedom in the last century. More than that, we remember that spirit of patriotism which sustained Hungarians in every age and which has flourished in our own time. The memories of the Hungarian Revolution in 1956 are still fresh and vivid in the hearts and minds of Hungarians, which is testimony to their acute desire for real independence.

The Revolution of 1848, even as that of 1956, aroused great sympathy in the United States. Kossuth's visit in 1851 was a dramatic occasion for celebrating American support for Hungarian freedom. Since that time countless thousands of Hungarians have come to America, seeking larger liberties. Today, there are well over a million Hungarian-Americans, whose contributions to our national life are outstanding in every area of endeavor including science and industry, music and the arts, journalism and entertainment.

Mr. Speaker, on this special day I join with our fellow Americans of Hungarian descent in celebrating the independence that the great patriot, Louis Kossuth, helped establish. However, it should not go unnoticed that the same Russian imperialism that prevailed in 1849 is still present today and continues to oppress the legitimate aspirations of the Hungarian people for real independence and to be free of foreign domination. Let us pray that those noble aspirations are realized one day soon.●

HEARINGS BY THE HOUSE SELECT COMMITTEE ON AGING, DELAWARE COUNTY, PA.

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. EDGAR. Mr. Speaker, on Friday, March 3, the Select Committee on Aging, represented by Congressmen MIKE BLOUIN and DAVE EVANS, held field hearings in my district to gather testimony regarding the Older Americans Act. I participated in these hearings which, in my view, were quite productive. For the past few days I have inserted into the RECORD portions of the testimony we received. The ninth section follows:

BUNTING FRIENDSHIP FREEDOM HOUSE, INC.,
Darby, Pa.

THE HOUSE SELECT COMMITTEE ON AGING

The Bunting Friendship Freedom House, Inc., would like to go on record as stating that the Government is to be complimented for at least recognizing the plight of its older Americans. We think it has been a long time coming and even now, we have only scratched the surface. Even though we are providing health screening, socialization, recreation, nutrious meals, nutrition information and lawyers for the writing of wills for some people, how about the thousands we are not reaching; some who are stored away in nursing and/or boarding homes, unfit for human habitation? There should be some mechanism set up, to monitor these homes. All of these homes can't be bad but, the numbers are so great until it gives good homes a bad name. I can testify to the condition and the deprivation of many of these places.

With additional funds, we would be able to have larger facilities to serve more people; we would be able to reach more shut-ins and home-bounds.

(MRS.) ETHEL G. SMILEY,
Executive Director.●

TAXES

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. O'BRIEN. Mr. Speaker, it is time that we talk common sense about the Carter administration's proposed tax cut. Similar to the old shell game where the pea appears under one shell and then disappears, the tax cut proposal is like a clever shell game. The closer you look at it, the trickier it appears.

If the tax cut goes forward, we will see a reduction in some taxes but an increase in others. If we consider the growing problem of inflation, the hard-working taxpayer will be the loser again.

This problem of the taxpayer and inflation has been highlighted in a recent book published by the Heritage Foundation: "Indexing the Inflationary Impact of Taxes: The Necessary Economic Reform" by Dr. Donald J. Senese. Dr. Senese describes how our present system allows the Federal Government to make a "profit" from inflation as the burden increases on the individual taxpayer:

Inflation has become a factor which every taxpayer must take into consideration in his everyday lifestyle. Some of the implications are obvious—notably that an individual's nominal or regular income must increase in order to continue to purchase the same goods and services. Most taxpayers are also aware that as they receive higher levels of income, they will have to pay higher rates of taxation. Yet, it is not as frequently recognized that as a person's income increases to match inflation, the person's tax burden increases still faster and thus income taxes take an increasingly larger share of the budget of the consumer taxpayer, even if real income remains constant or even declines. The taxpayer experiences the effects of an increased cost of living and a disproportionate increase in taxes as part of this increasing cost. Considering this major effect of inflation, a larger proportion of the national income has been switched from the private to the public sector through increased government revenues from tax collections.

The author suggests that we consider indexing our tax system in order to remove this "profit" from inflation for the Government bureaucrats.

The Carter administration's record on spending, on inflation, and on these tax cuts will leave the poor taxpayer worse off than ever. The individual will suffer and our whole economy will experience the result of this ill-conceived economic program. The ramifications of this program was well illustrated in two editorials which appeared in the Chicago Tribune (February 7, 1978): "The Dis-

appearing Tax Cut * * * And an Unintended Result." I urge my colleagues to study these editorials.

THE DISAPPEARING TAX CUT * * *

President Carter is selling his proposed tax cut as a benefit to all but the rich. If truth-in-advertising laws were applicable to presidential claims, Mr. Carter would be in trouble. His proposal would take money also from middle-income Americans and redistribute it to those with lower incomes.

The average American family had an income of about $17,000 in 1976. If that figure rises at the anticipated rate of inflation, it will pass $20,000 by 1979.

And as the accompanying table shows, the family of four with one wage earner earning $20,000 will be only $9 better off with Mr. Carter's tax "cut," taking into account both the income tax cut and the higher Social Security taxes that take effect in 1979, than without it. For incomes over $20,000, there will be a net loss.

What's more, that family's real income won't have changed in the four-year period; only its taxes will have increased. The family will actually have $511 less to spend than when it was earning $3,000 less.

For the many families of four where both husband and wife are working—and the number is growing steadily—the prospects are even more gloomy. They will be hit twice, by a double Social Security tax of $1,404 each and also by being pushed into a higher income tax bracket. If each earns $20,000 in 1979, their combined income and Social Security taxes will come to a staggering $9,000. That is more than $2,000 over their 1976 taxes [if they each earned $17,000] and $303 more than it would have been without the proposed tax cut.

True, some members of Congress such as Illinois' Rep. Abner Mikva are having second thoughts about the Social Security tax increase. They want to rescind part of it and shift some of the Social Security burden to general revenue funds. But this smacks of the "free lunch" approach. Congress has expanded Social Security benefits too fast in the past, and it can't pay for them by a juggling act. Somebody has to pay the taxes to provide the general revenue funds. And we'll give you one guess as to who will pay them.

If yours is a family of four with one working member, this is what you'll pay in 1979 under the Carter proposal and how it will differ from present rates. The only beneficiaries will be those in the lower middle income group earning no more than $20,000.

Wage income	Income tax	Social security	Total	Changes
$5,000	−300	306	6	+14
$10,000	134	613	747	−284
$15,000	1,072	919	1,991	−215
$20,000	1,910	1,226	3,136	−9
$25,000	2,830	1,404	4,234	+119
$30,000	3,910	1,404	5,314	+117
$40,000	6,630	1,404	8,034	+271
$50,000	9,870	1,404	11,274	+359
$100,000	29,470	1,404	30,874	+1,029

Source: U.S. Treasury, Office of Tax Analysis.

* * * AND AN UNINTENDED RESULT

A tax "cut" that leaves middle-income taxpayers subject to rates that are still oppressive, and that are aggravated by the upward "bracket-creeping" effect of inflation, may well be self-defeating.

Up to a point, steeply increasing tax rates may tend to make people work harder to compensate for the higher taxes; but there comes a point beyond which the share of every dollar of income that the government confiscates is so great that the employer or worker rebels.

If he is a home builder, he may not build and sell as many houses as he otherwise would; his leisure time might be worth more to him than any profit he might retain. The government thus loses the revenue from the houses not built. Society suffers through having not only fewer houses but also higher housing prices [demand exceeds supply] and fewer jobs in housing and related industries.

It matters little whether the government intended to use the revenue from those higher marginal tax rates to support higher government spending or to redistribute income. The long-term effect is the same: less revenue for either, lower productivity, and fewer jobs than if the government had lowered marginal tax rates and thereby collected taxes on the construction and sale of more houses.

In addition, experience has shown that when a taxpayer perceives the marginal tax rate as unacceptably higher for himself, he is tempted to find ways to cheat the tax collector. He might, for example, "dispense" with some employes by treating them as "subcontractors," and thus avoid Social Security taxes on those employes.

Furthermore, our homebuilder might employ as many carpenters as possible "off the books." He will pay them in unrecorded cash. And the carpenter pays neither his share of social security nor his income taxes; he is therefore willing to work for less than he otherwise might. In addition, he can collect unemployment compensation, since so far as the Internal Revenue Service and the Census Bureau know, he is unemployed.

As more people drop into the "secret economy" of unreported cash transactions, the government's losses grow. Economist Peter Gutmann of the City University of New York's Baruch College estimates that an amount equal to about 10 per cent of gross national product is now involved in this secret economy. With GNP expected to reach $2 trillion this year, such unreported and untaxed income could amount to a staggering $200 billion.

Prof. Guttman noted that historically as the tax burden has risen, so has the amount of currency in circulation compared with the amount of money in checking accounts.

He finds the rising ratio of cash especially curious when you consider the normal tendency to put more money into savings accounts as interest rates rise, and the huge growth in credit in credit-card buying and the introduction of automated bill payment. Why then are people holding so much cash? To "lubricate" the secret economy, he concludes.

Whatever the accuracy of Prof. Gutmann's estimates concerning the loss to federal, state, and local government treasuries through "off the books" transactions, the rising trend line of tax avoidance he sees is consistent with economic theory. Martin Anderson, senior fellow at the Hoover Institution of War, Revolution and Peace, notes that taxes of all kinds in the U.S. have grown from 25 per cent of net national product in 1950 to more than 35 per cent in 1970 and could exceed 40 per cent in 1980. Clearly, the "leading indicators" for the secret economy are bullish.●

WESTWAY: UNDERTAKING A TRAGIC MISTAKE

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. RICHMOND. Mr. Speaker, I have continuously voiced my opposition to the proposal known as Westway to reconstruct the West Side Highway in New York City. I believe the highway trust fund could be better utilized to revitalize and upgrade New York City's mass transportation bus and subway network.

Mr. Brian T. Ketcham, vice president and chief engineer of Citizens for Clean Air, Inc., recently echoed my conviction that the proposal to build Westway in its present interstate highway form would be a tragic mistake and a disservice to the residents of this city. Ketcham wrote a "viewpoint" article that appeared in the February 16 edition of Engineering News Report.

Mr. Speaker, I offer this article to my colleagues as further emphasis that the 1$ billion-plus price tag should instead be used to begin the task of reinvigorating New York City's deteriorating mass transit system:

WESTWAY WILL COMPOUND CITY'S PROBLEMS

In New York City these days, the promised land is made of spoil fill, concrete and greed. It's called Westway for short and its would-be builders and beneficiaries insist it is a kind of urban philosopher's stone that would change the base metal of the city's half-collapsed West Side Highway into federal gold.

They persistently promote it as the key to revitalizing not only lower Manhattan but the entire city. Only occasionally are they more forthright.

But Westway is misbegotten and badly planned for a number of reasons. It will further deteriorate New York City's air and water quality, disrupt the communities along its path, increase the city's already severe traffic problems, and create more fiscal dilemmas than it may alleviate. The fundamental problem is its Alice-in-Wonderland distortion of New York City's priorities.

Westway represents the worst corruption of the Highway Trust Fund and demonstrates how great the need is to dismantle this 20-year-old urban wrecking machine. The trust fund supplies virtually limitless funds to states and municipalities on a 90% federal/10% state basis. In New York, as elsewhere, this has been falsely interpreted to mean that Westway will be free to the city and its residents. This is untrue but the temptation of a 90/10 federal capital project ultimately costing several billion dollars is simply too great. In New York City, government and business interests have grabbed for it regardless of the social consequences.

Furthermore, there is currently no mechanism to fund transit project overruns as there is for highways. This disparity is an important reason why governments favor highways.

In the seven years the city has been agonizing over Westway it has raised transit fares twice, cut services by more than 12% and deferred so much essential physical maintenance that proper rehabilitation would cost about $10 billion in 1977 dollars, according to the New York City Transit Authority. The city has also accumulated a backlog of 2,300 miles of local and arterial roads which need replacement. This is more than 40% of its total mileage and this backlog is growing by more than 300 miles each year.

Trading in Westway will not by itself fill this capital need, but it would be a huge help, especially if the money were spent to repair subway track, signal systems, substations, collapsing local streets and the like. New York City can live without Westway but not without its subways, buses, streets and bridges—and they are all rapidly falling apart.

The business, government, union and media interests promoting Westway would have New Yorkers believe New York City can have everything, better public transit and Westway. But this is little more than calcu-

lated pandering to a sincere public desire for a decent city in which to live.

An example of the enormous wealth involved and its corrupting influence is the project's environmental impact statement (EIS) and the more than $16 million spent to produce and market it. This is almost twice as much as was spent for the EIS required to build the $10-billion Alaskan pipeline. Incredibly, the Westway EIS fails to adequately support its conclusion that the project is environmentally sound. The Environmental Protection Agency has ruled the plan unsound and the project has failed to secure a crucial indirect air pollution source permit despite lengthy hearings.

Nine-million dollars of the EIS budget was spent to create a high technology mathematical model for forecasting traffic and predicting air quality. This model obscures more than it reveals. Incomprehensible to any but its creators, it will spew forth on command air quality predictions through 1990 for any proposed highway configuration. The structure and capability of this model are the subject of considerable controversy and many experts believe it is useless as a predictive tool.

Westway has not only wreaked havoc with New York City's priorities but with the region's urban transportation planning process as well. The Westway struggle is testimony to the need for effective and continuous public participation in this planning process and the skills, funding and expertise public participants need access to in order to be effective.

Unless independent funding becomes available for such work, we will continue to have Westways in New York City and elsewhere. The wastage of the confrontations such projects breed can be reduced through substantive—not manipulated—public involvement. In transportation planning this means independent, funded technical representation of a kind which does not now exist in the New York City metropolitan area.

Other cities, most notably Boston, have very successfully traded in unnecessary highways for necessary transit money that was then spent to make life a little better for far more people. New York City can do this too but not if its elected leaders insist on placing private interests above the public welfare and proceeding with this disaster.

Should this happen Washington will be justified in ignoring New York City's pleas for yet more money based on the performance of its leadership. Building Westway instead of dealing with the city's incredible transit capital needs borders on the irresponsible and is a sacrifice the people of New York City should not be expected to make.●

A GOODBYE MAN SPEAKS OUT

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, a constituent recently sent me an editorial from the magazine, Iron Age, entitled. "A Goodbye Man Speaks Out." The editorial concerns the candid and courageous retirement statement of our colleague from New York (Mr. PIKE). At this point in the RECORD I include the full text of the Iron Age editorial written by its editor-in-chief, Gene Beaudet. The editorial follows:

A GOODBYE MAN SPEAKS OUT

Otis G. Pike is retiring from the U.S. Congress later this year. Rep. Pike is from New York State and, when he retires, will have served nine terms in the House.

That's a long time on the firing line in Washington. So it might be of interest to hear his views on how the government operates. Besides being highly experienced in Washington affairs, Mr. Pike is known to be a man who keeps a cool perspective and who is able to separate the wheat from the chaff on issues and arguments.

Well, in announcing his retirement from the Congress, Mr. Pike's Washington office had this to say: "He's tired of wasting his time on drivel."

And that's not all. As he headed into the snug-harbor security of political retirement, Mr. Pike, a Democrat, became suddenly apolitical.

"The wisdom of the ages," he said, "has not been secretly entrusted solely to Democrats. Both parties are indifferent to the national debt, the deficit or any obligation to pay our bills or balance our budget."

Hear, hear!

There's reflections on 18 years in the U.S. Congress. There's a moment of soaring truth.

This scalding indictment of drivel-obsessed and spendthrift government couldn't have come at a better time.

Just prior to Mr. Pike's quite pronouncements, the Administration proposed a new save-the-economy tax package where the most heated discussion centered on the idea to erase the tax writeoff on so-called "two martini" business luncheons. At the same time, a "cautious" and "conservative" government budget for fiscal year 1979 was outlined—with a deficit of "only" $61 billion.

Oh, there's more.

Right after the announcement of the "conservative" 1979 budget, the Treasury Dept. said it would ask Congress to raise the government debt ceiling by $112 billion. (This debt now totals $722 billion. At least this was true when I looked at the figures a few days ago.)

Treasury made the point that if it didn't get a $29 billion ceiling increase during the current fiscal period, it wouldn't be able to borrow more money and pay bills about to come due.

I know that economic theory says government budget deficits stimulate the economy. But I am wondering whether this theory has run into the law of diminishing returns. Maybe these huge deficits have reached the point where they now inhibit rather than stimulate the economy. Do they now draw more life-blood from the private economy than they put into it?

Don't forget, in the two calendar years preceding the worst of all postwar recessions in 1974–75, the Federal deficit was running at a "stimulating" rate of $1 billion per month.

Mr. Pike is right. The government red-ink tide is rising and the "drivel" right along with it. The number of pages in the Federal Register required to publish proposed regulations has been rising 25 percent per year.

All the Mr. Pikes in Congress should certainly be asking themselves what are they doing to turn the tide against deficits and drivel before they say goodbye.●

CRIME IN AMERICA

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for March 15, 1978, into the CONGRESSIONAL RECORD:

CRIME IN AMERICA

Violent street crime, the kind of crime most terrifying to the ordinary citizen, has gotten out of hand in America. Current surveys, including the letters and responses to questionnaires I receive from Ninth District residents, reveal concern that the laws are not being enforced strictly enough, that organized crime is being given a free hand and that little is being done to improve the criminal justice system.

There is more serious crime in the United States than in any other Western nation. Homicide has become so common in major cities that a boy born in an urban area today is more likely to die by murder than an American soldier in World War II was to die in combat. From 1960 to 1975, the number of serious crimes reported to the FBI increased an alarming 232%. The cost of crime in dollars reached $97 billion in 1975, an average of $450 for every man, woman and child. The figures are higher today than they were three years ago.

The causes of this "crime wave" are many, but some stand out. Part of the crime problem must be attributed to the large number of young adults in the population since they commit more crimes than do people in other age groups. Also, crime is the full-time job of 500,000 career criminals in the United States. These "businessmen" experience no recession and enjoy a high return on "investment". Another cause is the "immunity from prosecution" that many criminals appear to have. For only one crime in five is a suspect ever arrested, and only one crime in 20 is solved by conviction of the suspect on the charge originally placed against him. There is certainly a connection between social ills and rising crime. Although we may disagree that joblessness and bad race relations are the main causes of crime, we should not underestimate the detrimental effects they have. Some other factors are the high incidence of divorce and the growing number of families headed by two working parents. Because strong parental guidance is sometimes necessary if young people are to avoid criminal activity, many experts have linked these trends to crime

The role of the federal government in the war on crime is important, but the criminal law and its enforcement are primarily within the jurisdiction of state and local governments. Nonetheless, the federal government provides over $600 million per year through the Law Enforcement Assistance Administration to help meet the financial and technical needs of state and local police forces. Congress is rewriting the federal criminal code and is considering a program of compensation to victims of crime. It has shown a concern for the lives and families of law enforcement personnel by authorizing the payment of $50,000 to the surviving relatives of officers who are killed in the line of duty. It has tried to help states deal with juvenile delinquency and is considering legislation to provide severe penalties for persons convicted of involvement in child pornography. Finally, President Carter's recent appointment of Judge William Webster to head the FBI should bolster that agency by lifting it out of politics.

Since 1967 over $100 million has been spent on crime research. What has been learned? To begin, we have learned that government cannot wipe out crime since many factors which cause criminal behavior are beyond the reach of any government. We have also learned that more police do not necessarily mean less crime. The judges, prosecutors and jailers in many areas are unable to handle the volume of arrests that police already make. We have learned that not enough citizens cooperate with the criminal justice system. For example, the common practice of victims to wait 20 minutes or more before reporting a crime is a real problem. Finally,

we have learned that crime will not be swept away by a spectacular breakthrough. Our hope is that many small gains will add up to a major reduction in crime.

What should be done to stop crime? Of course, we should continue policies that have already cut down on crime or have mitigated its effects, such as prosecution of repeaters, federal support for state and local lawmen, expansion of the prison system and reduction of unemployment. But we should also make some changes. Given limited resources and the importance of the main tasks of the police, it may be preferable to have the police concentrate on serious crime. Also, the court system should be overhauled to ensure that quick, fair verdicts can be handed down and carried out. This means that trial procedures must not be delayed by continuances, that plea bargaining (which disposes of 90 percent of all cases) must take place in accordance with strict guidelines, that uneven sentencing must be eliminated, that the most up-to-date management techniques must be brought into courtrooms, and that the parole system must be reorganized to serve the interests of the community.

In the final analysis, we should be aware that anti-crime efforts to date have lacked an essential ingredient—citizen support. The professionals will do their part, but as private citizens we must do all we can to assist them. Beyond simple cooperation with the authorities, this means that we must become involved in community anti-crime groups, take strong measures to resist crime in the home and on the job, and make life as difficult as possible for the lawbreaker.●

INADEQUATE FUNDING LEVEL IN ADMINISTRATION'S BUDGET REQUEST FOR VETERANS' ADMINISTRATION MEDICAL PROGRAM

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. TEAGUE. Mr. Speaker, the national commander of the Disabled American Veterans has brought to my attention again the inadequate funding that the administration's fiscal year 1979 budget request contains for the Veterans' Administration's medical program. While I am very familiar with this inadequate funding level, I thought each Member would be interested in the remarks of the national commander, Oliver E. Meadows. This gentleman, in my opinion, is the most knowledgable individual in this country when it comes to veterans' benefits, services, and programs. The letter to me is as follows:

WASHINGTON, D.C., *March 8, 1978.*

Hon. OLIN E. TEAGUE,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN TEAGUE: As National Commander of the Disabled American Veterans, representing the interests of over 2.6 million service-connected disabled veterans, their dependents and survivors, I am compelled to bring to your attention certain glaring deficiencies contained in President Carter's Fiscal Year 1979 budget request for the Veterans Administration.

The Administration request contains inadequate proposed funding levels for several important veterans programs, however, my primary concern centers upon what I consider to be a callous, shameful disregard for the quality and scope of VA medical care benefits and services.

Clearly signifying the influence of OMB cost saving directives, the proposed cutbacks in VA medical care include:

The loss of 3,132 operating beds—equivalent to the closing of five 600 bed VA Hospitals—in 76 facilities located in 33 states. Loss to the system—$32.3 million resulting in the reduction of 1500 employees.

The elimination of medical research activities—2 Nobel Prize winners notwithstanding—in 64 hospitals located in 35 states. Loss to the system—$18.3 million resulting in the reduction of the 245 employees.

Abandonment of 35 construction projects located in 21 states—including a previously authorized 480 bed hospital in Camden, New Jersey. Loss to the system—$236.5 million in facility improvement funds.

All told, the Administration funding request falls some 408 million dollars short of assuring that our Nation's veterans continue to receive quality medical care. Unless these funds are restored by the Congress, such quality will drop to unacceptable levels in virtually every VA medical facility in every state in this country.

I urgently request your intercession in behalf of our veteran population. Specifically, I ask that you contact the House Budget and Appropriations Committees and urge that they provide this most necessary funding for our VA hospital system.

Thank you very much for your valuable assistance in this important matter.

Sincerely yours,

OLIVER E. MEADOWS,
National Commander.●

FUNDING FOR ADULT EDUCATION

HON. LOUIS FREY, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. FREY. Mr. Speaker, in a time which is characterized by rapid and momentous changes, the Nation's adults need improved access to appropriate learning opportunities; opportunities which will insure a higher quality of life by enabling them to develop skills and attitudes necessary to cope with social, economic, and technological change. Today, the House Appropriations Subcommittee on Labor-HEW begins hearings on education appropriations. Adequate funding for adult education is most essential.

At a recent conference on adult literacy, the needs of adults for relevant and pertinent earning opportunities were clearly outlined. Adults need opportunities to develop skills that will enable them to resolve increasingly complex life problems. They need experience that will enable them to be contributors to a free society rather than recipients of services such as welfare that are provided by that society. They need opportunities to develop an inquiring mind that is free of prejudice and is open to new ideas; opportunities to expand potential for economic and social contributions.

Let us assume that a literate person is one who can continue his or her education, can retain a job, and effectively contend with or adapt to most of the routine conditions of life and society—in other words, a person with a reasonably good high school education. Recent figures indicate that over 65 million American adults had less than a high school diploma. Of that 65 million, over 3 million adults participated in adult basic/high school completion programs across the country. The cost was roughly $107 per student per year. The Federal dollar contribution to this cost was approximately $5 per student—$5 toward the cost of assisting an adult to learn to read, to write, to obtain a high school credential.

For a moment, consider the lifetime earning capacity of the person with a high school diploma compared with that of a nongraduate. It was learned that a person with a high school credential can expect to earn approximately $78,000 more over his or her lifetime than a person without such a credential. This can represent the difference between owning one's home, being able to provide for one's family, or providing one's children with a good education.

It is clear that society benefits substantially from education in general and adult education in particular. Programs such as adult education are truly cost effective. They are far from being an economic parasite draining off national income into some nonproductive enterprise. Adult education can be a great equalizing force. Increased investment in adult education will raise the educational attainment levels of the entire population. Rather than being considered a cost to society, adult education expenditures are an investment in people. I look forward to the subcommittee appropriating the needed funds to continue adult education.●

THE 59TH ANNIVERSARY OF THE AMERICAN LEGION

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. ANNUNZIO. Mr. Speaker, 59 years ago, the American Legion pledged:

To promote peace and good will on earth; to safeguard and transmit to posterity the principles of justice, freedom and democracy, and to consecrate and sanctify our comradeship by our devotion to mutual helpfulness.

Today, the American Legion perpetuates its founding pledge in its perseverance "For God and Country." On March 15, Legionnaires celebrate the anniversary of their organization, which first met in Paris, France, on March 15, 1919, when delegates from the 1st American Expeditionary Force acknowledged that their responsibility to each other and to their country's citizens did not end with the signing of a treaty of peace.

The continuing dedication of the Legion to the adjustment of the veteran to civilian life, restoring his health and usefulness to society, maintaining his dignity, and assuring the welfare of the veteran's widow and children is celebrated with this commemoration of the Legion's founding. The American Legion has also performed outstanding service to the veterans of our wars with its sponsorship of the GI bill of rights and the Korean GI bill. By serving the vet-

eran in this way, the Legion serves all of America, for our men and women returning to American communities from military service face singular problems and pressures. In addition, financial aid to former servicemen and women increases their opportunities to contribute, in turn, to America.

While caring for veterans the Legion has not forgotten the veteran's children, for promoting child welfare legislation benefits all children and, therefore, the Nation. Youth programs like American Legion baseball have produced stars—Musial and Spahn—while encouraging youth in good sportsmanship. The American Legion sponsors thousands of Boy Scout units and offers a cash scholarship in the national high school oratorical contest. Such training and encouragement in American ideals multiplies the dividends resulting from these investments in our country's youth.

Mr. Speaker, an update of American Legion activities in 1977 follows:

In 1977 the American Legion continued the youth citizenship training programs it began in the 1930's. Some 30,000 boys in all parts of the country participated in the Legion's Boys State programs, at a cost to the Legion of $1.7 million. Two boys were selected at each state convention to participate in the Boys Nation convention held at the American University in Washington in July. The 19,000 girls who participated in the Girls State programs elected delegates to the Girls Nation convention, which was also held in Washington.

The American Legion, its Auxiliary, and the Eight and Forty service organization of the Auxiliary spent a record $14.6 million on children and youth activities in 1977.

American Legion National Commander Robert Charles Smith recently announced that the Legion is in the process of organizing what will be the first nationwide energy conservation program conducted by a grassroots, volunteer organization. The American Legion project takes a three-point approach, including energy conservation emergency meetings at local Legion posts, establishing local Legion posts as energy information clearing houses, and organizing a person-to-person "help your neighbor" campaign in conjunction with other local organizations to assist the elderly and disabled.

Mr. Speaker, after 59 years of vigorous service in America, it is clear that America still needs the American Legion with its continued and important civic service for those who served their Nation in war, and I am honored to join the members of the American Legion in celebrating the 59th anniversary of their proud traditions. I commend the Legionnaires of Illinois and our Nation for their dedication to the ideals of our American heritage, which they practice as a way of life, and extend my best wishes to them as they go forward in greater service to secure the blessings of liberty for us all.●

TITO AND HUMAN RIGHTS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. BIAGGI. Mr. Speaker, the recent visit to Washington by President Tito was perhaps more noteworthy for what was not accomplished than what was. Despite the pleadings of a prestigious group of 16 clergymen from 10 cities to the President, he failed to even discuss with President Tito the fate of some 6,000 to 10,000 political prisoners in Yugoslavia.

I consider this to be another extension of the selective application of this administration to its own human rights policy. To be effective it must be applied wherever and to whomever stands in violation of adherence to human rights standards. Yugoslavia's incarceration of political prisoners, and the deprivations of rights which occur in the prisons is worthy of our most serious concern and criticism.

Despite the fact that the President missed a golden opportunity to approach these issues with President Tito, I hope he will pursue this matter with Tito as soon as possible. We cannot overlook the fact that Yugoslavia incarcerates the highest percentage of political prisoners per population than any other Communist nation including the U.S.S.R.

I now wish to insert into the RECORD the text of the mailgram sent by the 16 clergymen including 3 from St. Cyril and Methodist Church and St. Raphael's Church. I also wish to acknowledge the work of a good friend Mr. Jules Somner who himself is an ardent advocate for human rights in Yugoslavia.

CLERGY PRESS PRESIDENT CARTER TO URGE MARSHAL TITO TO FREE 6,000 POLITICAL AND RELIGIOUS PRISONERS IN YUGO-SLAV JAILS

The text of a plea to President Jimmy Carter by 16 Clergy from ten cities, to urge Marshal Tito to release 6,000 political and religious prisoners in at least 15 Yugo-slav jails, was made public today (Monday, March 6th, 1978) as the 85-year-old Marshal Tito arrived in the nation's capital on a State visit.

(Verbatim mailgram follows:)

MARCH 1, 1978.

President JIMMY CARTER,
The White House,
Washington, D.C.

Mr. PRESIDENT: The State visit of Marshal Tito of Yugoslavia represents a unique golden opportunity to implement by deed your Administration's highly laudable goal to improve international human rights.

In about 15 Yugoslavian jails, there is estimated to be 6,000 political and religious prisoners; the New York Times claims there are 10,000. Yugoslavia incarcerates the highest percentage of political prisoners per population that any other Communist nation, including the Soviet Union and China.

We are not concerned primarily with the political and military ramifications of Marshal Tito's State visit but foremost with the notorious violations of human rights. In this short communication we cannot dwell at length about 600 Catholic priests who were murdered ruthlessly; the late Cardinal Stepinac, Archbishop of Zagreb sentenced to 16 years; the over 2,000 Catholic priests sentenced to from one to 20 years for their religious beliefs and worship; over 750,000 Croatian lay people who were slaughtered at the end of World War II and subsequent to the signing of the Geneva Peace Agreement; more than 25% of the entire Croatian population have fled from their homeland because of religious and political persecution, and these Croatian refugees are still plagued and are under surveillance by Yugoslavian secret police.

If you, Mr. President, speak out now on human rights to Marshal Tito, you will manifest to the nations of the world that our government is not merely engaged in rhetoric and propaganda but truly a policy of reaffirmation of human dignity.

We, the undersigned Clergymen, pray you, Mr. President, will use Marshal Tito's visit as the time to make your human rights declarations meaningful.

Reverend Mladen Culvalo, Reverend Leon Galic, Reverend Ivan Bradvica, St. Cyril and Methodist Church, New York, New York 10036.

Reverend Celestin Raguz, Reverend Dionizije Lasic, Reverend Kristijan Ban, Reverend Gracijan Raspudic, St. Anthony's Monastery, Chicago, Illinois.

Reverend Peter Topic, Croatian Catholic Mission, San Joe, California.

Reverend Stjepan Lackovic, Our Lady Queen of Croatian, La Cavana, New York.

Reverend Silvije Grubisic, Assumption Church, Stilton, Pennsylvania.

Reverend Domonic Coric, Spiritual Director of Croatian Catholic Union, Getty, Indiana.

Reverend Felix Diomartic, Reverend Janko Segaric, St. Anthony's Church, Los Angeles, California.

Reverend Anthony Cuvalo, St. Jerome Church, Detroit, Michigan.

Reverend Castimir Majic, President of the League of Croatian Priests for U.S. and Canada, Milwaukee, Wisconsin.

Reverend John Juricek, St. Peter and Paul Church, Omaha, Nebraska.●

ANNUAL LABOR MANAGEMENT DINNER DANCE

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. WAXMAN. Mr. Speaker, the American Trade Union Council for Israel Histadrut will hold its Annual Labor Management Dinner Dance on May 13, 1978, in Los Angeles. A most happy and appropriate choice of the person to be honored this year is Leonard Levy. Devoting almost half a century to the needs of working people, Leonard Levy will be celebrating his 75th birthday on the date of the event. The positions he has held, and is holding, and his community activities have certainly earned for him a place high on the list of those who work for the betterment of their fellow men and women. He is vice president of the Amalgamated Clothing and Textile Workers Union, AFL–CIO; manager of the West Coast Regional Joint Board and of the Southern California Joint Board, ACTMU. In addition, he has been a vice president of the Los Angeles County Federation of Labor since 1957, and a member of the executive board, Federacion Interamericana de Trabajadores de la Industrial Textil, Vestuario y Cuero (Interamerican Textile Leather and Garment Workers Federation), Bogota, Colombia, since 1976.

Leonard Levy was a member of the Los Angeles City Planning Commission from 1973 to 1977, vice president of the Greater Los Angeles Industrial Union Council, CIO from 1949 to 1957, and executive vice president, Retail, Wholesale and Department Store Employees Union from 1942 to 1949. One would assume

that Mr. Levy, constantly occupying positions which demand vastly more for their proper administration than an 8-hour day, would have little time or energy left for outside endeavors, but this has not been the case with Leonard Levy. His other activities include service as a member of the Regional Board of Directors, Jewish Labor Committee (1951–1971); member of the Administrative Board, Israel Histadrut, Los Angeles (1955–), vice chairman, Californians for Liberal Representation (1965–), member of the Board of Directors, Americans for Democratic Action, Southern California (1968–), Delegate to the Democratic Party National Convention in 1968 and 1972. He is a member of the Workmen's Circle, the National Association for the Advancement of Colored People, and of the American Civil Liberties Union.

Naturally, looking at this most impressive list of Leonard Levy's services, we are not surprised that he has received recognition for his work. His awards include the Meritorious Award for Distinguished Service Greater CIO Council (1949–1959); the Distinguished Service Award as chairman of the Education Committee, Los Angeles County Federation of Labor AFL–CIO (1963), and a citation for Distinguished Service to the Israel Histradrut Campaign (1966).

Now the American Trade Council for Israel Histadrut is carrying on a tradition by honoring Leonard Levy once again. His wife, Sandra, and his two children will, we know, be sharing with all of his many friends the pleasure of his being honored. I ask the Members to join with me in congratulations to Leonard Levy on his 75th birthday celebration.●

INVOLUNTARY CONVERSION OF SPECIAL USE VALUATION PROPERTY IN ESTATE TAXES

HON. MARTHA KEYS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Ms. KEYS. Mr. Speaker, I am today introducing a bill which would revise the income and estate tax treatment of property which has been "involuntarily converted" after an election has been made to use the new special use valuation rules. In my own State of Kansas, many farmers have been forced to sell all or a portion of their family farms for Federal dam or reservoir projects. These condemnations and other involuntary conversions have subjected farmers to unintentionally harsh taxation under the new estate tax law. My bill would remedy that situation.

The 1976 act provided generally that certain real property used in farming or in another closely held business could be valued by reference to its current use, rather than its highest and best use. This special use valuation can provide significant reductions in estate taxes for estates in which a large proportion of the value is attributable to real property used in farming or in another closely held business.

To insure that the property continued to be used for farming or for other closely held business use, a recapture rule was provided. In general, this rule results in recapture of the estate tax benefit of the special valuation if the heirs dispose of the property or change its use within 15 years of the death of the descendant (or, if earlier prior to the death of the qualified heir). The purpose of this recapture rule is to prevent the heirs from getting a windfall by having the property valued for a special use but, obtaining the highest and best use value by sale or change of use.

This recapture appears to be unnecessarily harsh in cases where the property is involuntarily converted during the recapture period. Consequently, this bill would provide that where an involuntary conversion of qualified real property takes place, no recapture of the estate tax benefit will occur if the property is replaced by other real property of at least equal value to be used for the same use. Also, if the qualified property is replaced by property of lesser value, the recapture will apply only in the proportion that the excess of the amount realized on the conversion over the amount reinvested bears to the amount realized on the conversion. These rules generally give the taxpayer the same time to make a qualified replacement as occurs under the income tax involuntary conversion rules—namely, 2 years from the date of the conversion.

The 1976 act also added provisions which generally require that property acquired from a decedent takes a carryover basis in the hands of an heir. This basis is generally determined by reference to the decedent's basis with several adjustments. One of these adjustments is for the estate tax attributable to appreciation in the property. However, the 1976 act does not provide for an adjustment to basis for the recapture tax of the special use valuation. Since the purpose of this recapture tax is, in general, to place the taxpayer in the same position as if special use valuation had not been elected, it seems inequitable not to have this tax increase the property's basis. Consequently, the bill further provides that a basis increase is to be made in cases where:

First, the basis is determined by reference to the decedent's basis;

Second, the property is involuntarily converted; and

Third, a recapture tax is imposed because of the conversion. This basis increase is computed in the same manner as if the recapture tax were an estate tax imposed on the estate that had elected special use valuation.

Furthermore, to allow the Internal Revenue Service to have adequate time to determine whether property has been replaced, the statute of limitations upon the assessment of the recapture tax is conformed to the statute of limitations with respect to the income tax in the case of involuntary conversions.

Since this bill is intended to correct a technical oversight in the 1976 act, it would apply to transfers of property occurring after December 31, 1976.●

AUTOMATED PHONE-DIALING BAN APPROVED BY THE MARYLAND HOUSE

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. STEERS. Mr. Speaker, the Maryland House of Delegates recently voted to prohibit the use of computerized dialing machines in the State. I applaud this action which will go far to protect the citizens of Maryland from invasions of privacy by computerized phone calls.

I feel that the Maryland House action indicates that the issue of telephone privacy is one of great concern to many individuals. I am presently cosponsoring a bill offered by my distinguished colleague, the gentleman from Wisconsin (Mr. ASPIN), entitled "The Telephone Privacy Act of 1977."

I hope that this bill will receive committee attention and subsequent action by the entire House, since it will limit the ability of computerized telephone operations to solicit large numbers of potential customers. As telecommunications equipment becomes more sophisticated, the need for such legislation becomes more urgent.

This bill also addresses the question of all telephone solicitation. I think that there is need for congressional review of this question. In some cases I feel that telephone solicitation should be allowed. Much insurance work is done by the phone. I have doubts as to whether this specific line of work could function effectively with a prohibition on unsolicited telephone sales. Elderly and handicapped people pursue telephone work as a necessary means of employment, and this question should also receive full consideration.

I would like to insert into the RECORD at this point an article that appeared in the Washington Post on Wednesday, March 1:

AUTOMATED PHONE-DIALING BAN APPROVED BY MARYLAND HOUSE

(By Felicity Barringer)

ANNAPOLIS.—Legislation that would shield Maryland residents from recorded telephone sales pitches won overwhelming approval yesterday as the House of Delegates voted 119 to 8 to prohibit the use of computerized dialing machines in the state.

The same measure won approval from the Senate earlier this month, but the Senators now must approve two technical amendments added by the House before the measure can be signed into law by acting Gov. Blair Lee III.

The automated "megadial" system that would be abolished under this legislation can be programmed to run through, in numerical order, all the phone numbers on a given phone exchange, before it moves on to the numbers on the next exchange.

Opponents of the legislation, which was proposed by Sen. C. Lawrence Wiser (D-Montgomery), argued that a dialing system operating from across state lines could bombard Maryland residents with as many calls as one operating inside the state—and the out-of-state machine could not be touched by the proposed law.

In any case, Chesapeake & Potomac Telephone Co. lobbyist W. Orville Wright argued at a committee hearing earlier this year, the megadial machines have achieved a 50 percent success rate in some areas—half of the calls made resulted in sales.

Testimony at a committee hearing on banning megadial early in the legislative session indicated that the robot caller also has been used to send commercial greetings and to dun people electronically for unpaid bills.

"You could be swamped with 10, 20 or even 30 recorded calls in a day," Del. Marilyn Goldwater (D-Montgomery) predicted at that hearing. "You could lose control of your own telephone in your own home," added Goldwater, who had proposed similar legislation banning megadial.

Although the bill passed by the House prohibits the robot dialing machines in the state, it sets up no penalties for those who violate this law.

House approval yesterday came with no discussion or debate on the issue. The amendments that were added to the bill were designed to insure that pushbutton dialing machines, as well as actual dialing machines, would be covered by the ban.

"It really boggles the mind, the number of junk phone calls one machine can turn out," Goldwater said at the committee hearing.

At a separate hearing, Montgomery Democratic delegate Ida Ruben recounted her own experience with megadial; the robot computer called when she was not at home, so her own recorded telephone answering machine ended up taking the recorded message.

Sen. Wiser, sponsor of the legislation that passed the House yesterday, could not be reached for comment on his bill's apparent success. Wiser had introduced similar legislation during the 1977 General Assembly session. He got it through the Senate, but it died without getting out of the House Environmental Matters committee before the end of the session.●

FED CHAIRMAN MILLER SPEAKS UP FOR CONSUMERS

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. ST GERMAIN. Mr. Speaker, while most of the public attention has been on monetary policy, the new Federal Reserve Chairman G. William Miller has been active in other areas of Federal Reserve policy—the areas most directly affecting the American consumers.

I am happy to note that the news reports emanating from last week's Federal Reserve Board meeting plainly indicate that Chairman Miller is coming down on the side of the consumer, in the Federal Reserve's rulemaking under the various consumer credit laws.

Mr. Speaker, I hope that the new Chairman will continue to maintain this proconsumer stance even though at times he will find himself in a minority position on a Board that has never been regarded as a consumer advocate. Consumer organizations have long been concerned about the administration of the consumer credit laws given the Federal Reserve by the Congress, and they should be encouraged by Chairman Miller's first moves in this arena.

Mr. Speaker, I place in the RECORD a copy of an article from the March 14 issue of the American Banker with headline: "Miller Speaks Up for Consumers at His First Meeting as Chairman with Mixed Results":

MILLER SPEAKS UP FOR CONSUMERS AT HIS FIRST MEETING AS CHAIRMAN WITH MIXED RESULTS

(By Phil Battey)

WASHINGTON.—G. William Miller spoke up for the consumer Monday as he presided for the first time as chairman of the Federal Reserve Board.

There were three main issues on the agenda with a consumerist theme. During the often spirited exchange with four other Board members, chairman Miller lost one round, served as referee on a second and won the third.

The first proposal dealt with a change in equal credit opportunity rules on "adverse action"—a denial of credit. The change was designed to settle the question of whether point-of-sale or loan denials, especially credit card transactions, fell under a notification provision.

Under that provision, when "adverse action" occurs, a creditor must notify an applicant in writing of the specific reasons for denial within 30 days or provide notice of the consumer's right to an explanation.

Three Governors, J. Charles Partee, Philip C. Jackson Sr. and Philip E. Coldwell, favored a Fed staff recommendation that would bring the transactions under the rules if the transactions result in an unfavorable change in the terms of an account, a termination of an account or a denial of an application to increase the credit limit in line with the creditor's practices.

Henry C. Wallich suggested leaving the rules as they were, saying, "The net result of adding regulation in this field is always anticompetitive.

But chairman Miller supported a proposal written by the Federal Trade Commission that defined three new exceptions to the rule, if the Board could make additions in the future.

While noting he did not have the Governor's background on the issue, Mr. Miller said, "Consumers should know for whatever reason people are denied credit."

Terming the Fed recommendation "A" and the FTC proposal "B," Mr. Miller called for a vote—and lost.

"We have four As and one 3-plus," Mr. Miller quipped.

A second proposal, permitting creditors to ask for credit application information for marketing purposes that would otherwise be prohibited by equal credit opportunity rules, ended in a compromise. The Board allowed a company currently following the practice, a door-to-door religious book company, to continue, but barred such questioning in the future.

A third proposal was aimed at ex- * * * rule on contract recission to open-ended credit plans. The current rule provides that in any closed-ended credit transaction in which a security interest is taken in a consumers' principal residence, the consumer has three business days in which to rescind the transaction.

"I think we may be opening a market we don't want," Mr. Miller said as he sponsored a successful move to have the proposal returned to the staff for further study.

After the meeting, Mr. Miller said "It moved along quite well" and that he hoped to chair as many of the open meetings as possible. Mr. Miller's predecessor, Arthur F. Burns presided at open meetings rarely.●

PHILADELPHIA'S TESTIMONY ON TUITION TAX CREDITS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. EILBERG. Mr. Speaker, just recently I had the pleasure of greeting leaders of the board of education of the Archdiocese of Philadelphia prior to their testimony on legislation to provide much needed tax relief to parents who bear the burden of tuition payments.

Nearly 100 parents from the archdiocese came to Washington to demonstrate their concern that we act on this legislation. Heading the delegation of parents were Msgr. Francis B. Schulte, superintendent for schools, and Vincent P. Haley, president of the board of education.

Monsignor Schulte and Mr. Haley testified in an eloquent and thoughtful manner before the House Ways and Means Committee on the plight of parents struggling to keep up with taxes, inflation, and tuition payments. I commend their testimony to the attention of those of my collegues who are not yet convinced that the "freedom of choice" which parents are supposed to enjoy in selecting schools for their children is being rapidly eroded by our failure to provide tax relief to those parents who choose nonpublic those parents who choose nonpublic schools:

STATEMENT OF MSGR. FRANCIS B. SCHULTE BEFORE THE WAYS AND MEANS COMMITTEE OF THE HOUSE OF REPRSENTATIVES, CONGRESS OF THE UNITED STATES, FEBRUARY 15, 1978

My name is Francis B. Schulte. I am Superintendent of Schools for the Archdiocese of Philadelphia, which embraces the city and four surrounding counties. It is a typical urban Catholic school setting: inner city—poor schools minority-group children, many non-Catholic children; outer city—working-class parents, heavy mortgages, heavy taxes; suburban—the same heavy taxes and heavy mortgages, with pockets of poverty in the towns; and rural-farmers, migrant workers, children whose first language is not English.

One hundred and eighty-five thousand children attend 337 Catholic schools in our Archdiocese alone, with 100,000 in the city and 85,000 without. We have the seventh largest aggregation of schools in the country, including public school systems.

I offer you these statistics to make clear the frame of reference and experience from which I speak. There are twenty other similar big-city Catholic school situations around the country, varying only in size.

I want to begin by thanking two of your members, Congressman Schulze and Congressman Lederer, for encouraging me to come here today. I am also gratified by the support of other legislators from our area, of both parties.

Nevertheless, some of you may be puzzled by my presence here today, since the matter at issue is one of tax benefits to parents, not to aid legislation for schools.

Indeed, many leaders of religious schools hesitate to appear here for fear of confus-

ing the real issue; whether, when parents exercise their free choice in the education of their children, public policy should encourage such freedom by offsetting the growing financial burden of parents through restoring a portion of their tax dollar to them.

I have chosen to present my views on an issue affecting parents' rights, because I see those rights brushed aside in some of the statements and testimony concerning tuition tax credits. Also, parents of Catholic school students see their Superintendent in a leadership role, and wonder whether he cares enough about parents' rights to be distressed at the way these rights can be ignored so readily by certain public officials.

Let me answer that concern: I do care, and I am distressed—perhaps outraged is a better word. And so, I appear before you today. However, to emphasize the real issue—parents rights—I am accompanied here today with a delegation of parents with children in our schools. They represent 100,000 other parents at home in the Philadelphia area.

I shall not speak of the "aid to schools" issue at all. The United States Supreme Court has effectively closed the door on significant direct aid to religious schools.

Nor shall I speak to the constitutional issue as it may or may not affect tax credit legislation. You will undoubtedly hear at length from experts on this matter, and so I shall spare you my non-lawyer reflections. I shall simply say that I would be most surprised if, at the end of that kind of testimony, any clear-cut answers have come your way.

I shall, then, focus my attention on the public policy issue I raised before: Is tax relief for tuition good for our nation and its people? Is it the just thing to do for parents?

As you know, in our country one child in ten of elementary-secondary school age attends non-public school. Only a small percentage of these children are the children of the rich. It is a distortion of the facts to present the potential beneficiaries of this proposed legislation as anything other than what they largely are: middle-class and hard-working poor. It is likewise a distortion to misrepresent their reasons for choosing non-public schools, particularly religious schools. Our parents are not fleeing *from* the real or imagined problems of their local public schools so much as they are attracted to something positive—a value-centered quality education.

The schools I am describing have historically been largely Catholic. That is changing, as more and more Protestant and Jewish parents choose Protestant and Jewish religious schools for their children. In Pennsylvania alone, for instance, a hundred day schools under Protestant auspices have opened in the last year alone.

Clearly there are now increasing numbers of parents who believe that their children are more likely to become better persons and better citizens if their education is value-centered, indeed specifically religious. They take seriously their supposed right to choose the education of their children. Yet they find this right meaningless because many of them cannot afford it. Many of these parents feel strangled by the cycle of inflation, ever-rising taxes, and tuition. These people are typical of the backbone of our country throughout its history—hard-working, God-fearing, devoted to their children and to their country. Not rich people. No, middle-class and hard-working poor.

The question, then, is this: Should the public policy of our nation be sending such parents a clear signal that the nation respects what they are and what they do for this country, that it recognizes that choice of education for children is a parental right, and responsibility, and that rendering that right real is a function of good government?

To ignore the plight of these parents is to invite the outcome described by David Hume in his treatise "On Taxes": "Exorbitant taxes, like extreme necessity, destroy industry by producing despair". These parents are the principal objects of each new tax imposed by government at every level; they are the chief victims of inflation; they respond with hope to pledges of aid for the education of their children; and they are filled with despair and anger when public policy seems to hurt rather than help their children, the most precious possession of their lives.

Is it too rhetorical to say that this is what is happening to the American dream today? And remember that these are the people who have been paying the bills to solve the social problems of our society, which they had no part in creating.

I plead with you not to listen to those who tell these citizens that they will have to wait, that there are more important priorities, or that college relief must come first. See for what they are the transparent efforts to placate one set of parents—a portion of these with children in college—and to ignore the plight of parents with children in elementary and secondary schools. Waiting is cold comfort for the drowning man, particularly when his plea not to be drowned is interpreted as the seeking of some kind of unfair advantage. And this is the plight of the parent awash in taxes and inflation, and tuition bills. And see through the argument that the parent's school will profit from this legislation, when it too is barely afloat and must of necessity hold the line on tuition to be accessible to the parents that it serves.

And don't be a party to pledges of improved ESEA benefits offered as a sop to such parents. Such a parent knows that, after thirteen years, Health, Education, and Welfare is only now getting the first benefits to eligible non-public school students in several of our states; he knows how limited the number of beneficiaries of that law are; and that ESEA will not help his burden of tuition and taxation.

But I am not here primarily to discuss the difficulties of existing legislation. It is enough to say that there is nothing currently on the books to relieve the burden of the tax-paying, tax-strangled parent, and it's dishonest to offer improvements in present legislation as a real remedy.

I want to emphasize that I am well aware that most of these arguments are not being offered by Congress. But you are hearing these arguments from supposedly reasonable spokespersons.

Gentlemen and ladies, if the proposed legislation for tax credits helps those who really do not need it, then amend the law. And, if the law cannot be fully implemented at first, at least make a beginning.

I have no business playing on fears, either here or at home. But I must tell you that the anger and frustration of parents who choose non-public schools for reasons of conscience is real. They ask, Is public education so feeble that it will collapse if they are allowed to keep a small portion of their tax dollar? And is their anger unreasonable if they see bureaucratic smugness in the "Poppa knows best" attitude about how their tax dollar should be spent?

I reflected in my own words the sound that I hear again and again in my work—from the faithful citizen, loyal tax-payer, and conscientious parent. I believe it is the voice of justice denied, of pledges betrayed, of freedom mocked.

STATEMENT BY MR. VINCENT P. HALEY, PRESIDENT OF THE BOARD OF EDUCATION OF THE ARCHDIOCESE OF PHILADELPHIA, BEFORE THE WAYS AND MEANS COMMITTEE OF THE HOUSE OF REPRESENTATIVES, CONGRESS OF THE UNITED STATES, FEBRUARY 15, 1978

On behalf of the Board of Education of the Archdiocese of Philadelphia and as a representative of the parents who have children in Catholic Schools in the Archdiocese of Philadelphia, I endorse and support the tax credit legislation currently being considered by the Ways and Means Committee. I support it primarily because it is a matter of justice.

One of the most important fundamentals of our Constitution is freedom of choice. But the fact is that freedom of choice in education in this country is quite limited. Our politicians voice this philosophy. Our citizens revere it. We oppose monopolies, yet when it comes to the basic education of our most valuable assets, our children, we allow a monopoly to exist. Increasing domination of education by the public schools is creating an economically and academically inefficient educational monopoly. Competition among various school systems, like competition in every other field of human endeavor makes for quality products, and in the case of education, makes for academic excellence and economically efficient operations.

Critics of aid to non-public schools maintain that Americans do in fact have freedom of choice in education. However, if parents' exercise of that choice must be purchased at a prohibitive cost, while they still pay for the unused choice, it is not freedom.

From a financial justice viewpoint, Chief Justice Warren Burger in his dissenting opinion in the *Nyquist* case said, "It is no more than simple equity to grant partial relief to parents who support the public schools they do not use."

There has been some criticism that the tax credit legislation would be inflationary. This is an incredibly shortsighted view of economic realities. Initially, the tax credit legislation would cost the federal government more money; however, one would expect that the law would enable more students to remain in non-public schools and since non-public school costs are only about ⅓ those of public schools, it follows that there would be a sizable saving to the American public over the long term. For every student who transfers to the Philadlephia public school system from a non-public school, the taxpayers in our city would be assessed another $1800 for operational costs alone. If this legislation does not pass, you can expect progressively more students to enter the public school systems, necessitating greater government subsidies for the public schools.

Other critics claim that the tax credit legislation will aid the rich. This criticism is made by those ill-informed about the socio-economic class of the typical parent who sends his or her children to Catholic schools. The great majority of the students in the 296 Philadelphia Archdiocesan Catholic schools are from lower-to-middle income families, and our schools include 47 inner city schools which educate over 24,000 students. Also, the legislation does not apply to families that have an annual income of more than $18,000.

This situation is true not only in the Greater Philadelphia area. Recently the education writer for the Washington Post wrote of a remarkable Catholic grade school in the District of Columbia's ghetto. Our Lady of Perpetual Help School is located in Anacostia, and nearly all its pupils are black and from lower-income families. These pupils scored far higher in reading tests than pupils in Washington's public schools.

An article in the September 12, 1977 issue of New York magazine about Catholic schools in New York City's ghetto neighborhoods reported essentially the same situation. Of the 18,421 students in inner city New York Catholic schools, 78 percent were from minority groups. While these youngsters were behind the national average academically, they were far ahead of those in the New York public schools.

In New Jersey, the same article reports that pupils in Catholic Schools score 17 to

25 points higher in national tests than public school children, and that most of these Catholic Schools are in urban neighborhoods.

It is simply not true, therefore, that the tax credit legislation will primarily benefit the rich.

Finally, from the academic viewpoint, this tax relief legislation must be passed so that non-public schools can continue to offer a quality education to those who choose them. In addition to the educational advantages of Catholic schools cited above, Catholic schools stress a unique values system that cannot legally be offered in a public school. The same can be said about other non-public schools such as Hebrew, Lutheran, and certain traditional private schools. Many of our parents feel that it is through this value system that academic and personal excellency are acquired.

In summary, the tax credit legislation should be approved because it will help provide:

(1) academically better schools, both public and non-public, because they will all be competing to attract students;

(2) less overall cost to the taxpayer because more students will stay in non-public schools;

(3) happier students and more supportive taxayers because they will have true freedom of choice in education.●

INFLATION NOW ADMINISTRATION'S NO. 1 CONCERN

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. SARASIN. Mr. Speaker, today we are renewing our efforts to effect a national policy that will not only guarantee full employment but will also insure balanced growth for our economy.

Of paramount importance in this effort is controlling inflation. Its affects are devastating for all Americans, but are even more debilitating for those living on fixed incomes, for our welfare families and for our working poor. Without a concerted and determined policy designed to protect against inflation, our society might again become the victim of double-digit inflation.

An article in today's Washington Post indicates that the administration has come to realize the severity of the situation before us and the potential consequences it could have for all our Government policies, not just our efforts to curb unemployment. I recommend "Job Picture Improvement Causes Shift" to all my colleagues. The article follows:

JOB PICTURE IMPROVEMENT CAUSES SHIFT

(By Art Pine)

The Carter administration showed further signs yesterday that it now regards inflation—not unemployment—as the nation's number one economic problem.

In testimony before a Senate Finance subcommittee, Treasury Secretary W. Michael Blumenthal said policymakers now believe no economic problem is more important than controlling inflation.

He said the administration is committed to slowing the wage-price spiral.

Blumenthal's comments appeared to mark a shift from the administration's previous posture. Until only recently, officials have sought to portray inflation and unemployment as equally important problems—carefully avoiding emphasizing one over the other.

However, the job picture has been improving recently, with the unemployment rate declining to 6.1 percent of the work force in February, from 6.3 percent in January and 6.7 percent last fall.

As a result, policymakers have been shifting their posture on the inflation-vs.-unemployment issue. Last week, Blumenthal told a newspaper editors' meeting that "inflation is the chief threat to our continuing recovery." Yesterday, he repeated that view.

Blumenthal's remarks followed disclosure of a memo written by Barry Bosworth, director of the Council on Wage and Price Stability, complaining that the administration is not doing enough to combat inflation and suggesting added steps the president might take.

There was no immediate reaction to the Bosworth memorandum, but Treasury Department officials are said to be taking a dim view of one of his major proposals—to go along with a congressional rollback of last year's payroll tax increases.

Blumenthal made his comments at a hearing over a bill to raise the ceiling on the national debt. The present debt limit expires March 31, and the government cannot continue day-to-day borrowing without extended authority from Congress.

The House last week defeated a debt-ceiling measure in what was widely regarded as an election-year protest vote. The earlier version included a provision that would have scrapped the semiannual debt-ceiling approval ritual and made the limit part of the congressional budget process.

Yesterday, the House Ways and Means Committee approved a watered down substitute that would freeze the present debt limit of $752 billion until Aug. 1—right in the middle of the primary election campaigns most members will face in the summer.

In his testimony yesterday, Blumenthal acknowledged that the 37 per cent wage increase granted coal miners in the recent settlement will place some upward pressure on consumer prices, but insisted it would not be likely to set a pattern for other major industries.

He also once again described maintaining a sound dollar as another top priority of the administration. The U.S. and West Germany announced new joint moves to support the dollar on Monday, but the currency has continued to decline on the foreign exchange markets.●

TRANSPORTATION OF UNDOCUMENTED ALIENS

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. UDALL. Mr. Speaker, I am sure we are all aware of the problems Arizona and all of the States and communities along the boundary with Mexico are having with the flow of undocumented aliens into this country. We have a long, open border, hundreds of miles of desert and mountain, endless expanses of sand and rock. It is one of the most inhospitable, inaccessible areas of the continent, and the Border Patrol should be commended for the job it is doing under extremely unfavorable conditions. It is understaffed, operating on a tight budget. President Carter's proposals to deal with the problem of alien migration rightly call for a large increase in the size of the patrol.

The whole problem of immigration into the United States is a complex one, and I wonder if we will be able to solve it by enacting one large, comprehensive piece of legislation. We are dealing with large numbers of people, both U.S. citizens and foreign nationals, with the sovereign nation of Mexico, which is traditionally suspicious of interference in its internal affairs, with U.S. labor unions, with the constitutional rights of U.S. citizens, and with the economy of a large, growing, vibrant part of our Nation. So I think we have to take it slowly, examining each facet of the problem with care, selecting solutions with caution.

In one area, though, it is possible to solve, with a simple piece of legislation, one minor problem facing the Border Patrol which keeps it from operating at its fullest potential. A bill which I am introducing today will give the Border Patrol the authority to seize vessels, vehicles, and aircraft used to move aliens into the United States illegally, and would make those vehicles subject to forfeiture. This authority would be vested in the Attorney General, and in those officers he designates. All provision of law which apply to the seizure of vehicles for violations of customs law, such as laws regarding the disposition of such vehicles, would be extended to cover the seizure of vehicles used in violations of immigration law.

All too often, when Border Patrol agents apprehend aliens moving into the United States, the vehicles used in such violations are simply picked up by the owners. There is no law authorizing seizure of these vehicles, as there is one authorizing the seizure of vehicles used to transport drugs. The same vehicles are used over and over again, with little, if any risk to the owner. Only rarely, in perhaps in 20 percent of the cases, do the owners of vehicles drive them across the border—usually someone else is hired to do the dirty work.

This law was drafted in cooperation with various Federal agencies, including the Border Patrol based in Tucson, Ariz., and the office of the assistant U.S. attorney. The provisions of the bill reflect their suggestions, and include safeguards against unjust seizure.

I certainly hope we can get action on this bill, or on a similar bill, sometime this year. Mr. Herbert Walsh, chief Border Patrol agent for Arizona, has stated that this type of legislation, if enacted:

. . . would be a most valuable enforcement tool in our efforts to combat the smuggling and transportation of illegal aliens.

A copy of the bill follows:

H.R. —

A bill to provide for the seizure, forfeiture and disposition of vehicles used to illegally transport persons into the United States, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 274 of the Immigration and Nationality Act (8 U.S.C. 1324) is amended by redesignating subsection (b) as subsection (c) and adding a new subsection (b) as follows:

"(b)(1) Any vessel, vehicle, or aircraft which is used in the commission of a violation of subsection (a) shall be subject to seizure and forfeiture, except when:

(A) such conveyance is in use as a common carrier, and, in the case of a railway car or engine, the owner, or, in the case of any other conveyance, the owner, master, or other person in charge, was not, at the time of the alleged illegal act, a consenting party or privy thereto; or

(B) the alleged illegal act occurred while the conveyance was in the illegal possession of any person other than the owner as established by the criminal laws of the United States, or of any State.

"(2) Any conveyance subject to seizure under this section may be seized without a warrant, if:

(A) the seizure is incident to an arrest; or

(B) the Attorney General has probable cause to believe that the conveyance has been used in violation of subsection (a).

"(3) All provisions of law relating to the seizure, forfeiture, and disposition of vessels, vehicles, and aircraft for violations of customs law shall apply to violations of the provisions of this chapter, provided that:

(A) duties imposed on customs officers or other persons regarding the seizure of such conveyances under customs law shall apply to seizures carried out under the provisions of this section by such officers or persons authorized for that purpose by the Attorney General; and

(B) proceedings instituted under this subsection respecting vessels shall be subject to the Supplemental Rules of Certain Admiralty and aritime Claims."●

CRS STUDIES IMPACT OF COMMUTER VANPOOL PROGRAMS ON PUBLIC TRANSIT RIDERSHIP

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. EDGAR. Mr. Speaker, many of my colleagues know of my strong advocacy of commuter carpooling and vanpooling programs as a strategy for saving energy, reducing pollution, and relieving traffic congestion. Some organizations of the transportation community have expressed to me and other Members the fear that these programs could compete with public transportation systems. To measure the validity of these fears, I requested that the Congressional Research Service conduct an independent study of the degree to which vanpool programs compete with public transit. I received the following report from CRS just yesterday, and I would like to share it with my colleagues:

THE LIBRARY OF CONGRESS,
CONGRESSIONAL RESEARCH SERVICE,
Washington, D.C., March 13, 1978.

To: The Honorable Robert Edgar.
From: Economics Division.
Subject: Potential diversion of commuters from traditional transit systems to vanpools.

The advocacy of vanpooling as an attractive alternative to the automobile for home to work trips has periodically raised certain fears that vanpools also could divert a substantial number of passengers from existing transit systems.

While we can find no evidence of studies that have specifically addressed this question, enough general information exists to allow some preliminary conclusions to be drawn.

While the potential for competition exists under certain conditions, there is no evidence to date to indicate that vanpools draw significant numbers of riders from existing public transportation systems. Observable indications are that vanpool riders have been drawn almost exclusively from the ranks of single automobile occupants, and carpool riders. Unless vanpools in the future are developed in a manner totally different from those currently operating, there seems little likelihood that vanpools will effectively compete with traditional transit systems. Further, there are indications that in some circumstances the existence of vanpools in a region may prove beneficial to the overall operation of the existing transit system. Vanpools can serve as feeders into rapid rail systems, for example.

The economics of vanpooling have a considerable impact on these observations. A van purchased by a private group for use in commuting requires a considerable capital investment. New vans equipped for commuting cost somewhere in the neighborhood of $9,000 to $10,000. Fleet discounts, if available, could reduce this cost per unit to some degree. In an article entitled "Commuter Van Programs—An Assessment," the authors make the following observation:

"Since for most vanpooling arrangements, the purchase price and other fixed costs of the van are recovered from fares, costs per mile over shorter distances are relatively higher than for longer trips. A 10 mile round trip costs about $0.088 per person per mile, a 20 mile round trip, about $0.05 per person per mile, and a 60-mile round trip, less than $0.026 per person per mile." [1]

(These amounts are meant to be representative of the relative levels of costs. Given the forces of inflation, the actual costs today would be higher. Costs will also vary with the number of riders, of course.)

Public transit, where available, offers the rider lower costs per mile due to its heavily subsidized nature. Furthermore, it is unusual for traditional transit services, outside of the largest metropolitan areas, to extend for distances of more than 10 to 15 miles from the central business district (CBD). It is beyond these distances where the van becomes most efficient.

For those seeking a more eonomic alternative to the private automobile for a short commute, public transit should win out over vanpools. Those commuters not primarily concerned with cost will, in all likelihood, opt for the private automobile for both long and short trips.

There are other factors that would tend to mitigate against extensive diversion of riders from transit. Vanpools seem most attractive where all of the riders have the same work destination, and live in reasonably close proximity to one another. If the vanpool takes more than 10 to 15 minutes out of its route to pick up or discharge riders, its potential advantage over a well-operated transit system, from a time standpoint, probably will be mitigated.

To date, most known vanpool operations appear to serve employment centers located either in suburban areas or in urban areas lacking in public transportation. In many cases these vanpool operations are financially subsidized by an employer, the most commonly cited example being that of the 3M Company in St. Paul, Minnesota. While 3M is located in an urban area, it is not served by any viable public system. The 3M example has been largely followed by other firms establishing vanpools around the country.

Demonstration vanpool programs that are supported by grants from the Urban Mass Transportation Administration (UMTA) have been designed specifically not to compete with existing transit systems. There are two reasons for this. Frst, Federal vanpool programs are initiated with the intent of reducing both traffic congestion and air pollution, and for promoting energy conservation. As transit serves these same goals, creation of a competing transportation service could well hinder such efforts. The second reason is that Section 13(c) of the Urban Mass Transportation Act of 1964 (P.L. 88-365) as amended, prohibits use of assistance funds where arrangements are not made to protect the interests of current transit employees. Federal vanpool programs to date have been estabilshed with great attention to protecting existing labor arrangements.

Of the four currently operating Federal vanpool demonstration programs, the one sponsored by the Golden Gate Bridge, Highway and Transportation District is unique in regard to transit. It has been theorized (and is being tested in this case) that an efficient vanpool operation could help transsit operators by reducing some of the peak demand on an existing bus system. This relieves the necessity for additional capital investment and operating expense solely to meet peak hour requirements. One of the original objectives of the Golden Gate project was to reduce the peak demand that has led to overcrowding on the existing bus system.

While the results of the program have not yet been determined, indications are that the vanpool program's riders are not coming from the ranks of transit users. Rather, vanpool users are attracted either from the driver-only private automobile or from car pools. Bus ridership does not appear to be affected, even during peak hours. This observed result tends to support the position that vanpools and public transit systems operate in different markets.

The Federal Highway Administration (FHWA), which also provides certain financial support to vanpool projects initiated by local authorities, also tries to avoid competition with existing transit systems. Like UMTA, FHWA has not conducted any studies detailing the effects of vanpools on existing transit systems.

The American Public Transit Association (APTA) which represents the interests of most major transit operators has taken a position calling for the integration of para-transit services, such as vanpooling, with conventional transit operations. To reduce the likelihood of conflict, APTA has called for further study in the area and suggested that the transit authority in a given urban area is the appropriate agency through which the integration of para-transit services be accomplished.[2]

The potential for conflict between vanpooling and conventional transit is not likely to be realized unless an extensive vanpool system is established which serves the same employment and residential sections as existing transit. The success of vanpooling in such an instance would seem to depend on the costs of the service to the rider, the time differential, and the comfort-convenience factor of the service. Where such a conflict might occur, close examination of the results would be required before the level of diversion could be determined. Depending on the viability of the transit service provided, it is possible that the vanpooling arrangement may be the preferred mode of transit for the trip.

In summary, to date there has been little observable conflict between vanpools and conventional transit. Due to this lack of conflict there has been a very limited amount of study on this subject. The best informa-

Analyst in Transportation.

INTERNATIONAL COOPERATION PRODUCES THE F-16 FIGHTER—AND MUCH MORE

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. WRIGHT. Mr. Speaker, when the United States joined four of its European allies in a memorandum of understanding 3 years ago, the result was not just an agreement to deploy a new and superior combat fighter aircraft, the F-16, but the start of a new era of cooperation in the actual production of weapons systems.

In August of this year the first production model of the F-16 will be completed at the General Dynamics plant in Fort Worth. But soon thereafter other F16's will be rolling off assembly lines in Belgium and the Netherlands. And components will be in production at factories in Norway and Denmark.

This is the first time that coproduction of a common weapon system by various countries has been programed from the start.

Mr. Speaker, Airman magazine, published by the U.S. Air Force, carried an interesting article concerning this program in its February issue. I commend it to my colleagues who have given such strong support to this pioneering venture in international cooperation.

The article follows:

THE COMBAT CO-OP

(By S.M.Sgt. Harold Newcomb)

In August 1978 the first production F-16 air combat fighter will roll off the assembly line at the General Dynamics plant in Fort Worth.

A few months later another "first" F-16 will roll off another assembly line in Belgium, followed shortly thereafter by yet another F-16 produced in the Netherlands.

Those three aircraft will mark the first time that international coproduction of a common weapon system has been programmed from the beginning, thus allowing the F-16 to be introduced almost simultaneously into the frontline forces of five North Atlantic Treaty Organization allies, the U.S., Belgium, Denmark, Norway, and the Netherlands.

For the four European countries, the coproduction arrangement represents the difference between being customers of the U.S. and partners in what some have called the arms deal of the century.

But according to Col. George L. Monahan, Commander of the F-16 Contract Administrative Services/European System Program Office, Europe (CASEUR), headquartered in Brussels, this partnership portends even more important benefits in the future.

"There are at least four advantages to this coproduction arrangement," said Col. Monahan, whose job it is to oversee the complex multination contractor effort in Europe for the Air Force Contract Management Division, Air Force Systems Command, and the F-16 System Program Director at Wright-Patterson AFB, Ohio.

"There is the logistical advantage, because of the increased interoperability and commonality that is achieved in terms of support of the airplane. That includes the ability, for example, for one country to service another country's F-16. There is also the common procurement of spares and components, which allows some joint warehousing and stockpiling, thereby perhaps cutting down on the number of spare parts needed.

"There is also a military advantage, I believe," continued Col. Monahan. "I think that commonality in aircraft can lead to commonality in modes of employment, common tactics, and a better tactical effect.

"And there is certainly an economic advantage to all five countries involved in this coproduction. I think it's likely that in the future programs of this sort are going to be required and it's well that the United States gain experience in them now, not only in aircraft, but probably in many other endeavors as well.

"I'm no statesman," the colonel noted, "but politically I think there are additional advantages. In any effort where you have to cooperate closely with an ally, I think it brings you closer together and enables you to understand each other's problems. And the more you work together, the more you find out that the things that kept you apart in the past and the things you differ on were based more on fear of the unknown than anything else, and they don't really exist."

It was fear, of a sort, that led to the development of the F-16 in the first place. Soviet tactical air forces, which had been primarily defensive in concept and conventionally armed, are being reequipped with modern, dual-capable fighters and fighter-bombers having longer ranges, greater payloads, and the higher speeds needed for offensive operations.

What was needed was an aircraft to replace USAF's F-4 *Phantom* and the European air forces' F-104 *Starfighter* and F-100 *Super Sabre*—an aircraft that could outmaneuver Soviet fighters at altitudes up to 40,000 feet and at Mach speeds of 0.6 to 1.6. Warsaw Pact forces have large numbers of MiG-21J and MiG-23B air-to-air fighters that operate in the European theater. The replacement aircraft would also have to be able to intercept MiG-23s and Su-19 ground attack aircraft.

The McDonnell Douglas F-15 *Eagle*, designed as an air-superiority fighter, has a qualitative edge over any known fighter, but its cost of more than $15 million a copy, including its support equipment, could exceed Air Force procurement authorization if the aircraft were purchased in numbers considered adequate to counter the growing Soviet threat.

At less than half the cost of the F-15, the F-16 will replace older fighters in both battlefield air-superiority and air-to-surface roles, augment the F-15, and meet the need for a larger fighter force.

At only half the weight of the F-4, the F-16 has twice the combat range and a 50 percent better turning radius. It accelerates twice as rapidly, carries a payload comparable to the F-4 at double the distance in the surface attack mode and, with its superior avionics system, can deliver ordnance with greater accuracy.

Although less sophisticated than the F-15, the F-16 incorporates some advanced technological features:

The seat back angle is increased to 30 degrees from the usual 13 degrees and the heel line is raised to increase pilot "G" tolerance. This seat position permits easier rear viewing and aids in tracking enemy aircraft in a high "G" environment.

A side-stick controller comes complete with an armrest to assist the pilot in executing more precise combat maneuvers. Pilot hand pressure electronically signals actuators linked to the control surfaces.

The clear-view bubble canopy permits unobstructed all-round vision.

The automatic leading-edge maneuvering flaps, programmed to accommodate Mach speeds and various angles of attack, change wing camber to maintain optimum lift coefficients at high angles of attack. The benefits to maneuverability are higher maximum lift capability, lower drag at a given lift, improved direction stability, and significantly improved buffet characteristics.

These features, combined with the F-16's capabilities and comparatively low cost, appealed to Belgium, Denmark, Norway, and the Netherlands as well as the U.S. Air Force. However, the four European governments which had come together to find a suitable replacement for their fighter forces, didn't want to just buy an aircraft—they wanted to help build it.

A major objective of the participating European governments was to work out an agreement giving them the best aircraft while still maintaining viable domestic aerospace industries. This necessitated a coproduction agreement under which the countries would share in the production of their own aircraft, those built by the U.S., and those that might be sold to other foreign governments. This agreement would allow the countries to maintain a constant aerospace work force, profit by technology transfer, and recoup at least part of their initial investment.

Thus, in June 1975 the U.S. and the four European governments signed a historic memorandum of understanding, setting forth the general policies and principles agreed upon by the five countries for the operation and management of the cooperative program. Major aspects of the agreement are:

The U.S. government, subject to congressional authorization, plans to buy 1,388 F-16s at a total cost of about $14 billion.

The participating European countries plan to buy 306 with options to buy an additional 42 F-16s.

The European industrial participation plan is based on the four European countries producing 10 percent of the procurement cost for U.S. Air Force F-16s (up to 650 aircraft), 40 percent of the European aircraft, and 15 percent of any third country purchases.

Final airframe assembly lines for the European aircraft will be established in Belgium and the Netherlands. Belgium will also provide final assembly of the F100 engine for the European aircraft.

Advanced technology cooperation and transfer are important features of this program. All elements of the F-16 aircraft, with few exceptions, will be released to the participating European governments in a transfer of advanced technology.

While the basic principles of the coproduction program are outlined in the memorandum of understanding, a multinational fighter program steering committee, composed of one representative from each partner nation, is responsible for broad policy matters, advice, and counsel to the USAF System program Director (SPD). This steering committee meets periodically to monitor program performance and provide the necessary consultation and coordination on program decisions.

Day-to-day management of the program is the responsibility of the U.S. Air Force. Supervision of the actual production is done by the two prime contractors, General Dynamics Corporation and the Pratt & Whitney Division of United Technologies Corporation.

Of course, management of the massive program is the key to its eventual success. There are more than 3,000 suppliers and subcontractors involved on both sides of the Atlan-

tic and synchronizing their efforts is no small challenge.

"This is by far," said Brig. Gen. James A. Abrahamson, F–16 Program Director, "the most complex program in the Defense Department and probably the most complex in history. It is a tremendous management challenge."

Contributing to the complexities of the program are the differences in approach among the five coproducing countries. Chief among them are:

Philosophies of doing business.

Methods of auditing and cost accounting.

Procedures for tracking progress.

Industrial output efficiency.

Factors used to measure escalation and inflation.

Stability of currency.

It was for these reasons that the memorandum of understanding established an arrangement for European personnel to be integrated into F–16 program management, both at the systems program office at Wright-Patterson and the Brussels F–16 office.

It is Royal Danish Air Force Maj. Peter Adser-Larsen's job, for instance, to "insure that the Danish Air Force gets exactly the same F–16 as the U.S. Air Force."

According to Maj. Adser-Larsen, Denmark will buy F–16s to replace the F–100 Super Sabres currently in its inventory.

"Coproduction program decisions," said Adser-Larsen "are based on five country agreements. Although it has been somewhat time consuming to obtain such multinational decisions, we have so far discovered no significant disagreements."

The major explained that in establishing the Brussels F–16 office there was a need for writing manuals and procedures that addressed the coproduction program. "Coordination of these took some time, but the effort is now paying off because they were agreed upon beforehand as the way to identify problems at an early stage."

Aside from coming to an agreement on the multitude of details involved in the program, there is also an essential difference in the ways European companies and U.S. companies do business.

"European industry normally doesn't work more than one shift a day, except where expensive equipment needs to run continually to be economical," said Maj. Adser-Larsen. Another dominating factor is the work force. European factories want to keep a constant number in their work force to avoid short term hiring or laying off of people. To do this, the factories try to accept orders in such a way that they maintain the same work force.

Another significant difference between U.S. and European industry is in the area of vacations.

"In Europe," continued the Danish major, "entire factories are shut down once a year so that the complete work force can take vacations. It has proven to be an economical thing to do, because it creates less disruption in overall support due to the absence of a key person or support department. That type of policy, however, requires more detailed planning to cover continuing requirements during planned shutdown periods."

Business practices aside, however, the biggest challenge thus far in the coproduction program has been according to Col. Monahan, communications.

"First of all," said Col. Monahan, "you have the inherent differences in languages. English is the official language of the program, and all of the European people associated with the program speak English very well. Nevertheless, there's never such a thing as a one-to-one translation. Different words mean different things."

As an example, an American in the program a while back decided to call the program Project Peace Crusade. When some of the Europeans learned about it, they were livid. To an American, crusade means a holy cause. To a European it means war, murder, pillage, loot, and burn.

"So despite the fact that everybody speaks English, we still have communications problems," said Col. Monahan. "When you have five governments involved, you have a lot of people who have to get to know one another. There are a lot of channels of communication that have to be opened up, and once they're opened, they have to be maintained. There's a lot of rapport that has to be built across many different borders; there's a lot of trust that has to be gained. In the U.S., on a program such as this, you have communications problems just between Dayton, Ohio, and Washington, D.C. Here, it's not only Dayton and Washington, it's also Brussels, Copenhagen, Oslo, and The Hague."

On the plus side, Col. Monahan likes to point out that coproduction is not new to Europe.

"While this kind of a program is very new to the U.S. Air Force and somewhat new to U.S. industry, in Europe industry has been doing business this way for the last 20 to 30 years. We're dealing with specialists who know how to do their particular specialty very well, and they know how to work together, company by company. The big change, though, is that coproduction has been accomplished mostly within Europe, and not that much with American industry."

In the same vein, Capt. Jack Saunders, who serves in the Brussels office as the Norwegian program coordinator and as the engine coproduction focal point, added:

"We have a problem with people understanding that the American way isn't the only way. We continually have people coming over here, both from our Air Force and American industry, who, when they see something being done the European way, automatically assume that it must be the wrong way.

"Over the last year we've come a long way in establishing that there are other ways of getting things done; that there are other people besides Americans who have the qualifications to do them. Probably the most startling thing to Americans is the amount of modernization the Europeans have done, and the amount of real visible progress that has been made during the past year. The people from all five governments involved are very impressed with the amount of activity that has gone on so far, and the quality of that activity."

Despite problems presented by differences in languages, distance, and business practices, the coproduction program is "going amazingly smooth," according to Jerry Jones, Production Director in the General Dynamics F–16 European Program Office.

"It is taking us a little longer, probably because of the impatience of Americans," said Jones, "but it has been a learning process on both sides. The attitude of the coproducers has been very good. Their main objection has been that we send too many people to help them.

"Many of these companies have spent from $6 million to $10 million on new facilities, modernization, and new machine tools. They have committed themselves to the program, and added to their capability for future business."

The European air forces will start taking delivery of their F–16s in early 1979, and deliveries of the 348 aircraft—42 of which are optional—ordered so far will continue through 1985. Later requirements for the replacement of other aircraft and sales to other countries could extend coproduction, according to some estimates, for as long as 20 years.

That's a long time for the people of five countries to get to know one another. Something more than aircraft could come of it.●

THE 60TH ANNIVERSARY OF BYELORUSSIAN PROCLAMATION

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. EILBERG. Mr. Speaker, this year, on March 25, Americans of Byelorussian descent will celebrate the 60th anniversary of the proclamation of the Byelorussian Democratic Republic.

On this date in 1918, Byelorussia was declared a free state, only to be later absorbed by the Soviet Union. The people of Byelorussia, however, continue to preserve their own culture and language, despite a continuing Soviet policy of Russification.

Because of the cultural oppression of the Soviet Government, many Byelorussians have left their homeland and come to the United States. Today, there are an estimated 5 million Americans of Byelorussian descent.

To commemorate the 60th anniversary of the proclamation of the Byelorussian Democratic Republic, I offer for the RECORD the following summary of the activities of the Byelorussian-American Association, Inc., prepared by Anton Shukieloyts, chairman of the association:

SUMMARY OF ACTIVITIES

The leadership of the BAA, both at the national and local levels, in co-operation with the Council of the Byelorussian Democratic Republic (in Exile), the Byelorussian Autocephalic Orthodox Church, the Byelorussian Institute of Arts and Sciences, the Byelorussian-American Youth Organization, the editorial board of the monthly Bielarus, and other organizations and groups in the U.S.A., has been active in maintaining among its membership and in American society in general an awareness of the fact that the Byelorussian people in the Soviet Union have been systematically deprived of their human, civil, national, and religious rights.

Among the established ways of achieving this goal are the annual observances of Byelorussian Independence Day, commemorating the proclamation on March 25, 1918 of the Byelorussian Democratic Republic. Each year Byelorussian-Americans in New York, New Brunswick, Cleveland, Detroit, Chicago, Los Angeles, and other cities and towns of this country mark the 25th of March by prayer services and rallies. On these occasions Byelorussian-Americans have enjoyed steadfast support among their fellow citizens and public officials—in the White House, Congress, and in state and municipal houses of legislative and executive branches across the land.

This moral support has been received by Byelorussians in America (and in the Soviet Union) with great appreciation and gratitude; it has played a crucial role in keeping the flame of a Free Byelorussia burning amidst the winds of oppression and persecutions. This vital link between the two communities and the interconnectedness of both processes are evident from the massive reaction by official Soviet media to the activities of the BAA as well as from private communications regularly received from Byelorussia.

The year 1976, which marked America's Bicentennial, also marked the 58th anniversary of the proclamation of the Byelorussian Democratic Republic. The celebration of the latter merged as it were with the festivities of the former Activities of Byelorussian-American organizations in general constitute

a bridge connecting a free American with the land to which Byelorussian-Americans are bound by blood and tender memories. They are grateful, therefore, to all those who help maintain this bridge. Traditions of freedom in America nourish aspirations for freedom in Byelorussia.●

THE POLISH AMERICAN POLICE ASSOCIATION

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. FARY. Mr. Speaker, I would like to take this opportunity to bring to the attention of my fellow colleagues one of the most outstanding and respected organizations in Chicago—the Polish American Police Association.

This organization is comprised of police officers that are of Polish and Slavic ethnic origin. Initially, this body was composed of men and women who were full-time officers of the city of Chicago Police Department. However, their recognition soon spread to the outlying areas and membership requests from throughout Cook County began to come in. It was not long before police officers throughout the whole State of Illinois became aware of this organization's efforts to enhance the image of its members in police service, and soon their membership mushroomed and eventually became an officially chartered organization of the State of Illinois. They now have members in the adjoining States of Wisconsin and Indiana and one member is on active duty with the military police overseas.

The activities of the Polish American Police Association initially were limited to a summer picnic, a Christmas party for their children and the St. Joseph's Day celebration, but as membership and interest increased, so did the demand for more activities. The Man of the Year Award was later originated and coupled with awards that are presented to those member officers who have distinguished themselves in the field of law enforcement.

This association showed its compassionate nature when, in the summer of 1975, a disease known as encephalitis, caused the death of the aunt of one of its members. The Polish American Police Association reacted by conducting a telethon which raised over $6,000 for research to aid in combating this disease.

Although this organization engages in a multitude of social functions, it should be remembered that its members are, above all else, police officers. Theirs is a profession that demands so much, yet their efforts often go unrewarded and many times, unnoticed. Many people wonder what kind of man would become a police officer. Paul Harvey, a national radio commentator with the American Broadcasting System said it best in his essay:

WHAT IS A POLICEMAN MADE OF

Don't credit me with this mongrel prose; it has many parents; at least 420 thousand of them; Policemen.

A policeman is a composite of what all men are, a mingling of saint and sinner, dust and deity.

Culled statistics wave the fan over the stinkers, underscore instances of dishonesty and brutality because they are "news". What that really means is that they are exceptional, unusual, not commonplace.

Buried under the froth is the fact: Less than one-half of one-percent of policemen misfit that uniform.

That's a better average than you'd find among clergymen.

What is a policeman made of? He, of all men, is at once the most needed and the most unwanted.

He's a strangely nameless creature who is "Sir" to his face and "fuzz" behind his back.

He must be such a diplomat that he can settle differences between individuals so that each will think he won.

But . . .

If the policeman is neat, he's conceited; if he's careless, he's a bum.

If he's pleasant, he's a flirt; if he's not, he's a grouch.

He must make in an instant decisions which require months for a lawyer.

But . . .

If he hurries, he's careless; if he's deliberate, he's lazy.

He must be first to an accident and infallible with a diagnosis.

He must be able to start breathing, stop bleeding, tie splints and, above all be sure the victim goes home without a limp.

Or expect to be sued.

The police officer must know every gun, draw on the run and hit where it doesn't hurt.

He must be able to whip two men twice his size and half his age without damaging his uniform and without being "brutal."

If you hit him, he's a coward; if he hits you, he's a bully.

A policeman must know everything—and not tell.

He must know where all the sin is—and not partake.

The policeman must, from a single human hair, be able to describe the crime, the weapon and the criminal—and tell you where the criminal is hiding.

But . . .

If he catches the criminal, he's lucky; if he doesn't, he's a dunce.

If he gets promoted, he has political pull. If he doesn't, he's a dullard.

The policeman must chase bum leads to a dead end, stakeout ten nights to tag one witness who saw it happen—but refuses to remember.

He runs files and writes reports until his eyes ache to build a case against some felon who'll get dealed-out by a shameless shamus or an "honorable" who isn't.

The policeman must be a minister, a social worker, a diplomat, a tough guy and a gentleman.

And of course he'll have to be a genius . . .

For he'll have to feed a family on a policeman's salary.

On March 18, this organization will present its annual St. Joseph's Day Man of the Year and Awards Dinner Dance. This year, I have the privilege of being the recipient of this great honor, of which I am extremely grateful. Those who have previously been bestowed this coveted award include my fellow colleague from Illinois, Hon. DAN ROSTENKOWSKI and Thaddeus "Ted" Lechowicz, the majority leader in the Illinois State Legislature.

Mr. Speaker, the Polish American Police Association are proud of their heritage and their organization. They are proud of their men and women who daily do so much for the people they are entrusted to protect and serve. To be honored by such a noble organization as theirs, is an honor that I will truly cherish the rest of my life.●

DR. THOMAS O. JONES RETIRES FROM NATIONAL SCIENCE FOUNDATION

HON. GEORGE E. SHIPLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. SHIPLEY. Mr. Speaker, today March 15, Dr. Thomas O. Jones is retiring as Special Deputy Assistant Director for International Affairs with the National Science Foundation after more than 20 years of service.

It has been my privilege and pleasure to work with Dr. Jones during the past 20 years. Certainly his devotion and many contributions to the National Science Foundation will long be remembered and held in the highest regard. I think it is appropriate that we take note of the retirement of this splendid public servant.

For the RECORD I would like to insert the following biographical sketch of Dr. Thomas O. Jones as well as the commendation given Dr. Jones by the National Science Board:

COMMENDATION TO DR. THOMAS O. JONES

Whereas, Thomas Oswell Jones joined the National Science Foundation staff more than twenty years ago; and

Whereas, Dr. Jones' career prior to coming to the Foundation advanced our knowledge of Heavy Water and the chemical atomic weight of hydrogen; and

Whereas, Dr. Jones served twenty years as a skillful teacher at Haverford College, a small high quality liberal arts college focused on undergraduate education; and

Whereas, Dr. Jones, following his arrival at the Foundation, directed with special skill and dedication a team which made outstanding contributions in organizing, coordinating, and carrying out the mission of the U.S. Antarctic Research Program and which met and solved a broad range of scientific and administrative problems, many of which were unique and required the utmost finesse or ingenuity, including valuable counsel to the Department of State leading to the Antarctic Treaty, and as a key contributor to the successful representation of the United States to the Treaty and its continued development through biennial consultative meetings; and

Whereas, under his leadership the Antarctic Program made important scientific advances in marine biology, glaciology, upper atmosphere physics, and earth sciences; and

Whereas, Dr. Jones' contribution to the high reputation of the Nation's Antarctic Program has been immortalized through the naming of the Jones Mountain Group in his honor; and

Whereas, under his leadership, the U.S. Antarctic Research Program became a model activity in the field of international cooperative research; and

Whereas, while accompanying countless distinguished visitors, including many Members of the Congress, to the Antarctic, Dr. Jones provided clear and understandable descriptions of the scientific research, its importance, the unique aspects of research in the Antarctic, relations among the Treaty nations, the logistics of research in the Ant-

arctic, and the interrelationship between scientific research and logistics there; and

Whereas, Dr. Jones, as Director of the Division of Environmental Sciences helped lead the Foundation into greater involvement in programs relevant to the needs of our society; and

Whereas, Dr. Jones served with distinction as Deputy Assistant Director and Acting Assistant Director for National and International Programs and Special Deputy Assistant Director for International Affairs, including participation in developing efficient managerial and diplomatic agreements for establishing several astronomical observatories, especially at Cerro Tololo in the Southern Hemisphere; and

Whereas, Dr. Jones has demonstrated throughout his career a rare sense of program judgment, political awareness, and ability to communicate with scientists and statesmen, both national and international, candor, common sense, humor, physical durability, and integrity;

Now Therefore Be It Resolved That the National Science Board expresses its deep appreciation and heartfelt thanks to Dr. Thomas Oswell Jones for his monumental contributions to the Nation, his exceptional diplomatic skill, his exemplary career as scientist-administrator, and his leadership at the Foundation for two decades;

And Be It Further Resolved That the National Science Board extends its personal regards to Dr. Thomas Oswell Jones and his family for good health and happiness in his new undertakings.

BIOGRAPHICAL SKETCH OF DR. THOMAS O. JONES

Dr. Thomas O. Jones was named Special Deputy Assistant Director for International Affairs, Directorate for Scientific, Technological and International Affairs, in July 1975, where he is the senior official responsible for representational and policy development in international scientific affairs for the Foundation.

Dr. Jones was born in Oshkosh, Wisconsin, on May 13, 1908. He received his baccalaureate in Chemistry at the University of Wisconsin-Oshkosh in 1930 and was awarded his Doctorate in Inorganic and Physical Chemistry at the University of Wisconsin-Madison in 1937. His research work at Wisconsin was on Heavy Water, having prepared one of the first major quantities of this material. During this period he redetermined the chemical atomic weight of hydrogen, a value which still stands in the international tables. Dr. Jones was on the faculty at Haverford College at Haverford, Pennsylvania, from 1937–1956, serving as instructor, assistant professor, associate professor, and professor of Chemistry, as well as Head of the Department of Chemistry. On leave of absence from Haverford from 1943 to 1947, Dr. Jones did research and served as Assistant Section Chief of the Chemistry Division and later as Section Chief of the Information Division at the Metallurgical Laboratory of the University of Chicago (now called the Argonne National Laboratory), where the processes and techniques for making and extracting plutonium were carried out.

Dr. Jones came to the National Science Foundation in 1956 as Acting Head of the Office of Science Information Service. Beginning in 1958 he was in charge of the Foundation's U.S. Antarctic Research Program, first as Program Director (1958–1961), then as Head, Office of Antarctic Programs (1961–1965). In November 1965 Dr. Jones was appointed Director of the newly-established Division of Environmental Sciences, into which the Office of Antarctic Programs was transferred intact with Dr. Jones serving as Special Assistant for Antarctic Affairs to the Director, National Science Foundation. The Division was responsible for programs in support of research in the atmospheric sciences, including aeronomy, meteorology, solar-terrestrial interactions, and weather modification; the solid earth sciences, including geology, geophysics, and geochemistry; physical oceanography; and the U.S. Antarctic Research Program. The Division also had responsibility for overseeing the scientific program of the National Center for Atmospheric Research (NCAR) at Boulder, Colorado.

Upon reorganization of the National Science Foundation in 1969, Dr. Jones was promoted to the position of Deputy Assistant Director for National and International Programs. He served alternately as Deputy Assistant Director and Acting Assistant Director of the Directorate between November 1969 and July 1975. The Directorate was responsible for programs in support of research related to Polar Programs (Arctic and Antarctic), Science Information Service, National Centers and Facilities Operations, Computing Activities, International Programs, the International Decade of Ocean Exploration, and Ocean Facilities and Support. Dr. Jones also served as Chairman of the Interagency Arctic Research Coordinating Committee, an interagency group of experts on the Arctic established to evaluate proposed research in the Arctic environment. During his association with the National Science Foundation, Dr. Jones has made fourteen trips to Antarctica to observe and direct the U.S. Antarctic Research Program. A large mountain group, the Jones Mountains, located at 73°32'S. 94°00'W, has been named in his honor.

In 1963, Dr. Jones was awarded the Order "Al Merito" by the Chilean Government for his work in advancing U.S.-Chilean relationships, and has been elected an Honorary Member of the "Chilean Antarctic Circle" Society for the same reason. In 1970 Dr. Jones was awarded the Meritorius Service Award by the Director of the National Science Foundation for "his inspirational administration of environmental science programs, particularly his worldwide acclaimed eminence in antarctic research activities and his development of scientific cooperation programs."

Published articles by Dr. Jones include the foreword to Richard S. Lewis' book, *Artarctica, A Continent for Science* (1965); *An Approach to Polar Research* (1963); *The Organization of Antarctic Biological Research by the United States of America* (1964); *New U.S. Research Station in the Antarctic Peninsula* (1964); *USNS Eltanin, The USARP Research Ship* (1965); *and Life at Antarctic U.* (1965). Earlier writings include a *Glossary of Terms in Nuclear Science* and many research papers in physical chemistry and geochemistry.

Dr. Jones is a member of Phi Beta Kappa, Sigma Xi, the American Geophysical Union, the American Chemical Society, and the Cosmos Club. He is married to Phyllis J. Jones and has two daughters; they reside at 7504 Holiday Terrace in Bethesda, Maryland.●

HUNGARIAN REVOLUTION

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. DELANEY. Mr. Speaker, today we commemorate the 130th anniversary of the Kossuth Hungarian Revolution of 1848, and are once again reminded of the tragic events of 1956.

The year 1848 proved to be a very decisive one for Hungary. Revolution had erupted in Paris, and when the news reached Vienna, Pozsony, and Budapest, a series of events unfolded which carried Hungary rapidly down the road to independence.

Upon hearing of the Parisian uprising, Louis Kossuth, busy pushing through a program of reform, assumed the leadership of the opposition forces in Parliament. Counterrevolutionary forces in Austria incited Croatian armies under Gen. Josef Jellasic to attack the reform-minded Hungarians in September 1848. The Croatian armies were defeated, but further troubles lay ahead as the Austrian Government, in March 1849 declared Hungary to be a mere second-rate power within a new centralized empire.

Louis Kossuth responded to this oppression with a declaration of Hungarian independence. He was carried forward on a flood of victories until the fateful summer of 1849. At that time, Emperor Franz Josef appealed to Czar Nicholas I for Russian assistance. In an ominous prelude to the events of the following century, the Kossuth revolution was brutally crushed and the courageous Hungarians forced to surrender.

Americans reacted immediately to this imperialistic intrusion by Russia. Shortly before the invasion in June 1849, President Zachary Taylor had issued special instructions to an American diplomat then in Europe to proceed to Hungary and give assurances of American recognition to the Kossuth government. Unfortunately, the Russian armies crushed the revolution before he arrived.

I join with our fellow Americans of Hungarian descent in celebrating today that brief period of Kossuth independence. Let us all take heed of the sobering example of Russian imperialism which sought to destroy those noble aspirations. And let us hope that soon we will see "That single and simple point-Hungarian control of Hungarian destinies" which Secretary of State Daniel Webster dreamed of back in 1851.●

RESEARCH WITH ANIMALS—PART III

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. DRINAN. Mr. Speaker, today I wish to share with my colleagues the conclusion of a recent three-part series on research using animals by Christian Science Monitor staff correspondent, David F. Salisbury.

In "Animal Rights Against Consumer Protection," Mr. Salisbury examines the massive impact of the Toxic Substances Control Act on the number of animals used in research.

With greater public awareness of the agonizing deaths of up to 1 million animals annually for the testing of newly introduced substances alone (this figure not including the psychological and biomedical research utilizing animals) comes the responsibility to seek a more humane approach.

I bring to your attention also the recommendations which conclude this series as well as a Monitor editorial of March 10, 1978, in which the funding of alternative methods of research is urged—specifically H.R. 10494, a bill which I and 22 of my colleagues are proud to support.

ANIMAL RIGHTS VS. CONSUMER PROTECTION

(By David F. Salisbury)

In the United States today over 60 million animals are used in laboratory experiments and tests every year. This figure is likely to rise sharply in the next few years.

The reason is a single piece of legislation: The Toxic Substances Control Act (TOSCA). In the past, safety testing has been required only for certain, specific classes of substances. Food additives and drugs are regulated by the Food and Drug Administration (FDA). Pesticides are licensed by the Environmental Protection Agency (EPA).

But most of the 30,000 to 60,000 chemicals in production have had only cursory tests made of their safety and health effects. It was to rectify this oversight that Congress last year passed TOSCA. An Office of Toxic Substances (OTS) currently is being set up at EPA.

Antivivisectionists view this development with alarm. Although OTS has not worked out the protocol it will demand, it may take as many as 1,000 animals to test each substance. Because from 500 to 1,000 new substances are introduced annually, this means one million animals may be sacrificed each year just to screen new products. At the same time, the tremendous backlog of untested chemicals already on the market must be tested as well.

In addition, each animal test takes several years to complete, making thorough screening of all chemicals virtually impossible. This adds to the pressure to find alternative means of testing.

During the last few years a number of different alternatives to "whole-animal" testing have been developed. These hold the promise of being cheaper, faster, and more accurate, in certain instances, as well as saving countless numbers of animals from suffering.

Most alternatve tests are in an early stage of development and validation. Many of the scientists developing these techniques say that their progress has been impeded by the extreme skepticism of animal researchers and the resulting difficulty in getting funds.

Still, a number of approaches have been offered and are in various stages of development. They fall into several major categories:

Use of lower organisms and eggs of reptiles and birds. Bacterial cell cutures show great promise for detecting substances suspected of causing genetic mutation and cancer. Egg embryo tests have detected chemicals which cause malformed babies.

Use of human and mammalian cell cultures. Techniques for growing human and mammal cell lines in test tubes (in vitro) have been perfected. Attempts are being made to apply them to determine drug effects and toxicity.

Use of organ cultures. Many drugs act specifically on certain organs. Methods to maintain organ fragments in the laboratory so that their reaction to specific agents can be determined have been pioneered. Because a number of different organ cultures can be taken from each animal, their use reduced the number of animals needed.

Improved computer techniques. By using more sophisticated statistics the number of animals required for certain tests can be cut drastically. Computer-based models of the molecular action of drugs may screen out a number of the compounds without animal testing and predict adverse effects.

These alternatives all could help reduce the amount of whole-animal testing, but not eliminate it entirely, at least in the foreseeable future.

Traditional techniques of animal testing involve exposing various animals to different amounts of a potentially poisonous substance. To test the toxicity of something swallowed, rats are used because they cannot regurgitate. If the substance is inhaled, dogs usually are employed because their lungs are similar to man's. If the substance is to be applied to the eyes—as in certain cosmetics—rabbits are the test subjects because they have sensitive corneas and do not have tear ducts to wash the substance out of their eyes. If nerve damage is suspected, then monkeys or primates are used.

Acute toxicity—poisoning with sudden and intense effect—typically is measured by the amount required to kill 50 percent of the test animals. This is called the LD–50 test. It is still a standard procedure, even through it is critized by a number of sources as being crude and of limited usefulness.

Thurman Grafton of the National Society of Medical Research confirms the validity of these criticisms. He lays the blame for their continued use on the legal profession: "Companies conduct these tests so that, when somebody sues them, they have a quantitative safety factor which they can use in their defense."

An alternative to routinely administering lethal doses of a substance to groups of 50 test animals is being developed by Robert T. Christian of the University of Cincinnati.

Dr. Christian has been working with cultures of mammalian cells to study the effect of poisons. The work is still in its early stages, but 30 chemicals have been tested. Those which are known to be toxic to animals also have proved toxic to the cells. They have not yet run into a case where a substance which is toxic to animals is not toxic to cells (a false negative) although they expect to. Likewise, they have not yet run across something which poisons the cells but not test animals (a false positive).

As might be expected, the strongest criticism of the validity of animal testing comes from antivivisectionists. Michael Fox of the Humane Society of the United States, for instance, argues that testing these substances one by one totally overlooks what happens when a number of these substances combine in the air, water, or human stomach.

"These tests of specific substances are fatuous," he maintains, "because they do not take synergistic effects [where one chemical enhances the effect of another] into account. Therefore the tests give a false sense of security."

This view is supported by a number of environmental scientists since there are literally millions of possible combinations of food additives, drugs, and other synthetic substances which may have different effects in combination than they have individually.

Recently there has been a growing concern about chronic, low-level health effects. Testing for these requires large numbers of animals and lifetime, or even multi-generation studies.

To judge the effects of a substance to which the entire U.S. popuation is exposed, would, strictly speaking, require 220 million test animals. Obviously this is not possible. Thus the scientist gives correspondingly higher doses to a smaller number of animals. He feels this enables him to calculate the risk to a larger population.

Canadian scientists fed several hundred rats an amount of saccharin which, on the basis of body weight, was 4,000 times higher than the amount consumed daily by an average American. From the results, they calculated that present saccharin consumption may cause several thousand cases of cancer yearly.

"Rodent tests are considered 95 to 99 percent predictive of real cancer risks in humans," says Robert Tardiff, a toxicologist with the National Academy of Sciences. But many scientists, including Dr. Grafton, are skeptical of the results of tests with extremely high dose rates which are necessary to detect weak carcinogens.

The saccharin study points out a number of the difficulties involved in traditional animal tests. The fact that adverse effects were found in rats, but have not shown up in hamsters and monkeys raises the question of its applicability to humans. There is also a possibility being debated that the effects were due to the high dose rates and so cannot be generalized to the consumption of a few bottles of diet drink a day.

The greater sensitivity in alternative, short-term tests enables researchers to detect low-level chronic effects with realistic dosages, thus avoiding the second of these objections. The use of human cell lines also holds the promise of reducing the uncertainties involved in generalizing from one species to another.

The most thoroughly validated test of this sort uses bacteria and has been developed by Bruce Ames of the University of California at Berkeley.

The Ames test identifies mutagens, agents which produce genetic defects. Not because they are considered less damaging, but because mutagenic effects are difficult to define, research efforts have centered on closely related carcinogens. Thus, in a survey of over 300 compounds, Dr. Ames found that his test correctly identified 90 percent of the commonly accepted cancer-causing agents.

In 6 percent of the case, the test showed positive for substances which have not shown up as detrimental in animal tests. However, Dr. Ames makes a strong argument that these are weak agents which would not be detected because of limitations in the animal tests.

"Besides better sensitivity, the Ames test costs only a small fraction of equivalent animal tests," says Dr. Ames. "It can be run in a matter of days instead of years. This makes it practical to test actual samples from the environment and to screen harmful substances routinely—before millions of dollars have been spent on their development."

There are a number of similar tests under development. "The field is moving very, very rapidly. Short-term tests are coming up with similar results. They are starting to build up a good batting average," says Dr. Ames.

The approach which the antivivisectionists and some researchers advocate would begin with a battery of these alternative tests. If these indicated probable health problems with a given substance, it would be prohibited unless there were convincing arguments that it may have offsetting beneficial uses. In that case, the material would be run through a series of animal tests as well.

Materials which were cleared by the short-term tests also would be put through animal tests to make sure that they did not have effects that were missed by the simpler approach.

However, Warren Muir of OTS explains that such an approach is not possible under present legislation. The law puts the burden of proof on the government. Not until these tests are validated thoroughly and generally accepted could a product be held off the market as the result of one of these alternative tests alone.

Still, his office will be using these prescreening tests to set priorities in the animal testing it will require of industry, says Mr. Muir.

"If we can get the bacterial tests incorporated into the guidelines, then the rest of the

regulatory agencies will begin falling into line," says Dr. Fred Deseres of the National Institute of Environmental Health Sciences.

RECOMMENDATIONS

Based on extensive research conducted in connection with this series, the Monitor makes these recommendations:

1. Enforcement of the Animal Welfare Act needs to be tightened. Instead of using U.S. Department of Agriculture veterinarians who, in many cases, are unfamiliar with laboratory animals, the program should be staffed with veterinarians who are knowledgeable and concerned. The program also needs additional manpower. Inspectors now only spend four hours per year in each laboratory. The program should be expanded to cover all vertebrates used in scientific laboratories, not just the few selected species with which it presently concerns itself.

2. More public purview of animal research grant proposals is needed. Citizen participation in the scientific review process could be an additional check on inhumane practices which occasionally become entrenched in some disciplines.

3. Students must be encouraged from an early age to explore humane avenues of animal research. High school students should be restricted to experiments which do not inflict pain on animals. Colleges and universities need to develop courses which deal specifically with the moral and ethical principles involved in animal experimentation. Students must be familiarized with the characteristic behaviors of various laboratory species and aware of their ways of expressing pain. These courses should be prerequisites for animal research. The National Science Foundation should support development of these curricula.

4. Increased research on alternative methods for screening harmful substances is justified not only as a humane concern, but also in enlightened self-interest. Development efforts thus far have been haphazard. Federal allocation of research money specifically for this purpose would encourage a more comprehensive approach. H.R. 10484, introduced by U.S. Rep. Robert Drinan (D) of Massachusetts to promote development of research methods, experimentation, and testing that would minimize the use of live animals and their needless pain and suffering, should be actively supported.

5. The Office of Toxic Substances of the Environmental Protection Agency should employ current short term tests to the greatest extent possible. Industry should realize that these alternative approaches are in their long-term best interest and publicly support their development as well as using them.

ANIMALS IN THE LABORATORY

In the three-part series "Research with animals" appearing in the Monitor this week, correspondent David F. Salisbury documents that the use and misuse of animals in laboratory testing is increasing dramatically. The trend is cause for concern. The United States alone subjects more than 60 million animals a year to frequently painful and fatal experiments, ranging from testing cosmetics and drugs to the impact of car crashes on occupants.

Encouragingly, there are signs that the scientific community has become somewhat more sympathetic to the arguments of antivivisectionists and animal welfare groups concerned about the suffering such tests bring to animals. Animal defenders no longer are dismissed out of hand as eccentrics. And antivivisectionists, for their part, seem more disposed to accept some animal experimentation as necessary rather than insisting on an outright ban.

Some researchers concede there is too much needless duplication of experiments on animals. And much of the testing—particularly many experiments involving stress and behavioral engineering—appear to be of questionable value and relevance to society, even by scientific standards.

In recent years a number of alternatives to "whole animal" testing have been developed. These involve the use of lower organisms, human and mammalian cell cultures, and improved computer techniques. Such innovative testing methods unfortunately have received far too little attention. The federal government in allocating research funds ought to give a higher priority to exploring these more humane forms of testing. Legislation before Congress, introduced by Rep. Robert Drinan of Massachusetts, would encourage and promote further development of such alternatives.

Federal research grants also are needed for the growing number of young scientists expressing an interest in pursuing the search for testing methods that do not require sacrificing animals. Greater public participation in the federal government's processing of research grants might help in this respect. And stepped-up enforcement of the Animal Welfare Act, with more money and manpower allocated to provide greater veterinarian oversight in laboratories, would further protect animals. If prospects of winning congressional approval for such steps seem slight (since research institutions are likely to oppose any "outside" infringement on their research) there is nothing to stop individual institutions and laboratories themselves from giving higher priority to alternatives to animal testing.

In the deepest sense, the issue has a bearing on the kind of moral environment that is fostered. Surely humaneness toward animals as well as men, a reverence for the life of all creatures, is an essential ingredient of that high ethical tone that marks any civilized society. As scientists who have turned away from animal experimentation argue the best way to use animals to help humans is to teach people to love.●

REDUCING THE RISK OF FLIGHT

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. DORNAN. Mr. Speaker, the March 1 air catastrophe in which a Continental Airlines DC–10 airliner crashed during takeoff in Los Angeles is another tragic reminder. The technical failures and mechanical problems responsible for this sad story prompt all of us to recall the universally recognized need to increase on-flight fire prevention.

Everyone agrees on the need to pull out all stops to reduce the risk of these recurrent tragedies. Yet hearings aside, flight fire prevention reform continues to crawl. For those of us on the House Science and Technology Committee who are trying to speed up the pace, a recent editorial in the Los Angeles Times effectively voices our own convictions to spur on the FAA. This March 3 editorial is called, "Pouring Safety on Plane Fires," and I bring it to the attention of my colleagues.

[From the Los Angeles Times, Mar. 3, 1978]

POURING SAFETY ON PLANE FIRES

The toll—2 dead, 84 injured—in Wednesday's crash of a Continental Airlines DC–10 during takeoff at Los Angeles International Airport could have been much higher had the plane been more crowded, the crew less skilled or the firefighters' response less swift.

But the toll could have been lower had the Federal Aviation Administration pushed more rigorously to reduce the risks of fire in airliner crashes.

This is not the first such incident of a big jet crashing on or near an airport runway, and it will not be the last. But there is a big difference between a nerve-wracking sudden stop and the horror of a fatal fire.

This country is the recognized leader of efforts to build safety into aviation. It should be the leader in attempting to keep crashes from turning into fires, too. It is not.

Many specific avenues need to be explored before the precise cause of the latest crash can be established. Why did two tires blow out as the airplane was reaching takeoff speed? Why was the asphalt pavement too thin to support the jetliner's weight as it swerved off the main runway?

But there is no doubt that what killed two people and turned many others into emergency medical cases was not impact, but fire. A wing banged against the ground, fuel spilled out and fumes were ignited by a spark.

Congressmen, airline pilots and consumer groups pointed out the need for better fire prevention last year, after the biggest air disaster in history. Fire took 581 lives in Tenerife, in the Canary Islands, when two Boeing 747s collided on a runway.

The FAA, an agency of the Department of Transportation, held hearings last summer on ways to fight the fire danger. One proposal was to require rubber liners inside fuel tanks; another was to design double-walled tanks instead of the current arrangement, whereby only the wing surface separates fuel from outside air. Among other ideas were chemical treatment to turn jet fuel into a jelly, pressurized nitrogen inside each tank to quell the formation of vapor, and possible changes in cabin ventilation systems.

In sorting through all these recommendations, the hearings found significant promise in only one: a series of British experiments with an additive that inhibits fuel evaporation. The agency decided to pursue this intriguing possibility.

The pursuit has been disappointingly slow. Since last summer the FAA's total effort has been to test the additive on 150-gallon batches of jet fuel—a tiny amount compared to a DC–10's capacity of 22,000 gallons. The testing process is a long, long way from leading to experiments on real airplanes.

This pace is too slow. The incident Wednesday should remind the aviation agency as well as every other party concerned that the risk remains real, and that it demands faster attention.●

GEN. LEWIS W. WALT: A CONCERNED PATRIOT

HON. RICHARD KELLY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. KELLY. Mr. Speaker, Gen. Lewis W. Walt, one of the most respected marines of our time, whose career culminated in the four-star post of Assistant Commandant of the Marine Corps, has continued to serve his country vigorously since his retirement from the corps.

One of the most memorable covers of Life magazine was a picture of General Walt in the thick of the fighting in Viet-

nam, trying to win an awful war under impossible rules. If anyone could have done it, it would have been Lew Walt—a marine's marine, if there ever was one.

General Walt is no less concerned about what he regards as the challenges to America today. Always a popular speaker at public events, Lew Walt is wading into this battle with all the spirit and determination for which he is famous. He sees an America that needs to be alerted to a movement toward loyalties that transcend national boundaries. This movement would destroy our constitutional freedoms and our representative republican form of government. Implicit in this movement is also the likelihood that our standard of living and prosperity would be divided and reduced by the world government.

When a great leader speaks with earnest concern regarding our Nation's welfare we should at least listen. It is for this reason that I submit for your consideration the recent speech by General Walt before a Chamber of Commerce audience in Florida:

THE EBB TIDE OF OUR REPUBLIC AND OUR FREEDOMS

Ladies and gentlemen, I am here today, not as a member of the Armed Forces but as a common citizen, an average American. As one who is deeply and alarmingly concerned about the security of our freedoms.

I am here today to speak to you because I feel it is my duty and my obligation to my country. More deeply, I feel an obligation to those Americans, whom I have seen sacrifice their lives on the field of battle to preserve our freedoms. I believe our freedoms are in greater jeopardy today than ever before in the history of our nation. We are joined now in a most critical battle to preserve our freedoms. To me it is a continuation of the battles in which our heroic Americans have sacrificed their lives. There are no booming of guns or dropping of bombs but the enemy is real, many faced, insidious and clever, and the results can be just as deadly to our freedoms.

In a democratic Republic, military leaders do not commit their countries to wars. Political leaders initiate the wars and order the military to fight them. The leaders who start the war are never active participants on the field of battle. Personally, on the battlefield. As a Marine infantryman, I was always trying to kill my "designated" enemy, because he was trying to kill me. War is "Hell" only for those on the battlefield and for those who have had their loved ones mangled or killed on the field of battle. For those who maneuver us into war, a war is a game in which our young men are pitted against a "designated" enemy in deadly combat.

With the advent of jet aircraft, satellites, atomic powered ships and submarines, instant world-wide communications and nuclear weapons, the nature of war has changed! No longer are the Atlantic and Pacific oceans a shield behind which we can hide from our potential enemies. More important, no longer can the internationalist political leaders hope not to be personally involved in a major conflict because intercontinental nuclear weapons are boundless in death and destruction effects. For this reason, I do not believe international political leaders will ever allow a nuclear conflict. But, I also believe that these same boundless weapons of death and destruction will be used to blackmail nations into submission. Submission to a new international order, a "one world" government where the Government will be the master and the people will be the slaves.

I believe that our country, the United States of America, will be the first target. I believe that the stage is now being set for the blackmail action:

How else can we explain:

Why we were not allowed to win the war in Korea or VIETNAM—

Why we have given the USSR money, food materials, and technology to allow them to build up the greatest military power the world in some respects—

Why we are deserting our friends in Taiwan, South Korea, and South Africa, and at the same time, extending a friendly and helping hand to Cuba, Red China, and other Communist dominated countries—

Why are we trying to give away the Panama Canal when its loss would divide our Naval Forces into two parts—and be a severe blow to the economy of our country—

Why have we deliberately cut back the effectiveness and capability of our Armed Forces by denying them the B–1 and other critically needed weapons systems without even requiring a reciprocal reduction of Russian Backfire Bombers—

Why have we denied our nation an anti-aircraft defense, a ballistic missile defense, and a civil defense while the Soviet Union, in direct violation of the intent and spirit of SALT I agreement, has built a civil defense to protect its people and industries and an anti-aircraft and missile defense of enormous proportions.

The Soviet Union has six times more nuclear explosive power in their intercontinental missile warheads than we have. They have nearly four times the number of submarines and twice the number of combat surface ships that we have. For more than ten years, they have had, in their operating forces, several hundred cruise missiles of two hundred miles range which can be fired from both submarine and surface ships and against which we have no proven defense.

As a result of my military training, I have learned to consider only the enemy's capabilities and not his intentions. His intentions can change over night, his capabilities cannot.

Today, the Soviet Union has the capability to control the sea lanes and cut off, either on the sea or at their source, the vital raw materials which our nation must have for its economy and its military readiness. Of the 72 vital materials we need, a part of 66 of them have to be imported. By such a move, our potential enemies could strangle our country economically, close down our industries, throw million of our people out of work, cause economic chaos in our country which (due to the weakness of our military reserves and national guard—result of no draft) would require a major effort on the part of our regular forces to maintain order.

This then could be a time for nuclear blackmail. With the Soviet Union "armored" (Civil, Anti-Air & Missile Defense) and our Nation naked for the lack of these defenses, the blackmail could force some political leaders to capitulate.

These National and International Political Leaders have made other preparations for the opportune hour. They have prepared a "Declaration of Independence" and a "New States of America" Constitution which would subordinate our Constitution, our Armed Forces and our Economy to that of the "One World Government" (The United Nations). Our freedoms as guaranteed by our Constitution would no longer exist. No longer would our people be the power and our Government the servant. The Government would be the master and our people would be the slaves.

Is our position hopeless??

No! Not if our people can be awakened to the Military, Economic and Political threat facing us. However, time is running out! This year's Congressional elections are the most critical of our Nation's history. The results will determine whether or not our freedoms will be maintained. I predict, that before too long, those who signed or endorsed the "Declaration of Interdependence," will be telling us that the only way we can save ourselves and other nations from a nuclear holocaust, is to form into a "New World Order" with a one world government. If the average American continues to be misinformed or uninformed or unaware of the blackmail maneuver and the majority of the members of our Congress refuse to stand up against such a threat then our case will be hopeless and the middle class, free enterprise and all our other freedoms, we have mistakenly taken for granted, will be only memories.●

FUELS TRANSPORTATION SAFETY ACT AMENDMENTS OF 1978

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. DINGELL. Mr. Speaker, on February 24 of this year, a relatively minor derailment of a Louisville and Nashville freight train in Waverly, Tenn. demonstrated two things: the awesome destructive power of relatively small quantities of liquid petroleum gas, and the shocking inadequacy of the existing safety regulatory activity in regard to such hazardous materials.

In 1976 alone, 63 people were killed, 366 injured and untold millions of dollars of property was destroyed or damaged as a result of fires and explosions that occurred along the more than 1.5 million miles of pipelines in this Nation that carry natural gas, petroleum, and petroleum products. There is good reason to believe that many, if not most, of these losses could have been avoided through a program of more effective safety regulation. Indeed, the fact there were more than 700,000 reported leaks of natural gas in the year indicates that it was due mostly to luck that losses were not higher.

For the future, the problem can only be more serious. In the coming years it is projected that Americans will come to depend more and more on LPG and LNG to meet their energy needs. By 1985, for example, it is estimated that the United States will use some 1.6 trillion cubic feet of LNG, up from 10 billion cubic feet this year, and it is projected that this country will use some 3 trillion cubic feet of LNG by 1995. This increase in the use of LNG and LPG will require the construction, and operation of substantial new facilities for storing and transporting these materials, which are known to pose grave hazards to public safety.

Congress has not been slow to recognize these hazards or to act to protect the public from them. As early as 1921, legislation was enacted giving the Interstate Commerce Commission authority to regulate the safe transportation of hazardous liquids by pipeline. Throughout the years, Congress repeatedly reviewed and reorganized this authority in an effort to compel the executive to strengthen and improve its regulatory activities. In 1967, regulatory responsibility for petroleum and petroleum products was transferred to the newly created Department of Transportation.

In 1968, recognizing the inadequacy of existing State regulation of natural gas pipelines and the growing number of accidents involving these lines, Congress enacted the Natural Gas Pipeline Safety Act giving the Secretary of Transportation full authority to prescribe safety regulations for the transportation of gas, which is flammable, toxic, or corrosive. The responsibility for implementing the provisions of the Natural Gas Pipeline Safety Act of 1968 and certain provisions of certain other acts were vested in the Office of Pipeline Safety Operations (OPSO) in the Department of Transportation.

Thus, under various statutes OPSO now has full authority to regulate the safety of pipeline transportation of natural gas, liquefied natural gas, liquid petroleum gas, petroleum, and petroleum products.

Unfortunately, the intent of Congress in creating this program has never been properly implemented, and as a result of this failure the American public continues to be exposed to unnecessary hazards and to suffer unnecessary losses.

Today, Congressman MARKEY and I are introducing the Fuels Transportation Safety Act Amendments of 1978. In addition to authorizing appropriations for the pipeline safety operations of the Department of Transportation as implemented by OPSO, this legislation is designed to coordinate the safety regulation activities of OPSO in a single coherent package, to close gaps in safety regulations created by OPSO's almost unbelievable misinterpretations of congressional intent and to compel the agency to strengthen and speed up its vital regulatory functions.

Under the Pipeline Safety Act of 1968, lines constructed before 1971 are exempted from regulation; however, if the Secretary "finds a particular facility to be hazardous to life or property, he shall be empowered to require the person operating such facility to take such steps necessary to remove such hazard." The record of pipeline accidents before and since the creation of OPSO makes it clear that certain types of pipeline in certain locations may pose unacceptable levels of risk and it was the clear intent of Congress that the Secretary should use this authority to force the correction of hazardous conditions regardless of when the pipeline was installed. The Secretary has never seen fit to use this authority, which is all the more remarkable in light of the fact that a substantial amount of the pipeline in use today was installed before the turn of the century. Thus, only about 180,000 miles of the more than 1.5 million miles of pipeline is fully regulated, and this is the most modern and safest pipeline in use.

Evidence before the committee at the time of enactment indicated that a number of the older lines were in very poor condition, an indication borne out by the fact that there are admittedly more than 700,000 discovered leaks each year. The legislation introduced today requires the Secretary to act on "grandfathered" lines when evidence indicates that they present a hazard, unless the operator can prove that they do not present a hazard. It requires the Secretary to consider such factors as the characteristics of the pipe, including age, manufacturer, physical properties (such as its resistance to corrosion and deterioration) and the method of its manufacture, construction or assembly.

It also requires him to consider the nature of the materials transported (including their corrosive and deteriorative qualities), the sequence in which the materials are transported and the pressure required. Finally it requires him to consider where the pipe is located and, in particular, the climatic and geologic conditions and the population density and growth of the area.

Obviously, the Secretary cannot make an informed judgment without information so the legislation I am introducing today requires that the person operating any pipeline facility supply it. It also creates a data-processing capability that will enable him to correlate the above information with information on leaks, which must also be reported, so as to identify the types and locations of pipe that constitute a hazard.

It has been obvious for a number of years that the most frequent cause of pipeline accidents is the inadvertant rupture of lines during construction. Now, some accidents will occur no matter what, but it seems reasonable to conclude that no contractor, and certainly no operator of construction equipment, wants to blow up a neighborhood in which he is building. The sad fact appears to be that contractors often do not know where a pipeline is and, therefore, cannot take reasonable precautions to avoid hitting it. This legislation attacks this problem by requiring each person operating a pipeline to identify the location of his pipeline and to file that information with State and local agencies authorized to approve construction activities in the areas in which the pipeline is located.

For some peculiar reason which remains unclear to this day, OPSO elected to treat LPG, which many experts believe to be more dangerous than LNG, as petroleum rather than as a gas. The record shows that LPG accounts for only 10 percent of the accidents reported, and for over 60 percent of deaths resulting from accidents. Yet, under OPSO's interpretation, it is subject to far less stringent regulation than even natural gas, let alone LNG. This legislation corrects that defect in interpretation by requiring LPG to be treated as a gas.

One other problem under the existing law is that petroleum and petroleum products are regulated under criminal statutes. The lack of civil regulatory authority causes OPSO difficulties which are clearly not of its own making and the legislation corrects this deficiency by creating civil authority for safety in regard to petroleum products that tracks the authority in regard to gas.

A very troublesome problem is the issue of so-called master meters. Under the existing regulations the safety authority of OPSO stops at the meter. For the average homeowner, this is clearly a reasonable provision; however, for persons in trailer courts and some apartment houses this creates a serious hazard. The Subcommittee on Energy and Power has evidence that in some trailer courts gas is distributed by ordinary waterpipe and garden hoses.

This is an intolerable situation. There is no clear evidence of how many persons may be endangered, but the subcommittee has evidence that there are at least 6,000 master meters situations in the State of California alone. The legislation brings master meters operations under the jurisdiction of OPSO. It also incorporates rural gathering lines under OPSO authority. These were exempted from the act after it was adopted in 1968. Evidence now indicates that this was a mistake since these lines do pose a hazard and substantial amounts of gas may also be lost thereby.

There is no question but that OPSO now has authority to regulate the siting and operating of both LNG and LPG storage and transportation facilities, but the hard fact is that the office has not yet done so, although it does have some regulations "in the pipeline," so to speak. This is a dereliction of duty which must be corrected and the record does not indicate that OPSO can be trusted to do so adequately without further direction from Congress.

The danger of LNG has long been known. In 1944, one LNG tank ruptured in Cleveland killing 130 and injuring 225. According to a report now in preparation by the General Accounting Office, had the wind been blowing in another direction at the time, all of southwest Cleveland could have been destroyed. In fact, it was due solely to the timing of the accident that casualty figures were not higher. The accident occurred during the day when husbands were at work and children in school, so that the victims were limited largely to housewives. The GAO report details a number of defects in the design of existing facilities that could cause a repetition of the Cleveland disaster. It is imperative that this situation be addressed and addressed quickly and the legislation we are submitting today gives OPSO very specific responsibilities to protect the public safety in regard to both existing and future facilities.

With substantial increases in the amount of LNG and LPG to be transported and stored in the United States in the future, there remains the very real possibility that despite our best efforts a catastrophic failure may occur. In 1974, then-Fire-Commissioner O'Hagan of New York City indicated that a rupture of a barge bringing 5,000 cubic meters of LNG down the East River could create a gigantic cloud of low-drifting gas that could be ignited by the spark of an auto horn. The threat of such accident could require the evacuation of as much as one or two whole boroughs of the city of New York. He said that firefighting strategy would consist of waiting until the resultant gas cloud ignited and then trying to confine the blaze. The tankers now being put in operation carry 125,000 cubic meters, five times the amount that concerned Commissioner O'Hagan.

Clearly, there is the potential for enormous financial liability, liability that

may be beyond the capability of the companies handling LNG and LPG. The legislation addresses this problem in three ways. First, it requires any person storing or transporting LNG or LPG to post evidence of financial responsibility of $100,000,000.

Second, it creates a liquefied gas liability fund which will assume liability for losses over $100,000,000 and up to $300,000,000. Recognizing that many LPG operators have small facilities and deal with relatively small amounts of gas that pose a much smaller risk, the Secretary has been given authority to exempt them from both the siting and operating and the financial responsibility requirement. Both, would be liable on the basis of strict liability, thus they would have to pay whether or not they could be proven to have been negligent, but they could recover from a third party, if they could prove negligence.

Third, if losses exceed $300,000,000 the person storing or transporting the gas would be liable, if it could be proved that he was negligent.

Finally, the legislation addresses what I believe to be a major weakness in the OPSO operation; the failure to provide effective leadership. For 7 years out of the 10 that OPSO has been in existence, it has been headed by an Acting Director. This is intolerable. It indicates a lack of serious concern with the problems of pipeline safety and a lack of dedication to resolving them. Repeatedly, Secretaries of Transportation have promised the subcommittee that this would be corrected. Repeatedly, those promises have been broken. In an effort to bring this situation to the attention of the present Secretary of Transportation in a more forceful manner, the legislation prohibits anyone from serving as an Acting Director of OPSO or of the Materials Transportation Bureau for more than 180 days. After that time, the Secretary himself must carry out all responsibilities and the authority to delegate responsibilities is suspended until a director is named.

These are some of the most important issues addressed by the Fuels Transportation Act Amendments of 1978 which I am introducing here today.

One final word. This legislation addresses problems that are very real and very serious. We believe that they can be resolved and resolved without imposing onerous burdens upon the industries involved. We believe that this legislation accomplishes that goal and I commend it to the attention of my colleagues with great hopes.●

EVA AND PAUL YAGER

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. WAXMAN. Mr. Speaker, on the occasion of its 30th anniversary, Shelters for Israel is honoring Eva and Paul Yager as "Couple of the Year" at its annual anniversary dinner dance to be held at the Century Plaza Hotel on Saturday, March 25, 1978, an event made even more significant because it also coincides with the 30th anniversary of the State of Israel.

The Yagers, who are survivors of the holocaust, settled in Los Angeles after arriving in New York from Hungary. They are the hardworking and popular coowners of one of the mainstays of our Beverly-Fairfax neighborhood, the Budapest Restaurant. In spite of the heavy demands of being involved actively in the daily operation of their business, the Yagers have found the time, indeed made the time, to give of themselves to Shelters for Israel.

Eva and Paul Yager are being honored for 20 years of devoted service to this organization which has built and supported the following in Israel: A public library, dormitories at Hebrew University of Mount Scopus, prekindergarten nurseries, and many other worthwhile projects.

Eva is a vice president, functioning as life membership chairman. Paul is a lifetime trustee and along with Eva, a member of the advisory board.

Although Eva and Paul Yager have been active in many other community organizations, their heart and soul are primarily with Shelters for Israel. Because of their exemplary dedication through the years, and because of their selfless and lasting contributions of time, effort, talent, and money, Eva and Paul Yager are most deserving of the honor being accorded to them. It is a great pleasure for me to ask the Members to join with their son, George, and their many other friends in saluting them on this special occasion.●

REPRESENTATIVE JOHN CONYERS URGES PRIORITY-SETTING

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. SIMON. Mr. Speaker, one of our colleagues in the House who is not a member of the Budget Committee has shown much above average interest and leadership on matters which relate to problems which the Budget Committee must face. He is Representative JOHN CONYERS, who, on February 28, presented testimony before the House Budget Committee which I found of interest and I believe many of my colleagues in the House and Senate will find of interest.

Basically, he calls for a better system of priority-setting in this body.

I commend him for his leadership and his interest. JOHN CONYERS not only serves the people of his district well, he is serving the people of this Nation well:

TESTIMONY OF REPRESENTATIVE JOHN CONYERS BEFORE HOUSE BUDGET COMMITTEE, FEBRUARY 28, 1978

Mr. Chairman and Members of the House Budget Committee. I appreciate this opportunity to share with you some thoughts about the fiscal year 1979 budget in the context of the congressional budget process that we adopted three years ago.

Last October I testified before the special task force on the budget process, chaired by my colleague from South Carolina, Mr. Derrick. The thrust of my remarks was that of all the objectives of the 1974 Congressional Budget Act, the one that has received the least attention and suffered the most neglect is the mandate "to establish national budget priorities" (Sec. 2, 4).

My argument today is that as a result of our failure to set budget priorities in a deliberate and systematic way, we have not gained the kind of control over the budget that we intended and that is necessary and, consequently, our policy objectives in virtually every area have been compromised and derailed. I will illustrate my argument with reference to two budget areas—tax expenditures and national defense.

It has been said that priorities are implicit in each and every budget decision that Congress agrees upon. In a certain sense this is correct. Budget resolutions do affirm a given set of economic and social policies, a particular distribution of wealth and income, as well as burdens. They always assign a certain weight to national defense as well as to the care of the society's most defenseless and dependent persons. I think it can be safely said that the budget decisions that we have made in the past three years, despite the new budget process, have carried forward to a remarkable degree the policy choices of the past and, indeed, have been made in a way remarkably like the budget decisions under the old system. What we call priorities are in a real sense the priorities of the past, reflecting conditions and choices made twenty or thirty years ago, that are carried forward into each subsequent budget by way of tinkering with budget increments rather than evaluating budget bases.

Nothing is wrong with the priorities of the past so long as they accurately and adequately reflect, and respond to, the needs and circumstances of citizens in the present and what these are likely to be in the future. But is this, in fact, the case? I think not. On the contrary, by any economic, sociological, and psychological measure the budgets we have been cursorily approving have not been accomplishing the goals they were intended to accomplish, or responding to the needs and interests of citizens, or winning the support and the legitimacy that can only be conferred by the judgment of citizens themselves.

Let us briefly review the performance of our budgets in the past few years. The budget is foremost an economic document for accomplishing the goals of economic growth, maximum employment, reasonable price stability, and a strong balance of payments position. In each of these areas the budget has performed poorly. Not only do the objective measures register poor performance, but of equal importance the perception of our economic and budgetary performance by the great majority of citizens—and for that matter on the part of citizens, bankers, and governments of the world—can be characterized as one of deep apprehension and concern about the direction we are taking. Opinion polls indicate that the majority of citizens is concerned most about the economy, pessimistic about the government's ability to make improvements and, overall, rather dissatisfied with the performance of government as such. There is also mounting discontent with the role of the budget in allocating the burdens—particularly, tax burdens—that finance government spending.

Candidate Carter struck a sympathetic chord in the 1976 presidential campaign when he attacked the tax system as "a disgrace to the human race." A great deal of the erosion of public confidence in government stems from the way we allocate tax burdens—and, the other side of that coin, tax privileges. There is growing public awareness not only of how, for what, and to whom

the government distributes spending, but also of how and from whom the government raises revenue.

One of the signal achievements of the new budget process was to formalize the concept of tax expenditures and require their listing in the budget. Tax expenditures are the exceptions or reductions in the normal tax rate that are offered to individuals and corporations to promote a particular type of economic activity or else to lighten the tax liability of groups experiencing adverse circumstances. In effect, they are revenue losses and a form of government expenditure. They include exclusions, exemptions, deductions, credits, preferential rates, and tax deferrals. In the popular mind, with justification, they are simply referred to as the loopholes, shelters, and privileges accorded to upper income groups and powerful institutions.

In FY 1979 tax expenditures will reach $134 billion, $103.5 billion to individuals and $30.5 billion to corporations. They represent nearly 27% of the direct expenditure budget. Tax expenditures increase just as direct expenditures do. For example, in 1967 they amounted to a revenue loss of $36.6 billion. Ten years later, in FY 1977, they had climbed to $114 billion. Unlike direct expenditure programs that have to be renewed and reauthorized periodically, most tax expenditures, once enacted, remain on the books, and are rarely scrutinized for their intended or unintended effects.

There are, in fact, two federal systems for allocating resources. One is direct spending that, overall, has a positive redistributive impact on lower- and moderate-income groups. The other is the tax expenditure budget—as well as federal credit and borrowing programs and payroll taxes—that, overall, have a negative, or regressive distributive impact.

The tax expenditure budget is significant from the point of view of the priority-setting function of the budget process. These expenditures often operate in the opposite direction of the direct expenditure budget, nullifying the latter's intended effects. Because tax expenditures are revenue losses, they represent resources unavailable for direct expenditure programs. In theory many of the major tax expenditures are supposed to promote economic growth and correct deficiencies such as unemployment. In practice these expenditures often fail to achieve their goals, or else cost far more than the value they confer, or, as is too often the case, merely furnish additional privileges to already privileged groups or institutions. As an example of the latter, one result of corporate tax expenditures is the reduction over the years of the tax rate for the largest firms from the nominal 48% rate to an effective 13% one.

In the early 1970s the Joint Economic Committee published one of the few systematic studies of tax expenditures. In a report entitled, "Federal Subsidy Programs," published on October 18, 1974, the Committee offered this view of tax expenditures:

"On the whole, these studies showed that many subsidies do not work well economically, they are often directed at outmoded or non-existent objectives, they redistribute income to the affluent, and in too many cases their costs far exceed their benefits to society as a whole."

Of the investment tax credit, one of the most celebrated tax expenditures, which was intended to stimulate employment and in that year amounted to about $4.5 billion (and which in the FY 79 budget will amount to $12.3 billion for corporations and $2.7 billion for individuals), the study concluded:

"... the tax credit would reduce unemployment by 0.1 percent in one year and 0.3 percent over a 2¼-year period . . . the investment tax credit does not correct the market deficiency of high unemployment rates as its proponents originally argued . . ."

With regard to another notable tax expenditure of that period, incentives for petroleum exploration, the study concluded that $1.4 billion in subsidies in 1975 generated only $150 million in additional petroleum reserves. "The consensus of professional economic opinion is relatively certain," the report concluded, "that the special tax provisions (for petroleum) result in an inefficient allocation of resources, a smaller national income, and questionable income distribution effects."

The JEC recommended in 1974 "major subsidy reform." This reform never materialized. Even President Carter's very modest requests this year to trim tax expenditures such as business meal deductions have encountered stiff opposition. Despite his campaign intentions, the President has already abandoned more substantial reforms such as the elimination of capital gains expenditures.

The tax expenditure budget is a major instance in which the Congress sacrifices a great deal of budget control for failing to establish explicit priorities, and consistent ones, for each and every expenditure program, direct and indirect. The interaction of direct and tax expenditures can be described as the left hand not knowing what the right hand is doing. The budget committees should be asking pretty tough questions of the tax expenditure budget. Are these expenditures the most cost-effective in accomplishing overriding objectives such as reducing unemployment or directing investment and production to economically-depressed areas? Are the tax expenditures enacted years ago relevant to the economy today? Are tax expenditures distributed equitably among regions, towns and cities, and among different income groups? What are likely to be the long-range consequences of an expanding tax expenditure budget for tax receipts and the ability to finance federal programs? And along with credit and borrowing programs, what are the implications of tax expenditures for the principle of progressivity in the federal tax structure?

These questions deal largely with the effects of the tax expenditure budget on economic priorities. Of equal importance is how these expenditures affect popular perceptions of the equity and integrity of the tax and budget systems themselves. The fact is that tax expenditures are the underbelly of privilege in the whole budget process. A 1972 study by Joseph Pechman and Benjamin Okner showed that whereas families with income below $5,000 a year received about 1.4% of all personal tax benefits, families whose income exceeded $50,000 a year received 24% of all individual tax benefits. Stanley Surrey, another leading tax expenditure expert, puts the matter of inequity in even a stronger light: on the average, individuals in the $3,000 to $5,000 tax bracket receive about $10 in benefits; in the $25,000 to $50,000 bracket they receive about $1,350; and individuals in the $100,000 to $500,000 bracket gain about $29,300.

Regressivity and privilege in the tax expenditures side of the budget have undermined public confidence. Because there is such gross inequity and, as a consequence, a spreading tax revolt, direct federal spending is called into serious question, particularly given the diversionary rhetoric of balanced budgets. Unless the budget committees establish control over tax expenditures, and relate them to the objectives of economic and social policy, we will continue to come under attack for direct expenditures which virtually stand alone as the instrument of equity and economic opportunity for groups at the bottom.

I began the testimony with the argument that the failure at setting explicit budget priorities has significantly undermined our control over the budget and our ability to achieve the objectives we intended to through the budget. I will briefly refer to one other budget area in which the priority-setting mandate has been disregarded and, as a result, the Congress has lost substantial control over present and future expenditures. I refer to the defense budget. (Because I testified at length on the defense budget before the National Security Task Force on February 22nd, I shall merely summarize here a few points.)

The President's FY 79 request for national defense is $117.8 billion in outlays and $128.4 billion in budget authority, roughly ten billion over last year's levels. Given the assumptions behind the defense function and the expectations for inflation and real growth, in only nine budget years we will find ourselves mulling over a defense budget of more than a quarter-of-a-trillion dollars and cumulative spending over the coming decade of nearly $2 trillion for defense. The budget we are considering now will, in effect, lock us into staggering expenditures on weapons and military forces in future years.

The President's FY 79 request makes it clear that this growth in the defense function is taking place at the expense of adequate spending for employment programs, housing, urban assistance, economic security for the elderly, and other vital social purposes. Several major domestic functions in this years request have been held down to the current services level and even back below that. The evidence, I believe, is clear that defense spending is seriously going to crowd out domestic expenditures.

National security, defined almost exclusively in terms of military might and adversaries abroad, remains one of the least examined and most expensive concepts in the history of this nation. It has very little to do with the security against the age-old adversaries at home of want, economic need in old age, idleness, dependency, and the disintegration through neglect and crime of urban communities.

Two weeks ago a remarkable colloquy took place between the distinguished chairman of the House Appropriations Committee, Mr. Mahon, and the chairman of the Joint Chiefs of Staff, General George Brown. After reminding General Brown that in the last three years Congress appropriated $330.7 billion for national defense, Mr. Mahon remarked:

"It's rather discouraging to learn from you that this did not buy us the security we need. . . . My colleagues keep asking, 'how do you let them get away with so much waste?' The average American would feel that $330 billion not only would enable us to avoid disaster but to keep pace with the Soviet Union."

General Brown complained that Congress had cut on an average $5.5 billion from Pentagon requests in each of the last five years, but conceded that this additional amount would have made little difference in achieving the superiority over the Russians he deemed necessary to our security. Chairman Mahon responded that the "risk has increased," not decreased, as defense spending has gone up. He put his finger on the nub of the problem. How much is enough in defense spending? If, in the absence of reliable measures, we do not know how much is enough, why continue appropriating additional billions?

The conventional wisdom is that military spending is good for the economy because it creates or maintains jobs in defense plants. Since World War II defense spending has been a major Keynesian tool for priming the economy before tax cuts and credits came along. But it has not worked well, as the history of unemployment and inflation has demonstrated. Today this conventional view is being challenged by the evidence that, as compared with virtually every other type of civilian expenditure—e.g., durable goods,

housing construction, services—defense spending is a far less efficient way to reduce unemployment and promote growth. A recent study on the economic impact of defense spending, *The Empty Pork Barrel*, written by Ms. Marion Anderson and the Public Interest Group in Michigan shows that during the period, 1970–74, each additional increase of $1 billion for defense entailed a net loss of 11,600 jobs nationally, and that 60% of the population live in states which suffered a net job loss. In this 5-year period alone, 907,000 jobs were lost—i.e., failed to materialize—as a direct result of money spent on defense crowding out civilian purchases by consumers or the government. It should also be noted that defense spending has a built-in inflationary effect due to the fact that while it results in the distribution of considerable income, it does not produce consumer goods or add to the total supply of purchasable goods and services.

Mr. Chairman and Members of the Budget Committee, I would ask you to consider my argument that we have failed to establish in a deliberate and systematic way national budget priorities and, as a result, we are being controlled by, rather than controlling, the budgets we pretend to fashion and claim will accomplish our social and economic objectives. It may also happen that if we stay on this course, the budget process and institutions themselves will lose their significance, support, and effectiveness.

We labor under the illusion that our present approach gives something to every legitimate group and activity in proper proportion, and that while it offers something to everyone, none gets all it wants. While we pretend to satisfy every interest, we rarely do justice to any of them, most of all to the groups and activities that badly need our attention and assistance. Witness the decay of the inner cities and the epidemic proportions of minority and youth unemployment, the conditions of which ten years after the Kerner Commission report are worse rather than better. Consider other activities that have been greatly neglected: decent and safe railroad transport and our energy needs.

What would it be like if, through the budget process, the Congress really did set about establishing national budget priorities? It would mean doing more than merely taking for granted existing programs that have failed their objectives or that are irrelevant to current conditions. It would also mean more than merely carrying forward the budget decisions of the past. It would mean examining the budget as a whole, and the relations of the functions and of tax and direct spending programs. I think it would also involve the notion of multi-year budgeting, that my good friend, Rep. Paul Simon, has advocated, as well as serious application of zero-based budgeting to all programs.

More than that, setting explicit budget priorities would involve being clear about protecting public standards governing expenditures and tax receipts, such as equitableness, domestic well-being, balanced economic growth, and cost-effectiveness. It would give rise to far more and profound debate on the issues and goals than we have witnessed the last several years.

Setting budget priorities entails ordering our national goals, and making sure our policies and programs are as consistent as possible with one another and these goals. It would, in addition, mean establishing some type of timetable and other benchmarks for measuring accomplishments, as is done in the Humphrey-Hawkins Full Employment bill, and also enable us to determine the short- and long-range economic and social impacts of federal programs.

The Congressional Budget Act of 1974 furnished Congress with ample tools for establishing priorities and fashioning a budget agenda, that is consistent with them. Unfortunately, we have failed to seize the opportunity.

I shall vote, of course, for the transfer amendment that calls for the shift of roughly $12 billion from defense to nondefense functions. This represents an indispensable first step in the recognition that our priorities ought to be responsive to the conditions, needs, and possibilities of the present and future, and not merely the inheritance of the past. But we also have to go beyond this in debating every aspect of the federal budget as it relates to the fundamental values we hold and the actions we have to take to realize our values.

I am aware there will be a rejoinder that what I am advocating is simply too much for the budget institutions to handle, or to expect from them. In one sense, the budget is the effect, not the cause, of policy. Budgets typically ratify prior decisions and choices. Any fundamental alteration can only take place if the laws, and the political forces behind them, have first undergone change. It is for this reason that those of us who seek to establish priorities that are appropriate to our social and economic goals face a far greater challenge than those who work to maintain the budgetary status quo.

But the language of the Budget Act speaks to "establishing" priorities, not just ratifying automatically ones that arose in the past, often without much deliberate decision and awareness of their consequences. I regard the federal budget as the single most important document of government, the shaper as well as the expression of our values and of the way we allocate our public resources and burdens. It is pivotal because it represents the whole of government activity and relates all the parts to the whole. For these reasons the budget process should and can be at the center of our decision making processes, and the instrument for making our policy responsive, workable, and decent.●

FULL EMPLOYMENT LEGISLATION: 1945 REVISITED

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. CONYERS. Mr. Speaker, as I have listened to the debate last week on H.R. 50 I experienced an incredible sense of deja vu.

I am holding in my hand excerpts from the House and Senate debate on the full employment bill of 1945. Thirty-three years of history is really being made in this Chamber as we resume debate on the Humphrey-Hawkins bill.

The logical question to ask is: What has changed in the debate in these 33 years? Have the opponents of full employment today raised arguments different from the ones opponents to the 1945 bill raised? What have we learned from the economic performance of the last 33 years? Is there the slightest doubt in our minds that the Employment Act of 1946—the successor to the 1945 full employment bill—has fallen far short of the goals that the authors of the 1946 act intended?

There should not be any question on the last item:

For example, it has been calculated that from 1953 to 1977, inclusive, as a result of cyclical and structural unemployment this country has lost approximately 72 million man- and woman-years of employment—that is the cost of joblessness and idleness to the economy, and

Another indicator: In only 5 years in the last 25 the unemployment rate has fallen below 4 percent; in the past 3 years it has averaged 7.7 percent That was not what the authors of the 1946 act had in mind when they mandated the Government to achieve "maximum employment."

The startling thing about the debate in 1945 and the debate today is that in every major aspect the opponents have offered virtually the same arguments. Before you rush to respond, may I say that the similarity in debate does not mean that the opponents today have the wisdom of the ages on their side. To the contrary, since for the most part the economy's performance in the past 30 years has fallen far short of its potential and has been almost totally unresponsive to the problems of structural unemployment, I would respectfully suggest that wisdom is not on the side of opposition, it was not then and it is not now.

Permit me to give you a very brief historical background. The 1945 full employment bill arose, because of the deep and widespread fear in the country that once the war ended, a substantial number of citizens would be thrown out of work.

There was one other concern in 1945: Leaders were very concerned that should there be another depression, another period when 10 million or more workers were cut off from work, the working people of the country would not stand for it, especially since during the war they had experienced near-full employment.

I must admit one error of the proponents of the full employment bill of 1945: another great depression did not occur after the war, in large part because the Government found a way through the defense budget, and later the cold war to keep substantial numbers of Americans employed.

The Senate first debated the 1945 bill. The debate lasted 4 days.

I should point out that the 1945 bill really went farther than the 1978 bill. It contained language that directed the Government to spend as much money as was necessary to close the gap between what the private sector could provide in the way of jobs and what additional jobs were needed so that every individual who was able and willing to work had a job.

On the Senate floor many of the same arguments against full employment were used then as now.

Arguments against making full employment the overriding objective;

Arguments about protecting the hundred million of employed persons against the demands of the several million who were unemployed;

Arguments about balancing the budget;

Arguments that there was a natural level of unemployment below which the economy could provide jobs; and

Arguments about the need to maintain individuals on relief in order to keep then out of the labor market.

There was one novel argument that has not been offered today, and thank God for that. An argument advanced by the distinguished Senate Republican leader from Ohio (Mr. TAFT).

Senator TAFT thought that full employment was antithetical to freedom:

I wish to suggest to the Senator (Mr. Tobey of N.H.) that there is no question that we can provide for full employment in the United States. Russia does it; Germany does it. In other words, if we are willing to sacrifice freedom, we can secure employment. . . .

Thirty-three years ago the full employment bill of 1945 as it made its way through amendments and conference was transformed into an employment act that has, according to every available evidence, not been able to accomplish the goals it set. It has failed to because there really was no mandate and no public accountability, no goals, no process framework, little to make it work.

By the time the 1945 bill passed both Houses, it was a mere shadow of its original self. Like today the opposition had loaded it down with every extraneous consideration under the Sun. Like today, the effort of the opposition was to take the guts out of the commitment to full employment. And they succeeded. I hope history will not again repeat itself on this score.

There is one difference. In 1945 the business community that led the ooposition—which it does today—argued that the bill was not needed because, in the words of the head of the NAM, "Full employment is a normal attribute of our economy." In other words, business claimed that full employment is the natural economic state that would arise by leaving the private sector alone. I think we have awakened by now to the absurdity of this claim.

I have learned one simple thing from the history of debate on full employment. It has never been tried. It never was given a chance.

Are we simply to conclude there really is no hope for the young and old who are eager to work but unable to find it? Shall we raise the defeatist notion that "life is unfair" to a cardinal principle of Government? Have we become so helpless before a set of circumstances none of us really approve of?

H.R. 50, I submit, is a moderate and modest bill. It is a process bill. It is flexible in its method. It provides a level of public accountability toward economic policy that citizens need to judge the performance of their leaders. It focuses on the hard-core structural unemployment problems that we all agree have proved impervious to all past efforts. It has resulted from 4 years of intense discussion and broad consultation, and a great many modifications that accommodated reasonable critics.

We face then one simple issue: After all this history are we or are we not willing to make a modest beginning to bringing employment within reach of all Americans?

We really have very little else to fall back on.●

EASYGOING, HARDWORKING ARKANSAS

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. ALEXANDER. Mr. Speaker, in the March edition of National Geographic, Boyd Gibbons and Matt Bradley teamed up in a pictorial and narrative essay on life in Arkansas in the 1970's. While I wish that I could share the pictorial part of the essay with my colleagues, I do commend the narrative that accompanied this excellent piece of literature about my State—easygoing, hardworking Arkansas.

The National Geographic article follows:

EASYGOING, HARDWORKING ARKANSAS

(By Boyd Gibbons)

Tom Blackmon, smiling, microphone in hand, leans out the window of his white Ford camper. He looks into the face of Arkansas farmers, his auction customers.

"All right, a good stock trailer. I got a thousand on the money . . . eleven and a half, now seventy-five, now twelve . . . ."

This is the Back Gate auction, on the banks of the Arkansas River in flat southeast Arkansas. The farmers have come here from the orchards on Crowleys Ridge, the oil fields around Smackover, the pine hills around Pine Bluff, from places like Bald Knob, Rocky Mound, Greasy Corner. There are a few cowboys here in pointed boots and high-crowned hats from the forested Ouachitas (WASH-ih-tahs) and Ozarks to the west and northwest.

There are bidders here from 28 states, but mostly these are soybean, rice, and cotton farmers of the Delta, the eastern third of the state—biscuit-and-redeye-gravy country. Their visored caps advertise John Deere, CAT Diesel Power, Gristo Feeds, Red Barn Fertilizer, Log Hog.

The month is March, windy and cold, and the river is muddy and wide. To escape the spitting rain, I squat beneath a flatbed trailer and watch Tom Blackmon work (pages 398-9). At 37 Tom is a master of the craft of auctioneering—rhythm, momentum, psychology, humor, and knowing the value of what he sells. He learned from his father, Eddie, who struts among the bidders as a ringman, touching an elbow, patting a shoulder, signaling bids with a "hup" and an upward jerk of his arm. Tom has been auctioneering all winter, and his voice is a musical rasp—a tenor Johnny Cash. He protects his throat by gargling with 3 percent Mercurochrome and by "rattling" with the tip of his tongue, cantering phrases like "who will bid" into something that sounds like "hoodalabidda."

"All right, that's a real good combine . . . hoodalabidda ten thousand? Nine, nine, nine, and now ten, now ten five. . . ." Tom sells the combine, and the camper creeps down the row of machinery to a disc. A bumper sticker on Toms camper reads: IF YOU COMPLAIN ABOUT FARMERS, DON'T TALK WITH YOUR MOUTH FULL.

In the next two days Tom will sell more than two thousand pieces of used farm machinery. More than a thousand bidders have registered in his trailer. Blackmon's Back Gate auction is the largest sale of its kind in the country. The sellers simply park their machinery along the river and leave without any receipt. "We walk away from sales like this with well over a million dollars of their money," Tom says, "and they never worry." Arkansas trust.

Agriculture is big business in Arkansas. Almost 40 percent of the state is farmland, soybeans are the leading crop, and more rice and broiler chickens are produced than in any other state. Arkansans also raise everything from cotton, hay, wheat, corn, oats, grain sorghum, spinach, snap beans, pecans, apples, peaches, grapes, strawberries, cucumbers, tomatoes, and watermelons that outweigh the farmers, to cattle, horses, hogs, turkeys, quail, chukar partridge, pheasant, crickets, fish, and worms. Turn on the television in Little Rock—fertilizer commercials.

Tom and Bonnie Blackmon live in a mansion full of antiques on leafy Edgehill Road in Little Rock. "We go to New York to the theater every year," Tom says. "People up there always expect us to be barefooted."

Weary of this stereotype, Arkansas remind visitors that wealthy people live here, that they have the Arkansas Symphony Orchestra, the Arkansas Arts Center, a repertory theater, the National Center for Toxicological Research, the Arkansas Gazette, modern shopping malls—that they do wear shoes.

After seven weeks and 4,000 miles of driving around the state, I also learned this about Arkansans: They are resourceful and enterprising, waste little, can make and repair just about anything, and they hustle imaginatively for income. They have to, because wealth here, while not invisible, is not prevalent. Many Arkansans barter and trade, often at auctions.

I asked Eddie how he felt about Arkansas. "This is a lot better state than 49 other states think it is," he said. "And I live in Texas."

PRAIRIE TEACHES A HARD LESSON

Pioneers pushing westward into Arkansas Territory in the early 1800's often got lost in the forests and swamps of the Delta (as De Soto had more than two and a half centuries earlier), so many paddled up the rivers—the White, the Red, the Ouachita, the St. Francis, the Arkansas. Those leaving Arkansas Post, the first white settlement (near Back Gate), came out of the forest onto a treeless prairie, an irregular oval of flatness about ninety miles long and forty wide. The Grand Prairie.

Those who stayed and tried to break the soil were more often broken by it. Poke a stick into the prairie. You might just as well try to push a pencil through macadam. Beneath its sallow loam is a blue hardpan clay. Arkansas cement.

About the turn of this century the Grand Prairie was discovered to be a natural paddy. The Rock Island Railroad advertised this fact (and its land for sale) throughout Iowa and Illinois, and German-American farmers came here to grow rice. From a distance Stuttgart, Arkansas, looks like the Dallas skyline (pages 418–9). Up close it is a small town of huge grain elevators—the aorta of rice and soybean production. Arkansas rice goes into Campbell Soup, Quaker Puffed Rice, the Soviet Union, the Middle East, and the craws of a million ducks that invade the prairie each fall along with thousands of hunters.

Catfish swim on the prairie. So do goldfish. From farm ponds Arkansas produces more baitfish than any other state, and is second only to Mississippi in raising catfish.

On their farm near Carlisle (about 60 acres of rice, 400 of catfish) Ray and Dot Schroeder sink ten-gallon milk cans in their Grand Prairie ponds. The female catfish lays her eggs in a can, and before she can eat the eggs, the male bats her out and guards them with slow sweeps of his tail.

Last year Ray was voted "Catfish Farmer of the Year" by the Catfish Farmers of America, but his catfish were unimpressed. When Ray slides his hands into the milk cans to get eggs for Dot's hatchery, the males try to bite him. Big ones have knocked him flat with their powerful tails.

Catfish are to Arkansas, and much of the South, what salmon are to the Pacific North-

west. In Dumas, in Little Rock, in roadhouses all over the state—as well as in the Schroeders' kitchen—I became pleasantly addicted to crisp green onions, hush puppies, and fried fresh catfish, rolled in cornmeal and dropped in cast-iron pots of peanut oil hot enough to light a kitchen match.

A HIGHWAY FOR BARGES

The Arkansas River rises in Colorado and enters Arkansas at Fort Smith. It meanders between the folded Ouachita Mountains and the Ozark Plateau to Little Rock, then on to Pine Bluff between pine hills and prairie, across the Delta to bed finally at the Mississippi (map, right).

With a series of locks and dams (twelve in Arkansas) and the spending of 1.2 billion dollars, the U.S. Army Corps of Engineers has made the Arkansas navigable up to Tulsa, Oklahoma. Tugs and barges freight in steel and raw materials and take out grain and coal. Originally it was hoped that a million tons would be moving on the river by the time the project reached Tulsa, but almost three times that tonnage was recorded in the first year of operation (1969) and last year more than eight million tons.

For years virtually all bauxite (for aluminum) mined in the United States has come out of the ground near Benton, a light-industry town near Little Rock. The river project has made it possible to supplement the Arkansas ore with higher-grade South American and African ore, barged upriver.

TRUE GRIT AND A CASTING ROD

At Benton I encountered Tom Blackmon selling bass boats.

"OK, a 1975 Glastron bass boat in need of engine work, but it's still a good boat. Does the engine run?" The manager nodded. "It runs . . . twenty-eight hundred now, twenty-eight-twenty, now thirty, twenty-eight-fifty, trailer and all. . . ."

All across Arkansas you see pickups trailering expensive bass boats—sleek, low fiberglass silhouettes, less like watercraft than jet interceptors. In Arkansas, as throughout the South, bass fishing approaches a scientific, gadgeted mania: hydraulic pedestal seats, electric trolling motors and anchors, engines up to 200 horsepower, depth finders, temperature gauges, aerated live-fish wells, and casting decks covered in poly-turf.

Not everybody here bass fishes, but I met few who do not. To describe an afternoon fishing with Arkansans as relaxing is to be far wide of the truth, for in pursuit of the black bass they are grim and determined. And at tournaments they are fanatics—as I found out at one sponsored by the Arkansas Bass Association on Lake Ouachita, in the rocky hills near Hot Springs.

Before dawn, the dark harbor was growling with 350 fishermen and 175 bass boats. On the check-in barge, a man aimed a light into boat wells to be sure no one was going into today's tournament with yesterday's fish. The boats pitched and rolled, big engines rumbling, reminiscent of a naval invasion. The harbor twinkled with red and green running lights and, like small coal fires, the flickering orange blips of depth finders.

Lining up the first flight, Joe Wilson and George Schweer, officials of the tournament, weaved among the boats. A metallic red Mon-Ark, a blue and white Roughneck XL, an apricot Ranger with Apache stripe.

Jim Owens backed his white Bass Cat away from the pier as David Pryor, standing, threaded line through the rod guides. David Pryor is the governor of Arkansas, a man who prefers fishing at a more civilized hour and comfortable pace.

The fishermen, tensing, reversed their caps like baseball catchers. Some wore crash helmets, plexiglass visors, goggles.

"Let me have your attention!" Joe shouted into his mike. "Kill all your big engines!" In the momentary silence, Joe said a brief prayer, then the harbor thundered to life.

"Ease out, now!" Joe shouted. "No rooster tails: Ease Out!" A few eased out, but the boats were soon at flank speed, rooster tails spuming, and the harbor was a raging sea.

Cotton Cordell was not there, but his livelihood was: plastic worms, "crank baits" (Big O, Super Shad, Gay Blade), pistol-grip graphite rods. Carl Richey Cordell, Jr., is an Arkansas success story. As a boy, Cotton lacked money to buy lures, so he made his own. Cordell Tackle, Inc., in Hot Springs, is now among the largest manufacturers of fishing lures in the United States. The lead jigs are shaped in jewelry molds. The Plastisol worms come in delicious hues of raspberry, strawberry, and grape. Fishermen keep demanding exotic colors, so Cotton produces them: Hot Head Neon, Firebelly, Chameleon Green.

I once asked Cotton how many colors I needed to catch bass. "About three," he said, smiling. "Light, dark, and yella. That's all you need. But people want this." And he held up a nine-inch plastic worm, soft brown body and hot-pink nose, which in the light glowed iridescent purple. "See? It's gotta be 'purty.'"

TOO BUSY FOR TRIVIAL THINGS LIKE EATING

That evening the governor was exhausted. "I'll tell you," he said, "I was fishing with a serious fisherman. My hand got so tired casting and cranking, I was afraid I was going to throw that rod in the water. I offered Jim a candy bar. 'Unh-unh,' he said. 'I don't eat when I fish.'"

At the boat auction in Benton, Herbert Kimbrough bought chicken wire, coops, jars, tools, and plow handles. Kim, who grew up in Little Rock ("I'm just a curb-and-gutter man"), quit his floor-covering business to go back to the land, to a 20-acre farm near Menifee (page 407).

The day I drove out to see him, Kim was standing in his yard, an immense black man with arms like the limbs of an oak, in bib overalls, T-shirt, and work boots, his hair a trellis of small cornrows. He has a gentle, melodious drawl.

"Come on in. Would you like a beer? I was just fixin' to take a break. All I do around here is piddlin'. I'm tryin' to do what interests me."

We had a beer and walked across the field to his woods. Each morning Kim clears out brush and water moccasins, so his children, someday, can ride their horses through the oak and hickory. Kim's horses come when he whistles, a trick his grandfather taught him. Sundance, Kim's pit bullterrier, was in the woods. He studied my leg with the interest of a shark. I studied the woods for an exit.

ONE MAN'S DREAM

Kim prefers clearing brush to kneeling on floors. "I love that cutting wood. I can relate to that. That's real. Grandfather had him about 15 to 20 hogs behind the barns. I'm gonna have the same thing."

Kim owns some pullets and plans to get a milk cow, a goat, fish for the pond, and a used tractor. Near the house is an orchard and garden. For shade in the horse pasture, Kim has planted a few pine seedlings. He stores his hay in a '48 Chevy resting on blocks, his tools and saddles in his "Furniture and Floors, Inc." panel truck. The basketball backboard reads: "Zoned Industrial . . . Call John L. Burnett . . . 376-3811."

"When I have this place fixed up the way I want it, I'll start doing floors again to make some money. I got a long ways to go, but I come a long way."

Kim, who is 33, remembers a Little Rock of trolleys and busy sidewalks when he was "coming up" near the Rock Island Railroad tracks in the city's south end. Kim swam in a stock pond and swept out grain cars, selling the sweepings to a woman for her chickens and ducks. Blackbirds swarmed to the tracks for grain, and Kim flattened them under "falls," old doors propped up on triggered sticks. "We'd pick 'em and cook 'em up with peas all around. Birds, when you was coming up, was a real treat."

For years Little Rock swelled with whites and sharecropper blacks moving from the small towns and mechanized farms in search of jobs. In the 1950's whites began drifting to the suburbs—then flooded to them after the confrontation between Governor Orval Faubus and federal troops over integration of Central High School. Most downtown businesses have followed. Now, even at rush hour, downtown sidewalks are nearly empty, as workers slip down elevators to parking lots and drive home to the suburbs.

One day Kim drove me around Little Rock. We passed Central High School.

"In 1957 this street here was mobs," Kim told me. "You know what I mean? Broom handles, boat oars. When it got dark, you'd better do like the chickens—get near your roostin' place.

"This used to be an all-white area. Now it's all black."

We bumped through the industrial east end, where Kim and his wife, Kay, once lived. Kay is a social worker (master's degree) in Little Rock, commuting 78 miles daily. During the week their children live with Kim's parents in Little Rock and are bused across town to schools in white areas.

We passed War Memorial Stadium, where the Arkansas Razorbacks play football when they are in town; the University of Arkansas is in Fayetteville, in the Ozarks. If Arkansans have a unifying passion, it is their football team, the Razorbacks. Throughout the state, on bumper stickers, billboards, filling stations, laundries, you see pictures of a violent, charging red hog. Razorback Realty, Razorback Shooting Supplies, Razorback X-Ray Co. "Soooeeee!" Razorback country.

TRUTH IN A STATE'S NICKNAME

We drove through Sugar Hill, University Park—well-to-do black neighborhoods—and then into Pleasant Valley, Little Rock's Beverly Hills. Kim stopped the car.

"You see, black folks look at this and try to make it. They can't touch this out here. They want to feel like they're close, though. But they find themselves just work, work, work, grinding that nose down. They think they can kill that work. They're wrong. You can't kill work. I've seen work kill men. See that yardman? He's gettin' to it."

Years ago Kim's father couldn't wait to get out from behind the plow and mule and head for the city. Kim is going in the opposite direction, and gladly leaving the city behind. Kay has reservations about what they may be giving up, but they pull together.

"Whatever a man wants to do, whatever makes him happy, he can find it in Arkansas," Kim said. "Arkansas people will stop what they're doing and talk with you. They're friendly. You have car trouble on the interstate at midnight, knock on a door, and people will help you. They'll do that in Arkansas. Arkansas is the 'land of opportunity.' It's been that for me."

Arkansas has been that for Junior Cook, too. He pulls drum, buffalo, carp, catfish, and alligator gar out of the Arkansas River in trammel nets and sells them at his market in Pine Bluff.

Sport fishermen refer to gar and carp as "trash fish," and most commercial fishermen in Arkansas throw back everything but the catfish and buffalo. Junior keeps everything but the turtles.

"Y'know, a gar don't eat no dead bait," he says. "He don't eat no chicken liver like a catfish. We get $1.30 a pound for catfish and 60 cents a pound for gar. Gar's not bad eating."

Junior is a pleasant, almost whimsical man, and his anger is slow to rise—except

when he sees poachers using the magnetos of crank telephones to shock fish to the surface. When poachers put wires in the river and "telephone" fish, Junior goes to his house trailer and telephones the law.

Junior is 53 and is content in his native Arkansas. "I have been around quite a bit," he says, "different countries while I was in the Army. I do like to go to other places and see other things. But this is where my old den tree is. They say an old coon likes to come back and dip in his den tree. Arkansas has been good to me. I believe I can find enough to do here, and then some."

COMPETING WITH TELEVISION'S LURE

Jim Hatch came to Arkansas because here he could make a difference. Jim is from Illinois, by way of Julliard. He plays bass with the Arkansas Symphony and, like the other string players, teaches strings to schoolchildren who until recently played only band instruments. Jim is impressed with their musicianship. He finds the attitude toward art more genuine here than in New York City. Jim is tall, slender, 31, and adroit with children.

"OK, tonight when you're watching 'Charlie's Angeles,' I want you to cross the strings like this. . . ."

"I don't watch 'Charlie's Angels.'"

"OK, 'The Waltons,' whatever. . . . Who watched Rostropovich last night?"

"Who's that? I watched 'Charlie's Angels.'"

For years opportunity was what Arkansas had little of, squeezed out by drought, the Depression, the overlogging of the Ozarks. By World War II, Arkansans were streaming out of the hills and the Delta, heading for the aircraft plants in California.

In his youth Orval Faubus followed the strawberry harvest to Michigan, thinned apples and cleared slash in Washington, hoboed in Chicago.

"I slept in that fine park on Michigan Avenue," he told me, "and a policeman would come through every day at 4 p.m. and blow his whistle to move us out of sight so the hoi polloi could walk by on their way to the World's Fair. The next time I stayed in Chicago, I was governor, and I could afford to stay in a suite."

BRINGING JOBS TO ARKANSAS

The irony was not lost on migrating Arkansans—Faubus among them—that their reputation as industrious workers got them jobs not in Arkansas but outside it.

In 1955, with the state almost drained economically, Governor Faubus appointed the late Winthrop Rockefeller to the newly formed Arkansas Industrial Development Commission. What Rockefeller may not have known about industrial development, he more than made up for in his influence with the industrialists. As chairman of AIDC, he helped organize (and sometimes fund) an aggressive sales campaign to attract industry to Arkansas. AIDC compiled encyclopedic facts about the state and, particularly, the towns where plants might best locate. The communities looked around at their assets, vacuumed, set the table, and switched on the porch light. Forrest City got a hoist-manufacturing plant, Baldwin started building pianos in Conway, and soon neighboring states were looking over the fence with envy.

In the years since AIDC was established, Arkansas has reversed its declining population (now more than two million). Companies have invested four billion dollars in building and expanding 3,500 plants here. A fourth of all Arkansas workers now hold manufacturing jobs. Lumber, paper, furniture, electric motors, buses, food processing, aircraft components. Of this country's 500 largest companies listed by Fortune magazine, 120 have plants in Arkansas.

Delmar Middleton is not in the Fortune 500. Nor—were there one—would he be in a Fortune 500,000. Unlike International Paper, Weyerhaeuser, Georgia Pacific, and the other large companies that own almost four million acres in Arkansas and dominate its timber industry, Delmar operates a small mill, a 440 Corley, on a few acres in the Ozarks. He uses a 54-inch circular saw to cut oak, hickory, and gum into railroad ties, lumber for grocery pallets, and bark slabs for charcoal.

More than half of Arkansas is commercial forest, and a fourth of all Arkansans in manufacturing are employed by the forest-products industry. Peckerwood mills—as those like Delmar's are called in this region—are remnants of the past, when timbering was done mostly by small entrepreneurs scattered about in the woods. The days of the whipsaw, the sash saw, the gang saw are gone. So are most of the Delta hardwoods (now soybean fields) and more than a million acres of Ozark forest (now cattle pastures). So too, practically, are the likes of Delmar Middleton.

"It ain't much," he says, "but it's a git by."

Half the furniture manufactured in the state is made around Fort Smith, as are cups by Dixies, appliances by Whirlpool, peanuts by Planters, and baby food by Gerber. Herman Udouj (you-dodge) started Riverside Furniture in 1946 with a bottle of glue and some orders for baby furniture. He's now chairman of the board of the largest furniture company in Arkansas, where nostalgia is put into "nostalgia furniture" with whacks of a chain. The Udoujes own 200 Thoroughbreds, which they race at Oaklawn (Hot Springs) and other tracks around the country. The bronze front doors of their elegant home in Finanna Hills, a Udouj development overlooking Fort Smith, weigh half a ton.

Unlike the Deep South of the Delta, Fort Smith is a town of the West—once the end of the rope (Hanging Judge Isaac Parker's) for outlaws who terrorized western Arkansas and the adjoining Indian Territory. "It's a solid town," says Herman. "Between them, a husband and wife at our plant earn maybe $17,000, have a little farm, raise their own vegetables and meat, but they'll have two cars and a good bass boat. It just doesn't take as much to live here."

CRAFTSMANSHIP FOR SALE

Not the least of the state's attractions for industry is the attitude toward work. "The work ethic," Governor Pryor says, "is extremely strong here. In Arkansas workmanship means something."

Arkansans make everything from turkey calls to violins. At his home in Russellville, Jimmy Lile makes knives: dropped-point hunters and skinners, Arkansas toothpicks, Bowies, folding knives that close with the click of a Rolls-Royce door. Chairman of the Knifemakers League of Masters, Jimmy shapes handles out of wood, India stag antler, ivory from elephant tusks (which he keeps in a bank vault). He grinds the blades out of D–2 high-carbon, high-chrome tool steel, and heat-treats them in a Thermolyne furnace. He sharpens the cutting edges on Washita and hard Arkansas oilstones, mined by one of the state's oldest industries from the uplifts of novaculite in the Ouachitas, a stone so abrasive that it quickly wears out splitting mauls, quarrymen's boots, and the cleats on huge crawler backhoes. Diamond saws are used to cut this stone. (Diamonds come from Arkansas, too, from a state park near Murfreesboro. Find one, and it's yours.)

In 1946 Paul Klipsch found space in a shed in Hope to make loudspeakers. Klipsch now has 90 employees and lots of space. His Klipschorns, the woofers of which are built of nine-ply birch from the U.S.S.R., are considered by many to be the finest loudspeakers in the world. Made in Arkansas.

Millions of chickens are made in the Ozarks. Hatched after World War II, the chicken industry now employs thousands of Arkansans, particularly in the Ozarks, where hills of hardwood are being killed off with herbicides, cleared, and fertilized with chicken litter to grow grass for cattle.

Last year Tyson Foods, Inc., of Springdale grossed about 225 million dollars. Each morning red Tyson buses take some 300,000 chicks from their hatcheries to contract farmers all over the Ozarks, who raise them to broiler size.

CHICKENS BY THE FISTFUL

When the sun goes down, Jimmy Graham goes into chicken houses and snatches thousands off their feet. He heads one of Tyson's 15 catching crews. Jimmy is slight of build, but he has the grip of a blacksmith. Tonight I watch him catch chickens at a farm near Tontitown, an Italian settlement where grapes are grown. A front-end loader ferries empty coops from flatbed trailers to the chicken house and returns, red-lighted and grunting, with coops full of confused chickens.

The chicken house—the length of a football field—is bathed in dim blue light, enough for the catchers to see, but not enough light to arouse the chickens, which squeeze together in a warm, sleepy sea of white. The air is full of dust, feathers, ammonia, and the muted "puks" and "yeeoks" of 19,000 contented chickens. Like umpires dusting the plate, Jimmy and his catchers bend at the waist, grab chickens by the legs, invert them, and rapidly stuff the legs between their thumbs and fingers. Lugging nine birds from his left fist and three from his right, Jimmy stuffs them into a coop and grabs more. "Used to be, twenty thousand chickens was a hell of a night," he says. "Now twenty thousand is nothing—now it's about 35,000." Don't arm wrestle with a chicken catcher.

The Ozarks have traditionally been hills of hard times and ticks, of row cropping and timbering for barrel staves, then emptiness when the trees went down and the soil played out. Ozark people still look upon their hills as "a good place to live, but a tough place to make a living."

In the fall Arthur Gunter picks apples in Missouri, and in the winter he traps coon, bobcat, and coyote in the Ozarks. On his farm near Pelsor he has some cows and hogs, and he plows with a mule. He cooks and refrigerates with butane, heats with a wood stove, and lights his house with Coleman lanterns. Arthur, who is 54, grew up not knowing how to hunt for turkey and deer, and neither did his father. In these devastated hills there weren't any.

Now deer, turkeys, and some bears are returning to the Ozarks. One morning recently Arthur hunted for a turkey, shot it, found some wild ginseng, picked 80 dollars' worth, went home, and plucked the bird. When I walked into his yard, he was stretched out on the seat of his pickup, shoes off, doors wide open, listening to the ball game on the radio.

A NEW LIFE IN THE HILLS

Tourists come to the Ozarks to see the Passion Play at Eureka Springs, the Ozark Folk Center at Mountain View, or to nose around the hills trying to photograph people like Arthur Gunter. Many want to return—permanently—and increasing numbers are doing just that. Land in much of the Ozarks can be bought for a few hundred dollars an acre, and state and local taxes are the lowest per capita of any state in the U.S. Between 1970 and 1975, about 39,000 more people moved into the Ozarks than moved out. They come out of snowbanks and traffic in Chicago to live in retirement communities and to fish. Many are homesick natives returning from California. Some are dropouts from the '60's, back-to-the-landers who build lofted cabins of battened green oak with heavy doors like safes, live off the land (and their own kind of grass), and learn why so many natives gave up and left: More self goes into these rocky hills than subsistence comes out.

When Lewis Grabbe and his wife came to the Ozarks, near Rushing, eight years ago, Lewis knew nothing about masonry. But stone by stone, year by year, he has been building a house to leave to his children and grandchildren. Lewis Grabbe is 55 years old, scarred, and muscular. His big fists are gnarled from fights in the Navy (boatswain's mate) and lifting stone in the Ozarks.

Lewis removes by hand only enough trees to let in the sunlight needed to grow pasture; his 42 acres look like a London park. In a grove of oak, persimmon, and hickory is a compartmented bathtub he built of stone: a dry well at one end, where he stands and scrubs, a fireplace at the other to heat water. He exudes a spiritual joy about hard labor.

"They're hauling stone out of Stone County like you wouldn't believe," he says. "Some people will say, 'That stone's in my way.' But I look at it as something that's been here for eons. I wanted to build my own house from materials off the land. I face my house east, 'cause that's where all our learning comes from. I want to put my house square with the world. Maybe I'm a little odd, but I appreciate what God's done for me."

SEARCH FOR A NEW BEGINNING

Some miles away Cindy Berman stands at the entrance to her first Ozark home, looking across a canyon to the green hills beyond. The Ozarks, like the Ouachitas to the south, are intimate hills, not awesome mountains, and one must spend time here to fully absorb their beauty. Cindy's single piece of furniture, where I sit, is a cot of lashed-together pine branches—the first functional product of her hands. This dwelling, like Lewis Grabbe's, is of Ozark stone, but no human hand shaped it. Cindy Berman came to Arkansas from Long Island three years ago with only a knapsack and an issue of Mother Earth News. In this cliff is where she lived for the first nine months. In a limestone cave.

Of those like Cindy who try to live off the Ozarks, probably far more leave than persevere. (A master's degree and a tree house, many natives say.) Most of them find loneliness, fear, and hunger. But Cindy also found herself, and that's what she moved here for.

SHEDDING SOME ACADEMIC BLINDERS

Cindy is 26, tall, has thick eyelashes, brown hair, a full mouth, long, strong arms and legs, and an enthusiasm for life that would astound Norman Vincent Peale.

"When I came down here, I just wanted to sit by this creek and be by myself. In a covert way I thought I was better than these people. Boy, oh boy, was I wrong. The smartest people are the self-educated ones. Now I see that plain old life experience is the real education. I'm a whole lot more humble than I ever was."

Cindy now lives in a cabin she built of pine from her hillside. She got her door and windows from a dump. Her wood stove cost $35. Her table is a telephone-cable spool on end. She carries her water in buckets from the creek far below. Cindy studied to be a teacher, but she has had difficulty finding work in the Ozarks, and what she has found, like catching chickens, has not held her interest.

She barters for things, for labor, for food. She grows vegetables and spices, and sun dries apples, tomatoes, and watermelons, which shrink to a leatherlike candy. Cindy exists on about $500 a year.

She no longer invites friends down from New York, and enjoys going there even less. Her city friends belittle her way of life and try to talk her out of it: "You're a schoolteacher—you ought to be teaching."

"Even some of the natives can't understand why I enjoy chopping wood with an ax," she says. "They'd buy a chain saw. What I enjoy as a simple, beautiful life, they see as poverty.

"I've just gained faith in my ability to do anything I want. I grew up believing you learn everything from a book. Now I learn by doing, or watching someone else do it."

Cindy put her finger on Arkansas. "Things around here have different values than dollars and cents. These people really know how to make do."●

RESULTS OF FIRST DISTRICT QUESTIONNAIRE ON PROPOSED PANAMA CANAL TREATIES

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. ALEXANDER. Mr. Speaker, late last session, I sent a detailed questionnaire on the various provisions of the proposed Panama Canal treaties to 172,000 households in the First Congressional District of Arkansas.

With the able assistance of junior high and high school civics and government students from throughout the 21 counties that make up the district, the 10,444 responses (6 percent) have been tabulated. I would like to share with my colleagues the tabulation of the responses I received:

QUESTIONNAIRE ON PROPOSED PANAMA CANAL TREATIES

(Prepared by the Congressional Research Service at the Library of Congress.)

1. In recent weeks President Carter announced that the United States and Panama have reached agreement on two new Panama Canal treaties.

a. Have you read or heard about the proposed new treaties? Yes, 94 percent; no, 6 percent.

b. Have you talked to friends about the matter? Often, 54 percent; seldom, 37 percent; never, 9 percent.

c. Does the issue interest you? Not at all, 5 percent; slightly, 18 percent; very much, 77 percent.

2. The 1903 treaty with Panama granted the United States extensive rights to operate the Panama Canal "in perpetuity". Proponents of the new treaties, the Republic of Panama, and most of the states of Latin America argue that the "in perpetuity" clause is out of keeping with present times and that the United States is mature enough to accept a new arrangement.

a. Do you feel the treaty rights granted in 1903 and which run in perpetuity, or forever, provide a sound moral basis for the United States to retain full control in the Canal Zone? Yes, 79 percent; no, 21 percent.

b. Do you feel a renegotiation with Panama is possible, provided that American interests are protected? Yes, 54 percent; no, 46 percent.

3. While the construction of the Panama Canal was an engineering triumph for which all Americans can be proud, the Administration argues that the use of the Canal, not ownership or control, is the prime interest of the United States at the present time. Our last four Presidents (Johnson, Nixon, Ford, Carter) have felt that a new treaty with Panama is the best way to insure continued, uninterrupted use of the Canal.

a. In your opinion, is the Panama Canal vitally important to the United States? Yes, 90 percent; No, 10 percent.

b. Do you feel that the use of the Canal is more important than control of the Canal? Yes, 41 percent; No, 59 percent.

c. Is the Canal important enough, in your opinion, to justify the use of military force, if necessary, to maintain our present position? Yes, 79 percent; No, 21 percent.

4. While opponents of the new treaties argue that the United States exercises sovereignty in the Canal Zone, proponents argue that the United States only has treaty rights to operate and defend the Panama Canal in a 500 square mile Canal Zone which bisects the Republic of Panama.

a. Do you consider the Canal Zone part of the United States? Yes, 68 percent; No., 32 percent.

b. Do you see anything to the argument that the presence of the United States Canal Zone in the midst of the Republic of Panama is similar to other colonial arrangements? Yes, 39 percent; No, 61 percent.

5. Under the new Canal treaty, the United States will retain primary responsibility for the operation and defense of the Canal until December 31, 1999. During this transition period, the Administration argues that Panama will be trained and that the Panamanians will hire or acquire the necessary skills to efficiently operate the Canal.

a. Do you feel that twenty-three years is a sufficiently long period to prepare Panama for the responsibility of the operation of the Canal? Yes, 49 percent; No, 51 percent.

6. The neutrality treaty will give the United States the permanent right to defend the Canal from any threat for an indefinite period.

a. Do you feel the neutrality treaty will adequately protect the United States' right to the non-discriminatory use of the Canal? Yes, 27 percent; No, 73 percent.

b. Do you feel the neutrality treaty will deter any intentions by foreign aggressors to play a role in Panama? Yes, 29 percent; No, 71 percent.

c. Do you feel the neutrality treaty will be adequate for the United States to take military action, if necessary, against any foreign aggressor? Yes, 35 percent; No, 65 percent.

7. The new Canal pact will provide Panama compensation from Canal tolls of between $50 and $70 million per year. While this is a substantial increase from present payments, none of it will come from appropriated funds. Since current toll fees will not generate sufficient revenues to reach the compensation level to Panama, it is expected that tolls will be increased to meet this requirement of the treaty.

a. Do you feel the compensation to Panama is: Too small, 3 percent; about right, 26 percent; too much, 30 percent; far too much, 41 percent.

Opponents of the treaties argue that Panama is a tiny country, run by a dictator, which is incapable of operating the Canal. Proponents argue that Panama has been friendly to the United States over the years, that Panamanians have never attempted to close the Canal, that three-fourths of the Canal Company employees are Panamanians, and that Panama has every interest in keeping the Canal open. Proponents argue that Panama can be relied upon to fairly operate the Canal.

a. Do you see Panama as a country that is unfriendly to the United States? Yes, 49.8 percent; No, 50.2 percent.

b. Do you fear that Panama might attempt to close the Canal to U.S. use? Yes, 72 percent; No, 28 percent.

c. Does Panamanian insistence on a new treaty cause you to have reservations about the negotiated treaties? Yes, 78 percent; No, 22 percent.

9. Overall, what is your opinion of the two new Panama Canal treaties?

Strongly Favorable, 6 percent.
Favorable, 16 percent.
Neutral, 8 percent.
Opposed, 17 percent.
Strongly Opposed, 53 percent.

10. Do you consider this questionnaire fair and unbiased?

Yes, 88 percent; No, 12 percent.

*Based on 10,444 responses from citizens in the First District.●

FREDERICK SONTAG MAKES CONSTRUCTIVE LAW PROPOSALS IN NEW YORK TIMES

HON. GILLIS W. LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. LONG of Louisiana. Mr. Speaker, the American Bar Association recently held its annual meeting in New Orleans and the need for better relations between the legal machinery and individual citizens struck a responsive chord among some of the more farsighted observers of our courts.

A graphic example of how an individual citizen can help make the legal system more effective is pointedly illustrated by Frederick H. Sontag's article on the op-ed page of the New York Times, New Jersey section, February 26.

From his extensive service in both the private and the public sectors, Mr. Sontag knows that mutual respect and improved treatment of the citizen are necessary for strengthening our legal system in the years ahead. His article contains numerous good, specific suggestions and the editor of the New York Times thought the piece was important enough to give it top location and fine art work on the editorial page.

I hope my colleagues, the media, and men and women who want to improve our system of law will weigh carefully the type of citizen reaction which Frederick Sontag as a public affairs and research consultant brings to the situation he describes. Even though he is not a lawyer, he served for 14 years as the consultant to the general counsel of a legal department, so he knows where improvements are possible.

The sympathetic response of Chief Justice Richard J. Hughes is further indication that citizen interest and awareness can generate a meaningful dialog between citizen and public official that leads to better understanding and hopefully to better government as well.

The article and Judge Hughes' letter follow:

THE LAW IN ACTION—ONE MAN'S NIGHTMARE

(By Frederick H. Sontag)

I was in the gallery of the State Legislature in Trenton when Chief Justice Richard J. Hughes of the State Supreme Court asked for an $8,500 pay increase for all judges.

I thought perhaps he might want to add a new section to his printed text concerning the needs of witnesses and jurors; if Mr. Hughes and the legislators would be willing to tie these two considerations together, a stronger legal machinery might very well result.

Let me tell you, Mr. Hughes, about the latest example of New Jersey law-in-action that I know of.

On the afternoon of last Dec. 3, a Saturday, a tall, thin gentleman in civilian clothes came to my apartment and presented me with a summons to appear at 9:30 A.M. the following Monday at the Essex County Courthouse complex in Newark, specifically before Grand Jury No. 2042B in Grand Jury Room No. 2. I think you will agree that that isn't much time for a professional person to rearrange his or her schedule, however willing he or she may be to lose a day's pay.

But why did they want me? Because on Oct. 21 my new, carefully locked car had been broken into, along with six others, in the locked garage at my apartment house. The thief had used a crowbar, or something like it, to force open the right front door.

I thought that master keys or coat hangers were used for such purposes, but I guess that was when you and I were youngsters. I also thought that $2 was a lot for most working victims to have to pay, as I did, to get a Xerox copy of the police report.

The car was finally repaired by Nov. 4, after all the insurance company approvals were obtained.

You can therefore imagine my surprise when I was suddenly served with a summons, which, incidentally, had no telephone number one could call to get more information.

(ITEM: Mr. Hughes, you might tie into your pay-increase request one for new forms that list the names of persons to be contacted and their telephone numbers, including ones for weekends and evenings, if we are supposed to help the courts on such short notice, as well as a specific address of where one is supposed to show up.)

The summons server finally said that he could give me the name and number of someone to contact on Monday, if I so wanted. He asked that working on Saturday afternoons wasn't something that he especially wanted to do.

I modestly expressed the hope that he was being properly paid for his trouble, at the same time reminding him that I would get no pay from anyone on Monday, not even expense money.

I did get the man's name, and he finally showed me his identification. He reportedly left another summons at a wrong apartment.

(ITEM: So long as summonses are being delivered to people unexpectedly, court officers might at least wear badges, which would serve to reassure us a little.)

During the weekend, I faithfully dug out all the documents about the crime and Xeroxed a spare set for the grand jury's use. I called my insurance agent and told his answering service that the courts had summoned me.

I carefully wrote out my notes on possible answers I would be called upon to give in court, and also saw that the insurance company, with its deductible, would repay me less than $50.

I figured out, too, what the whole thing would cost in lost time and effort, in addition to repairs, calls, driving around, and so on. It came to more than $1,000.

Early Monday morning, I called the jury officer, since it was snowing and I thought I might be late. He said not to worry and that, in view of my questions on what this was all about and shortness of time, I would not have to appear if it would be a genuine hardship to do so.

I made it very clear that I was not trying to bug out of a court appearance, adding that I felt most legal officers deserved the legitimate cooperation of citizens, especially those witnesses whose possessions had been injured or taken.

The jury officer was very courteous, and I took his name for our mutual use. This man was one of the few persons I contacted all day whose name was easily available; others did not wear badges or give their names.

(ITEM: Let's have all court officers wear identification tags so we can address one another courteously.)

I took the earliest buses to Newark I could, snow, sleet and rain notwithstanding. It took three different buses to get me there.

(ITEM: Transport of New Jersey is an expensive organization and often lacks even timetables. You might compare the high salaries it pays with those of judicial officers, since it's all really the taxpayers' money.)

No one I asked knew which of the big new buildings I should go to, and the summons certainly didn't give any clue. I finally located the right building and noticed its parking lot. I ask whether, had I driven to Newark, I could have parked my car in the court's lot.

(ITEM: The fact that there are separate lots for jurors, which I was not, and witnesses, which I was, was never made clear until I got inside the "holding area" and had plenty of time to interview people. The location of the lots, and the rights of legitimate persons to park there, might be on forms that the judges, County Clerk and the Deputy Clerk of the Superior Court could agree on—and before the judges are granted their pay raise.)

Once inside the building, I showed the guard my form, and he said he thought the place I was supposed to go was on the fourth floor, but that he wasn't sure. When I got to Holding Room No. 400, I experienced another shock.

The man took my form and said I could wait. That I knew, but where were the words of greeting, or welcome, or any explanation? The room was totally without signs.

(ITEM: I suggest that signs be put up listing where the bathrooms are, where one could get coffee or milk—I got some for a woman with a small child who couldn't get it herself—the location of telephone booths, whom to ask for information, maybe even a bulletin board indicating what cases were being heard—where. Some reading materials about the courts and the legal system also might be provided, if only to help jurors and witnesses cope with the emotional problems of these court appearances.)

During the wait, Mr. Hughes, I overheard some pretty frank talk among a few of the police persons, and this might be the subject of a private talk between us another day.

Suddenly, a list of persons who were "excused" was read out, and I heard my name among them. I asked the men at the desk what had happened and they said they didn't know.

I asked when I might find out, and was told maybe in 10 days or so.

SUPREME COURT OF NEW JERSEY,
Trenton, N.J., February 28, 1978.

Mr. FREDERICK H. SONTAG
South Orange, N.J.

DEAR MR. SONTAG: I read with concern and sympathy your message to me in Sunday's Times, "The Law in Action—One Man's Nightmare." The points you make are perfectly valid. So far as the Judiciary can act to cure these defects, we shall try to assert more control on the bureaucratic maze. My first step will be to place copies of your article in the hands of Essex County Assignment Judge Arthur J. Blake and the 11 other Assignment Judges, who represent the Chief Justice in local administration in the 12 New Jersey vicinages. Each will be asked to prepare a point-by-point report dealing with the deficiencies and suggestions mentioned in your article. I will then meet with them within a month, after these reports have been submitted and analyzed. We shall, like the Avis Company, "try harder."

In the 1947 Constitution the people (by an unprecedented plurality, 653,096 to 184,632) vested heavy administrative responsibility, expressed as follows: "The Chief Justice of the Supreme Court shall be the administrative head of all the courts in the State." In 1948 our first Chief Justice Arthur T. Vanderbilt, pledged the full use of this power:

"We of the Supreme Court are determined to a man to give the State the finest judicial organization and administration within our power ***."

Yet the administrative and rule-making power, while producing a flexibility which is helping the court system function, indeed survive, does not extend to the providing of needed resources. The latter depends upon the Legislature, Governor and County Freeholders. My November Legislative Message, copy enclosed, points out the massive, frustrating overload of litigation on the courts. It sought a pay increase equal to that earlier granted federal court trial judges, as well as other resources including a Judiciary computer to enable us to cope. On January 10, 1978, the Legislature granted an $8,000 increase, which hopefully will keep on the bench some of our very fine judges who had thought of retiring. The question of other resources hangs in the balance pending Appropriation Committee study.

The fees for jurors and witnesses are fixed by the Legislature and are beyond the control of the courts. Of course they should be increased to reduce the hardships you mention—if someone can find the money.

I appreciate your citizen concern in the administration of justice. At any convenient time when you wish to discuss it further, I will welcome a visit to my chambers in Trenton.

Respectfully,

RICHARD J. HUGHES,
Chief Justice.●

AMERICAN LEGION HONORS JULES FALCONE OF WAYNE, PA.

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. SCHULZE. Mr. Speaker, my colleagues, it gives me great pleasure to bring to your attention the accomplishments on behalf of our veterans of one of my constituents, Jules Falcone, now serving as commander of the 8th district of the American Legion, which includes Chester and Delaware Counties in Pennsylvania.

Jules is my friend, but more importantly, he is and has been a friend to all veterans of our armed services.

Jules served in the U.S. Army from July 1941, through September 1945, with 2½ years of that time spent in the Alaskan-Aleutians theater. Returning to civilian life he immediately joined Anthony Wayne Post of the American Legion in 1945 and remained active in that post until 1960 when he transferred his membership to the Bateman-Gallagher Post 668 of Wayne. As a member of those two posts, he served in every post position.

At the county level, he served as commander in 1974–75, and as chairman of legislative, countersubversive and public relations committees and as editor of the American Legion Post.

Prior to becoming commander of the 8th district, he served as deputy commander, chairman of the countersubversive activities committee, adjutant, and as a delegate has attended all national conventions since 1968. At the national level he has served on both the countersubversive and legislative committees.

Jules, however, has not confined his efforts and talents to serving veterans. He has been actively engaged during these years in the Boy Scouts of America, Knights of Columbus, Holy Name Society, Radnor Fire Co., Italian-American Club of Wayne, Voiture 518 of the Delaware County Forty and Eight Society, the Concerned Citizens of Radnor Civic Association, Radnor Township Memorial Day Bicentennial Committee, the United Way, and numerous business and professional organizations.

He is now retired from the Federal civil service, having served as supervisor at the Germantown District Office of the Social Security Administration.

His interest in and devotion to the cause of veterans has been shared by his family. His wife of 32 years, the former Ellen DaBundo of West Chester, has served as president of the auxiliary of Post 668, and his son, Flavio, who is a veteran of service during the Vietnam conflict, has also served as commander of Post 668.

On Saturday, March 25, his comrades in the 8th district of the American Legion will gather at the Ramada Inn in Essington to honor Jules at a testimonial dinner.

I honor Jules Falcone of Wayne, Pa., here today.●

RHODESIA—TEST FOR CARTER

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. LAGOMARSINO. Mr. Speaker, I have been pleased with the turn of events in Rhodesia and believe that the internal settlement reached by Ian Smith and the three moderate black leaders deserves U.S. support. However, I am most concerned about the Carter administration's attitude toward this settlement.

I would like to bring to the attention of my colleagues the following editorial by William Randolph Hearst, Jr. Mr. Hearst examines the choices available to the President as he deals with this African issue and concludes that, if the President does not order a U.S. veto of the appearance of Nkomo and Mugabe before the Security Council unless Ian Smith and Chief Chirau are also allowed to attend, then the President will "have betrayed the principles of American democracy."

The article follows:

RHODESIA—TEST FOR CARTER

President Carter this week faces a crucial test of his capability for leadership.

It will be a test of his statesmanship in the conduct of America's foreign policy.

It will be a test of his commitment to America's traditional dedication to the principles of democracy and self-determination for people.

It will be a test of his adherence to the charter of the United Nations, which commits its members not to interfere in the internal affairs of other countries.

The issue will be this week's special debate at the United Nations Security Council on Rhodesia.

A move is afoot to sabotage the settlement Rhodesian Prime Minister Ian Smith has reached with the leaders of that country's three major black political parties. That agreement would transfer power at the end of this year to the population's black majority after nearly 90 years of white rule.

The settlement represents a triumph for sanity and moderation and democracy. It provides for establishment of a multi-racial society that will give Rhodesia's 6.4 million blacks political control while promising reasonable protection for the economic interests of the 268,000 whites who, until economic sanctions were imposed in the 1960s, had made the country one of the most prosperous in Africa.

Now, under the sponsorship of black dictators who rule most of the African nations, an attempt will be made to get the United Nations to denounce the settlement. Their idea is to refuse to recognize the new government that would be established by the Rhodesian people, black and white, in free elections.

The black dictators will be showing they don't stand for majority rule in Rhodesia any more than they do in their own countries, where most of them have imposed by brutal, and in many cases, barbaric methods, military or one-party rule.

What is particularly shocking about this week's scheduled Security Council debate is that Prime Minister Ian Smith, whose patience and perseverance brought about the settlement with Rhodesia's moderate black leaders, is being denied the opportunity to participate in the debate. The British government has taken the position that he cannot come to the United States to address the Security Council because his government, having declared its independence of Great Britain in 1965, is illegal.

Please remember that Yasir Aarafat, the ruffian-leader of the Palestine Liberation Organization which is not a government and therefore not a member of the United Nations, was allowed to strut up to the General Assembly podium with a pistol strapped to his hip. Now unbelievably Prime Minister Smith is barred from participating in a debate concerning the destiny of his own country.

The British government has invited the two terrorist leaders of the so-called Patriotic Front, Joshua Nkomo and Robert Mugabee, to attend the Security Council debate along with two of the black leaders—Bishop Muzorewa and the Rev. Sithole—who concluded the agreement with Ian Smith. Not only has Smith been ignored, but so has the third black signer of the settlement, hereditary tribal Chief Chirau, a senator in Rhodesia's parliament who represents all the tribes throughout the country, and who is estimated to have as much popular support in Rhodesia as Nkomo and Mugabe combined.

Nkomo and Mugabe, operating from neighboring Zambia and Tanzania, are trying to terrorize Rhodesia's black population into cooperating with the misnamed "Patriotic Front." They are demanding that Muzorewa and Sithole be barred from addressing the Security Council and that they have the sole right to do so.

Both Nkomo and Mugabe, armed and financed by Russia, have a record of heinous atrocities against blacks and whites in Rhodesia.

Both have rejected invitations from Smith and the moderate black leaders to renounce terrorism and participate in free elections.

Both have demanded that Britain give them, in effect, control of Rhodesia before elections are held—a demand based undoubtedly on the estimates they would poll less than 15 per cent in free elections.

Now this is where the crucial decision facing President Carter comes into the picture. The Carter administration is still insisting that Nkomo and Mugabe must be brought into the settlement.

British Foreign Secretary David Owen, who originally maintained that position, is backing away from it. He announced in London

this past weekend that the British government might have to accept the settlement if it could be shown through fair and free elections that the Rhodesian people approved of it.

If President Carter does not support that position; if he does not instruct Ambassador Young to veto the appearance of Nkomo and Mugabe before the Security Council unless Prime Minister Smith and Chief Chirau also attend, then he will have betrayed the principles of American democracy.●

ANNIVERSARY OF ST. PATRICK'S PARISH

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Ms. OAKAR. Mr. Speaker, it is fitting on this St. Patrick's Day that this year the people of Cleveland will be celebrating the 125th anniversary of the founding of St. Patrick's Church, the second oldest parish in the city. When St. Patrick's was built back in 1853 under the leadership of Father James Coulon, no one could have foreseen that this church would become a haven not just for Irish immigrants, but for displaced and impoverished people of all faiths and nationalities. Father Coulon erected his church with the bricks of faith and held it together with the mortar of love. And today we commemorate the achievement of this heroic priest and pay tribute to the church which still stands as a living testament to one man's courage and faith to provide shelter for the homeless Irish immigrants who fled their famine-ravaged land in the late 1840's and early 1850's.

When we speak of St. Patrick's, we speak not only of history and tradition, but we speak also of faith, of love, and of courage. Especially courage. Imagine, if you will, what it must have been like crossing a vast ocean on a masted schooner in the 19th century. Frightened families from County Cork and County Armagh, driven from their home and land because potatoes rotted in the earth and would not grow, huddled together in cramped and open quarters with all their worldly belongings stuffed into three cloth sacks. Turbulent waves lashing at the ship's sides and splashing on the wooden decks, the howling winds of sudden rainstorms, the infinite spreading darkness of the night sky, the fevers and pneumonia from exposure to the cold, the sickness and diseases from a diet consisting mainly of stale bread and water, and all the while, the steady, knowing, dreading drift toward a strange land in a far part of the world. But these people endured and survived this suffering, and came to this country impoverished in material goods, but immeasurably enriched in spirit from the experience of having lived through the horrors of poverty and starvation in Ireland to sail through the dangers of an ocean crossing in search of the promise of America.

Many Irish immigrants came to Cleveland hoping for the chance to begin their lives anew, and they turned to the church to help them in this effort. The jobs were often hard to get, but the work that was available demanded strenuous physical exertion and usually paid very little. Most of the men and boys worked on the docks down by the old riverbed or at "Irishtown Bend." Up and down inclined wooden ramps, they pushed wheelbarrows loaded with iron ore shipped into Cleveland from the mines at the western end of Lake Superior. The backbreaking work of these men and boys helped to build the steel mills that would become a major industry for Cleveland. The Irish families whose fathers and sons worked on the docks settled together on the bluffs above the Cuyahoga River and in that day developed into a close-knit community in which St. Patrick's Church played a leading role.

As more and more immigrants flooded into Cleveland during the 1850's and 1860's, St. Patrick's increased in size accordingly, so that in 1871, St. Patrick's School alone had 950 pupils and the congregation numbered 2,100 families. In time, St. Patrick's would expand into a larger church on a piece of land facing Bridge Avenue, but only after the death of Father Coulon in 1875 and after the depression which lasted from 1872 to 1879. A new pastor would arrive, Father Eugene O'Callaghan, and his dedication would inspire the parishioners of St. Patrick's to travel by horse-drawn wagon to Sandusky to cut stone from a quarry and haul it back to Cleveland. In that way, enough stone was quarried to build the new St. Patrick's.

Thus was the present structure built. This is the story of the building of one church. People who were poor, but devoted to the heritage, their community and their church, donated their energies to their families and to the community. The history of St. Patrick's Parish has been eloquently narrated more than several times by Father Nelson Callahan, historian of the diocese of Cleveland.

St. Patrick's today continues to serve the near west side community. It is a diverse community made up not only of the Irish, but of every race and ethnic origin. St. Patrick's continues to serve its needy. Those of us who were educated at St. Patrick's grade school and who consider it to be their parish, are proud of its past. We are indeed proud of the present—proud of the devoted parishioners, pastor, Father Patrick McManamon and the pastoral staff. We join with the entire Cleveland community in saying on this St. Patrick's Day, "All Praise to St. Patrick."●

ONE STEP FORWARD, TWO STEPS BACK

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. RANGEL. Mr. Speaker, the race riots which occurred a decade ago across the country brought fear, alarm, and concern to us all, and also resulted in a lengthy study by the Kerner Commission. There were demands and promises that the situation would improve. Wars were declared on crime and poverty which nurtured hope. I would like to bring to the attention of my colleagues an editorial which appeared 10 years after the Kerner Commission Report in the March 11 issue of the New York Amsterdam News.

The editorial reminds us that the fear is forgotten, the concern has decreased, and the hope is gone. The problems of the ghettos have not been solved, they have been ignored. If we continue to pretend that the danger of riots do not exist, and those of us who went through last summer in New York know that it does, we will face an explosion more painful than that of the late 1960s.

The text of that March 11 editorial follows:

[From the New York Amsterdam News, Mar. 11, 1978]

KERNER COMMISSION REVISITED

Last week, the New York Times has been running a series of articles attempting to assess where race relations stand today—10 years after the Kerner Report.

The Kerner Report was commissioned in 1968 by President Johnson in an attempt to discover the underlying causes of the rioting by Blacks that had struck hundreds of cities across the country.

The Report found that the country was moving toward two societies, one white and one Black, one affluent and one largely underprivileged, and that dangerous implications for the total society could be drawn from this fact.

The Report recommended a massive federal program to combat this tendency and to upgrade the quality of life for Blacks.

The New York Times has found that 10 years later, the recommendations of the Commission have been largely ignored, racial attitudes have become more divergent and the society has become more segregated, in most ways, than it was a decade ago.

Some of the Times' most startling findings are in the area of attitudes. Blacks and whites have almost precisely opposite views of whether there has been real progress for Blacks and whether or not things are getting "better" for Blacks. Moreover, Blacks have become much less hopeful about the prospects for the future.

For example, a national poll conducted by the Times and CBS found that in 1968 49 percent of the Blacks in this country had "real hope" that racial prejudice would eventually end; in 1978 only 37 percent had any such hope.

In 1968, 63 percent of Blacks felt that a lot of progress had been made in ending racial discrimination in the previous 10 to 15 years; in 1978, only 45 percent thought there had been any real progress.

In 1968, 33 percent of Blacks believed that whites didn't care about the plight of Blacks; in 1978, that percentage had risen to 44 percent.

These are only a few of the findings. In general, the stories painted a picture that is all too familiar to those of us who live or work in Black urban communities—a picture of rotting, deteriorating communities, enormous unemployment among our young people, apathy and hopelessness of spirit, and frustration about the uncaring attitude on the part of white-dominated institutions of government and private business.

No white leader, in the public or private sector, can now say that he or she has not been warned about the dire conditions that exist.

If rioting breaks out again one of these summers the fault will lie squarely on the shoulders of the people in power who, in 10 long years, have failed to act to reverse the physical decline of our communities.●

THE BURCHETT VISITATION

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. DORNAN. Mr. Speaker, it has long been a source of amazement to me to observe the wide variance in both the content and interpretation of news events in liberal and conservative media. I mention "content" because newsworthy stories which are given wide play by the conservative journals and reporters are frequently ignored by the liberal press or buried among their ground beef ads and obituaries.

Exposés by conservatives—or exposés with a less-than-liberal stand—are by and large met in the liberal media with underwhelming silence. Or, as M. Stanton Evans said in a recent article on Wilfred Burchett's activities and his recent visitation upon America, they are "treated as crashing nonevents."

In fact, the notorious Burchett tour is a perfect case in point.

Over the protests of conservatives across the country and in spite of exposés by the conservative press, the Department of State allowed Mr. Burchett, an avowed Communist sympathizer and probable KGB agent, to spread his vicious anti-Western poison coast to coast, college to college.

Now, the fact that State allowed this person to enter the country comes as no surprise to those of us who have witnessed the double standard of the Department toward leftists during the last 20 years. After all, these are the same people who also allowed entry to an English "punk-rock" group whose only talent appears to be the ability to spend long periods of time in jail and to vomit at will on front-row groupies.

Nor is it surprising that the only published criticism of the proposed visit was found in the conservative press.

What was surprising was the coverage given to the "Quisling" Burchett descent upon our shores by the New York Post—a well-respected member of the eastern fourth estate.

The other surprise was the outcome of the visit itself. Far from being the triumphant progress the radical left hoped it would be, the tour proved to be a disaster for Mr. Burchett, his leftist sponsors and his Marxist message of death, by degree. What James Burnham calls the suicide of the West.

Since it is so rare that occurrences of this type receive the coverage they deserve, I ask unanimous consent that the Post articles on Mr. Burchett's visit be reprinted in the CONGRESSIONAL RECORD. In this way, those of my colleagues who read neither the New York Post or conservative publications will have a chance to learn the true story behind Burchett. I commend highly the courageous and two-fisted reporting of Bill Heffernan. The Post is very, very lucky to have this "tiger" on board.

The articles follow:

SOVIET AGENT TOURS UNITED STATES WITH STATE DEPARTMENT HELP

(By William Heffernan)

Communist newsman Wilfred Burchett, known to government officials here as a Soviet KGB agent who interrogated and tortured American PWs in Korea and Vietnam, is now making a speaking tour of this country with the help of the U.S. State Dept., a Post investigation has found.

Burchett, 66, an Australian, is listed by the U.S. Immigration Service as "ineligible" for a travel visa here because of his membership in the Communist Party.

Last month, however, Burchett was granted a three-month waiver of that status at the request of high-ranking State Dept. officials after it was referred to State by the White House.

The Post has learned, however, that those same State Dept. officials withheld information about Burchett's KGB activities from their Immigration counterparts.

They also failed to advise Immigration about Burchett's brutal interrogation of allied prisoners of war during the Korean and Vietnam wars.

The Immigration official who approved the waiver, Ralph Kramer, deputy assistant commissioner for adjudications, told the Post in a recent Washington interview that the State Dept. never advised his office of Burchett's KGB status, or his involvement in the torture and brainwashing of American PWs

"If we had known that, you can be sure it would have been given heavy consideration," Kramer said. "I don't understand why that information was withheld."

Ironically, when Burchett filled out his recent visa application he denied being a Communist Party member, a statement that is in total conflict with his State Dept. status.

That fact alone could have denied him entry to the country. It could also deny him future entry if enforced by U.S. officials.

REQUEST APPROVED

Edward Hurwitz, the State Dept. country director for Australia (Burchett travels on an Australian passport), told the Post that he approved the request for a waiver after the department's Paris office had refused approval when Burchett applied there.

Hurwitz said he was "not sure" why Immigration was not advised of Burchett's background, or even at what level the final decision was made.

Four days later a spokesman for Hurwitz said the State Dept. "had assumed Immigration was aware of Burchett's past activities because that same information was reviewed when previous waivers were granted."

Those waivers however were limited to 10 days and when Burchett received his first waiver to cover the UN General Assembly for the leftwing American newspaper. The Guardian, his stay was limited to 10 days and he could only travel within a 25-mile radius of Columbus Circle.

GETS OK

During that visit he was also kept under FBI surveillance. An FBI source said that surveillance has not been requested for his current tour.

Burchett was actually denied a passport by his native Australia for 19 years because of his activities in Korean prison camps. During that period he traveled on a North Korean travel permit until 1968 when Fidel Castro personally issued him a Cuban passport.

In 1970, after the socialist regime of Australian Prime Minister Gough Whitlam took power Burchett again received an Australian passport.

In an interview yesterday Burchett smilingly said his current request for a waiver was taken "to the White House earlier this year by some friends and was pretty quickly approved after that."

The Post confirmed that members of the White House staff did refer Burchett's request to the State Dept., where the decision was finally made, allegedly on the grounds that he was "not a threat to the security of the nation."

Burchett's speaking tour—which also includes fundraising for "future journalistic efforts" in Europe and South Africa—began last Oct. 21, at New York's Washington Irving HS.

TOURS COUNTRY

He then worked his way across the country with almost daily appearances at various university and private gatherings.

Today he will address the prestigious Nieman Fellowship Society at Harvard University, then move on to other universities before ending his tour Dec. 12 before the American Humanist Society here.

Burchett first gained notoriety with government officials here at the close of the Korean War, when returning PW's told of his direct involvement in the torture and brainwashing inflicted in North Korean prison camps.

Later, when PW's returned from the Vietnam war they too told of Burchett's direct involvement in interrogations and how he masterminded "confessions" from their alleged use of germ warfare.

Those confessions, in which Burchett played a major role—actually writing and rewriting many himself—were extracted under threats of death combined with physical and mental torture, the PW's revealed.

The Communist newsman's KGB activities were vividly detailed under oath in 1969 and 1970 by KGB defector Yuri Krotkov.

Krotkov, now living on the West Coast under another name, testified before the U.S. Senate Internal Security Subcommittee at that time and identified Burchett as a paid KGB agent whom he worked with in Europe and Moscow.

HUNGARIAN RISING

In that testimony Krotkov disclosed how Burchett reported on Hungarian dissidents prior to the 1956 Hungarian uprising: how he developed a scheme, never used, to blackmail the wife of an American Air Force general; and how he lured a New York Times correspondent in Moscow into the hands of the KGB, which eventually tried unsuccessfully to blackmail him.

When questioned about Krotkov, Burchett insisted that Krotkov had since recanted that testimony. In a telephone conversation with the Post, however, Krotkov reaffirmed his testimony and Burchett's involvement with the KGB.

That involvement was also affirmed by Edward Hunter, a retired CIA agent now living outside of Washington.

Hunter, a psychological warfare expert, engaged in covert activities for the CIA. He said he regularly reviewed top secret CIA reports that repeatedly identified Burchett as a KGB agent.

"There is no question this man was and still is one of the chief propogandists for the KGB," Hunter said.

"He personally developed and directed the germ warfare propaganda campaigns in Korea and Vietnam and we know he was directly involved in the brutal interrogation of U.S. prisoners of war as well as those of other nations," he added.

"He's one of the best known spies in the world," he said. "And I'd like to find out how he got into this country so easily."

SPY CONFRONTED

Yesterday The Post brought former Korean War PW Derck Kinne to confront Wilfred Burchett about their prior meetings in PW camps.

Kinne (whose story along with those of other PW's will be told in future articles) told of Burchett's threats to have him shot and the subsequent torture and solitary confinement he suffered when he resisted him.

Burchett, angry over the confrontation which he had not expected, denied that he had ever been a Communist or had been involved in any interrogation of PWs.

"I was simply a journalist doing my job, reporting from the other side," he insisted. He said Kinne had mistaken him for someone else in the prison camp.

Kinne, who testified under oath along with other PWs at a 1974 libel trial involving Burchett in Australia, replied simply: "You're a lying bastard and you know it. You know what you did to me and a helluva lot of other men."

In that libel suit the stories of the PWs were upheld and Burchett was ordered to pay $100,000 in damages to the defendant. He is appealing that verdict.

[From the New York Post, Nov. 17, 1977]

KISSINGER GAVE THE OK FOR KGB MAN'S TRAVELS

(By William Heffernan)

The ability of Soviet KGB agent Wilfred Burchett to travel freely throughout the United States on a speaking and fund-raising tour can be traced directly back to former Secretary of State Kissinger "as payment for favors received," a State Dept. source has revealed.

Burchett, 66, a Communist newsman who has worked for various publications throughout the world, is known to government officials here as a paid agent of the KGB who was involved in the interrogation and torture of American PWs in Korea and Vietnam.

He is presently, however, traveling throughout the nation presenting his views on college campuses and raising money to further his "future journalistic assignments" in Europe and South Africa.

An investigation by The Post has found that Burchett, an Australian national who was strictly limited in his travels here in the past, had those restrictions removed on orders from Kissinger's office during the Nixon Administration.

AIDED HANOI

Burchett, it was found, served as a liaison for the Hanoi government during the Vietnam war and was responsible for passing on diplomatic signals that led to the Paris peace talks.

He also conferred with U.S. negotiator Averell Harriman just prior to those talks to present the North Vietnamese position.

Burchett also met with Kissinger in his White House office in October, 1971, to help pave the way for President Nixon's visit to China the following February.

During a recent interview, Burchett acknowledged that he "helped with the Paris peace talks" but insisted he had little to do with Nixon's China trip.

Burchett acknowledges that he was a close friend of both North Vietnam's Ho Chi Minh and China's Chou En-lai and "may have discussed those matters with them." He insists, however, that his role was "minor at best."

RESTRICTIONS EASED

A State Dept. source said, however, that Kissinger "apparently had a different view of Burchett's role." Shortly after the 1971 White House meeting, he added, word came down from Kissinger's office to case Burchett's travel restrictions in the future.

Prior to that time Burchett was strictly limited in his visits to this country. In 1969, in fact, while covering the UN for an American left-wing newspaper, he was limited to a 10-day visit and travel within a 25-mile radius of Columbus Circle.

On his present trip Burchett has free movement around the nation on a waiver granted by the Dept. of Immigration.

That waiver was given on the recommendation of high-ranking State Dept. officials, who failed to disclose Burchett's KGB background or his involvement in the brainwashing and torture of PWs.

MADE AVAILABLE

Immigration officials have since complained about that withholding of information, saying such data had been made available in previous waiver requests.

A State Dept. source insisted that the decision to withhold that information and push for more liberal travel for Burchett went directly to the 1971 White House directive.

"You have to understand how the State Dept. works," he said. "Once a suggestion comes down from the White House and becomes part of someone's file, it would be followed blindly until someone else—perhaps decades later—directed that it be changed."

"This was no conspiracy to help Burchett," he added. "This was a typical bureaucratic foul up."

During his present tour, the Communist newsman—who spoke yesterday before the prestigious Nieman Fellowship Society at Harvard—is presenting his views on Eurocommunism, the "coming revolution in South Africa" and other matters of interest to the Soviet bloc.

ON SOUTH AFRICA

During a recent speech to students and faculty at Ripon College, Ripon, Wis., Burchett predicted that the Communist-led revolutionaries in South Africa would soon wage open warfare there.

"South Africa is the very center of the anti-Imperialist struggle," he said. "We've tried many nonviolent demonstrations and tactics and they've all been met with force and violent reactions. Only organizing for armed struggle can get anywhere," he added.

Throughout his tour Burchett has been raising funds to help pay the expenses of his future work in Africa.

He is described in CIA reports as a top KGB propagandist, with close ties with the Chinese Communists and Cuba, who is sent to potential trouble spots.

In testimony before the Senate Internal Security subcommittee, KGB defector Yuri Krotkov identified Burchett as a paid KGB agent he had worked with in Europe and Moscow.

Burchett has also been identified by American, British and Australian PWs from both Korea and Vietnam in sworn testimony as the person who brutally interrogated them, in some cases threatened them with death and who urged many to defect at the end of the war.

Burchett denies those charges, saying that "at best I was mistaken for someone else."

He also claims he is the victim of a smear campaign directed by the John Birch Society which he terms "one of the small prices one must pay to retain one's journalistic integrity while pursuing the truth from the people's side of the barricades."

HE INVITED US—TILL YESTERDAY

Wilfred Burchett abruptly withdrew an invitation extended to The Post to attend his closed lecture last night before the Nieman Fellowship Society at Harvard University.

A spokesman for Burchett said that after reading yesterday's story about himself; the Communist newsman decided to cancel the invitation. The spokesman said Burchett considered the article "gutter journalism."

BURCHETT'S U.S. TOUR

Oct. 21: Washington Irving High School, New York City, "The World Struggle Against Imperialism."

BURCHETT TOLD PW: I COULD HAVE YOU SHOT

(By William Heffernan)

To the prisoners of war who dealt with Communist newsman Wilfred Burchett in Korea and Vietnam he was a brutal interrogator who filled them with fear, a man of great power who could say if they lived or died.

Derek Kinne, now a businessman in Tucson, Ariz., was one of those men.

As a member of the British Army he was captured in Korea and taken to a prison camp in Chong Song where he first met Burchett, now 66.

EMOTIONAL ON THE SUBJECT

Kinne, who holds the George Cross—one of Britain's highest honors—for his actions as a prisoner of war and about whom the book "Wooden Boxes" was written detailing acts of heroism, still becomes emotional when he speaks of Burchett, who is now on a controversial lecture tour of the U.S.

"I first met him when he came to our camp to give us a lecture," he explains. "And we all went because we thought the bastard was one of us."

"He started to give us this talk, this lecture," Kinne said. "It was so one-sided it wasn't even funny. He kept referring to the Americans as 'your side' and to the Communists as 'our side.'

"Then this one guy in the audience, another prisoner, he fashioned a noose with his belt and shouted 'You'll hang, you bastard.' And we all joined in and before long a lot of us had nooses."

TALKS WITH HIM

Kinne explained that Burchett became angry and began to gather up his papers to prepare to leave, then turned to the men and told us not to hope that the Americans were going to come and rescue us, because if they did we would be taken to Red China."

Kinne said that before Burchett could leave he rushed up to him and began to argue with him.

"We got into a heated debate," Kinne added, "and he turned on me and said: 'I could have you shot.'

"I said, 'Look you bastard, you see that hill over there?' I said, 'There's over 600 men who have died of malnutrition, dysentery, bari-beri, lack of medical facilities for wounds, men who have been beaten and tortured in this camp, so if you've got any spunk in you you'd do something about it.' And he said to me, 'What can I do about it?' "

"And I told him he could tell them about it at Panmunjom [where peace talks were being held then] and he said, a good thing if 'I had you shot, I think I will have you shot.' "

GUARDS ARRIVE

An hour later, Kinne said, two Chinese guards came and took him to a small room "and then he tied my arm behind my back, tied a noose around by neck and put another noose from the same ropes around one of my feet and pulled it up behind me.

"Then they took another rope from my arms and threw it over a beam and pulled me up until I was just balancing on my left foot."

Kinne said the guards then "told me I wasn't a very good student in the way I'd talked to Comrade Burchett, and that I was sick in the mind and they were going to cure me.

"I had a hernia and they hit me repeatedly right in the hernia in the groin until I doubled up and began to choke from the noose around my neck," he added.

For the next 13 months, he said, "I was kept in solitary confinement and beaten daily while they tried to get me to sign a confession. One of the parts of that confession," he added, "was that I had a hostile attitude to Comrade Burchett."

A CONFRONTATION

Kinne, like the other former prisoners quoted in this article, testified in a libel suit brought by Burchett in Australia over a magazine story identifying him as a KGB agent who interrogated PWs in Korea and Vietnam.

Burchett lost that suit and was ordered to pay $100,000 in court costs.

Earlier this week during an interview with Burchett, The Post brought Kinne to that meeting.

Upon seeing Kinne, Burchett blurted out: "It wasn't me who threatened to have you shot, it was another man named Shapiro. You're confusing me with him."

Kinne stared back at Burchett, saying: "I could never forget the person who did that to me and you're that man."

Another PW who remembers Burchett is former U.S. Air Force Lt. Paul Kniss, now a airline pilot for United Airlines.

Kniss, who after months of day and night interrogation signed a false confession that he had been dropping germ warfare bombs on North Korea and China, said he first met Burchett 10 days after his plane was shot down in 1952.

IN BRITISH UNIFORM

"The first time I met him," Kniss said, "he was in a British uniform and I thought he was a PW too. He asked me my outfit, how I was shot down and then he came into this germ warfare bit."

The former fighter pilot said the Chinese began interrogating him the next day, trying to get him to sign a germ warfare confession.

"The interrogation went on day after day, sometimes 24 hours at a time," he said. "They would hit me with rifle butts and sometimes they would give me this little effeminate slap across the face. I hated that, it made me feel ashamed."

Kniss said Burchett interrogated him as well, "but mostly served as an editor. He did most of the editing of the confession, manipulating the story, changing it where needed, so it would come out right and correspond to confessions already signed by other pilots.

"My confession was a work of art," Kniss said. "This man was very good at what he did. I thought the Chinese were good too, the way they asked questions. But then one day one of them dropped a piece of paper as he was leaving my room. It had a list of questions in English on it, the questions I had just been asked. At the bottom it was signed 'W. Burchett.' "

Kniss said Burchett often reminded him that only through full cooperation with the Chinese, could he ever hope to return home. "He kept me in constant terror," he said.

"Then, when I finally had that chance, he came to me and urged me to defect," Kniss said.

"When I told him I wasn't interested, he started to warn me how badly I would be treated in the States because of my confession. But this time he couldn't scare me, all I wanted to do was go home," Kniss said.

Former Air Force Col. Walker Mahurin, one of the most decorated men in Air Force history, also recalled similar encounters with Burchett.

"When I got to the prison camp," Mahurin said, "Burchett was there with some other men. He was dressed in a Chinese officer's uniform and he just stared at me the way a snake would stare at a mouse."

The retired colonel said he underwent beatings until he signed a germ warfare confession, beatings so brutal that at one meeting with Burchett "I was trembling so hard I could hardly sit down. I was absolutely terrified in his presence.

"I felt he was my court of last appeal to go home, because I had been condemned to death as an international war criminal," Mahurin said. "I told Burchett anything he wanted. I told him whatever he wanted me to tell him."

Another person who knew Burchett in Panmunjom was Richard Applegate, former Southeast Asia manager for United Press.

Now retired and living in Boston, Applegate, 65, told The Post how Burchett had told him and other newsmen here that he was a Communist.

"We didn't much like him and we decided to express that distaste," Applegate said. We gave him an insulting birthday cake.

Applegate said that a few days later he took a sailboat that he had purchased out to sea, for a shakedown cruise that he had boasted about to the entire press corps, including Burchett.

"A few miles out I was intercepted by a Red Chinese gunboat," he said, "and forcibly towed to Red China.

"They kept me there for 18 months," Applegate added, "trying to get me to sign a confession that I knew about the American germ warfare program but was not reporting it."

One of the interrogators almost knocked me off my feet one day when he suddenly asked me: "Why does Comrade Burchett hate you so much?"

"When I told him I didn't know," Applegate said, "he just smiled at me and said: 'He who plays with cake gets his head cut off.' "

Burchett is currently making a speaking and fund-raising tour of the U.S., over the strong objections of several members of Congress.

Despite previous limitations on his ability to travel in this country, Burchett was * * *.

That visa was granted by the U.S. Department of Immigration at the urging of officials in the State Dept. last October that has no limitations.

[From the New York Post, Nov. 19, 1977]

BURCHETT: THEY'RE ALL FILTHY LIARS

(By William Heffernan)

Wilfred Burchett sat in a quiet West Side bar this week, sipping scotch as he brushed aside charges that he brutalized American prisoners of war in Korea and Vietnam.

'These men are all filthy perjurors," Burchett said. "The best I can say for them is that they may have mistaken me for someone else."

The 66-year-old Australian newsman, who has been identified in sworn testimony as a Soviet KGB agent who interrogated and tortured PWs in North Korean and Vietnamese prison camps, said he had been "the victim of a McCarthyite smear campaign directed by the John Birch Society."

When it was suggested that the Birch Society would have difficulty organizing a Sunday picnic, the cherub-faced Burchett laughed but insisted "there is a great deal of evidence they are involved in this."

Speaking in a clipped Australian accent, Burchett said the testimony of KGB defector Yuri Krotkov before a Senate Subcommittee in 1969 and 1970 identifying his KGB work was "total fabrication."

When asked about the American, British and Australian prisoners of war who traveled to Australia to testify against him in a libel action he brought there, Burchett insisted their stories too were "a tissue of lies made up by the Birchers." Burchett lost that suit but insists it was a "moral victory."

Many of these same former prisoners have since told The Post that their expenses were paid by the defendant, an Australian magazine, and each insisted he had not been approached by any members of the Birch Society. They also repeated the charges and insisted they were true.

Burchett, who is now touring the U.S. on a speaking and fund-raising visit, arranged with help from State Dept. officials, also denied he was a member of the Communist Party or had ever worked as a paid propagandist for Communist regimes. He has been identified as such by various federal agencies, and as such requires a special waiver to enter this country.

The tour, Burchett said, will hopefully "raise enough money to finance my work next year in Europe and Africa.

"Africa is the important place," he said, adding he had made three recent visits there.

"Believe me, Africa is headed for open armed conflict. Preparations are now being made by South African black leaders, members of the African National Congress."

Throughout his career Burchett has steadfastly reported from the Communist side, or what he terms "the people's side of the barricades."

Those governments have given him unusual treatment in return.

Burchett lived in Moscow after the World War II, in a building reserved for prominent Soviet citizens.

In 1971 Fidel Castro personally issued him a Cuban passport, after learning that he was traveling on a North Korean travel document. (Burchett's Australian passport was

lifted by that government for 19 years and not returned until 1972).

"The North Korean travel document was an enormous thing," Burchett said, "and Fidel had heard about it and offered me the Cuban passport as a convenience." He added: "I believe that is the thing that truly got the U.S. government so concerned about me, that Cuban passport."

BURCHETT DENIES HE'S A PAID SPY FOR THE SOVIET

(By William Heffernan)

Communist reporter Wilfred Burchett denied today he was a paid agent of the Soviet KGB secret police or involved in the torture of U.S. prisoners of war in Asia.

The 66-year-old Australian, in a press conference at the Americana, said he was the victim of a "McCarthy-type smear campaign launched by the New York Post."

The Post ran a four-part series last week disclosing that Burchett was making a fund-raising speaking tour of U.S. college campuses despite his being known to government officials as a KGB agent who had interrogated POW's both in Korea and Vietnam.

NAMES CIA

Today Burchett said the only intelligence agency that had ever attempted to recruit him was the CIA.

He said he received a $100,000 cash offer from the CIA during the Panmunjom peace negotiations "about 25 years ago," when he was covering the Korean war from the North Korean side.

At that time Burchett was best known as the leading publicizer of charges that the U.S. was using germ warfare against Communist forces.

CONFIRMS REPORT

He said reporter Ed Hymoll of Hearst's International News Service acted as intermediary for the CIA and confirmed reports by columnist Jack Anderson that Hymoll had said, "My outfit wants to pay you $100,000 cash down to write the story of your life. But you must write it on our side of the line . . ."

Burchett claimed today he had forgotten the offer until Anderson found records of it in newly opened CIA files and called him for confirmation.

Acknowledging he had "interviewed" U.S. prisoners in both Asian wars, Burchett insisted his role had been merely that of a correspondent, not an interrogator. He appeared nervous under questioning.

Asked if he knew the PWs had been tortured either before or after his "interviews," Burchett said: "I don't believe so. Some may have been under pressure, but then, all prisoners were under pressure then."

Yesterday, referring to the testimony of KGB and Viet Cong defectors as well as that of former PWs who gave sworn testimony against him. Burchett had insisted they were all "fantastic stories."

CALL THEM 'HILARIOUS'

"In fact, when you read some of them they were hilarious," he said.

Asked if he intended to sue The Post for the alleged false statements about him, both Burchett and his lawyer, Marshall Perlin, said they were "exploring that possibility" as well as "investigating other appropriate steps."

If his many articles about Communist governments over the years, Burchett conceded none had been critical of those regimes.

"No, my writings have always been sympathetic to those causes," he said.

[From the New York Post, Nov. 22, 1977]

THREE IN CONGRESS SCORE VISA

(By William Heffernan)

Three Congressmen today urged the House Judiciary Committee to investigate the State Dept.'s role in obtaining a U.S. travel visa for Communist newsman Wilfred Burchett.

The bipartisan group—Mario Biaggi (D-N.Y.), Lawrence McDonald (D-Ga.) and Robert K. Dornan (R-Calif.)—each questioned the wisdom of allowing the 66-year-old Burchett into this country in light of charges that he has been an agent for the Soviet KGB and that he brutally interrogated prisoners of war in Korea and Vietnam.

Burchett, an Australian who acknowledges that he reports from the Communist perspective, entered this country last month, and has been crisscrossing the nation on a speaking and fund raising tour with the blessing of State Dept. officials.

As reported in The Post last week, those officials aided Burchett in obtaining a visa without advising the Immigration Dept., which issues visas, of his past activities.

WON'T NAME THEM

When questioned by reporters at the State Dept.'s daily briefing in Washington yesterday, spokesman Hodding Carter declined to identify the officials involved in getting the visa. He insisted, however, that Immigration personnel should have been aware of Burchett's background based on information provided to them in 1969 and 1971.

At a press conference here yesterday, Burchett denied being a paid agent of the KGB or being involved in torturing American prisoners of war. He acknowledged he had "interviewed" POWs in both the Korean and Vietnam wars, but insisted his role had been merely that of a correspondent, not as interrogator.

'SELECTIVE LAXITY'

Taking issue with the State Dept. on the visa, Biaggi yesterday charged that officials there "seem to practice a policy of selective laxity with respect to granting visas."

McDonald, talking from his Atlanta, Ga. office, said he had spoken to several high-ranking State Dept. officials and "I have become convinced that some people there are now lying and trying to cover their tracks."

Dornan, who said he requested and received a top-secret CIA briefing on Burchett last week after reading The Post articles, said there "is no question of his KGB background or his brutal treatment of prisoners of war.

"It seems inconceivable to me that this same State Dept. could hound (rock star) John Lennon over one marijuana arrest and then defend letting this Soviet apologist of torture and murder enjoy a propaganda orgy from coast to coast."●

THE NEW MORALITY: PAY PANAMA; GYP VETERANS

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. HANSEN. Mr. Speaker, as a member of the Committee on Veterans' Affairs, I call to the attention of my colleagues a recent article by Dr. John Wasylik, commander-in-chief of the Veterans' of Foreign Wars, which appeared in the March 1978 issue of the VFW magazine. This presentation clearly expresses the opinion of not only the VFW, but the Nation as well.

PAY PANAMA; GYP VETERANS

President Carter has been telling us that giving the canal to Panama will not cost the American taxpayer one cent since all monies which will be paid to the Torrijos government will come from increased toll charges.

It becomes more apparent with each passing day that the economic effects of the treaties have not been made clear and should be given closer examination, especially now that the full Senate is considering them.

Sen. John G. Tower (Texas), of the Senate Armed Services Committee, recently released his testimony before that Committee which contained some startling revelations.

"The Committee devoted substantial time to hearings recently concluded on the economic aspects of the treaties in addition to the relevant national security considerations.

"Information being placed on the public record by the Committee includes testimony by numerous expert witnesses as well as a detailed economic impact assessment prepared by American Management Systems, Inc," Tower said.

"The study provided showed that the proposed Panama Canal Commission being created to replace the present Panama Canal Co. could have a deficit as high as $133 million by 1985, increasing to $548 million in the year 2000. To avoid such a deficit, the canal tolls would have to be dramatically increased and, since the commission would be a U.S. government agency, any deficit would be the responsibility of the U.S. Treasury," the Texan continued.

Tower cited four specific areas in which additional costs will accrue to the U.S. government if the treaties are approved:

Loss of interest payments to the Treasury: The annual payment of about $20 million in interest on the net U.S. investment in Panama will cease under the terms of the treaty. This will cost the U.S. Treasury at least $440 million in revenues between now and the year 2000.

Early Retirement Benefits: Current employees of the Panama Canal Co. are to be given early retirement pay by the Civil Service Commission costing from $6.5 to $8.4 million per year. Between now and 2000, a conservative estimate of these additional costs is $165 million.

Impact on the Department of Defense Budget: Transferring hospitals, schools and other support functions to the responsibility of DOD will require funds of about $5 million each year in DOD outlays that will not be reimbursed by the Commission.

DOD Relocation Costs: The required relocation of U.S. military bases in the Canal Zone will incur a one-time cost of $43 million.

Adding these additional costs for the 22-year period from now to the year 2000 yields a total estimate of $785 million, Tower said.

"The figures I have referred to could well run these total costs not just into the millions, but well over a billion U.S. dollars," he continued. "President Carter is simply not telling the whole story when he claims 'payments to Panama will come from tolls paid by ships which use the canal.' The public has a right to know more about what we are being asked to agree to in underwriting Panama if the proposed treaties should be put into effect," the ranking minority Committee member concluded.

It is not difficult to understand why the Carter Administration is reluctant to make all the pertinent economic details available for public scrutiny. The silent majority who have been opposed to the new treaties from the outset would most certainly raise their voices in unified protest if all the facts were known.

It is significant that Sen. Robert C. Byrd (W. Va.), who is leading the Administration's fight for ratification in the Senate, conceded these points on the second day of the debate over ratification.

It will be interesting to see how many more misrepresentations of the facts will be exposed as the Senate continues to hash over the treaties' provisions.

Once again the Carter Administration has cut veterans' programs by $38 million and eliminated a new proposed VA hospital in Camden, N.J., despite the lengthy studies that showed the area's need for such a facility. The hospital's construction was approved by President Ford and reaffirmed by President Carter just last year. But now there is no need for it, says VA Administrator Max Cleland.

That isn't the only shocker.

The VA budget eliminates over 3,100 beds from existing hospitals to save $32 million. Yet veterans must go without medical treatment because they are turned away from VA hospitals by the thousands.

Medical research from which veterans and all other Americans benefit is cut by more than $500,000 and 34 personnel positions are lost. This action ironically follows last year's award of Nobel prizes for medical research to two VA doctors.

Medical treatment for the nation's veterans will suffer a still further reduction of $5.5 million because cost-of-living pay raises for all VA employees are not in the budget. They will have to come from within the agency.

President Carter's budget does not include a cost-of-living increase in payments to Vietnam veterans studying under the GI Bill.

In another blow to veterans that will have a far-reaching effect, the VA department handling veterans' claims and problems is to lose 667 people under the proposed budget.

You can be assured the V.F.W. will fight in Congress to restore these and other drastic cuts.●

NATIONAL TELECOMMUNICATIONS POLICY

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. WEAVER. Mr. Speaker, a large number of public and private organizations, at the request of the telecommunications industry, have taken positions expressing concern that Congress should expeditiously review and determine the national telecommunications policy. They are also concerned that any policy not have an adverse impact on either the cost or quality of basic residential and basic long distance services.

The Oregon organizations who have submitted their formal position on telecommunications policy:

Corbett Kiwanis Club.
Linkville Kiwanis, Klamath Falls.
Newport Chamber of Commerce.
Toledo Chamber of Commerce.
City of Happy Valley.

HOUSE WOULD VOTE 2 TO 1 AGAINST TREATIES

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. HANSEN. Mr. Speaker, Members of the House would oppose transferring the Panama Canal to Panama by nearly a 2 to 1 margin according to a poll of Member's offices by Scripps League Newspapers.

The survey asked: "If the House were allowed to vote today on transferring the Panama Canal and related property to Panama, how would you vote?"

The story by Mr. Lee Roderick and Mr. Mike Richins said 208 Representatives either opposed transferring the property to Panama or were leaning against the transfer. The number included almost an equal breakdown of Democrats, 106, and Republicians, 102.

A total of 131 Members either favored the transfer or were leaning that way.

These findings show a sharp contrast between the House, all of whose Members are up for reelection this year, and the Senate, only one third of which is up reelection this year. Senator Alan Cranston told the Scripps League last week that 62 percent of his Senate colleagues were prepared to vote for the treaties, which is an interesting contrast to just 300 percent of House Members so inclined as disclosed in the Scripps poll.

Unfortunately not many have seen the results of the poll of House Members because of the shockingly restrictive reporting by the national media regarding negative factors involved in the treaty debate. The same is true of the news reporting the classic constitutional fight by the House to exercise its legal and traditional role in measures involving the appropriations process and the disposition of property led by 231 Members who are sponsoring necessary legislation.

Mr. Speaker, for the benefit of my colleagues, I include for the RECORD a copy of the Scripps League article of March 10, 1978, as well as an article by Mr. Reed Irvine of Accuracy in Media on March 10, 1978. The articles follow:

HALF OF HOUSE MEMBERS WOULD VOTE AGAINST CANAL TRANSFER

(By Lee Roderick and Mike Richins)

WASHINGTON.—If the House of Representatives voted today on whether to transfer the Panama Canal to Panama, nearly half of its 435 members say they would definitely or likely vote no. Less than one-third say they would definitely or likely vote yes.

This is the key finding of an off-the-record survey of all 435 offices by Scripps League Newspapers. The telephone survey was conducted between March 3-9. It suggests the treaties are in even more trouble on Capitol Hill than generally believed.

The House's role in the canal negotiations is a hot issue, with Carter administration holding that the Senate alone, through its treaty power, can transfer Canal Zone property to Panama. Others cite Article IV, Section 3 of the Constitution to argue that the full Congress must vote on property aspects of the canal treaties as part of the ratification process—rather than after the fact. The House at least will be voting on implementation of the treaties.

Members of the House or their key aides were asked this question in the Scripps League survey: "If the House were allowed to vote today on transferring the Panama Canal and related property to Panama, how would you vote?" Offices not giving a firm "yes" or "no" were then asked: "Are you leaning for or against the property transfer?"

One hundred seventy congressional offices said they would vote no on transferring the property to Panama. An additional 38 said they are leaning against the transfer. The two groups total 208 representatives—48 per cent of the House membership.

Congressmen who say they would vote for transferring the canal to Panama number 102. Another 30 report they are leaning in that direction, for a total of 132 who favor the property transfer. The figure represents 30 per cent of House membership.

Seventy members are uncommitted on the issue and another 25 declined comment.

Almost an equal number of House Democrats and Republicans—106 and 102 re-

spectively—are against, or leaning against, giving the canal to Panama. Only 22 Republicans say they would definitely or likely vote for the transfer, along with 110 Democrats.

On a regional breakdown, only 13 members from southern and border states are for, or leaning for, transferring the canal to Panama, with 76 southerners going the other way. In the Northeast, 47 members favor the transfer, with 44 members opposed. In the Midwest, 41 members are in favor, with 53 opposed. In the far West, 31 members are in favor, with 31 opposed.

The Scripps League findings reveal a sharp contrast between the House and the Senate, which is debating the two canal treaties. Senate Majority Whip Alan Cranston (D-Calif.) said Thursday that 62 senators—which also means 62 per cent—are "almost surely" prepared to vote for treaty ratification, as opposed to only 30 per cent who feel that way in the House.

It is generally believed that representatives, a great majority of whom must face voters in November, reflect the sentiments of their constituents more accurately than their Senate counterparts. Only one-third of the senators are up for reelection this year.

More than 230 members of the House have signed a resolution introduced by Rep. George V. Hansen (R-Idaho), which calls for a House vote on property aspects of the treaties as part of treaty ratification.

Constitutional scholars are divided on whether the House has a right to participate in the property transfer aspects of the treaties. The Senate alone clearly has the power, on a two-thirds vote, to ratify or reject a presidential treaty. However, Article IV, Section 3 of the Constitution says "The Congress shall have Power to dispose of . . . the Territory or other Property belonging to the United States; . . ."

Scholars agree that, if the House did have a say in the canal transfer, it would take a majority of its voting members to approve the action. The Scripps League survey indicates that if such a vote were taken today, the House would deny President Carter the right to sign away the canal and adjacent property to Panama.

HOUSE DEMANDS VOICE ON CANAL DECISION; MEDIA MUFFLE IT

WASHINGTON.—Did you know that over half of the members of the House of Representatives have demanded that the House be given a voice in the Panama Canal decision? Did you know that 219 members of the House, one over a majority, had cosigned a resolution saying that no U.S. property in the Canal Zone should be transferred to a foreign country without authorizing legislation being passed by both houses of Congress? Not if you depended on Big Media for your news.

I didn't know this until a member of Accuracy in Media called me all the way from California to verify a report that she had seen in a weekly Washington paper, Spotlight, published by the far-right Liberty Lobby.

I checked the story out and found that not only had the resolution been signed, but that Congressman George Hansen of Idaho had taken the highly unusual action of going to the Senate chambers on February 10 and personally delivering a copy of the resolution to Senate Majority Leader Robert Byrd. Congressman Hansen asked that the resolution be entered into the Senate record of the current Panama Canal debate.

Congressman Hansen made this unusual move because even though the resolution has been co-sponsored by a majority of the members of the House, House Speaker Tip O'Neill has indicated his intention to keep the resolution from being voted upon until after the Senate ratifies the Panama Canal Treaties. It would then be more difficult for the House to enforce what it considers its constitutional right to vote on the disposition of property owned by the Federal Government.

This right is based on Article IV, Section 3, Clause 2 of the Constitution which says, "The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States." There have been four previous occasions on which the U.S. has turned small portions of the Canal Zone over to Panama. In 1932 and 1937 the transfers were effected by Acts of Congress. In 1943, an executive agreement transfering property was approved by a Congressional Joint Resolution. In 1955, one provision of the treaty specifically recognized the need for implementing legislation. Two others did not have a specific provision for such legislation, but a State Department official acknowledged that they would require such legislation, according to a Library of Congress study.

This study concluded: "It is clear that Congress has often asserted an exclusive right to dispose of federal territory and property. It is also apparent that both the Executive and the Senate have recognized that claim in past dispositions of property in the Canal Zone to Panama."

Now that the entire Canal Zone is to be given to Panama, this previously recognized right of the House of Representatives to have a voice in the decision is being ignored. That is not, perhaps, too surprising, since the clearly expressed feelings of the people in this matter are also being ignored. The Carter Administration's big campaign to swing public opinion behind the Canal treaties has been a flop. This was demonstrated by the reaction of the public to the President's televised fireside chat on the treaties on February 1.

The public was turned off by the fireside chat. That night and the following day, The White House received 1,509 telephone calls opposing the treaties and only 193 favoring them. For some mysterious reason, treaty supporters called the White House in greater numbers on February 3, but the final tally was negative by 1937 to 807. The White House won't say how many letters it got, but after stalling for nearly a month, a spokesman told me the mail had been against the treaties by a ratio of 4 to 1.

The House reflects popular will more closely than the Senate, which is why its right to vote is being denied. Big media are helping by muffing the cries of protest.●

PENNSYLVANIA STEEL CONFERENCE—AGENDA FOR ACTION

HON. DOUGLAS WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. WALGREN. Mr. Speaker, on November 10, 1977, the Pennsylvania Conference on Steel was convened in Pittsburgh—the heart of America's steel industry. The conference brought together leading figures in the steel industry, organized labor, government, interest groups, and the academic community in a common effort to develop and discuss ideas relating to the current steel crisis.

As a means of dealing with the issues involved, the conference was divided into task forces that focused on a specific issue. Each task force met in the morning and afternoon and presented recommendations at the closing session. Subjects covered by the task forces included community impact, capital generation, environmental control, Federal and State investment policies, labor, and transportation.

I would now like to draw the attention of my colleagues to a resolution adopted by the steel conference which outlines suggestions for future actions to help solve the problems of the steel industry. The resolution voices support for the recommedations made in the Solomon report as well as further measures that should be taken.

AGENDA FOR ACTION

At its closing session, the conference, by acclamation, adopted the following three recommendations which represented an agenda for immediate recommendations action:

First. Pennsylvania Steel Conference urges the Carter administration to provide immediate support for the steel industry: Enforce strictly the antidumping provisions of existing international trade agreements to prohibit the sale of foreign steel in the United States below cost; and maintain import restriction agreements on specialty steel products that represent a small but vital share of the domestic steel production.

Second. The Pennsylvania Steel Conference calls upon the Carter administration and the Congress to give high priority to those targeted public investments that will stimulate a long-term demand for steel and promote balanced growth throughout the national economy.

Third. The Pennsylvania Steel Conference reaffirms its intention to review thoroughly all Government programs which affect the steel industry and to develop quickly recommendations aimed at providing a more favorable climate for the steel industry and for the hundreds of thousands of Americans who depend upon it for their livelihood.

In the time that has followed, the President's Task Force on the Steel Industry, headed by Undersecretary of the Treasury Anthony M. Solomon, announced a plan to protect the steel industry against unfair imports and to help provide financing for modernization. In some areas, the President's task force report is quite consistent with the proceedings of the Pennsylvania Steel Conference, while in others the conference proceedings suggest the need for the administration and the Congress to refine, extend, or amplify the task force plan.

Now the conference presents a further agenda for action by both the Federal and State governments. This agenda was developed in consultation with the moderators and comoderators of the conference panels and seeks to pinpoint specific steps which should be taken to deal with the community impacts of the steel industry decline, alleviate some of the burdens of pollution control, and provide

new economic stimulus and new tools to assist in steel industry modernization.

GOALS

All Pennsylvania conferees and observers agreed that some mechanism is necessary to restore the competitive balance that existed before unfair steel import practice cut deeply into domestic steel production. Whether this takes the form of a reference price system, increased enforcement of international trade agreements, or some other remedy, it is a basic step toward restoring the steel industry in the United States.

However, the Pennsylvania Steel Conference agreed that further steps beyond this are needed. Although not necessarily in order of priority, they are to:

First. Increase steel production in the United States by initiating new programs and expanding existing programs which will increase the demand for all types of steel;

Second. Increase the availability of capital for steel industry expansion and modernization (including pollution control expenditures);

Third. Clarify pollution standards and allow for consideration of economic impact in determination compliance schedules; and

Fourth. Target Federal and State assistance programs toward areas that have been or could be adversely affected by the steel situation so that future economic development can be realized and relieve the immediate impact on communities that have a steel based economy.●

FOOD LABELING

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. WHALEN. Mr. Speaker, the complete and accurate labeling of food ingredients remains a major concern of mine. In fact, this morning I testified before MARTY RUSSO'S Subcommittee on Special Small Business Problems, regarding the ingredient labeling of bakery goods.

I would like to call to my colleague's attention an article that appeared recently in the Cleveland Plain Dealer. The column, written by food editor Janet Beighle French, discusses briefly what I and my colleague, ROBERT WALKER are doing in the area of food labeling.

At this point, I wish to insert in the RECORD the article on food labeling that appeared in the March 8 issue of the Cleveland Plain Dealer.

EASY LABEL LINGO SOUGHT

(By Janet Beighle French)

Would you like easier-to-understand pictorial nutrition labeling? Complete ingredient lists on food?

Two congressmen assume you would.

Rep. Robert Walker, R-Pa., is recommending we switch from our present system of nutrition labeling to a graphic system popular in Europe.

Walker's recommendation is already embodied in H.R 9849, and hearings may be scheduled on it this spring, before the health and environment subcommittee. Walker has enlisted 21 cosponsors for his bill.

Rep. Charles Whalen, Jr., R-3, has charged his staff with studying the need for complete ingredient disclosure to aid consumers on special diets.

Walker's bill would require depicting the relationship of calories to nutrients in a food, "using a system of symbols, figures, or other devices, which will readily enable consumers to comprehend the information."

Walker recommends a system developed by Albert Heijn of Holland.

A day's total nutritional allowance is depicted by a large circle. A dark wedge in this "pie" represents total nutrients in the food. A light wedge represents calories. By comparing the sizes of the two wedges, a consumer can quickly tell if a food is a nutritional heavy-hitter.

Gram content of "fuels"—protein, carbohydrate, and fat—is listed. And content of protein, four vitamins and two minerals is also illustrated by darkening parts of smaller circles

Our minimal nutrition labeling gives the same information, though up to 14 additional vitamins and minerals can also be listed by U.S food packers.

Whalen, meanwhile, is soliciting comments from persons who have been adversely affected by unlisted food ingredients. His address is 1035 Longworth House Office Building, Washington, D.C. 20515.

One case Whalen cites is that of Michael Grybsank's "ice cream death," in 1962. Grybsank was extremely allergic to peanut butter. He died as a result of eating butterfinger ice cream, which contained candy, which contained peanut butter. But the peanut butter was not listed on the ice cream label as an ingredient.

This is possible because standard foods, of which ice cream is one, are not required to list ingredients, and party because some ingredients can be listed in generic groups, such as food colorings or spices.

Standards originally insured that commercially prepared foods would meet minimum requirements and be truly representative of the homemade foods they replaced. But standards have been amended so often that some allow for hundreds of optional ingredients today.

A 1975 report from the General Accounting Office, titled "Food labels; do they tell enough?" concluded that they don't.

The report recommended much more explicit labeling to aid "23 million people with heart conditions, over four million diabetics and kidney patients and over seven million people who suffer allergic reactions."

Saturated fats, sodium and caffeine are of particular concern to heart patients, noted the reports. Diabetics are interested in sugar content, kidney patients in potassium.

Milk, eggs, gluten, wheat, corn, tartrazine (FD&C Yellow No. 5), nuts and monosodium glutamate are of major concern to allergics, pointed out the report.

GAO reviewed 284 food categories which are exempt from ingredient labeling.

The foods were checked for content of caffeine, eggs, gluten, milk, monosodium glutamate, nuts, sodium, sugar, tartrazine and wheat. At least one of these ingredients was an optional ingredient in 127 food categories reviewed.

Next GAO randomly selected 1,000 food products from Detroit supermarkets. The agency found that labels for 129 disclosed none, or only some, of their ingredients. And 64% listed "spices, flavoring, colorings, and vegetable oils in general terms."

In the three years since, the Food and Drug Administration has moved to require identification of oils (effective this July 1) and has proposed listing of tartrazine.●

NAVAL RESERVE ASSOCIATION JOINS IN OPPOSING THE PROPOSED PANAMA CANAL TREATIES

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 15, 1978

● Mr. HANSEN. Mr. Speaker, I recently received a letter date March 9, 1978 from Capt. Fred D. Carl, USNR (ret.), president of the Naval Reserve Association, notifying me of the opposition of the 19,000-member Naval Reserve Association to the proposed Panama Canal treaties. I find this extremely significant not only as a reflection of public opinion, but also as an indication from an authoritive source as to the real importance of the Panama Canal to our national defense. For the benefit of my colleagues in the House as well as the Senate I include for the RECORD a copy of Captain Carl's letter and the enclosed position statement.

AN OPEN LETTER TO THE CONGRESS

On behalf of the 19,000 member Naval Reserve Association, I respectfully urge your support for disapproval of the two proposed Panama Canal treaties. Enclosed herewith is a copy of the position statement adopted by the National Executive Committee of the Naval Reserve Association on February 25, 1978, following an intensive review of the issues involved. It is believed that the treaties, even with the proposed amendments, are not in the national interests of the United States.

Having visited the Canal Zone and Panama several times during the past year, most recently in late January to review the ramifications of the treaties, I am strongly opposed to ratification. It appears to me that the Administration has shamefully misled the American public by deliberate half truths and omission of facts in its massive public program to "sell" the treaties. Torrijos has played his cards right since last August, holding down disturbances and minimizing violations of human rights during this period.

Ratification of the treaties would enhance a communist takeover of another country. There is ample evidence of communist involvement in the highest levels of the Panamanian government, despite public assurances to the contrary by the State Department. Ratification of these treaties and the giveaway of the Panama Canal would be pursuing a policy of appeasement and constitute an abdication of our responsibility and position as a world leader. There are other ways of satisfying the legitimate concerns of the Panamanian people without jeopardizing our nation's national security.

Indications are that a strong "get-on-the-bandwagon" atmosphere is being generated in order to stampede the Senate into hasty ratification. I urge you to resist such pressures and to support efforts to disapprove these treaties.

Sincerely yours,

FRED D. CARL,
National President.

THE PANAMA CANAL AND THE PROPOSED TREATIES

The Naval Reserve Association is of the opinion that the ratification of the new Panama Canal Treaties as proposed by the Administration, or even as amended as proposed to clarify certain points in the treaties, would be contrary to the national interests of the United States. The Naval Reserve Association is opposed to these treaties for the following reasons:

1. The protracted discussions concerning the interpretation of "neutrality" and the drug traffic through Panama are diversionary and tend to mask the principal defects of the treaties, without which these problems would not arise. The relinquishment by the U.S. of its rightful and necessary control of the Canal Zone, and the consequent inability of the U.S. to enforce compliance by Panama with any of its treaty obligations would not be possible, once Panama has taken control of the Canal Zone.

2. The instability of Panamanian governments (59 revolutions in 75 years) raises a serious question as to the degree of reliance we can place on honoring of treaty obligations by Panamanian governments, both present and future. The unreliability of the present government has already been indicated by the numerous recent violations of the existing treaty provisions.

3. The near-unanimity of retired U.S. Navy flag officers in opposition to the proposed new treaties (241 out of 245) strongly suggests that senior active-duty officers are under pressure by the Administration to endorse the treaties.

4. Panamanian control over land and roads of the Canal Zone would jeopardize the security of the Panama Canal and make effective operation impossible as well as greatly interfere with operation and supply of remaining U.S. military installations, should the Panamanian government decide to oppose U.S. policies or extract new concessions.

5. Joint military planning and defense of the Panama Canal and Canal Zone by the United States and Panama is not realistic, since it is based on the tenuous assumption that Panama will be a willing and cooperative partner. If this assumption proves to be invalid, effective joint planning and defense would not be possible.

6. Contrary to popular opinion the U.S. Navy no longer has sufficient ships for constituting a "two-ocean Navy" to fulfill its global missions and commitments simultaneously (the number of Navy ships has decreased from 976 in 1968 to 457 in 1978). Therefore, our ability to shift Naval power from one ocean to another, as the need arises, is dependent upon unrestricted access to the Panama Canal. The same is true with respect to U.S. maritime commerce in view of the fact that over 90 percent of our raw materials are imported and depend to a major extent on transit through the Panama Canal. The proposed clarification of the treaties that U.S. warships would have the right of expeditious transit of the Canal for an "indefinite" period is not adequate assurance, since the term, "indefinite", could be construed to mean a short period of time.

7. The credibility of the United States as a world leader in resisting communist expansion would be greatly undermined by surrendering control of the Panama Canal to Panama, which to say the least is sympathetic toward communism—particularly in the face of threats and warnings of violence and sabotage if we fail to do otherwise.

8. The current ability of the United States to deny use of the Canal to its adversaries is not addressed in the new treaties and would be completely lost if control is relinquished to Panama.

9. On expiration of the proposed new treaties, Panama's ability to charge exorbitant and/or discriminatory tolls could be a continuing source of friction and possible violence between Panama and shipping nations. Panamanian control could also be used as a lever to promote communism in countries which are presently democratic.

10. Despite assurances to the contrary, Panamanian leaders have publicly expressed an intention not to abide by the terms of the proposed neutrality treaty. After Panama has taken control of the Canal Zone, our only means of ensuring that they will honor the terms of the treaty will be the possible withholding of payments due under the terms of the treaty—which may not be feasible due to Panama's ability to retaliate in other ways (see 4 above). Following expiration of the proposed new treaties, we would have no means of securing observance by Panama of the terms of the treaties, short of force, which might be inhibited by considerations of our relations with other Latin-American countries.

11. The Panama Canal operation presently pays about $26 million annually into the U.S. Treasury on unrecovered investment. If the proposed treaties are ratified, this income will be lost and will have to be made up by the American taxpayers. This is one of the additional hidden costs in the treaties.

12. The U.S. presence in Panama is legitimate in every respect, and our rights there were lawfully obtained under the 1903 treaty. In addition, the U.S. purchased all property rights in the Canal Zone from the individual owners and paid $25 million to Columbia in 1922 for a quitclaim agreement. The Panama Canal itself was designed, constructed and paid for by the United States, a tremendous engineering feat which stands today as a monument to U.S. enterprise, determination, courage and ingenuity.

13. Four former Chiefs of Naval Operations issued a joint statement calling for continued U.S. sovereignty and control of the Panama Canal and the Canal Zone, based upon the vital necessity for having reliable availability of the Canal for U.S. Naval forces, and the ability to deny use of the Canal to enemies of the U.S. Admiral Moore further stated, "In military affairs, there is no substitute for ownership of the territory and the ability to control or to deny the waters and air space."

14. A strong possibility exists that the Panama Canal will come under communist control if Panama is given control of the Canal Zone. The present Torrijos government is unelected, having seized power by force of arms in 1968. The communist ties of that government and its close relations with the Castro government in Cuba strongly suggest that the Canal could easily come under strong communist influence or control, should the U.S. relinquish its present rights. The possible uses of the Canal by our opponents as a tool in cold war tactics are not difficult to imagine.

15. The proposed treaties provide no compensation to the U.S. for the tremendous investment it has made in the Panama Canal and the Canal Zone. Not only is this huge investment, amounting to about $7 billion, with all U.S. property rights, handed over gratis, but the U.S. is committed to pay Panama an estimated $60 million annually, plus hundreds of millions more under economic and military programs during the life of the treaties—after which we would have no rights at all except a nebulously worded permission to help defend the Canal. In addition, a reasonable possibility exists that the proposed Panama Canal Commission would find it politically expedient not to raise shipping tolls in order to cover the greatly increased payments to Panama, but instead to pay them from U.S. government subsidies. These aspects are not only unacceptable but are an affront to U.S. citizens and taxpayers.

16. Relinquishment of U.S. control raises the possibility of frequent and prolonged shutdowns of the Canal. Should the treaties be ratified, many employees of the Panama Canal Co., including key personnel, may elect to return to the U.S. in a relatively short period of time, seeing no future there for themselves and the encroachment of an unfriendly Panamanian government. This could lead to operational errors by inexperienced Panamanian personnel with consequent disruption of ship traffic.

17. The operating arrangements detailed in the proposed treaties contain considerable potential for trouble. Panama would be in the position to make things very difficult for the U.S. if we did not acquiesce to future Panamanian demands, due to Panama's control of the police, courts, and the Canal Zone territory (under the terms of the proposed treaties). The same rationale that has given rise to these treaties could be used to justify further demands and concessions in the future.

18. Increased payments to Panama, if deemed appropriate, should be possible under the present operating arrangements, without the necessity of destroying the treaty that enabled the Canal to be built and which today remains the foundation of a vitally important link in U.S. security and world commerce. The proposed treaties will enable Panama, after the year 1999, to charge exorbitant and/or discriminatory shipping tolls if it chooses, with no recourse by other nations except to ship overland at other points or to go around the Horn.

19. The U.S. has other treaties in perpetuity with other nations concerning the Panama Canal, e.g., the Hay-Pauncefote Treaty of 1901. With Panama in control of the Canal, we could no longer guarantee fulfillment of our obligations under such treaties.

20. The U.S. successfully defended and operated the Panama Canal through two world wars, the Korean War, the Cuban Crisis, and Vietnam. This would seem to answer the argument that the Canal cannot be successfully defended. Sabotage attempts or actions by local dissidents to put one or more of the Canal locks out of operation would require a team of well organized demolitionists and a considerable amount of time to be successful. Thereis no military reason why the security of the locks cannot be successfully defended against such attempts. In addition, the economic disadvantage that would be suffered by Panama if the Canal were to be put out of operation would be sufficient to expect that Panama would take measures to prevent acts of sabotage.

21. Should Panama later decide to abrogate certain treaty rights granted to the U.S. under the proposed treaties, the U.S. would put itself in the position of "imperialist aggressor" if it attempted to use force to ensure those rights. Thus, the treaties, rather than solving a current issue, may actually create greater problems in the future.

22. It is not reasonable to expect that a very small country such as Panama, as landlord of one of the world's most strategic waterways, would remain immune from international pressures, despite the declarations of the proposed neutrality treaty. The long term interests of the U.S. and all nations would be best served by having control of the Canal remain with the U.S. whose record of Canal management and operation has been very creditable and fair.

23. The State Department has indicated that the primary problems with Panama are political in nature. The only reasons thus far advanced for surrendering U.S. control are:

a. Threats of violence and sabotage if the proposed treaties are not ratified. (To suggest that the U.S. should negotiate from fear and blackmail, particularly when the potential opposing force is so miniscule, is unworthy of a great power and is a policy of appeasement.)

b. Surrendering control of the Panama Canal would improve our relations with Latin-American countries. (Any good will so obtained would very likely be forgotten by succeeding governments, who certainly would not appreciate the higher ship tolls that these treaties can be expected to bring.) This massive "giveaway" may even be regarded as justification for demanding more U.S. aid for themselves. Further, many Latin-American leaders and officials are inhibited from supporting continued U.S. control of the Canal because such would be unpopular and

contrary to the "get Uncle Sam" syndrome. It is probable that many Latin-American countries are actually uneasy over the possibility that this waterway, so vital to their world commerce, will come under the control of an unreliable Panamanian government.

24. The State Department's contention that the 1903 treaty should be scrapped because the same terms could not now be obtained from Panama is a ridiculous argument because:

a. Conditions are not the same now as they were then, i.e. the Canal had not been built then—and may never have been built had Panama not made concessions, since we were also considering Nicaragua as a possible canal site at the time.

b. The same argument could be made for suggesting that we return Alaska to the Soviet Union, Florida to Spain, and the Louisiana Territory to France, since none of those countries would sell those territories to us now for the prices that we paid at the time of purchase. The 1903 Treaty with Panama is no less valid than those other purchase treaties, and should be no less permanent.

25. Recent transfer to Panamanian registry of a significant number of merchant ships owned or controlled by the Peoples Republic of China is cause for concern with regard to possible significant Chinese influence in Panamanian affairs at some future date.

26. The proposal for two treaties could lead to irreparable difficulty by putting Panama in a position to announce nullification of the Neutrality treaty, after the U.S. had given away its rights in the basic Canal Treaty, a separate legal instrument not dependent upon compliance with the Neutrality Treaty.

The above position statement was adopted by the National Executive Committee of the Naval Reserve Association on 25 February 1978.●

SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committees scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, March 16, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MARCH 17

*Energy and Natural Resources
To hold hearings on the nomination of H. William Menard, of California, to be Director of the Geological Survey.
3110 Dirksen Building

9:00 a.m.
Governmental Affairs
Civil Service and General Services Subcommittee
To hold hearings on S. 408, to extend certain benefits to ASCS county employees.
357 Russell Building

Judiciary
Improvements in Judicial Machinery Subcommittee
To hold hearings on S. 2094 and S. 2389, to provide access to the Federal courts for the redress of citizens' grievances.
5302 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on numerous pending nominations to the U.S. Metric Board.
318 Russell Building

Energy and Natural Resources
To hold hearings on the nomination of Robert D. Thorne, of California, to be an Assistant Secretary of Energy.
3110 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To resume hearings on S. 2040, the Comprehensive Drug Amendments Act.
Until 12:30 p.m. 4232 Dirksen Building

Select Ethics
To continue closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Until 12:30 p.m. S-407, Capitol

10:00 a.m.
Budget
To receive testimony from Secretary of HUD Harris in preparation for reporting the first concurrent resolution on the FY 79 congressional budget.
6202 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To hold hearings on S. 2444 and S. 2437, relating to a national program of dam inspection.
4200 Dirksen Building

Foreign Relations
To meet in closed session to discuss the Middle East situation.
S-116, Capitol

11:00 a.m.
Select Intelligence
Special Investigations Subcommittee
Closed business meeting.
S-126, Capitol

2:00 p.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on H.R. 7320, to revise miscellaneous timing requirements of the revenue laws.
2221 Dirksen Building

Select Ethics
To continue closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Until 5:00 p.m. S-407, Capitol

MARCH 18

9:30 a.m.
Select Ethics
To continue closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Until 12:30 p.m. S-407, Capitol

2:00 p.m.
Select Ethics
To continue closed hearings concerning alleged attempts by representatives of the Republic of Korea to improperly influence Members and employees of the Senate.
Until 5:00 p.m. S-407, Capitol

MARCH 20

8:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Research and General Legislation Subcommittee
To resume hearings on proposed extension of the Commodity Futures Trading Commission.
324 Russell Building

Appropriations
Agriculture Subcommittee
To hold hearings on budget estimates for FY 79 for the Department of Agriculture and related agencies.
1318 Dirksen Building

9:00 a.m.
Governmental Affairs
Federal Spending Practices and Open Government, and Civil Services and General Services Subcommittees
To hold hearings jointly on transporting hazardous materials by rail.
1224 Dirksen Building

Judiciary
Improvements in Judicial Machinery Subcommittee
To resume hearings on S. 2094 and S. 2389, to provide access to the Federal courts for the redress of citizens grievances.
2228 Dirksen Building

Citizens and Shareholders Rights and Remedies Subcommittee
To hold hearings on S. 2390, the Citizens' Access to the Courts Act.
6226 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 2616, FY 79 authorizations for the National Transportation Safety Board.
235 Russell Building

SENATE—*Thursday, March 16, 1978*

(Legislative day of Monday, February 6, 1978)

The Senate met at 9 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. ROBERT C. BYRD, a Senator from the State of West Virginia.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray.

O God our help in ages past, our strength in the present and our hope for all the future, be especially near to us on this day of judgment and hard decision. Grant to us the light and the wisdom of Thy continual presence. If we forget Thee do not forget us.

In crises keep us strong and calm. Guard us from bad manners, from illtempered speech, and ungracious demeanor. Prepare us for the surprises of history. Winning or losing in the contests of this life may we never lose the awareness of Thy presence. Help us to comport ourselves with the dignity and majesty of persons created in Thy image and destined for citizenship in Thy kingdom.

"Now unto Him that is able to keep us from falling, and to present you faultless before the presence of His glory with exceeding joy; to the only wise God our Saviour, be glory and majesty, dominion and power, both now and ever." Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The second assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 16, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT C. BYRD, a Senator from the State of West Virginia, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. ROBERT C. BYRD thereupon assumed the chair as Acting President pro tempore.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the order entered on yesterday, the Senator from Indiana (Mr. LUGAR) will be recognized, as in legislative session, for not to exceed 15 minutes.

THE 100 DAYS OF URBAN POLICY DEBATE: THE NEW YORK CASE

Mr. LUGAR. Mr. President, in the next 100 days, the Congress will make a number of fundamental decisions on urban policy, and President Carter will reportedly announce his urban policy proposals. I know that many of us will want to boost those ideas which seem promising for strengthening our Nation's cities. We will also want to offer alternative suggestions on the basis of practical experience in urban government.

In truth, the Carter administration has already made a most significant statement of urban policy, in the proposal for financial relief of New York City enunciated by Secretary of the Treasury Michael Blumenthal. By June 30, 1978, crucial decisions will be made by the city of New York, the State of New York, the Congress, and the President about urban policy. Despite many assertions to the contrary, the New York City situation is not unique. New York City encompasses the same basic dilemmas that face cities of all sizes in our country; the pattern of settlement and the reasons for that settlement will dwarf in significance all of the rest of urban policy suggestions and debate during the year.

A great temptation in urban policy discussions is to try to isolate cities from all of the other crosscurrents of life in America and, by offering a carrot here and a stick there to stimulate the body of urban government with hopes that something positive will turn up.

The New York situation moves quickly beyond the academic and the experimental to the political and economic realities of urban policy. The Senate Committee on Banking, Housing, and Urban Affairs of which I am a member issued a unanimous report on February 9 which states that no further Federal loans to New York City are justified. In response to hearings called by the Banking Committee in the House, Secretary Blumenthal stated on March 2 that the administration is suggesting a plan which calls for Federal guarantees of approximately $2 billion of long-term bonds ranging up to 15 years in maturity.

New York City and State officials have thanked the Secretary for proposals which are surely generous in comparison to the Senate Banking Committee stance, but Governor Carey and Mayor Koch have indicated that much more will need to come in negotiations with the Federal Government if New York City is to avert bankruptcy. They cite President Carter's well-known campaign pledges to bolster their faith that the Carter administration simply will not allow bankruptcy in New York City.

Our colleague, the distinguished junior Senator from the State of New York, stated the New York City case with eloquence in a speech before the 50th mid-

winter banquet of the New York State Bankers Association when he said:

We have a simple proposal, requiring not a monumental new federal urban policy, nor huge new increases in federal spending for cities. Such will prove to be illusory in any case. Rather, what is required is a straightforward commitment to help the City regain its financial equilibrium and the limited federal guarantee needed to implement it.

At the Rambouillet conference in 1975, Chancellor Schmidt of West Germany told President Ford that the bankruptcy of New York City was unthinkable. The Economist of London has repeated this just weeks ago. The Europeans understand that New York is the capital city of the western world; so must our own government.

I put to you a simple proposition: An urban policy, which permits the nation's largest city to go bankrupt is fantasy heading for nightmare. The federal government must accept this, and must simply resolve that that bankruptcy of the City of New York will not be allowed to happen. The Senate Banking Committee has spoken. The time is at hand to hear from the President. It is no longer enough for him to say that he will not allow bankruptcy. The time has come for him to state how he will prevent it.

The President has spoken through Secretary Blumenthal and the Federal Government has made a response to the city's 4-year plan to balance its budget. An initial reading of the 4-year plan will lead most citizens who have witnessed any level of public life to conclude that the overall assumptions undergirding the plan are optimistic to a fault. Careful students of urban government will offer a more detailed analysis, but in this brief summary, I will mention the areas to which my colleagues will want to direct especial attention.

New York City has been receiving substantial grants of Federal aid for many years. The city budget for fiscal 1978 suggests that categorical grants of $2,808,000,000 and $479,000,000 in Federal revenue sharing is anticipated. New York State will provide $533,000,000 in revenue sharing. New York City will raise $7,220,000,000 from local sources on its own. The ratio of Federal aid as a percentage of funds locally raised is 45.6 percent for New York City according to my calculation, and generally in line with 15 other large cities of over 500,000 in population for fiscal 1978, as the Advisory Commission on Intergovernmental Relations pointed out in its 1977 review of federalism.

Very few Americans are aware of the enormous dependency of large cities on Federal categorical grants quite apart from revenue sharing. The action which Congress takes in regard to New York City will not be a one-of-a-kind situation. New York City shares common characteristics with many large cities of this country, all of which could claim in equity a fair share of Federal attention.

Many of us might wish to package the issues in a different form, and pretend that urban policy can be merely a collection of interesting ideas for urban banks, housing incentives, State assumption of new financial or boundary drawing responsibilities, or general attacks on urban crime, pollution, transportation hassles, and educational deficiency. All of these aspects are very important and should and will be addressed. But for the moment, and for the last several years, those delegations of big city mayors coming to Washington have been talking about money. The New York situation is a national debate about money. The question will be faced squarely in 100 days. The answers will determine the fundamental structure of urban policy for some time to come. And all of this will happen whether President Carter advertises a full blown urban policy or not.

As far as I am concerned, the New York debate offers a good forum for urban policy debate because it will engage the attention of the country in a way that could not be matched by the most exciting of discussions in the usual format of urban policy alternatives.

The Wall Street Journal has editorialized that loan guarantees for New York City are not really guarantees but should be understood as outright grants, that the possibility of New York City arriving at solvency on the basis of the 4-year plan, even if supplemented by Federal guarantees, is remote. If this is true, citizens of cities and States all over the country are being asked to redistribute a further portion of their moneys to New York City to subsidize services given to New Yorkers at a level decided by New Yorkers but not paid for by New Yorkers.

New Yorkers will retort that almost every other city is receiving a redistribution of the wealth also, or that the Treasury is simply printing additional money to cover all of the $55 billion in Federal distributions to cities in fiscal 1978.

The New York City 4-year plan for budget balancing assumes that Federal categorical grants will not only remain but will increase during the next 4 years by amounts of $224 million, $379 million, $484 million, and $452 million in fiscal years 1979 through 1982, inclusive. Indeed, the budget has no hope of ever being in technical balance without these substantial increases, all of which are predicated on the timely and favorable outcome of completely unpredictable congressional legislative battles in the areas of welfare reform and medicare funding.

Congress must face the fundamental question of whether we plan to fund increasing distributions of money to local governments even at a time when Federal grants already average an estimated 47.5 percent as a percentage of local budget funds raised on the local level by cities of over 500,000 in population.

Perhaps equally crucial is the host of questions raised by the fact that New York City's 4-year budget plan does not include any dollars to cover collective bargaining settlements with policemen, firemen, and other public employees during the next 4 years. Secretary Blumenthal warns that Federal guarantees or other new loans for New York must await settlement of wage negotiations. I will not belabor the obvious, but there is no reasonable possibility of New York City balancing its budget if payrolls increase. As a larger issue, there is not much hope for the financial solvency of a great many other American cities until a method of preventing strikes by policemen, firemen, and other vital service employees is achieved. There is not much hope until we answer this basic question: Who in America should pay for wage and pension settlements which are clearly excessive, however understandable the motive of the mayors who agree to them, as they attempt to preserve a degree of public safety in a complex and vulnerable urban society?

For the moment, let it be clearly understood that the Federal Government, which is to say the taxpayers at large, is paying for most of those settlements now, and that means that a redistribution of national wealth is occurring, assisted by the running up of Federal deficits.

Because city budgets are so victimized by national inflation, cities approach the Federal Government with an appropriate sense of justice as they seek to remedy the hidden taxation of inflation by restoring solvency through grants of all sorts.

The Federal Government has mandated urban policy, effectively, by attaching to these grants at least 33 general guidelines which require performance by cities in the areas of environment, equal opportunity and affirmative action, the Davis-Bacon Act, and a host of other federally determined goals. These mandates are expensive to attain and, collectively, they thwart or simply overwhelm all the well meaning suggestions for economic aid and development which are usually trotted out as a stab at urban policy making.

All of this continues despite the fact that cities are losing population, as are entire large urban areas in the Northeast and upper Midwest; that local budgets are increasing in size; that larger Federal contributions are demanded to cover deficits; and that Federal guideline policies are enforced with rigor, even if they are contributors to the flight of people and commerce and thus to any hope of genuine recovery.

I believe that a general impression prevails in Congress and in the country that, as June 30 approaches, much negotiation and handwringing will occur, but that a midnight solution involving new Federal assistance will be given to New York City. Oppressive Federal urban policies incorporated in mandatory guidelines to all cities will not have been reformed, public employee dilemmas will have been discussed and much lamented but will not have been touched. Almost no one will believe that the New York City budget will ever be balanced if Congress and thus the rest of the Nation proves willing to support the unbalanced budget of goods and services for New York. New Yorkers will feel that the settlement of new guarantees, loans, and grants is stingy, but meanwhile many other cities and their respective Congressmen will be demanding justice in terms of equal consideration. In the midst of all this, someone may come forward with a few schemes for inner city renewal and economic revitalization—useful ideas, but almost totally irrelevant compared to the fundamental, monumental issues confronting American cities.

What really is needed, as we try to come to terms with the issues of money, is to wrestle with so-called environmental attainment standards which, as matters stand, will knock any serious

urban revitalization program into a cocked hat.

We will need to discuss whether a truce can be obtained in the urban schoolbusing war, with commonsense prevailing over the previously undebatable standards of mathematical exactitude in racial balance. Can there be an end to rent controls around the country, the establishment of two or more standards for code enforcement in order that rehab of properties is really practical: can HUD and city governments expand urban homesteading and disgorge swollen portfolios of housing properties without endless guidelines and redtapes? Can there be tradeoffs with affirmative action and quota systems if necessary to provide economic growth of a city or substantial urban public budget cutting?

Is this an appropriate time for the Federal Government to face the inflationary aspects of urban policies which have run amuck in the name of social justice, and which are paid for through the injustice of gross inflation and a strangling noose around the budgets and the policies of urban America?

In my judgment, the current 4-year budget plan of New York City is unacceptable because it guarantees that New York City budgets will remain unbalanced indefinitely. Secretary Blumenthal's response, predicated on retention of so much that remains unmentioned and untouched in New York City, is equally insupportable, and not a final solution. It is only another temporary fix. In the next 100 days, we have an opportunity to make progress in formulating urban policy. The purpose of this speech is to indicate that, absent many more favorable developments in which the Federal Government agrees to liberate New York from crippling guidelines, New York City prepares much more seriously to balance its budget, and the State of New York moves to guarantee the fiscal integrity of its major city, the reasons for taking no action in regard to loans and guarantees for New York City by June 30 clearly outwiegh reasons which have been offered to support such Federal action. At this juncture, the State of New York should be planning to take a much more comprehensive role in the post-June 30 period as should New York banks, pension funds, labor unions, and citizens at large assisted by a vigorous press that could help frame issues and focus decisionmaking.

It will be no service to New York City or to any other city to paper over the cracks once again, and I invite other Senators to join me in pledging that we do not intend to do so.

Mr. President, I ask unanimous consent that pages 8 through 14 of the ACIR annual report on federalism and an article entitled "How Many More New Yorks?" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FEDERAL INITIATIVES AND IMPACTS

Despite a decline in the public sector growth rate in 1977, the trend during the past quarter century has been toward an unparalled expansion of government. State and local governments in particular have grown rapidly, as demonstrated by the nearly threefold increase in their work forces from about 4.1 million to 12.2 million between 1953 and 1976, and the nearly tenfold increase in their own revenues during the same period, from about $27 billion to approximately $200 billion. The roles of these governments also have expanded and diversified greatly, supported in part by federal aid.

But while the size and scope of state and local responsibilities have grown, policy initiatives, allocational decisions, and administrative authority increasingly have been centralized at the national level. Paradoxically, this shift began to accelerate at a time when two national administrations were proposing policies designed to facilitate decentralization.

The dollars and the sense

The expansion of the federal government's role has taken a variety of forms. Recent trends in aid programs, regulations and supersessive laws illustrate the dimensions of this phenomenon:

In 1950, federal grants-in-aid to state and local governments amounted to about $2.3 billion; but by 1977, the total has risen to over $70 billion. The forms of federal assistance also have changed, with general revenue sharing and block grants now comprising almost one-fourth of what was once an entirely categorical system. These newer grant forms also have expanded greatly the contemporary intergovernmental partnership, as virtually all state and local units are recipients of federal aid and are, therefore, bound by the accompanying conditions and controls.

As the modified version of the golden rule goes, "he who supplies the gold makes the rule," and federal aid is no exception. At least 33 crosscutting regulations routinely are attached to most aid programs. These deal with such subjects as environmental protection, relocation, citizen participation, prevailing wages, and affirmative action, and they are in addition to specific programmatic requirements.

And, federal supersessive laws—which in various ways remove jurisdiction from the states—have enlarged the sphere of federal influence and decisionmaking. Over 40 such laws have been enacted by the Congress in such diverse areas as the environment, occupational health and safety, consumer protection, civil rights, and horse protection.

These developments in federal assistance, regulations and law have increased the interdependence of federal, state and local governments. They also have raised concerns about the degree of dependence of states and localities on the federal partner. Federal aid as a percent of state and local own-source general revenue rose from 11 percent in 1957, to 28 percent in 1976. Large cities have registered the most dramatic increases. Direct federal aid as a percent of municipal own-source revenue has virtually doubled every five years over the last two decades—rising from about 1 percent in 1957 to over 23 percent by 1976 It is estimated that federal aid to cities over 500,000 population will zoom from 28 percent of their own-source revenues in 1976, to about 50 percent in fiscal 1978 (see Table 1).

Several major factors have contributed to this dramatic growth in direct federal assistance: general revenue sharing, the manpower and community development programs, and the Carter Administration's economic stimulus package. Others include:

The economic and fiscal plight of the older central cities, and the basic political fact of life that in order to win sufficient Congressional support for aid to these jurisdictions, it is usually necessary to extend federal assistance to a wide range of local governments;

The development of strong "urban" lobbies in Washington;

The relatively poor performance of the states in facilitating and assisting urban problem-solving; and

The growing hope that direct federal aid to poor cities also will help poor people.

In 1977, with a new President in the White House (whose public career has included service at both the State and local levels) and the 95th Congress convening on Capitol Hill (with new leadership and members in both chambers), these and other dynamics of the federal system were the focal point of attention by citizens and public officials alike.

TABLE 1.—DIRECT FEDERAL AID AS A PERCENT OF OWN-SOURCE GENERAL REVENUE, SELECTED CITIES AND FISCAL YEARS 1957–78

City	Fiscal years (percent)				Exhibit: per capita Federal aid [1]	
	1957	1967	1978	1978 estimate	1976	1978 estimate
St Louis	0.6	1.0	23.6	56.1	$86	$228
Newark	.2	1.7	11.4	64.2	47	291
Buffalo	1.3	2.1	55.6	75.9	163	239
Cleveland	2.0	8.3	22.8	60.3	65	190
Boston	[2]	10.0	31.5	30.2	204	219
Unweighted averages	.8	4.6	29.0	57.3	113	233
Baltimore	1.7	3.8	38.9	46.4	167	225

Unweighted average of 15 cities	1.1	5.2	28.1	47.5	95	179

[1] Based on 1975 population.
[2] Less than 0.05 percent.
[3] Percentage based on Federal aid excluding general revenue sharing. Funds withheld pending judicial determination.

Source: ACIR staff computations based on U.S. Bureau of the Census, "City Government Finances in 1957, 1967, and 1976." Estimated city own-source general revenue for 1978 based on annual average increase between 1971 and 1976. Direct Federal grants to each city for fiscal 1978 based on (a) ACIR staff estimates of the Federal stimulus programs for 1978 and (b) Richard Nathan's estimates for all other Federal aid in fiscal 1978 as set forth in his testimony before the Joint Economic Committee on July 28, 1977.

A NEW ADMINISTRATION

A top priority of this first Carter year has been the reorganization of the federal bureaucracy, its budgeting system, and the procedures for evaluating the government's programs and operations. Three themes appeared to emerge: recentralization, consultation and effectiveness.

Reorganization or recentralization?

One of the first Presidential acts of the year was to request the Congress to re-establish the Chief Executive's authority to reorganize the Executive Branch. After considerable debate, a procedure was approved in April, enabling the President to submit plans to create, abolish, consolidate and shift agencies in various departments (within certain limitations) unless either the Senate or the House rejects the plan within 60 days after submission.

In July, the President transmitted his first reorganization plan to Congress—dealing with the Executive Office of the President. Among its features were a reduction in staff levels, consolidation of administrative service functions, elimination of some units, and the creation of a new policy management system.

The plan discontinued the Domestic Council because, in the President's judgment, it has rarely functioned as a Council, because it is too large, and its membership is too diverse to make decisions efficiently." A domestic policy staff, under the direction of an Assistant to the President for Domestic Affairs and Policy, was proposed as a replacement. This staff now coordinates a system which is designed to improve decisionmaking in the formation of domestic and economic policy. Policy agendas are recommended by a committee of Presidential advisers under the chairmanship of the Vice President, and the role of Cabinet departments in policy development has been strengthened. The President earlier had appointed a senior aide to serve a dual function as secretary to the Cabinet and as Assistant to the President for Intergovernmental Affairs.

The first reorganization plan took effect in September. A second plan, focusing on international cultural, information and education activities, went into effect in mid-December.

Reorganization plans underway

These two plans, as well as future ones, are products of the President's Reorganization Project, located in the Office of Management and Budget (OMB). This staff is organized into special study teams for developing reorganization recommendations over a four-year period. There are 31 reorganization initiatives underway. The following projects are representative of the work which could have significant impact on state and local government:

Community and local development—to review the organization and structure of the major federal programs for local and community development;

Civil rights—to strengthen enforcement of civil rights legislation and reduce the burden of formal compliance activity;

Intergovernmental management circulars—to improve the procedures covered by OMB Circulars A-85 (regulation review), A-95 (clearinghouses), and A-111 (joint funding);

Federal planning requirements—to review federal requirements for state and local planning, to promote coordination, and to minimize the burden on state and local governments;

Human services—to improve the federal organization and delivery of human services to needy families and individuals;

Paperwork reduction—to reduce federal government reporting burdens and implement the Federal Paperwork Commission's policy recommendations; and

Federal field structure—to review field coordination of interagency and intergovernmental operations.

Much of the preliminary work of the reorganization study teams is to be completed in 1978. These groups also are working in conjunction with ongoing internal department reorganizations. The degree to which some of these efforts are being coordinated, however, is not completely clear. An example here is the apparent confusion over a plan to reorganize the Law Enforcement Assistance Administration (LEAA). In early December, it was reported that the Department of Justice had urged the President to scrap the LEAA program, and replace it with a "National Institute of Justice" to conduct research and to target federal funds to high crime areas. A White House spokesman described the recommendation as "very useful," but added that the reorganization project also was preparing a report for the President. According to the spokesman, the reorganization project staff recommended that a decision on LEAA reorganization be deferred until its recommendations are submitted and reviewed.

The civil service component

Federal personnel management practices are being reviewed as well. While the vast majority of work pertains strictly to federal personnel, the Task Force on Federal, State and Local Interaction in Personnel Management also was established and substantially has completed its work. This task force has been addressing questions concerning the appropriate and inappropriate roles of the federal government in improving state and local personnel management; in mandating state and local personnel practices in such areas as collective bargaining, pensions, and unemployment insurance; and in prescribing personnel requirements as conditions to grant programs. It also is considering whether the *Intergovernmental Personnel Act* programs should be revised and the capacity building component expanded to encompass more of state-local general management.

Field office recentralizations

Of particular interest to state and local governments were the field office reorganizations in several federal departments in 1977. The LEAA regional offices were closed in September, with personnel reassigned to the central office in Washington or to one of five regional audit offices. The Secretary of the Interior's regional representative offices were abolished, and the Labor Department's regional director positions were eliminated. The number of Housing and Urban Development field offices was reduced, and the Secretary's representatives in HEW regional offices lost their program responsibilities.

These centralizing organizational realignments not only affect individual agency relations with state and local governments, they also have given rise to concerns about the White House position that the Administration is "committed to a Federal regional presence." As noted by Washington columnists Rowland Evans and Robert Novak: "Judging from his campaign emphasizing his non-Washington base and extolling government closer to the people, voters expected that one distinctive Carter label on the federal leviathan would be less, not more centralization."

Related questions have been raised regarding the continuation of the ten Federal Regional Councils (FRCs). The FRCs, which are intended to coordinate federal programs in their regions, have had a mixed record at best, and currently are on "one-year's probation" to improve their performance. The President has designated a chairman for each FRC, and the Under Secretaries Group has been reactivated to oversee their work. A decision on continuing FRCs probably will be made in late 1978. As a White House aide put it, the President "doesn't want to change the coordinating mechanism until we know what is to be coordinated."

Intergovernmental consultation initiatives

According to Jack H. Watson, Jr., Assistant to the President for Intergovernmental Affairs, "there is virtually nothing that the Federal Government does, domestically certainly, that does not involve the immediate participation and partnership of state and local governments." Within five weeks of assuming office, the President directed the heads of all executive agencies and departments to make provisions for a "genuine and timely" consultative process with state and local officials, noting that:

"State and local sectors constitute the delivery mechanisms for *most* of the actual services the federal government provides;

State and local concerns, as well as their expertise, should be considered as programs are being developed in order to ensure the practicality and effectiveness of the programs;

Such early participation by state and local officials in our planning proces will help ensure broad-based support for the proposals that are eventually developed; and

It will ensure that priorities developed at the federal level will work in conjunction with, and not at cross purposes to, priorities at the state and local level."

By mid-September, the President also had directed the heads of all agencies having extensive contact with state and local officials to designate a senior staff person for liaison with those officials in the development of policy. These officials have been named, and their names published in the *Federal Register* and disseminated to state and local officials. As a further extension of the President's directive, Commerce Secretary Juanita Kreps not only designated a key aide to act in the "liaison" capacity, but also established the Office of State and Local Government Assistance to help facilitate state and local contact with the various activities and programs of her department.

In November, a draft Executive Order was published in the *Federal Register* focusing on state and local participation in the development and promulgation of federal regulations with significant intergovernmental impact. The draft order stated that "regulations should be as simple and clear as possible," should "achieve legislative goals effectively and efficiently," and "should not impose unnecessary burdens for the economy, on individuals, on public or private organizations, or on state and local governments."

The effectiveness quest

Closely associated with reorganization efforts are various Administration initiatives to increase the effectiveness of the federal government's programs and operations.

Budgeting. "Zero-based" budgeting (ZBB) is one of the most heralded of these initiatives, and is being utilized during the preparation of the first "Carter budget" for FY 1979. ZBB techniques have been used by businesses for several years, and first were applied to government in Georgia during the first term of then Governor Jimmy Carter. While it is too early to rate the success of ZBB, Administration spokesmen do say that "an honest try" was made during this first year and that the process fulfilled its promise in some agencies.

Critics of ZBB, however, argue that this approach may be inappropriate. Robert W. Hartman of the Brookings Institution, for example, has contended that it "makes no sense" to rank the food stamp program against research within the Department of Agriculture, when it is not ranked against HEW's welfare programs. Hartman main-

tains that ZBB concentrates attention on the budget for the coming year, which largely is "locked in place," at the expense of a focus on multiyear budgeting—another Carter goal. He suggests that the best method for identifying budget reductions "should be specially designed approaches in different areas."

The first year's experience of ZBB will be evaluated during the months ahead. One concern is state and local involvement in the ZBB process for future fiscal years, since some believe that in view of the substantial amount of the budget that is considered "uncontrollable," grant programs to states and localities may be the most susceptible to change.

In addition to ZBB, three other features characterize the Carter Administration approach to the federal budget:

Multiyear budgeting—the goal is to move to a two to three-year budget focus in an attempt to evaluate the "out-year" implications of "close-year" decisions;

Better use of existing programs—the view is that unless the existing program base is sound, additions to that base will be ineffective and a waste of resources; and a

Balanced budget by 1981—according to Administration spokesmen, the President "understands the implications—both economic and political" of working toward a balanced budget by 1981; however, he is still committed to it, "and will do nothing now to jeopardize that goal."

Achievement of a balanced budget by the end of the President's term is easily the most controversial of the budget goals. It is of particular concern to local and state officials who are calling for an increase in domestic aid programs. In an appearance before the Joint Economic Committee in early December, Congressional Budget Office (CBO) Director Alice Rivlin cautioned that continuing attempts to reduce unemployment through economic growth would preclude balancing the budget by 1981.

The Grant System. The grant system is the second area in which greater effectiveness is being sought. In early September, the President announced plans for what he termed "a concentrated attack on red tape and confusion in the Federal grant-in-aid system."

Several actions were initiated to simplify planning, application and reporting requirements. Agencies were directed to ensure that standard application forms are used and are widely available, that grantees be required to submit only an original and two copies of applications or reporting forms, that reports be combined or eliminated where possible, and that federal agencies share information among themselves rather than requiring grantees to provide the same data more than once. Earlier, a June directive had focused on a "zero-based review" of all federally imposed planning requirements, with the intent of substantially reducing them by the end of the year.

In the area of financial management, the President directed OMB to review "advance funding" for five programs. In December, OMB announced that it would recommend advance funding for three of the programs—maternal and child health care, aging, and vocational rehabilitation—in the FY 1979 budget. The Treasury Department also expanded its use of letters-of-credit, and is identifying additional programs which could benefit from electronic fund transfers.

Growing financial interdependence has led to stepped-up audit activity at all government levels. Federal agencies have been directed by the President to make their audit schedules systematically available to grantees and to public and private auditors; to conduct single audits wherever possible; and to increase their reliance on state and local audits.

Improvement of federal administrative regulations—long the bane of state and local officials—is another component of the grant system reform package. In addition to being written in clearer and simpler language, state and local officials are to be consulted during the drafting process. Regulations are to be changed less frequently and made less complex. Uniformity of administrative requirements for all grant programs administered by a single department remains an objective.

The final area of administrative reform of the grant system concerns those crosscutting requirements designed to achieve specific national goals. At the President's request, an effort has been launched by the Community Services Administration, the Equal Employment Opportunity Commission, and the Council on Environmental Quality to bring order out of the chaos of regulations dealing with citizen participation, civil rights, and environmental protection. These agencies are charged with identifying redundancies and gaps so that more uniform and simpler requirements may be developed.

The President also has asked ACIR to "suggest appropriate ways to further streamline federal aid administrative practices." In one area, ACIR has recommended the consolidation of categorical grant programs, and preliminarily has identified 172 programs which could be merged into 24 functional areas. ACIR also has urged that the President be authorized to submit consolidation plans to Congress in a manner similar to that now used for Executive Branch reorganization plans. In addition, ACIR will undertake a federal aid monitoring project, an idea that was conceived by the White House Intergovernmental Affairs Office during its survey of federal aid administration earlier in the year. The one-year experiment will provide a mechanism to obtain information from state and local officials about federal aid administration problems, and will serve as an "early warning system" for identifying friction points and as a feedback mechanism to federal agencies.

THE "URBAN CONNECTION"

One of the most publicized—and at times criticized—initiatives during the first Carter year was the development of an urban policy. To be sure, there is an abundance of urban policies being carried out by federal departments and agencies. These policies, however, often are disjointed and inconsistent with one another. The tension between programs aimed at rebuilding central cities and those stimulating suburban growth is the classic example.

In March, the President formed a Cabinet-level Urban and Regional Policy Group (URPG), chaired by HUD Secretary Patricia Harris. The charge to the group was to prepare an "urban strategy," with its first task being the formulation of an urban program that would be incorporated into the President's State of the Union Message in January 1978. However, the pace and character of the group's work have come under attack from such groups as the National Urban League, the AFL–CIO, the Congressional Black Caucus, and the National League of Cities.

On the one hand, black leadership and labor groups contended that too much time was being devoted to research and not enough emphasis was being given to "action oriented results." It has been speculated that pressure from these groups—particularly from the National Urban League—contributed to a reorientation of the URPG's work, and to White House encouragement for a speedier process and greater involvement in the project. On the other hand, the National League of Cities (NLC) cautioned that more time would be necessary to do a credible job. The NLC also criticized the "narrow scope" of the group's focus, noting that such issues as crime, education and energy which will not be addressed by the URPG are integral parts of the urban scene and must be considered as part of an overall policy or strategy.

Questions also have been raised about some of the group's specific proposals, such as the use of tax incentives and the establishment of an urban development bank ("urbank") to promote development in distressed cities. Proponents contend that tax incentives would be the most effective tool in aiding urban development. However, critics maintain that new tax incentives would add loopholes to the tax code at the very time the President wants to reduce them. Concomitantly, the urban proposal, a decades-old concept, has been termed a "slogan in search of a prorgam." George Sternlieb, a noted urban analyst, recently observed: "If we are truly serious about revitalizing the central city in a market context, the limited range of functions of financing mechanisms that I have heard addressed under the title 'urbank' are nonsense. And they will be very costly nonsense."

These developments are indicative of the frustrations surrounding the formulation of an urban policy which must not only address the fiscal and physical deterioration of cities, but the security and well-being of their citizens as well.

The first draft of the URPG's report was released in November and described urban problems and possible solutions only in general terms. A second draft was submitted to the White House in early December. However, it was rejected by the President on the basis that it was only a "laundry list" of policy proposals and programs and that it failed to establish priorities or set forth bold ideas. He requested that consideration be given to redesigning existing programs rather than simply expanding them or creating new ones; and that provisions be made for a stronger state role, including federal funding to implement comprehensive state growth strategies, the earmarking of general revenue sharing funds, and incentives to coordinate federal and state aid now directed to major urban areas. A third draft is to be prepared by the URPG and White House staff. It now is anticipated that the President's National Urban Policy Report, scheduled for March, will contain broad statements of principle, with a more detailed program to follow later in the year.

Urban policy issues also have been basic to the planning for the 1978 White House Conference on Balanced National Growth and Economic Development. The conference has been organized around six broad themes focusing on economic development, government structure, and fiscal capacity and service delivery problems. ACIR participated in the development of the "streamlining goverment" them by preparing background papers, a discussion guide, and reports on the workshops.

Without waiting for these longer range policy efforts, however, the Federal Home Loan Bank Board, working with the White House, proposed new regulations to prohibit mortgage credit practices which discriminate against older neighborhoods, commonly referred to as "redlining." Specifically, the proposed regulations—applicable to savings and loan institutions, which make more than half of all mortgage loans—prohibit unjustified discrimination in mortgage lending based upon the age of the dwelling or neighborhood in which it is located; require written nondiscriminatory underwriting standards and periodic review of advertising and marketing practices; and prohibit discrimination based on the marital status or age of a loan applicant, or the fact that an applicant receives public assistance. It is anticipated that the proposed regulations will meet with serious opposition from the savings and loan community.

Several committees of Congress also have brought attention to the urban dilemma. A report issued by the House Subcommittee on the City, chaired by Rep. Henry Reuss (WI), termed the federal budget as probably being "the single most important document affecting the well-being of American cities." The report urged the House Budget Committee's Task Force on State and Local Government to "press for active OMB participation in a cooperative effort to improve analysis of budget decisions affecting cities."

The report also noted that neither the Executive Branch nor the Congress systematically considers the impact of the budget on cities, especially central cities, as part of the budgetmaking process. The study continued that OMB appears "reluctant" to expand the special analysis of how much money goes to state and local units, and called for a breakdown of federal dollars flowing into cities of different sizes, suburban communities, and nonmetropolitan areas. The report also urged that the Urban and Regional Policy Group give high priority to the development of a budget impact statement for cities. The Administration now does intend to prepare an "urban budget" for FY 1979. This budget analysis is to include the programs and activities of those agencies with an urban orientation—HUD, DOT, DOL, HEW and Commerce—in an attempt to "more readily identify the substance, quality and quantity of federal aid allocated to major urban areas."

The House Sub-Committee on Housing and Community Development (also of the Committee on Banking, Currency and Housing) has shown similar interest. In February, its Chairman, Rep. Thomas Ashley (OH), established five urban affairs task force to develop policy and legislation. These groups are addressing home ownership and the role of the federal government, neighborhood preservation and rehabilitation, community development, fiscal problems and disparities, and housing subsidies and income maintenance programs.

In August, the CBO released a report entitled *Troubled Local Economies and the Distribution of Federal Dollars*. The report responded to a request from Representatives Elizabeth Holtzman (NY) and Louis Stokes (OH) for an analysis of federal spending, with an emphasis on geographic distribution and the relative well-being of recipient local economies. The study categorized local economic problems into two general areas: those related to low income and those resulting from low economic growth. While the characteristics of individual localities vary, two paradoxical patterns emerged:

Low income appears to be concentrated in the south and southwest regions, despite fairly high growth rates in recent years, and

Low economic growth is a condition in the northern regions (New England, Great Lakes, and mid-Atlantic), but personal incomes are relatively high.

These two patterns highlight yet another concern which has expanded—regionalism. The diverse economic trends in various parts of the country have led some pundits to coin phrases such as "the Second War Between the States" and "Sunbelt vs. Frostbelt." The controversy implied by these terms has tended to center on the role that federal aid and direct outlays, and national policy play in regional economic disparities.

Regionalism has spawned at least a dozen regional organizations of state and local public officials in the past few years—including the Coalition of Northeast Governors, the Council for Northeast Economic Action, and the Southern Growth Policies Board. ACIR also is researching the influence of federal policy on regional economic trends, and the potential role of federal policy in ameliorating or reversing undesirable implications of regional economic trends.

THE VIEW FROM THE HILL

The 1977 Congressional year was dominated by the increasing concern over an uncertain economy, and by long-standing environmental and energy issues. While Congress did approve the President's proposal for the Department of Energy—the first new Cabinet department in over ten years—much of the Congressional agenda was, in the end, side-tracked by the preoccupation with the President's proposed energy policy.

Enactments, deferrals, and disagreements

Several program initiatives of particular significance to state and local governments were approved by Congress during 1977:

The "Economic Stimulus Package" was approved and funded at a $20 billion level. It consisted of a three-pronged attack on the recession involving local public works, public service jobs, and countercyclical general revenue sharing. A one-year extension of the Comprehensive Employment and Training Act of 1977 (CETA) was approved, and funded at a level of $7.98 billion as part of the economic stimulus package. The appropriation more than doubled the number of job slots previously funded.

The Youth Employment and Demonstration Projects Act of 1977 authorized four new programs under CETA: youth incentive entitlement pilot projects, youth community conservation and improvement projects, youth employment and training programs, and the young adult conservation corps. The legislation initially will provide for about 200,000 jobs and training slots, and will be funded at a level of $1 billion, earmarked from the economic stimulus package.

The new Housing and Community Development Act of 1977 increased funding for the existing community development block grant program, and for rental assistance and public housing. The act also created a new initiative to aid the most hard-pressed urban areas—the Urban Development Action Grant Program, authorized at $400 million for each of three years.

The fiscal year 1978 appropriation for the Intergovernmental Personnel Act (IPA) was approved at a $20 million level, an increase of $5 million.

A National Commission on Neighborhoods was established to study the factors contributing to the decline of neighborhoods. The 20-member commission will work over the next two years to analyze the effect of government policies on neighborhoods; identify the administrative, legal and fiscal obstacles to neighborhood growth; and analyze the impacts of private and public investment.

The Federal Program Information Act will set up a computerized information system within OMB to disseminate more reliable data on domestic assistance programs to state and local officials in a more timely manner.

Congress did not complete its deliberations on a number of other proposals which would alter the fiscal and functional roles of all three governmental levels. These include:

A key part of the Carter Administration's proposed welfare reform is the creation of up to 1.4 million public service jobs. Of major interest to states and localities is a provision for $2.1 billion in fiscal relief grants during the first year. Half of the relief would go to New York and California; eight states would get $1 million or less. States would be required to pass through this fiscal relief to local governments in proportion to the localities' contributions.

The Program Evaluation Act, commonly known as the "sunset" bill, has been the source of continuing controversy, and has been stalled in the Senate Rules and Administration Committee since last summer. Under the proposal, nearly all federal departments, agencies and programs would be reexamined every six years by Congress. Any agency or program which did not receive affirmative legislative reauthorization action would be terminated automatically. Exempted from the measure are social welfare programs such as Social Security and Medicare. Over 50 sunset bills are before various House committees, and no action is expected until the Senate passes a bill.

The Federal Grant and Cooperative Agreement Act is designed to reduce the confusion between the usage of grants, contracts and cooperative agreements by federal agencies.

The Municipal Bond Disclosure Bill was introduced in late 1977, and would require state and local governments to disclose key information when they issue new securities. In addition, units with debts in excess of $50 million would be required to prepare annual reports on their operations, finances and budget procedures.

The Intergovernmental Coordination Act would establish a national policy on areawide planning and coordination, and strengthen the state and local role of federal planning programs. The measure also would beef up the A-95 review process.

Conferees already have approved a number of energy-related proposals, such as an extension of the state energy conservation program, technical assistance grants to states and localities for conservation activities, and a matching program for conservation in schools and hospitals. Intergovernmental issues include utility rate reform, coal conversion provisions, regulation of inter- and intrastate natural gas prices, and various energy taxes.

The list of caucuses lengthens

One of the more interesting intergovernmental developments in Congress during 1977 has been the emergence and activities of even more special interest caucuses. For example:

The Rural Caucus, composed of 101 Congressmen, was founded in 1973 to "insure orderly growth and development of rural communities." The caucus held its first conference in 1977 to help dramatize the needs of rural areas and to urge full funding for Rural Development Act programs. Approximately two-thirds of the Nation's substandard housing is located in rural areas, and it is expected that the caucus actively will support the reintroduction of the proposed "Rural Housing Act of 1977" early in the 1978 session.

The Steel Caucus was formed in late 1977 to provide "a strong watchdog to protect this endangered basic American industry." The caucus became quite active when steel plants closed in several cities, allegedly because of unfair foreign competition.

The Suburban Caucus was formed in October to support tax relief for suburbanites and more federal projects for middle income families who live outside cities. The primary impetus for the group came from Rep. Ronald Mottl of Ohio when 22 suburban communities in his district failed to receive money during the second funding round of the Public Works Act. The caucus has a potential membership of 150 Congressmen whose districts have 60 percent or more suburban population.

These caucuses, some of which have overlapping membership and at times competing interests, join such other groups as the Irish, Black, Blue Collar, Port, Hispanic and New Members Caucuses; and the Northeast-Midwest Economic Advancement Coalition. The emergence of these special interest groups adds a new dimension to the competition for favorable Congressional action—including the sweepstakes for federal aid and the articulation of an urban policy.

Thus, there already is important grist for the 1978 federal legislative mill, as the Congress and the President consider economic recovery, tax reform, urban policy, and other major issues. If the past is prologue, the outcome of these deliberations will have significant implications for the condition of Ameri-

can federalism. In particular, the actions in 1978 should provide a clearer indication of whether the tilt toward Washington will continue and how far it is likely to go.

How Many More New Yorks?

(By Terry Nichols Clark)

(New York may be the first, but not the only city to suffer severe financial strain. But disaster is not the ineyitable result for all American cities.)

Is New York the "bellwether" city for America in its financial difficulties? If others follow New York's path, their futures will certainly be bleak. Many observers, especially those based in Manhattan, have suggested that other cities must be close behind. But, what is the evidence?

This was the first question my associates and I posed a few months ago.* To answer we used the Permanent Community Sample, fifty-one cities (municipalities) chosen as representative of the places of residence of the American urban population. About half are central cities and half suburbs, with populations as low as 50,000. We have monitored these sample cities for eight years, conducting interviews with local leaders using the staff of the National Opinion Research Center, and continually updating socioeconomic and fiscal data. For our work on fiscal strain in American cities, data for New York, Chicago and Los Angeles were added.

There is no single thermometer to test for fiscal health. We therefore computed most measures used by municipal finance analysts.* * *

TABLE 1

	Municipal fiscal strain index	County area fiscal strain index
New York	165.03	122.91
Boston	128.82	100.16
Newark, N.J	105.91	97.79
San Francisco	102.97	95.25
Albany, N.Y	102.88	115.99
Buffalo, N.Y	89.00	71.59
Atlanta, Ga	87.29	64.45
Cambridge, Mass	81.44	40.08
Malden, Mass	81.13	55.15
Seattle	79.34	59.09
Waterbury, Conn	78.88	60.21
Jacksonville, Fla	73.69	22.89
Utica, N.Y	72.41	74.66
Los Angeles	68.27	46.05
Akron, Ohio	63.57	41.69
Memphis, Tenn	60.28	40.48
Birmingham, Ala	60.08	15.59
St. Louis, Mo	58.76	54.76
Manchester, N.H	58.20	42.63
Palo Alto, Calif	55.67	42.49
Chicago	55.33	56.55
Pasadena, Calif	54.47	44.26
St. Paul, Minn	54.16	96.86
Minneapolis	51.35	63.95
Long Beach, Calif	49.67	44.43
Pittsburgh	48.35	55.06
Milwaukee	45.38	58.46
Tampa, Fla	44.27	49.80
Phoenix, Aria	42.38	30.30
Tyler, Tex	40.89	39.87
Charlotte, N.C	39.95	33.65
South Bend, Ind	39.24	35.47
Waco, Tex	38.67	18.24
Indianapolis	38.65	36.65
Fort Worth	38.65	38.23
Euclid, Ohio	36.64	41.54
Santa Monica, Calif	35.39	39.24
Schenectady, N.Y	32.68	40.35
Bloomington, Minn	32.33	61.02
Irvington, N.J	32.04	75.21

Clifton, N.J	27.85	26.83
San Jose, Calif	25.95	56.56
Duluth, Minn	25.32	55.05
Gary, Ind	21.21	31.38
Waukegan, Ill	20.70	28.05
Warren, Mich	20.43	43.51
Salt Lake City	18.99	19.74
Amarillo, Tex	18.05	21.46
Fullerton, Calif	13.25	35.90
Santa Ana, Calif	10.53	39.73

Note to Table 1: Both indexes, as described in the text, sum the *z* scores for four separate indicators of fiscal strain. Five was then added to make all scores positive, and the result multiplied by ten. Consequently, if a city was precisely at the mean on all eight fiscal strain indicators, it would receive a score of fifty on both of the indexes.

The four indicators summed to create the County Area Index were (1) per capita overlapping long-term debt; (2) per capita overlapping short-term debt (both for the municipality, school district. special district, and county governments); (3) overlapping revenues (for these county area governments plus the per capita share of total state revenues); (4) tax effort (county area total revenues/ municipal taxable property value).

The Municipal Index data were for 1973–74, County Area data for 1971–72. Both were the most recent comparable figures available in April 1976 from the U.S. Census (Finances of Municipalities 1973–74 and the U.S. Census of Governments, 1972, Vol. 4, No. 5). Some municipalities, school districts, and special districts are coterminous with a county, others are not. Measurement error is thus introduced into the County Area Fiscal Strain Index which indicates the average level of fiscal strain for the entire county area.

Region. Cities in the Northeast and Midwest were not distinctly high in fiscal strain.

These four results initially surprised us as they directly contradict the common wisdom that large, declining, older cities of the Northeast and Midwest suffer most fiscal strain while the "Sunbelt" cities are fiscally sound. New York, Boston, Newark and Albany are, in fact, under great fiscal strain, but Waukegan, Hammond, Schenectady and Pittsburgh are fiscally sound. More important than these first four characteristics are others, which do make significant, independent contributions to fiscal strain when the above four (and others) are controlled.

The Tax Base. Cities with lower taxable property values suffer greater fiscal strain. This time the folk wisdom is sustained.

Poor Residents. Cities with higher percentages of families with annual incomes below the federal government's definition of "low" ($3,388 in 1969) suffered greater fiscal strain. However, New York is not unusual in having 11.5 percent of its residents classified as "low-income"—Chicago had 10.6 percent below the line, Memphis 15.7 percent, Birmingham 17.4 percent and Newark 18.4 percent. We note in passing that New York also does not have an exceptionally high percentage of welfare recipients (12.4 percent compared to 11.1 percent in Chicago, 16.9 percent in Boston and 14.4 percent in Newark—data for county areas in 1974).

Are all New Yorkers "poorer" because of a higher cost of living? Only a little. The Bureau of Labor Statistics provides an Intermediate Family Budget Index on which New York ranks 116, above Chicago (103) and San Francisco (106), but similar to Boston (117) and Newark (116).

THE IRISH FACTOR

A few years ago, it was discovered, almost by chance, that the percentage of city residents born in Ireland or with one or more parents born in Ireland, was highly related to municipal spending. We initially thought it was spurious and contemplated dropping it out of the study after controlling for elements like having a strong Democratic party or population size or city age. But although we introduced twenty-six such variables to the study and checked the same pattern in 1880, 1930 and 1968, it held strong.

Why? To construct a meaningful answer, we analyzed several surveys of the American population.[1] For example we classified the places of birth and names of all municipal employees in Albany by decade—from 1870 to 1970. The percentage Irish dipped dramatically about 1900 when the Republicans came to power, but from 1920 to the present the figure rises continually to about 50 percent. Dan O'Connell has astutely led Albany's Democratic party for the entire period. Using another approach, a survey asked four questions of 3095 Americans: if they had ever worked for a party or candidate in elections, attended political meetings, contributed money, or tried to persuade others about a candidate or party. The four items were combined in a campaigning index on which Irish Catholics scored 37, Slavic Catholics 15; most other groups were under 5.

Although they comprise only 4 percent of the American population, Irish Catholics have exerted an impact on municipal politics and finance that far transcends their numbers. It has been a style distinguished not by abstract ideology, but by a dense network of friendship and social relations. On several surveys, Irish Americans report they are usually *sociable* ("like to do things with others"), trusting ("think most people can be trusted"), *localistic* (prefer a local man), *practicing Catholics* (over 90 percent attended weekly Mass and sent their children to parochial schools in the 1960's, compared to about a third of Italian Americans) and *socially conservative* (in favor of compromise and moderate solutions). Together these five sets of beliefs comprise what we have called "the Irish ethic." Reinforced by such organizations as the Democratic Party and Roman Catholic Church, it helps support a distinctive style of politics. Patronage is central. Most important, the emphasis on friendship and enduring social contacts (the Irish ethic) makes patronage politics legitimate. For example, when Mayor Daley was recently criticized by the press for awarding insurance contracts to his sons' firm, he replied "What's wrong with a father helping his son?" Imagine the same response from Mayor Lindsay! The important point here is that Mayor Daley was not being hypocritical, but essentially reflecting the Irish ethic. The ethical consistency of Richard Daley far transcends that imagined by many of his critics.

Personal network, and rewards for party work and campaigning activities, have increased municipal payrolls for Irishmen and their political allies. The pattern is familiar in Chicago; more striking was to learn how important it was nationally. Indeed, although previous discussions of municipal finance have generally ignored the Irish, we found that the percentage of Irish residents in the municipality was often the most powerful single variable predicting fiscal strain. Certainly the Irish ethic is not unique to the Irish, but along with some knowledge of English and slightly earlier arrival in the U.S., it helped the Irish in urban politics. If Italian-Americans, blacks and others are succeeding the Irish in many American cities, they often follow similar patterns of governance.

THE LEADERSHIP FACTOR

Chicago may be unique with its highly organized Democratic Party, but other cities

*For more detail, see: Terry Nichols Clark, Irene Sharp Rubin, Lynne C. Pettler, Erwin Zimmerman, "How Many New Yorks?—The New York Fiscal Crisis in Comparative Perspective," Research Report No. 72 of the Comparative Study of Community Decision-Making.

[1] See Terry Nichols Clark, "The Irish Ethic and the Spirit of Patronage," *Ethnicity*, 2 (1975), pp. 305–359.

still use related leadership and decision-making patterns. These significantly affect fiscal strain.

Strong Mayors and Weak Businessmen. In interviews conducted with local leaders in each of the fifty-one cities, we asked about the importance of different actors for such decisions as mayoral elections, floating municipal bonds, antipoverty and urban renewal programs. Two major actors were mayors and local businessmen. They were assigned scores for their importance in these decisions. Cities with moderately strong mayors and weak businessmen suffered greater fiscal strain.

Union Contracts. About half the cities had signed collective-bargaining contracts with the American Federation of State, County, and Municipal Employees. Those that had scored higher on fiscal strain.

Numerous Municipal Employees. The (per capita) number of municipal employees in each city working in the nine common functions discussed above was computed. It was adjusted for basic socioeconomic characteristics of the city (taxable property base, percentage poor, etc.) The result was a standardized score indicating the number of municipal employees above or below what one would expect in the city based on its socioeconomic characteristics. Albany scored highest (+2.58), San Jose and Santa Ana lowest (−1.2, −1.4), zero was average. This Index of Overstaffing also correlated positively, as expected, with the percentage of Irish residents and with fiscal strain.

Tax Collection Rates. We sought a measure of sound fiscal management that could be used across cities, and found that cities vary substantially in the percentage of levied taxes collected. Boston was lowest, collecting only 85 percent of all taxes levied, whereas many cities collect 99 percent or more. (New York collects 94 percent [2]).

These five dimensions of local leadership are generally interrelated; that is, cities with strong mayors also tend to have weak businessmen, union contracts, numerous municipal employees, and low tax collection rates. We thus combined the five dimensions in a single Index of Political Leadership. It was one of our strongest predictors of fiscal strain. The basic pattern looked like this:

"Numerous Irish residents—high index of political leadership—high capital outlays—fiscal strain."

CAPITAL OUTLAYS

The distinction between municipal operating expenditures (salaries, etc.) and capital outlays (normally for highways, public buildings, and so forth) is important. Cities can issue bonds to finance capital outlays, whereas operating expenditures must be funded from taxes and revenues for the same fiscal year (according to most state laws). In 1960, Chicago's capital outlays were $42 per capita; in 1974 they were still $42 per capita. By contrast, New York's capital outlays were $54 in 1960, but they jumped to $153 in 1973 and to $195 in 1974. The average for our fifty-one cities in 1974 was $60. Cities were often high on capital outlays if (as in the diagram) they had numerous Irish residents and a high score on the Index of Political Leadership. High capital outlays, in turn, lead to fiscal strain.

This is perhaps obvious—if you build new capital facilities and pay for them by borrowing, eventually interest payments on the debt can strain the budget. The story is familiar for New York, where the problem was compounded by supporting certain operating expenditures using the capital budget. What deserves emphasis is that in New York as elsewhere, one of the most important and direct causes of fiscal strain is high capital spending in earlier years. Supporting projects like the reconstruction of Yankee Stadium can cause more fiscal strain than supporting the poor.

PREDICTING FISCAL STRAIN

The most consistent message of these findings is that local leadership can make a substantial difference. Fiscal strain is greater on local officials in cities with weak tax bases and large numbers of poor residents. But some cities are fiscally healthy (like Pittsburgh, Schenectady and St. Louis) even though they share many socioeconomic problems with Boston and New York. If the leadership characteristics we have isolated are crucial in explaining fiscal strain, and some cities are fiscally sound, one might conclude that at least some cities can solve their own problems without major assistance from higher levels of government. This is not to argue against more federal and state assistance, especially for programs like higher education, which affect the entire society as students migrate, or income transfer programs which people can migrate from to avoid supporting.[3] But as far as the fiscal well-being of American cities is concerned, the evidence suggests that much can be done at the local level.

In many cities in the past, only the financial officials paid close attention to fiscal difficulties. The major elected officials are now focusing more attention on such matters with support from the press and local citizens. Comparisons with past fiscal performance for the individual city are useful; so are comparative rankings. Increasingly, officials will have to try to spot fiscal overburden before the situation becomes critical.

If this is to be done reporting will have to be improved. Even many elected officials, not to mention municipal employees and citizens, have only a cloudy picture of their local finances. Current reporting of fringe benefits for municipal employees, pension provisions, and short-term debt is also poor (although improving). City workers might appreciate their jobs more if they knew just how much they received in fringe benefits and pensions. The municipal bond market could charge cities less interest if it were clear that their finances were sound.

The city tax burden must be kept competitive if fiscal strain is to be avoided. If local leaders do not compare their tax burdens to those elsewhere, citizens and firms do. Newer towns and suburbs in the "Sunbelt" are growing for many reasons, but one seems to be their low tax rates. Given free migration, if any city deviates too far from the others, it is likely to lose residents and firms. This has been happening to Boston, New York and many cities in the Northeast and Midwest for some time. But, not to all of them. From 1970 to 1974, Chicago's Cook County lost about 2 percent of its population, as did Los Angeles County, while New York's five boroughs lost 4 percent.[4] If the sunny California weather is more pleasant than wintry breezes off Lake Michigan, the taxes are still lower in Chicago. The average per capita taxes and charges paid to all local and state governments for residents in the three county areas were approximately $765 in Chicago, $849 in Los Angeles and $1064 in New York. They were less in Jacksonville, Fla. ($536), and Fort Worth ($439) and Tyler ($474), Texas.

City officials must watch particularly closely the municipal payroll as well as capital expenditures. These are the two largest items in most city budgets. And, unlike welfare or Medicare, cities must rely primarily on local taxes and charges to support their employees. Capital expenditures can be eased through borrowing, but interest payments can obviously become burdens. Even if local officials are largely autonomous in payroll and capital expenditure decisions, some cities always seem to spend more, despite the wishes of leaders and citizens. What can be done?

CENTRALIZATION AND "PUBLIC-GOODS"

Until recently, New York represented an extreme but not unique case of decentralized decision-making. "Decentalized" is here used to refer not to neighborhood participation, but to the involvement of numerous organizations and individuals in basic municipal decisions. The mayor of New York generally was only one of many participants in decisions. If LaGuardia built up a substantial following, Lindsay never succeeded. He, like many other actors in a decentralized context, had to provide a continual flow of benefits to piece together one fragile coalition after the next—which is expensive.

The situation was similar in turn-of-the-century Chicago. Construction firms and others complained that aldermen could not be "bought" for more than one vote at a time. A political organization gradually developed that coordinated the votes of aldermen. Today, unlike New York and other more decentralized cities, in Chicago both the mayor and the voters know that Richard Daley is responsible for major decisions. He can and does say no to demands for spending, because he is strong enough to say no. Few mayors are, and Chicago, as Table 1 indicates, is fiscally sound.

If few Americans would welcome back political machines of the Tammany variety, they might nevertheless consider some of the advantages derived from giving mayors—or someone—enough legal authority to govern effectively.[5]

Goods provided by government may be classified along a continuum from "public goods" to "separable goods." Public goods, or, in this case, "bads" like air pollution or municipal bankruptcy, are shared by citizens throughout a city. By contrast, separable goods, like jobs or housing, are allocable to distinct individuals or interest groups.

Thus, the comparison of Chicago and New York may be restated more abstractly: centralization encourages public goods, but decentralization generates separable goods. To achieve the public good of fiscal health, centralization helps. It obviously is not suffi-

[2] However, this ratio is affected by the tendency in some cities, like New York City, to knowingly extend property tax levies against nontaxable property which is then fictitiously shown as delinquent. The purpose of this is to permit a greater volume of seasonal borrowing in the form of tax anticipation notes.

[3] There is a misconception which should be corrected—that is, most welfare costs have already been taken over by federal or state governments. Nationally, local governments pay only about 6 percent of public welfare from locally raised funds; New York City, because of its peculiar method of handling Medicaid, pays about 8 percent (1973–74).

[4] "Estimates of the Population of Metropolitan Areas, 1973 and 1974, and Components of Change since 1970," Current Population Reports, P-25, No. 618 (January 1976). Population data here and fiscal data below are for county areas.

[5] Although we reported above that cities spent more if the mayor was stronger, strong was only relative to other cities. In virtually all major cities except Chicago, the mayor is relatively weak—at least by comparison with a president of a private firm. Mayors are thus much less able to choose a desirable level of spending and stick to it. See John P. Kotter and Paul R. Lawrence, *Mayors in Action* (New York: Wiley-Interscience, 1974) for documentation. This has happened by political if not literal fiscal default in New York. Creating the Municipal Assistance Corporation and Emergency Financial Control Board centralized power. They stand behind the mayor and help govern without having to respond to the demands of all interest groups in the city.

cient. But, unless enough authority is given to someone to confront the big issues, no one will. Instead, local officials usually become so caught up in responding to day-to-day demands that thinking beyond next week seems Utopian. Yet it is hard for most local leaders to survive otherwise.

Centralization also helps to hold down costs because leaders will be less responsive to immediate demands. Over the last decade, some people have held that "democracy" is defined by immediate response to forceful citizen demands especially from the poor. By now the short-sightedness of this view should be apparent: fiscal strain often follows.

Many American cities are declining; their economies are stagnant and their population in decline. The New York fiscal crisis may have the salutary effect of frightening people enough to consider new modes of urban governance. To effect the sorts of dramatic changes that are taking place in New York, someone, most likely the mayor of a MAC-style committee, must be given more authority. There are many well-known legal alternatives: a longer term of office as well as broader veto, spending and appointment powers. The civil service structures have been criticized by several commissions; they now largely tie the hands of chief executives. Centralization need not imply a larger budget or staff. Indeed, given the leveling of population, in the next decade mayors are likely to distinguish themselves by creatively doing more with less. But unless mayors have sufficient authority to implement such productivity improvements, they are unlikely to consider them seriously.

TREATY CONCERNING THE PERMANENT NEUTRALITY AND OPERATION OF THE PANAMA CANAL

The PRESIDING OFFICER (Mr. PAUL G. HATFIELD). Under the previous order, the Senate will now resume consideration of the resolution of ratification of executive N, 95th Congress, 1st session.

Under the previous order, the Senator from Ohio (Mr. METZENBAUM) is recognized for not to exceed 30 mniutes.

Mr. METZENBAUM. Mr. President, the treaties now before the Senate for advice and consent are the end result of one of the longest and most painstaking diplomatic processes in the history of our country. For 14 years, negotiators representing four American Presidents of both political parties have worked with this issue. They have been meeting with their Panamanian counterparts to reconcile our fundamental interest in an open, efficient, secure, and neutral canal with Panama's passionate desire to change what the people of that country have long considered to be an outmoded and unequal relationship with us.

It is now nearly half a year since President Carter and Chief of Government Torrijos signed the treaties. In that time, every detail of these agreements has been subjected to the most intense scrutiny. The Committee on Foreign Relations heard 92 witnesses in 15 days of hearings. The full Senate has devoted hundreds of hours to the canal. Treaty opponents have had ample opportunity to raise objections to the agreements. They have done so with great vigor.

All of this is as it should be. The canal issue is complex. It is difficult. It arouses strong emotions in this country and abroad. Our resolution of this issue will say much to the rest of the world—and above all, to Latin America—about the kind of country we are and the kinds of relationships we want to have with our neighbors.

Mr. President, I believe that the treaties are in the best interests of our country and that—after all is said and done—is the critical question. In some instances, what is right does not always accord with a nation's national interest. But in this instance, it is both right and in our national interest that the treaties be ratified. I intend to cast my vote for ratification.

The Panama Canal treaty that is now in effect was concluded 75 years ago in an international environment that no longer exists. In the world of 1903, two great imperial powers—Britain and France—controlled empires of unprecedented size and diversity. A majority of the independent nations whose flags today fly in front of the United Nations Building in New York did not exist in 1903. The idea of independence had begun to gather strength in some places, but the established order of things appeared secure.

Our own country at that time was a newcomer to major power status. Our territorial expansion across the continent was complete and secure. In the 1890's, we faced down the mighty British Empire in what we considered a test of the Monroe Doctrine in Venezuela, and we subsequently fought and easily defeated Spain. With many misgivings, the Nation that had first raised the banner of independence in 1776 took over most of what remained of Spain's colonial possessions. We were later the first nation to promise—and to deliver—independence to our colonies. But for a relatively brief period, we were also enthusiastic participants in the race between established powers to gobble up all of those territories that were not yet incorporated into one or the other of the great empires.

The construction of the Panama Canal was an enterprise that matched the spirit of the age. It was an heroic undertaking, a demonstration that America could succeed where France had failed.

It was a notice to the world that a new and dynamic force among nations had come of age. David McCullough, the author of "The Path Between the Seas," was correct in pointing out that the canal is an achievement that will cause archeologists far in the future to ask, "What kind of civilization could have produced this?"

But just as Americans of that time would not let tropical heat, diseases, and challenging engineering problems stand in the way of completing the canal, neither did President Roosevelt permit legal niceties regarding the sovereignty of other nations prevent him from acquiring the right to build it.

When the United States first conceived the idea of constructing the Panama Canal, Panama was a province of Colombia. Colombia and the United States signed a treaty to permit construction, but in August 1903, the Colombian Senate refused ratification. On November 3 of that year, the Province of Panama, with American encouragement, revolted against Colombia and proclaimed its independence. U.S. recognition—and the U.S. Navy—followed on November 6. Our forces prevented the Colombians from reclaiming their lost province.

On November 18, 1903, Philippe Bunau-Varilla, a Frenchman who had a large financial interest in the defunct French Canal Company and who had actively encouraged American intervention, signed the present treaty on behalf of Panama.

Mr. Bunau-Varilla had not been in Panama for 17 years before he signed the document. No Panamanian ever signed it, and the Panamanian provisional government ratified it only after our Government threatened to withdraw its military protection and leave the erstwhile rebels to the tender mercies of Colombia. Mr. Bunau-Varilla never returned to Panama.

"We have an agreement very satisfactory, very advantageous to the United States," said Secretary of State John Hay at the time, "and we must confess with what face we can muster not so advantageous to Panama."

The treaty of 1903 may have served a useful purpose at another time in our history. But times change. The world of 1978 is vastly different and more complex than the world of 1903. We must deal with the present and the future rather than try to bring back a time that cannot be restored.

No nation in today's world would accept a treaty that permits another nation to act on its land as if that foreign nation had sovereignty. Just as we would never accept a British or a German or a Russian enclave on our territory in which British or German or Russian law would take precedence over American law, we can no longer expect Panamanians to accept our extraterritorial rights in their country.

No nation in today's world would willingly accept foreign control of a strip of land cutting that nation in two. Yet the Canal Zone bisects Panama in precisely the same way that our country would be divided if a foreign power had control of the Mississippi River.

No nation in today's world would willingly allow another nation to control nearly all of its deep water port facilities. Yet that is the situation in Panama.

I support the treaties because I believe that respect for the legitimate rights of others is in the highest and best tradition of our country. I support them because they are fair to Panama, fair to the United States. They represent a farsighted solution to a difficult set of problems—a solution arrived at by friendly countries in a spirit of conciliation and mutual understanding.

Mr. President, we are told that the treaties represent a backing down by the United States in the face of insistent demands by a foreign country.

They do not. Rather, they say to the world that the United States respects the aspirations of other, weaker peoples. The treaties say to the world that while the Soviet Union ruthlessly tightens its grip on the nations of Eastern Europe and

forces their peoples into a rigid mold, the United States realizes that it has nothing to fear from the legitimate aspirations of another country to set historical grievances right.

The treaties show that we are strong, not that we are weak. They show that we are responsible, that we are mature, that we are a nation that can be trusted to pay due regard to the interests of others. The treaties say to Latin America and to the developing world as a whole that we are serious when we say we want new relationships based on equality and respect.

Mr. President, I believe that in every important respect, these two agreements protect our interests in the canal.

They provide for a gradual transition to full Panamanian ownership and control. Nothing will happen overnight. Change will proceed in an orderly manner. Panama and the United States will run the canal in partnership for a full generation, and Panamanians will be fully trained to operate the canal properly.

The treaties permit us to take the steps we deem necessary to defend the canal. In defense, as in other areas, they make Panama a partner, rather than a potential adversary.

They provide that the canal will always be neutral. The neutrality treaty has no expiration date. It enables us to take action, if it is ever needed, to be sure that neutrality is maintained.

As amended by the Senate, the treaties give our warships the unquestioned right to move to the head of the line in times of emergency in order to transit the canal as rapidly as possible.

The treaties are sound, they are just, and their terms are extremely moderate. They make our true interests easier—not harder—to defend. They provide to us and to Panama an honorable way to change an outmoded relationship in an atmosphere of dignity rather than one of confrontation. Ratification, I believe, is not only an acceptable step, but one that is a compelling matter of national interest.

In the final analysis, the strength of America in the world does not rest upon our capacity to force our will upon others. Instead, our ability to influence others is directly related to the degree to which our actions reflect the values for which this country has always stood.

These treaties truly reflect the values of our democracy. They show that the strong can be just, that relations between nations can be based on something other than brute force, and that the process of free political debate can reach wise and generous decisions.

Mr. President, failure to ratify the treaties would be a tragedy for America. But I am confident that at the end of this agonizing debate, the Senate will vote to ratify. Ratification is prudent, it is responsible, and above all, it is the only action that is principled. The true interests of our Nation require that the treaties be ratified. I will so vote.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. SARBANES). Under the previous order, the Senator from Colorado (Mr. HART) is recognized for not to exceed 30 minutes.

Mr. HART. Mr. President, the issue of ratification of these treaties has called upon Senators to define the obligation of its elected representatives as has no other issue in recent times.

It has been strongly urged that the weight and volume of expression of opposition to these treaties should of themselves determine our actions; that our role in this and, presumably, any issue where emotions run high and opinions are strongly held and expressed is simply to convert these emotions and opinions into a vote.

But surely, Mr. President, representation is not so simple. Otherwise this profession would scarcely appeal to men and women of character, of judgment, and of thoughtfulness. Otherwise, why would Jefferson have stressed the need for the representative to educate his constituents?

Otherwise, would not the republican form of government be useless? We would need only to conduct referenda or polls, to consider only the opinions of those who felt strongly enough to write letters.

But that is most surely not our system of government. It was not the role of a parliamentarian before this Government was founded, nor has it been in the 200 years since Edmund Burke reminded his Bristol constituents that he owed them more than his industry; he owed them also his judgment.

No one before or since has better described the awesome burden of this job, particularly when our own conviction, our own judgment persuades us that what is best for our country, what is our moral imperative, may conflict with the popular view.

My judgment on this matter, particularly as a member of the Senate Armed Services Committee, was shaped by considering whether these treaties serve the national interest and security needs of the United States. Second, I must consider whether they are consistent with our overall foreign policy objectives.

Like each of my colleagues, I have heard from thousands of constituents concerned that these treaties be in our national interest. Some of these letters accuse me, and my colleagues who support ratification, of not listening to the voice of the American public. Too many of those letters make the automatic assumption that if you support the treaties you are less concerned with national security than the writer. But we have listened and we share their concern that these treaties further our national interest. Not only have we listened, but we have raised their questions and questions of our own with the political and military leaders of this country. We have held hearings, reviewed intelligence data, and discussed and debated these issues in depth.

I would hope that every American who questions these treaties would listen to the answers we received from those responsible for the protection of our national interest. Listen to what the men who are responsible for our national security have to say about these treaties.

Listen to the Secretary of Defense:

(The) ability to defend and control access to the canal is essential but the issue is how that ability can best be assured—by a cooperative effort with a friendly Panama or by a garrison amid hostile surroundings.

I have examined these issues personally and in detail. As have the joint Chiefs of Staff. The Department of Defense has been fully involved in all stages of the drafting and negotiation of these treaties. I believe personally and in light of my responsibilities as Secretary of Defense that these treaties fully serve and greatly promote our national security interests.

Listen to the Chairman of the Joint Chiefs of Staff:

Our capability to defend the Panama Canal will be enhanced through cooperation with the Government of Panama. The new Treaties provide a basis for such cooperation between the United States and Panama. The alliance relationship should develop and strengthen during the life of the Panama Canal Treaty and be further enhanced by the neutrality treaty.

Listen to the Chief of Naval Operations:

The Joint Chiefs of Staff are unanimous in their position supporting the Panama Canal Treaty and the Treaty concerning the Permanent Neutrality and Operation of the Panama Canal.

I am convinced that the continuing use of the Panama Canal for national security purposes is best assured through the provisions of the new Treaties.

Listen to the Commander in Chief of the Southern Command whose headquarters are in Panama:

The Panama Canal Treaty establishes a concept of defense that includes United States and Panamanian forces operating cooperatively to defend the canal. Indeed the most effective defense of the canal can be obtained in conjunction with a friendly Panama.

Listen to the Commandant of the Marine Corps:

I am convinced that, among other things, the proposed new treaties contain the necessary provisions to ensure the continued and unimpeded use by U.S. vessels, that the change of jurisdiction will not prevent us from defending the canal, that Marines are capable and ready to respond if called, and from the military point of view the ratification of the proposed Treaties would be in the best interest of the U.S. national security.

These are not lightly held opinions of nonresponsible individuals. They are the judgments of those responsible for our national defense and security. Their decisions affect us all. They accept the responsibility for the results of their decisions—and they do so with a great deal of integrity and dedication. I know that they reached their conclusion that these treaties will further our national interest by careful analysis and serious consideration of all options.

For this reason, I find their arguments and conclusions highly persuasive and have given considerable weight to their judgment in reaching my own conclusions regarding these treaties. I have also studied all of the arguments—both pro and con—and analyzed the political and economic significance of the treaties—as well as the defense implica-

tions. I am convinced that they are in our national interest—militarily, politically, and economically. I am convinced that:

America's national interest in Panama rests more in access to and use of an open canal than in ownership of a canal which might be rendered useless;

Insistence on maintaining our presence under the terms of the old treaty would seriously jeopardize our ability to defend the canal and keep it open;

The canal will be easier to defend under the new treaties than it now is under the old treaty; and

Our presence in Panama, under the old treaty terms, is legitimately resented by the Panamanian people and is a contradiction of our Nation's oldest and highest principles.

This last conclusion is based on consideration of our past foreign policy in Latin America, which I would now like to discuss briefly in order to view the treaties from another perspective.

The foreign policy of any nation is a reflection of its economic needs, political aspirations, and military power. The development of our foreign policy in Latin America is a reflection of the changes that have occurred in America's national aspirations, needs, and power over the past 155 years—from the Monroe Doctrine, in its various phases, through the era of the "big stick" and "dollar diplomacy," the good neighbor policy, and the Alliance for Progress. These changes have led us from the time when we were a new nation, intent upon the development of our frontiers, determined to make an impact on the social and economic environment of the Western Hemisphere, dependent on the power of the British navy but willing to use our own limited military power in an aggressive and sometimes brash manner, to the America of today—a tried and proven model for today's new nations, so powerful that any action we take has an economic and social impact on the entire world and not just our hemisphere, and with such military might that we must use it with only the greatest of wisdom and restraint.

The 1903 Panama Canal Treaty was a child of that earlier age just as the treaties now before us are children of today and tomorrow. No one would understand this better than Theodore Roosevelt who said:

> The important thing is the next step. It often happens that the good conditions of the past can be regained not by going back, but by going forward. We cannot recreate what is dead; we cannot stop the march of events; but we can direct this march and out of the conditions develop something better than the past knew.

The question, then, is how do we direct the march and in what direction? The direction, in my judgment, should be toward resolving conflict by peaceful negotiation, championing the cause of human rights and national aspirations, recognizing the growing economic and social interdependence of all nations, and controlling and reducing the awesome nuclear force extant in the world today.

How do we direct the march? Largely through our foreign policy: Détente, SALT, our mediating role in the Middle East and Africa, our participation in the United Nations, the World Bank and other international financial institutions, are all consistent with our fundamental view of the world as a community of neighbors where cooperation is seen as the foundation of survival in a nuclear age. The Panama Canal treaties are consistent with these foreign policy endeavors. Basically, it is those who want America to move in a different direction who oppose ratification of these treaties.

The direction of our foreign policy was set at the close of World War II, when this country emerged as the most powerful nation in the world. That power gave us many options not before open to us. We had the power and we had the choice. We did not choose to use our power to subjugate our former enemies; we did not choose to keep Europe impoverished. Instead we chose to treat our vanquished enemies with generosity—and they now count amongst our closest allies. We helped create the United Nations and the World Bank. We championed the cry for independence from old colonial ties—and granted independence to our own possession, the Philippines. We engineered the most massive economic recovery in the history of the world—the Marshall plan, and we worked for a higher standard of living and social justice for our own people and people everywhere. No one forced us to make these decisions; we had the power and we had the choice.

Can there be any doubt that we made the right choices? I think not. They were the right choices because they were the right thing to do, and they have served our national interest well; just as these treaties are the right choice because they are the right thing to do, and will serve our national interest.

Our policy in Latin America has been inconsistent with the general direction and tenor of our foreign policy in the rest of the world since the end of World War II. Too often in Latin America, we have not made the right choices. Since the time of the Monroe Doctrine, the United States has insisted that a special relationship exists among Western Hemisphere nations. Unfortunately, too often that relationship has been one of special privilege for us and exploitation for the Latin Americans.

In the first half of this century our foreign policy in Latin America was guided by Theodore Roosevelt's Corollary to the Monroe Doctrine, which basically stated that the United States had the right to exercise an "international police power" in regard to Latin America. It was based on the premise that Latin Americans were inferior to us and unfit to manage their own affairs and that the United States as a "civilized nation" had the right to intervene, militarily and otherwise, in the internal affairs of Latin American nations. And intervene we did—Haiti, Dominican Republic, Nicaragua, Mexico, Colombia, Panama. Latin America was considered the "white man's burden" by too many in the United States.

Even the "good neighbor" policy was basically paternalistic and reflected an innate sense of superiority which had been present in U.S. attitudes toward Latin America since the Monroe Doctrine. Franklin Roosevelt, at a press gathering in 1940, when the "good neighbor" policy was first mentioned, talked about:

> . . . a new approach . . . to these South American things. Give them a share. They think they are just as good as we are and many of them are.

Unfortunately, this attitude did not die at the end of World War II. Although our foreign policy toward Latin America tried to reflect a change of direction to make it more consistent with our other postwar foreign policy goals, in practice, it was often business as usual.

It is time to change that policy in practice as well as theory. It is time that relationships among Western Hemisphere nations be positive ones for all partners. It is time that we apply the same standard of justice and fair play to our actions in Latin America, that we have applied to our own actions in Europe, and that we have applied to the colonial power in Africa and Asia. It is time that our foreign policy objectives in Latin America be consistent with our own objectives in the rest of the world. Ratification of these treaties will be a major step in that direction.

For many Americans these treaties have become symbols of our strength, and I share that conviction. But the strength these treaties represent is not the strength of domination, of imposed will, of force of arms. These treaties represent the strength of deference to the weak, the strength of a helping hand, the strength of leading, not resisting, the strength of moral purpose, the strength we all feel when we know we are doing the right thing.

Mr. President, as I would not vote for these treaties because of fear of Panamanian retaliation, so I would not vote against these treaties because of fear that some nation or interest might think the United States weak. The great Senate of the United States does not decide this Nation's future out of fear.

Queen Elizabeth II said on the occasion of our bicentennial:

> We lost the American colonies because we lacked the Statesmanship to know the right time and manner of yielding what is impossible to keep.

Do not let that be said of us. Do not let it be said that America:

Lacked the statesmanship to know that the time had come to let go;

That America is no longer powerful enough to use her power with wisdom and restraint.

Do not let it be said that America has lost her vision to recognize injustice and lost the will to do all in her power to rectify that injustice wherever we might find it.

The Panama Canal is a symbol. It has been a symbol of America's genius to conquer nature and control it for man's benefit. But it must also be a symbol of America's spirit. For, without doubt, it is not just America's technological genius

that has made us a great Nation, but the generosity of our spirit, as well.

I support the ratification of the treaties because they are in the national interest and because they will make the canal a new symbol, a symbol of America's vision for a peaceful world. Peace, as defined by Spinoza:

> . . . is not an absence of war, it is a virtue, a state of mind, a disposition for benevolence, confidence, justice.

Mr. President, I yield the remainder of my time to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Colorado has 12 minutes remaining, which he yields to the Senator from Oklahoma (Mr. BELLMON).

Mr. BELLMON. I thank the Chair.

I express my appreciation to the distinguished Senator from Colorado for his courtesy in yielding me this time.

Mr. President, it is not my intention to add excessively to the already voluminous debate on the Panama Canal treaties ratification issue. Rather, I will take only a few minutes of the Senate's time to announce my personal decision on this important and highly emotional question.

From the beginning of this debate, I had hoped that some convincing set of facts would be developed which would demonstrate conclusively the wisdom or folly of these treaties. Unfortunately, this has not been the case. It has become increasingly clear to me that this decision cannot be made by a simple accounting of the pros and cons in the treaties themselves. Instead the decision must be based on American principles—those great ideals upon which our Nation stands. In addition, because the future cannot be known, the decision must be made with the exercise of a certain amount of instinct and intuition which are the product of past experiences.

Some facts in this case are readily apparent:

The United States has successfully built, maintained, and defended the Panama Canal. In addition, our country has operated the canal fairly and in the international interest.

The United States has the ability to continue the operation of the Panama Canal indefinitely.

The record of U.S. successes in connection with the Panama Canal is the source of great pride to millions of Americans, including many of my constituents in Oklahoma who strongly believe that, "We built it; we own it; let's keep it." The canal is a major symbol of our national greatness. So it will remain.

For a variety of reasons, the U.S. presence in the Canal Zone has become a lightning rod which attracts negative political charges from many groups in Panama as well as in other Central and South American countries.

Construction and operation of the Panama Canal, while justifiably the source of great national pride for Americans, has not been conducted in such a way as to return a profit to the U.S. Treasury. Rather, the canal has been operated as an international service.

Future successful operation of the canal is important to the United States for defense during national emergencies and for economic and commercial convenience during times of peace. The best estimates I can obtain show a savings of about $10 to $12 per ton on bulk freight transiting the canal compared with shipping that freight around the South American Continent. This savings will diminish as canal tolls are raised to cover rising operational costs no matter who operates the waterway.

Mr. President, I have never been to Panama. In fact, I have never visited any Central or South American country so I cannot state from firsthand experience how Panamanians or others feel about the U.S. presence in the Canal Zone; however, as an American, I know how I would feel if the positions were reversed and Panama owned a strip of land along the Mississippi River and operated that great waterway. I would not like it. No matter how efficient, how effective or how benevolent the outsiders were, I would want them out.

Probably no Member of the Senate is satisfied with every provision of these treaties. Had the Members had the opportunity to personally participate in the development of these documents undoubtedly many of the provisions would have been different. For instance, I had hoped that some provision such as that outlined by the Stevens amendment, which would have created an operating partnership between the United States and Panama beyond the year 2000, would have been included.

The Senate has, thankfully, adopted the Baker-Byrd amendments which guarantee our right to defend the canal and our ships' right to have priority access in times of national emergency. These amendments strengthen the treaties and vastly improve the position of our country.

As Members know, article 2, section 2, of the Constitution gives the President the "power by and with the advice and consent of the Senate to make treaties provided two-thirds of the Senators present concur." These treaties are the result of more than 13 years of negotiation between the Governments of the United States and Panama. These negotitions have proceeded under four Presidents. While their provisions do not please everyone, under our law the President and not the Senate is the negotiating authority. There is reason to believe that these treaties, with the Baker-Byrd amendments added, are the best arrangements which could be worked out by the negotiators.

The negotiated result is not ideal, but on that matter I would like to quote from a speech delivered by Gen. G. V. Underwood, Jr., the retired commander in chief of the U.S. Southern Command headquartered in the Canal Zone from 1971 to 1973:

> People seldom differ on what is the ideal solution. They often differ on what is practically attainable. All this makes it timely to recall, when considering treaties, that diplomacy is the art of the possible, and therefore we should not impetuously demand miracles.

In trying to bring my own feelings about this matter into focus, I have reread many of the founding documents which led to the declaration of our independence from Great Britain 201 years ago. The statements made and the actions taken to further our principles have helped to bring the present question into clearer perspective for me.

The events which created the U.S. presence in Panama are different from the actions which led to the British relationship with the American colonies, but much of what transpired more than 200 years ago has application to the Panama treaty question.

Consider these words from our Declaration of Independence:

> When in the course of human events it becomes necessary for one people to dissolve the political bonds which have connected them with another.

The citizens of Panama by a more than 2-to-1 vote have opted for the treaties before us. They cast aside the phrase "in perpetuity" with this vote. I doubt we should have expected otherwise.

Consider another part of our Declaration of Independence:

> We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights . . . that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it.

Those words, "the right of the people to alter," if applied to all people, if exported to Panama as we have chosen to export our other ideals to that country and the rest of the world, would appear to strongly support the updating of our relationship with Panama. They further make untenable, and in fact repulsive, the often heard argument that Panamanians should not be given full rights and responsibility for running their own country or managing their own resources, including the resource of geography.

After reawakening the knowledge of these principles, I had to resolve a number of questions in coming to my decision:

Are Panamanian opposition to the U.S. presence in the Canal Zone and the feeling of nationalism sufficient catalysts to cause and sustain civil or terrorist action? My opinion is that the answer is yes; such would be my personal feeling if I were a Panamanian citizen.

Is the importance of the Panama Canal to the United States great enough to, first, win and, second, hold the political support necessary to sustain a lengthy and costly antiguerrilla action by American military forces in Panama? My opinion is that, in time of war, the answer is yes.

I doubt, however, that such a course would gain or long hold a high sense of national unity or urgency during peacetime when the issue would be the commercial question, "Should we fight to keep the canal open so shippers can save $12 per ton on freight?"

As a combat veteran, I probably take more seriously than most the responsibilities governments have for actions which may lead to the sending of young men into combat of whatever kind. Having had this experience on many occa-

sions, I feel that such actions should only be taken for the most serious of reasons—those relating to the defense of our country or the maintenance of our basic principles and ideals. If these treaties are not ratified and guerrilla warfare results in Panama, I am afraid that American servicemen and their families will have a difficult time maintaining a strong fighting spirit when the purpose for their sacrifice is basically commercial. It is difficult to develop a rallying cry around the concept of "Whip the Panamanians and keep cheap freight."

My opinion appears to be shared by General Underwood who earlier has said:

I think continued U.S. control of the canal is of major importance, but I am quite apprehensive that future public opinion will not support vigorous defense of our role, if violence develops. So I am a hard-liner on the need to strengthen and clarify the Neutrality Treaty, and a reluctant supporter of the rest of the treaty as the best we can expect at this point and in the present environment.

Can the Panamanians successfully operate, maintain, and defend the canal after the year 2000? This appears to be the central question because it is the unfettered use of the waterway which provides the United States with its defense and economic assets. The mere asking of this question is an affront to Panama. History is replete with examples of peoples rising to challenge when given the opportunity. There is no reason to believe that Panamanian citizens are born with inferior morals, intellects, or mechanical aptitudes. My opinion is that given the opportunity, Panamanians will prove to be fully capable and even more solicitous of the continued successful, independent operation of the Panama Canal than we have been.

What of the danger of outside forces taking over the canal? Once Panama begins to receive greater revenues from the canal any outside force will likely encounter vigorous Panamanian nationalism causing highly aroused opposition to any hint of "take over." In addition the adoption of the Baker-Byrd amendments assures U.S. rights to act unilaterally in the event of such a threat.

Mr. President, the United States is a great Nation. We have not become great because we have thrust our presence into areas of the world where we are unwanted. Our greatness has not come from occupying weaker nations and sapping the resources of those unable to protect their own interests. Our record is exactly to the contrary. We have no record of holding territory against the will of the local inhabitants.

The Senator from Oklahoma is a veteran of World War II and was involved in several landings in the Pacific, including Iwo Jima. It pained me at first when it was learned that that island and Okinawa, which American fighting men won at heavy cost, were to be returned to Japan. My personal opposition was intense. We won it. We own it. Let us keep it. But why? Basically as a symbol and perhaps as an irritant to our former enemies, the Japanese. On reflection, these seemed grossly unworthy reasons. Okinawa and Iwo Jima were returned to Japan and the fact of this so-called surrender hardly crosses my mind anymore.

There are other symbols more important to our national pride and stature than occupying territory outside our national boundaries: the symbol of fair play, the symbol of equality—including equal rights among nations—the symbol that the United States desires to deal with other nations as we would have other nations deal with us.

Listen to the words of George Mason of Virginia, who in 1776 declared:

That no free government, or the blessings of liberty can be preserved to any people but by a firm adherence to justice, moderation, temperance, frugality and virtue.

These principles should govern our actions as a great nation both internally and externally. They argue eloquently in my judgment and conclusively in the language of American principle for ratification of the treaties before us.

One final word, Mr. President:

Any elected official of government genuinely desires to cast votes which will receive popular support and reflect popular attitude.

Our personal political survival depends upon our representing the will of the majority. The Constitution however, in article IV, section 4 states:

The United States shall guarantee to every state in this union a republican form of government.

To me, the word "republican" means that while I was elected to represent the views of the people of Oklahoma, I was also chosen to devote my time to gaining a knowledge and full understanding of both the short- and long-range effects of the questions which come before the Senate and to cast my vote in accordance with the best judgment I can make.

Two years before the founding of our Nation, Edmund Burke explained the duty of an elected representative succinctly:

Your representative owes you, not his industry only, but his judgment; and he betrays, instead of serving you, if he sacrifices it to your opinion.

Having obtained all the information I can, I am ready to defend my vote on this and other issues as being my best judgment of what is in the national interest.

The PRESIDING OFFICER (Mr. METZENBAUM). The Senator from Tennessee.

Mr. BAKER. Mr. President, I have difficulty in expressing adequately my admiration for the statement just made by the distinguished Senator from Oklahoma and for the courage that I know that it took to make it. It may be that my native State of Tennessee and his State of Oklahoma have many things in common, but I am sure one of the things we have in common is a strong and vocal segment of our citizenry who are opposed to these treaties, and I know firsthand how hard it is to exercise the best judgment that you are capable of under those difficult circumstances. The risk that one takes from a political standpoint may be no more than most of us take who understand the uncomfortable position that the Senator finds himself in, in such circumstances, and when we must make these judgments.

Mr. President, more than that, I commend the Senator for his carefully reasoned statement of support for this treaty. I have watched the distinguished Senator from Oklahoma as he has gone through the careful, thorough analysis of the facts and circumstances as he has participated in the debate and in the negotiations for amendments and understandings and reservations. I know the careful attention he has given to this question and the prayerful concern that he possesses for it. I am pleased beyond words that he has arrived at this conclusion, not only because it coincides with my opinion but because I know it is the exercise of the best judgment of a truly courageous man, and I commend him for it.

Mr. BELLMON. Mr. President, I greatly appreciate the comments of my friend from Tennessee. It is not an easy decision. I suppose none of the decisions we make here are easy; but we were not, I guess, elected to do the easy things, but the necessary things. So I thank my friend.

Mr. GRIFFIN. Mr. President, I also salute the Senator from Oklahoma, not because he comes down on the same side as the Senator from Michigan, but because I know that he has struggled with this issue in a very sincere and conscientious way, and that his decision and his announcement are in line with his best judgment as to what is in the best interests of the Nation. I have no doubt and no question about that.

I must say that as I listened to the Senator refer to Edmund Burke, I could not help but recall that I, too, had used the reference to Edmund Burke. I had to make this decision a little earlier than other Senators because I happen to serve on the Committee on Foreign Relations, and it was nearly on the last day that I finally made the decision in my own mind that I would oppose the treaties.

I said in the committee that I had respect for our two Senate leaders and my colleagues who had reached a contrary conclusion, those who are convinced in their own minds that these treaties do serve the best interests of the Nation. I salute them for having the courage of their convictions, because I, too, believe with Edmund Burke that a Senator owes his constituents his judgment, and should not sacrifice it to public opinion alone.

However, I might add that I went on to say I believed that when the calling of the merits and the issues is as close as it is here, or as close as I perceive it to be, the judgment of the people ought not to be taken lightly. I do not want to presume or suggest that the Senator from Oklahoma has taken it lightly, but I very honestly and frankly have come to the conclusion that in this situation, as often is the case, the people are right.

Nevertheless, I do think the Senator from Oklahoma has in this instance, as in all other situations, exercised his judgment as a great Oklahoman and a great Senator, and I salute him.

Mr. BELLMON. Mr. President, I thank the distinguished Senator from Michigan.

Let me say that this was obviously a difficult and a close decision and my decision was made only very recently, earlier in the week—primarily, as I tried to say in my statement, by trying to put myself in the position I think the Panamanians are in, trying to determine how I would feel in their position.

I do not differ with the position that the Senator from Michigan has taken, but I think this is the sort of thing that has to be done almost by instinct or intuition; and mine came down on the other side.

I greatly respect the Senator from Michigan. As he knows, I was very close to agreeing with him at certain times during this debate.

The PRESIDING OFFICER. Under the previous order, the Senator from Kentucky (Mr. FORD) is recognized for not to exceed 15 minutes.

Mr. FORD. Mr. President, few questions during my public life have caused me more anguish or concern than the one now before the Senate—the ratification of the treaties with the Republic of Panama.

Since the day the treaties were announced, I have sought to help the Senate fulfill its constitutional obligation giving advice and consent to the President in the ratification of treaties. I felt then, as I do now, that this well-tested principle needs to be observed as it has been throughout the course of our Nation's history.

In the treaties before the Senate, there has been too much emphasis placed on the effort to obtain the Senate's consent and too little on the effort to listen to the Senate's advice. While circumstances beyond our national control may have dictated this course, those circumstances cannot dictate a man's conscience.

After all, in the treaty-making process, it is not only the President who should seek advice, but it is incumbent on every Member of this body to do likewise.

This, Mr. President, I have tried to do.

I have listened carefully to those who argue that these treaties are in the best interest of our country. I have searched endlessly for the insight necessary to understand what these treaties truly mean for us, for the Panamanians, and for those generations who will follow us.

I have traveled the length and breadth of my State talking to the people. In each place I stopped, I listened and I learned. The people are talking, but Government is not listening.

The message I received from the people was clear: The Neutrality Treaty, as written is not right, and unless changes—substantive changes—are made, the treaty should be rejected.

I have discussed my concerns about the treaty in great detail with the administration and the Senate leadership and my colleagues. Together, we considered ways to change the treaty to make it more palatable. My efforts and the efforts of others to alter the treaty through our advice failed.

The problems I have with the treaty are well known:

There is no guarantee that the United States can negotiate for a continued military presence after the year 1999.

There is no guarantee that the United States can intervene to keep the canal open.

The United States will be forced to surrender its Southern Command.

And there is no guarantee of proper maintenance and operation of the canal after the year 1999.

There is an economic implication to the treaties that has not been discussed as much as I, personally, feel it should have been.

Let me give one example, if I may. General McAuliffe said we must spend some $40 million beginning 6 months after these treaties are ratified to build additional military installations to replace those we will have given to the Panamanians, and then turn them over to them in the year 2000.

It seems to me that if we are going to spend $40 million of our taxpayers' money, then a discussion, in their best interest for the future should have been considered.

There is a spreading fear that if we modify this treaty, the Panamanians will reject the treaty and humiliate us in the process. To avoid this possibility of rejection, it has been suggested that we alter this treaty by means of reservations rather than amendments. The advocates of this view explain that by proposing reservations, which do not require a plebiscite, our country can avoid the return of the treaty to the Panamanian people for consideration. A reservation, they say, means the same thing, but the Panamanian people will not be able to approve or disapprove it—so let us do it this way, with the reservation.

If it is true that a reservation is the same as an amendment, why not allow the treaties to be amended?

If it is true that the Panamanian people would not accept the amendments we attach, then it is not a solid treaty, I say.

By refusing to consider amending the treaty, we are saying to the people of this country that our overriding concern is with the Panamanian constituency—the constituency of a foreign land.

Somewhere along the way we have reversed our priorities. Somewhere along the way in this Chamber we have lost sight of the fact that our job is to make the treaty acceptable to the American people. And, somewhere along the way we have elected to ignore their advice.

Our first obligation, our foremost responsibility, whether it be in enacting legislation or ratifying an international treaty, is to insure that the best interests of the American people is met.

The treaty, as it now stands, fails to satisfy that obligation.

The treaty, as it now stands, leaves much to be desired as to the future security and well-being of our country and the Western Hemisphere.

Proponents of the treaty have correctly pointed out that negotiations of these treaties span four administrations. The issue now before us is not a question of whether the Senate stands behind the President in his conduct of foreign policy. The issue is whether this particular treaty at this particular time serves this particular Nation's best interest.

No foreign government should misinterpret the vote. There is no weakening of our national commitment. This country will still unite behind the President against any act of aggression or threat to our national security. But we will unite with the same sense of independence and free will which has characterized this Nation from its beginning.

The sole reason, the lone factor behind the decision I have reached is that, without amendment, this treaty neither reflects the will nor satisfies the best interest of the United States and its people.

In closing, let me recall something Alexander Hamilton said during the debate on the Federal Constitution about the Halls of Congress:

> Here, sir, the people govern; here they act by their immediate representatives.

If the people are right on this question—as I think they are—then I am right. And if the people are wrong, then so am I.

And so, Mr. President, I intend to cast my vote today against the Neutrality Treaty.

One further point, Mr. President, that I feel must be made: There are mean and vicious rumors as to deals, if you will, buying of votes to secure ratification of this treaty. I think I have been the subject of as intense pressure and lobbying by the administration as anyone, and I want it on the record that not even the slightest inference has been made to me, directly or indirectly, for my vote. The approach has always been the need for these treaties and the interests of this country.

If there is one thing everyone in this country must know, it is that this President has the highest moral principles and integrity of anyone. I strongly resent these inferences being made, and I want to set the record straight so far as I am partially concerned.

Mr. President, I yield back the remainder of my time.

Mr. LAXALT. Mr. President, the Senator from Nevada would like to commend the Senator from Kentucky for his statement. Of the many statements we have had here in the last 2 or 3 days, his, in my judgment, was the most significant.

I would be less than candid not to indicate to the Senator from Kentucky that had he made a decision in the opposite direction, the cause of the opponents to this treaty, at this moment, would have been lost.

I commend his analysis concerning the defects in the treaties, as we perceive them, in relation to the defense capability, the defense presence, the economic problems, the ambiguities overall, and the unending questions we have had as to why these reservations that we are treating as being important changes, necessary changes, to clean up the treaty, so to speak, were not handled properly by way of amendment, so that if adopted they would be in the four corners of

that treaty. We know why: Because had they been handled as amendments, they would have subjected the Panamanian Government—more specifically, General Torrijos—to a new plebiscite, which he does not want or need.

So, once again, I commend the Senator from Kentucky. This was a courageous position. I do not know of anybody on this floor who has been subjected to more pressures—all proper, as he has indicated—from every quarter than he has these last several days. I know that; his colleagues know that.

What we have seen here in the last several moments is a tremendous example and a sterling example of a "profile in courage."

Mr. GRIFFIN. Mr. President, is there a special order now?

The PRESIDING OFFICER. Yes, there is.

Mr. GRIFFIN. May I ask what the situation is?

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas (Mr. BUMPERS) is recognized for not to exceed 15 minutes.

Does the Senator from Nevada wish to suggest the absence of a quorum?

Mr. LAXALT. Mr. President, I suggest the absence of a quorum.

Mr. GRIFFIN. Mr. President, will the Senator withhold that?

Mr. LAXALT. I certainly will.

Mr. GRIFFIN. I was going to ask unanimous consent that I be recognized, and if the Senator from Arkansas comes in, I will immediately yield the floor.

The PRESIDING OFFICER. Does the Senator from Michigan make that unanimous-consent request?

Mr. GRIFFIN. I do.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. GRIFFIN. Mr. President, I was interested to learn of a report this morning by CBS Radio—and television, I take it—about the fact that the Ambassador of Panama called at the White House on yesterday and let the President and Secretary Vance know that General Torrijos is extremely upset over Senate additions to the treaties, as I understand the report.

I also understand, on the basis of the report, that the President called General Torrijos on yesterday and attempted to calm him down and to assure him that, really, what the Senate was doing here was not making any difference nor making any significant changes in the treaty.

I can only read between the lines, Mr. President, but I suspect that the concern is not only about what the Senate already has done but also what the Senate may be about to do this afternoon. I refer, in particular, to an amendment to be offered by the Senator from Arizona (Mr. DECONCINI), which, if it is offered in the form now printed, will provide, subject to the condition to be included in the instrument of ratification of the treaty:

that notwithstanding the provisions of Article V or any other provision of the Treaty, if the Canal is closed, or its operations are interfered with, the United States of America and the Republic of Panama shall each independently have the right to take such steps as it deems necessary, including the use of military force in Panama, to reopen the Canal or restore the operations of the Canal, as the case may be.

This, of course, would fly in the face of the Panamanian interpretation of the Neutrality Treaty, which is that the United States cannot come in with military forces to defend the neutrality of the canal unless it is with the permission of the Republic of Panama.

Other efforts to amend the Neutrality Treaty in this respect, of course, have been resisted.

The public press reports now are that President Carter—I do not know if it is true or not—has agreed to go along with this amendment by the Senator from Arizona, which obviously would be a significant change in the treaty as it has been interpreted and understood in Panama.

I do not know what will happen. I do not know whether the amendment will be modified further or whether it will be offered, but at least that is the state of the situation at the moment. I do know this: I do not see how anyone could vote against the provision that will be offered by the Senator from Oklahoma (Mr. BARTLETT), that, in light of the changes that have been made—and this one if it is adopted—we would surely want to be sure that there was a new plebiscite in Panama.

Otherwise, as I have said over and over and over on the floor of the Senate, we will end up with an agreement only with a temporary dictator, not with a treaty with the people of Panama. Unless we have a treaty with the people of Panama, we certainly are asking for trouble for ourselves.

It is very interesting, Mr. President. I would think that, in light of the situation in the Senate, it would be unreasonable to ask the White House to inform the Senate if it is true, as reported by CBS, that General Torrijos and top Panamanian officials have expressed their outrage about that action taken in the Senate and about to be taken today, and whether such an exchange of views between the President and General Torrijos took place on yesterday. Also, how about informing the Senate, so that we can intelligently decide our responsibility?

Mr. President, I suggest the absence of a quorum, pending the arrival of the Senator who had the time.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arkansas was previously recognized under a special order for 15 minutes.

Mr. BUMPERS. Mr. President, since the Presidents of the United States and Panama signed the two Panama Canal treaties on the 7th day of September 1977, the first of which has been debated here for the past 5 weeks, I have steadfastly refused to say that I would vote for or against the treaties. I believe the highest duty of any public official is to diligently study every possibility and contingency that can be foreseen as a result of his vote on these or any other issues presented. I have been as diligent as time would permit in listening to and reading the debate. I have read everything I thought would add to my knowledge of the treaties and the implications for the United States in ratifying or rejecting them.

Mr. President, I have concluded that the long-range best interests of the United States will be served if these treaties are ratified. They are not perfect, but if a thousand additional efforts were made to negotiate these treaties it is doubtful any of them would meet with anything like universal approval. I believe the treaties under consideration provide for adequate safeguards in insuring the neutrality of the canal, for America's continued use of the canal, for priority usage during an emergency, for our right to negotiate a continued military presence after the year 2000, and that no American tax dollars will be used in the transition period. I have cosponsored two amendments and a reservation which I believe further insure the above rights, and I have voted against other amendments which I considered frivolous, redundant, or designed not to improve the treaties, but to defeat them. In the final analysis, Mr. President, I do not believe the security interests of the United States are jeopardized by ratification, and the Joint Chiefs of Staff, upon whom we must depend for our military information, have so stated. While the treaties will not cost Americans any tax dollars (contrary to a public misconception), while only 1 percent of our Gross National Product transits the canal, while our usage of and dependence on the canal are declining annually, and while the canal is costing more and more to maintain, none of these reasons is compelling or persuasive in supporting the treaties.

I believe the treaties ought to be ratified because it is right to do it.

Back in 1965, I did not necessarily think the Vietnam war was a high-water mark in this Nation's history, but I was at best passive to that war because they were not my sons whom I was seeing borne on litters every evening on the news, and it was only when my first-born son turned 17 that I began to seriously question and later actively oppose that war. I knew if I lost the very light of my life in a war that had no meaning, to him or me, I would also die. But my death would have been slow agonizing, and bitter, and I would never forgive those who caused it.

Yet we do not seem to have learned the lessons of that war. It is simple: The Vietnamese did not want foreign nationals on their soil. The Panamanians, partly because we taught them patriotism and to love their land, do not want foreign nationals on their soil; and in 1776 we did not want foreign nationals on our soil. The early settlers came here from England. Later the British poured money into the Colonies assisting in their development, but I cannot find anywhere

in history where there is a recordation that any of our early patriots said the British bought and paid for us and therefore they ought to be entitled to keep the Colonies.

I am not going to vote for the treaties because I think all Latin America will love us forever—because they will not. I would not vote for them because I think the Panamanians can deprive us of the use of the canal by sabotage, though I believe that. But I will vote for them because I think it is right—because no nation ought to own a 10-mile-wide tourniquet across the middle of another nation, and, finally, because in the constant ideological struggle between communism and democracy, democracy is slowly winning because we believe in the rights of all people and all nations—rich or poor—to determine their own destiny. In the past 5 years we have seen Spain, Portugal, India, and Greece, turn away from authoritarianism and move toward government by the people. It was the heavy-handedness of communism that caused Egypt and Somalia to kick the Russians out. That is one of the reasons Cuba and Russia are in Africa—it is about the only place where targets of opportunity for their heavy-handedness are left for them, and they ultimately will most certainly meet with the same fate there that we met with in Vietnam, and for the same reasons.

If this body wants to prove that might makes right, that we—the most powerful nation on Earth—will not be intimidated by 1,750,000 hapless, largely illiterate, and impoverished people, living on a land about one-fourth the size of Arkansas, then we can do it. But we should understand when we do it that we are handing every Communist zealot in this hemisphere the greatest talking point he could ever, in his wildest dreams, have hoped for.

We should understand that our military presence will have to be increased to approximately 100,000 men. And we should understand that some of those men will certainly die in defense of the canal, and even that presence, and those deaths will not guarantee us the continued use of the canal.

As for the national uproar over how Senators can callously ignore the wishes of their constituents, I can tell you my vote is not being cast indifferently or callously. It is being cast after long, agonizing hours of study, serious consideration of constituent views, both for and against, and recognition finally that I and I alone can cast the vote, and it is I who must accept whatever consequences history shall dictate.

Edmund Burke was elected to the British Parliament in 1774 along with another man named Cruger. They represented the city of Bristol. Cruger thought that every representative ought to represent and vote according to the popular views at any given time on any given day. Burke disagreed, and in addressing his constituents, he said:

> My worthy colleague says, his will ought to be subservient to yours. If that be all, the thing is innocent. If government were a matter of will upon any side, yours, without question, ought to be superior. But government and legislation are matters of reason and judgment, and not of inclination; and, what sort of reason is it when the determination precedes the discussion; in which one set of men deliberate and another decide; . . .
>
> To deliver an opinion is the right of all men; that of constituents is a weighty and respectable opinion, which a representative ought always to rejoice to hear; and which he ought always most seriously to consider. But authoritative instructions; mandates issued, which the member is bound blindly and implicitly to obey, to vote, and to argue for, though contrary to the clearest conviction of his judgment and conscience, these are things utterly unknown to the laws of this land, and which arise from a fundamental mistake of the whole order and tenor of our constitution.

Mr. President, my position is not consistent with the majority of mail I have received from my home State on this issue, but happily, I have immense faith in the people of my State and of this Nation, not to forgive and forget, but to remember the greatness of this Nation; to believe that magnanimity, generosity, and restraint, not bullying, are the characteristics of a great nation. A great nation lives by the Golden Rule. That is why history will record the Marshall Plan—that saved Europe from communism and turned deadly enemies into powerful allies—as the most humane act of enlightened self-interest in world history.

Mr. President, if there is a quality which we, the American people seem to be losing, it is confidence in ourselves. But this loss of confidence seems unjustified when we realize that in the past decade we have survived an immoral war, a constitutional crisis with the Presidency, and shattering revelations about government lying to us—yet our institutions are still intact.

Thomas Jefferson would be proud of that, but he would be deeply dismayed at the distrust of Government so pervasive throughout the land.

Not long ago I watched President Carter and Prime Minister Giscard D'Estaing on the evening news as they stood on Omaha Beach. A wave of haunting memories flooded my mind as I recalled that terrible battle. I was in the Marine Corps, destined for the Pacific theater of operations, but I was fearful for my brother, whom I thought to be in the Normandy landings.

But I also recalled that mighty armada of ships, the most powerful in history, laden with men and equipment, prepared for the final awesome assault against those who would have enslaved the rest of us.

Mr. President, I believe that there is now an even greater reservoir of strength and resolve in this Nation should the occasion ever call for it to be tapped. This Nation's dedication to freedom, to individual rights, to fairness is as great today as ever, and I believe that our Judeo-Christian beliefs and our Jeffersonian political traditions would extend the right to those same aspirations to all people everywhere, even so small and impoverished a nation as Panama.

I thank the Chair.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. BUMPERS. I am happy to yield.

Mr. SARBANES. Mr. President, I want to commend the very distinguished and able Senator from Arkansas for an extremely thoughtful and eloquent statement on the treaties. In particular, I thank him for stressing that he is for these treaties because these treaties are right; that these treaties give us an opportunity to bring right and might into harmony with one another. It gives the United States the opportunity to use its power consistent with what is right, to do the right thing morally, to do the right thing legally, and to protect our interests in the course of doing that, and yet to recognize the legitimate aspirations of another people, and to deal with them with a sense of dignity and a sense of respect.

I greatly appreciate the thought, the understanding, the conviction, and the courage which the distinguished Senator from Arkansas has shown on this issue as he does on every issue which comes before this body.

Mr. BUMPERS. I thank the Senator very much for his compliment.

Mr. President, I suggest the absence of quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, in a way I am somewhat reluctant to speak here this morning. I have spoken on the subject of the treaties on a number of occasions during the debates, and in a speech quite some time ago in which I said I would support ratification of the treaties.

Like most Vermonters, I think we tend not to speak overly long on any subject, but I have been troubled by certain events in the past few days.

I went home last night and made a few notes, got up this morning and made a couple of more, sent the children off to school, and came in here and thought about it again.

Mr. President, if I might, I would like to quote what I said yesterday just before rollcall vote No. 59 Ex. That, you may recall, was a vote in which, by 82 to 16, we adopted the reservation proposed by the distinguished junior Senator from Georgia.

I said at that time:

> Mr. President, very briefly, I feel that everything that is in this amendment is already inherent in the treaty. I will vote for the amendment only so that a nay vote would not be interpreted to mean, on my part, that I felt that these rights were not already in the treaty. But I think it is a waste of time, and I really would hope that neither myself nor any other Senator, at any time in the future, would claim that there had been some major change in the treaty, and that that was what enabled us to vote for these treaties. The treaties should be voted for or against on their merits, and not because of this amendment.

Mr. President, I support these treaties because I think they are right. I said earlier on the floor of the Senate that I supported them not because I felt that the United States was a weak country, but because the United States was the strongest, greatest country in the world.

The United States is the oldest existing democracy. The United States is a country the free world relies on to maintain its freedom as well as ours, and because it is such a great country it can afford an act of overdue justice. I said at that time I felt indeed this was such an act.

In this, Mr. President, and in statements to my friends, neighbors, and constituents in Vermont I have said also that I support the President of the United States in this regard.

We know from the history and from the speeches that have been given here, that many other Presidents have been in favor of a Panama treaty. It would appear that Presidents Truman and Eisenhower were, as well as President Johnson, President Nixon, President Ford, and now President Carter. But President Carter was the one who finally took the unpopular step of signing such treaties, knowing, of course, that the act itself would be unpopular, but taking it because he knew it was right.

Those who hold public office should not consider that they are in some sort of an ongoing marathon popularity contest, but must do the things that are right.

Those of us in the Senate, in voting for this treaty, realize that for some of us it may be political suicide. But let us hope again that any Senators who vote either for or against the treaties will vote for or against them because they feel they are right in their vote. Vote for the treaties or vote against the treaties because you feel that that is what is in the best interests of the United States, because, after all, that is what our oath of office calls upon us to do, to defend the United States, and to defend the Constitution and laws of the United States.

Let us hope that we do not consider our political future when we vote here today, because no Member, no man or no woman in the U.S. Senate, owns a seat in the U.S. Senate. I repeat, you do not own it. It is not some kind of birthright. It is not the case that because you are here, you will be here for the rest of your life. You are here to do what is best for the United States of America.

Let us hope that that is the determination of every Senator.

We are and should be the conscience of the country, the greatest deliberate body in the world. Quite frankly, it should remain so: 100 individuals to represent 220 million Americans, to do, hopefully, what is best for those Americans, what is best for our country, to make sure that 100 years from now we will still be the oldest existing democracy in the world.

Perhaps, Mr. President, on the eve of St. Patrick's Day, and being half Irish, I should be pleased that Edmund Burke has been quoted so often here. Mr. President, 4 years ago, at the age of 33, I went before the people of Vermont and announced that I was going to run for the United States Senate, hoping to succeed a man who had been elected the year I was born. I quoted Edmund Burke at that time. Maybe it would not hurt to read the quotation again.

Burke promised his constituents his loyalty in the following words:

> Certainly Gentlemen, it ought to be the happiness and glory of a [legislator] to live in the strictest union, the closest correspondence, and the most unreserved communication with his constituents. Their wishes ought to have great weight with him; their opinion high respect; their business unremitted attention. It is his duty . . . in all cases, to prefer their interest to his own. But his unbiased opinion, his mature judgement, his enlightened conscience, he ought not to sacrifice to you. These he does not derive from [you]; no, nor from the law and the constitution. They are a trust . . . for the abuse of which he is deeply answerable. Your [legislator] owes you, not his industry only, but his judgement; and he betrays, instead of serving you, if he sacrifices it to your opinion.

Because of that, Mr. President, I hope that the Members of the Senate will vote either for or against the treaties on what their conscience says is best for their country, not on what their own political polls might say, and not because they feel that somehow they cannot live unless they remain elected and re-elected to the U.S. Senate.

I am forced to reiterate this, Mr. President, because I have become very concerned in the past few days, as I expressed yesterday, that all of a sudden the whole thing becomes very political when it is tied up with reservations, many of which I think are meaningless. Some do not add anything to what is already in the treaty, but seem to be designed so that any of us who expect any kind of political retribution from our votes today can go back and say, "But, look at this reservation we got at the last minute, and, therefore, we were able to go and vote for these treaties." The reservations are already built into the treaty to begin with.

Mr. President, this Vermonter is not attracted by that prospect whatsoever. I hope this will not continue to be the course of action on the floor of the U.S. Senate. I have far too much respect for my colleagues and for this institution, and far too much respect for the President of the United States; but far more important than that, I have far too much respect for the United States of America, to wish to see that happen.

Mr. President, if we are going to have votes on meaningless matters rather than on a treaty that I think is in the best interests of the country, I wonder how many of us who are deeply committed to voting for a treaty because we think it is right would be able to continue to vote for such a treaty under circumstances like that.

Mr. President, I have spoken much longer than I had intended, but I feel deeply about this. I would hope that we can put aside the weighing of mail back and forth, the weighing of political polls back and forth, the weighing of what difference an extra sentence one way or the other might make to our political future either in voting for or against this treaty, and remind ourselves that ultimately we are here to reflect in our final judgment what is in our conscience, what is in our hearts, and what we feel is best for the United States of America.

In that regard, let me repeat this one more time, Mr. President, no Member of the U.S. Senate owns the seat he occupies here. No Member of the U.S. Senate owns his office.

When you realize that, then it becomes very simple. What is your judgment? What are your best thoughts? What, in your conscience, is best for the country? For me, the answer is very simple. It is ratification of these treaties, for the reasons I have stated over and over again on the floor of the Senate. I can assure you it is not because of any political gains which might occur to the Senator from Vermont.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BUMPERS). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHURCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHURCH. Mr. President, I commend the distinguished Senator from Vermont (Mr. LEAHY) for his remarks this morning. I appreciate the fact that he has taken an unpopular position. It is always lonely when one finds himself in that predicament. Yet, clearly, the responsibility of each Senator on a matter of this importance is to vote in strict accordance with his own convictions. Each Senator owes his constituency the duty to exercise his judgment, which the Senator from Vermont has done in the most admirable way.

There are far too many public officeholders who bend with the winds, constantly telling the people what they think they want to hear. They are not leaders, but followers, and because their numbers are many, the hard problems that face this country are not getting solved.

I want the Senator from Vermont to know that I not only admire the position he has taken on the treaties, but I admire the reasons he has given for the stand he takes. I think his remarks today are in the best traditions of politics as it should be practiced and in the best interests of the country.

Mr. SARBANES. Will the Senator yield?

Mr. CHURCH. Yes, I yield.

Mr. SARBANES. I thank the distinguished Senator from Idaho.

Mr. PRESIDENT, I, too, thank the very able Senator from Vermont, not only for the statement which he has just made, but for the extremely effective way in which he has participated in the debate on this treaty and the enormously constructive contribution which he has made to the Senate's consideration of this important issue.

It should be pointed out that the leading American negotiator with respect to this treaty, Ambassador Ellsworth Bunk-

er, is a very distinguished native and resident of the State of Vermont. Ambassador Bunker has made an enormous contribution to the foreign policy of this country and to the diplomacy of this Nation. So, of course, has former Senator George Aiken, who was such a distinguished representative of the State of Vermont in this body and served so ably as the ranking Republican member of the Senate Committee on Foreign Relations. Both of these gentlemen are outstanding examples of the development of a foreign policy in this country, bipartisan in nature, with a deep perception of American interests in the world, and of the need for a wise and mature America.

Ambassador Bunker has labored on this issue over the course of a number of years, and has been one of the most effective members of our diplomatic service. I think it is fitting, in commenting on the address by the Senator from Vermont, to point out that it is one of Vermont's own sons who has played such an instrumental role in helping to shape and develop these treaties. I think the citizens of Vermont should be fully cognizant and appreciative of that role.

Mr. LEAHY. Will the Senator yield?

Mr. SARBANES. I yield to the Senator from Vermont.

Mr. LEAHY. I thank my friend from Maryland and my friend from Idaho. I think both they and other Members of the Senate realize the high respect, regard, and friendship I feel for both of them. They both know how greatly I admire the way they have handled the debate on behalf of those of us who favor the treaties, and I am moved deeply by their comments. I thank them both very much.

TIME LIMITATION AGREEMENT

The PRESIDING OFFICER. Under the previous order, the Senator from Oklahoma (Mr. BARTLETT) is recognized.

Mr. CHURCH. Will the Senator yield so I may inquire if it is possible to reach a time agreement by unanimous consent? I was going to suggest to the Senator that, on this amendment, the opponents desire no more than 15 minutes. If an hour would be sufficient to accommodate the Senator, then the proponents of the amendment might have 45 minutes of that hour.

Mr. BARTLETT. Yes, the request of the Senator from Idaho is agreeable with me: 45 minutes on our side and 15 minutes on the other. I hope we can make it even sooner than that.

Mr. CHURCH. I thank the Senator very much.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESERVATION NO. 4

Mr. BARTLETT. Mr. President, I call up my reservation No. 4.

The PRESIDING OFFICER. The clerk will state the reservation.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BARTLETT) proposes reservation No. 4:

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the reservation that before the date of the exchange of the instruments of ratification the President shall have determined that the Republic of Panama has ratified the Treaty, as amended, in accordance with its constitutional processes, including the process required by the provisions of Article 274 of the Constitution of the Republic of Panama".

Mr. BARTLETT. Mr. President, I wish to begin by reading article 274 in the Panamanian Constitution. It says,

Treaties which may be signed by the Executive Organ with respect to the Panama Canal, its adjacent zone, and the protection of the said Canal, and for the construction of a new Canal at sea level or of a third set of locks, shall be submitted to a national plebiscite.

This means, then, that this reservation would require the President of the United States to make the determination that the Republic of Panama has ratified the treaties with a national plebiscite prior to exchanging the instruments of ratification.

I think this is very vital, and I shall try to outline some of the reasons why it is important in the exchange of treaties that this Nation is making with the country of Panama.

Mr. President, the long, complex debate in the Senate over the Panama Canal Treaty and the treaty concerning the permanent neutrality and operation of the Panama Canal is nearing an end as we approach a final vote on this first of two treaties. Clearly, however, debate will continue within the United States and around the world on the merits of these treaties long after they have been considered by the Senate. Whether they are approved or not, men everywhere will wonder what would have happened had the treaties, as originally negotiated, been different.

The lengthy debate on these treaties reflects not only the importance of the Panama Canal to the United States, Panama, and the world, but also concern over divergent interpretations of its provisions. Certainly, there has been major dissatisfaction in the Senate with the treaties as they were negotiated. Today, as more Senators announce for and against the treaties, we have heard nothing to renew our confidence in either of these treaties. On the contrary, those announcing for the treaties, such as my good friend from Georgia (Mr. NUNN), have been very eloquent in expressing their dissatisfaction with the provisions, many very ambiguous, of this treaty. The Senate has already made two substantive changes by amendment to the treaty of neutrality. These were called the leadership amendments to article IV and article VI.

Further reservations and understandings are inevitable, and it is expected that the reservation by the distinguished Senator from Arizona (Mr. DECONCINI) will be approved overwhelmingly later today. There will be other reservations that will be approved. Even those who support these treaties and have announced their intention to vote for them recognize that amendments, reservations, and understandings must be added by the Senate to these treaties in order to secure the neutral and efficient operation of the Panama Canal and to maximize the possibility of good relations with Panama and the world.

Nearly every Member of the Senate joined with the distinguished majority and minority leaders in voting for their amendments to article IV and article VI of the Treaty of Neutrality. Numerous Senators took the floor to express their view that these amendments made major substantive changes to the Neutrality Treaty. That is, they were expressing their dissatisfaction with the Neutrality Treaty as negotiated. At the same time, those who voted against the two leadership amendments did not do so because they were satisfied with the existing language. On the contrary, they had all expressed their dissatisfaction with the treaty itself.

The changes made by the leadership amendments are quite significant. In the case of article IV, they deal with the right of one nation to intervene in the territory of another nation. In the case of article VI, the right of warships of the United States to "go to the head of the line" is made clear. These are substantial changes to the Neutrality Treaty, I am confirmed in that view by the distinguished majority leader. For example, in an exchange with the majority leader on Thursday, March 9, he and I had the following discussion:

Mr. BARTLETT. I thank the distinguished majority leader very much for yielding.

Is the majority leader saying, on the one hand, that his amendment adds additional words to article IV and that those words constitute a substantive change in the meaning of article IV?

Mr. ROBERT C. BYRD. I am saying in response to the Senator from Alabama, who first said that they add no words, and obviously they add 219 words; he said they add no phrases, and they obviously add phrases; he said they add no substance, and I am saying that they add even to the substance.

Mr. BARTLETT. Well, I am asking the distinguished Senator if in his opinion his amendment, the leadership amendment, adds and makes a substantive change to article IV?

Mr. ROBERT C. BYRD. Yes. I think it does, and I have just stated why.

Mr. BARTLETT. I thank the Senator.

Given the testimony received by the Armed Services Committee concerning ambiguous and inadequate economic provisions of the Panama Canal Treaty, it is likely that the Panama Canal Treaty will also be amended. Thus, it is probable that both treaties will contain language not in the treaties as negotiated at the moment when the Senate gives its consent to ratification. Although the process for making these changes—amendments, reservations, and understandings—is consistent with American constitutional procedures, the resulting treaty documents will be different from the documents recently subjected to approval by a plebiscite of the people of Panama.

I would remind my colleagues in the Senate that the fate of the Panama Canal is as important to the people of Panama as it is to the people of the United States. For that reason, article 274 of the Constitution of Panama provides very specifically for exceptionally careful ratification procedures for any

treaty dealing with the Panama Canal. I read article 274 just a minute ago.

Many Panamanians have expressed their view that the original 1903 Panama Canal Treaty was negotiated in a less-than-straightforward manner, and this unusually specific provision for ratification of treaties dealing with the Panama Canal was undoubtedly designed to allay fears that a new treaty might also be negotiated in a cloud of confusion. This is not an unreasonable fear.

Mr. President, the citizens of Panama, like the citizens of the United States, are aware that a treaty is an agreement which is, in many ways, like a business contract. They understand that each side puts forth offers which are either accepted or rejected by the other side. The agreement is consummated when both parties agree to the same terms and express that agreement in language acceptable to both. Essentially, the same procedure applies to treaties.

By altering the treaty language as originally negotiated and as approved in Panama by plebiscite, the Senate is, in effect, rejecting an offer from Panama while at the same time countering with an offer of its own. Were the Government of Panama not to resubmit the treaties as amended to a plebiscite of the people of Panama, its action would seemingly constitute a rejection of the new offer from the United States.

Clearly, to give the proposed Panama Canal treaties their maximum legitimacy, they must be submitted along with all changes to the people of Panama in accordance with article 274 of the Panamanian Constitution of 1972. Failure to take this step would leave the treaties vulnerable to refutation by subsequent governments of Panama, or for that matter the United States, and might reduce the binding effects of the treaties under international law. In my opinion, such a loophole could work to the advantage of Panama in the future.

Although the Government of Panama is undoubtedly a dictatorship, the rule of law has not completely ceased in Panama. Article 274 of their constitution clearly requires a plebiscite prior to ratification of any treaty dealing with the Panama Canal and the present Government of Panama has already acted once in accordance with that provision. Certainly, when confronted with a changed document, the right of the present government to rule would be seriously called into question if the new language were not submitted in a plebiscite.

I believe that the seriousness of this issue can be illustrated by two questions. Do you believe that Panama would accept a treaty that had not been ratified by the U.S. Senate in accordance with our Constitution, when such ratification is required by the language of the treaty itself? And would my colleagues as elected representatives of the American people, give their consent to ratification of a treaty whose language had been changed subsequent to first consideration of the document?

I think we should look upon this as if the shoe were on the other foot, and the nation of Panama had made changes in an offer of a treaty by the United States. Would we not feel completely obligated to consider that changed treaty and act accordingly, according to the constitutional requirements?

I think the answer to the questions that I have put would be that the Americans in the Senate, the Senators, would definitely want to have the United States fulfill the requirements of the Constitution and each as an individual Senator would want to fulfill his constutitional duties. I think that the answer to both of those questions is "No."

It would be an injustice to the people of the United States if the Senate were to ignore its treaty responsibilities, and it would be an injustice to the people of Panama and the United States, and the world, about whose human rights and democracy we have been greatly concerned, not to expect that the treaties as amended would be resubmitted to a plebiscite of the people of Panama.

I think, therefore, a Senator would be in violation of his oath of office in not upholding our Constitution in case the shoe were on the other foot.

Mr. President, at this time I would like to discuss briefly exactly what my reservation to the Neutrality Treaty will and will not do. The reservation I propose adds to the resolution of ratification language which makes consent to ratification "subject to the reservation that before the date of the exchange of the instruments of ratification the President shall have determined that the Republic of Panama has ratified the treaty, as amended, in accordance with its constitutional processes, including the process required by the provisions of article 274 of the Constitution of the Republic of Panama."

In effect, Mr. President, the reservation I propose makes clear to the President that the Senate does not consent to ratification of a potentially invalid treaty. It instructs the President to determine that the Republic of Panama has properly considered our amendments as required by the Constitution of Panama.

In short, the reservation I propose makes explicit the recognition that a new plebiscite is required in Panama to deal with changes already made or pending to the Treaty of Neutrality. A new plebiscite in Panama is necessary to:

First. Conclude a new agreement between the United States and Panama in the manner of a contract, which we all understand;

Second. Guarantee United States and Panamanian rights under the treaty;

Third. Comply with international law;

Fourth. Reduce the likelihood of misunderstandings with the Panamanians;

Fifth. Reduce the chances that subsequent Panamanian regimes will refuse the treaty;

Sixth. Comply with the Panamanian Constitution and insure that the Supreme Court of Panama does not void the agreement;

Seventh. Support our policy of standing up for political and human rights around the world;

Eighth. Strengthen the leadership amendments by showing that they do, beyond a shadow of a doubt, change the substance of the Treaty of Neutrality; as was agreed to by Senator BYRD as far as the leadership amendments make it a substantive change; and

Ninth. Show the American people that the amendments passed by the Senate are not a political maneuver designed to camouflage real flaws in the treaties so that the administration will not suffer political embarrassment and defeat.

The addition of this reservation to the Treaty of Neutrality is necessary because the joint Carter-Torrijos statement of October 14, 1977, which forms the basis of the leadership amendments, was not attached to the Treaty of Neutrality when that specific document, and the specific language it contained, was ratified in Panama. A new plebiscite, determining once and for all the status of the joint Carter-Torrijos statement, is necessary to end the conflicting interpretations which existed at the time of the first plebiscite and which would continue to exist without a new plebiscite dealing with that specific issue.

Mr. President, Mr. Oppenheim in his Treatise on International Law, volume 1, section 517, states as follows:

§ 517. It follows from the nature of ratification, as a necessary confirmation of a treaty already concluded, that ratification must be either given or refused, no conditional or partial ratification being possible. That occasionally a State tries to modify a treaty while ratifying it cannot be denied; but conditional ratification is not ratification at all, but is equivalent to refusal of ratification coupled with a fresh offer which may or may not be accepted. Nothing, of course, prevents the other contracting party from entering into fresh negotiations in regard to such modifications; but such negotiations are negotiations for a new treaty, the original treaty having become null and void through its conditional ratification. On the other hand, no obligation exists for such party to enter into fresh negotiations, for conditional ratification is identical with refusal of ratification, whereby the treaty falls to the ground. Thus, for instance, when the Senate of the United States on December 20, 1900, in consenting to the ratification of the Hay-Pauncefote Treaty, added amendments which modified it, Great Britain did not accept the amendments, and considered the Treaty to have fallen to the ground.

. . . It has been asserted that it is quite legitimate—and that one ought not in this case to speak of conditional ratification—for a contracting party who wishes to secure a certain interpretation for certain terms and clauses of a treaty, to grant ratification upon the understanding only that they should bear a particular interpretation. In such cases, according to that view, ratification does not introduce an amendment or an alteration, but only fixes the meaning of otherwise doubtful terms and clauses of a treaty. However, it is clear that such interpretation, in order to be binding upon the other parties, must secure their assent. Otherwise it might be possible for a contracting party to modify substantially its obligations by means of its own interpretation of the provisions of the treaty.

§ 517a. . . . Reservations raise an important question of principle because they modify the terms of the offer which a State in signing or ratifying or acceding to a treaty purports to accept. *A reservation is upon analysis the refusal of an offer and the making of a fresh offer. Therefore in principle it seems necessary that the other party should assent to the reservation . . .*[1] [Emphasis supplied.]

I would like to cite another example which has particular reference to the Panama treaties now before us; and this is an observation by Professor Oppenheim with some relevance. It is in section 497:

§ 497. Although the Heads of States are regularly, according to International Law, the organs that exercise the treaty-making power of the States, *such treaties concluded* by Heads of States, or other organs purporting to act on behalf of the State, *as violate constitutional restrictions do not bind the State concerned*. This is so for the reason that the representatives have exceeded their powers in concluding the treaties.[2] [Emphasis supplied.]

I would add that Mr. J. L. Brierly, in the Law of Nations, says:

Ch. VII, § 1. . . . In accepting a treaty a state sometimes attaches a "reservation," that is to say, it makes the acceptance conditional on some new term which limits or varies the application of the treaty to itself. Such *a qualified acceptance is really a proposal for a treaty different from that agreed on, and if the reservation is persisted in and is not accepted by the other states concerned it amounts to a rejection.*[3] [Emphasis supplied.]

Mr. LAXALT. Will the Senator yield?

Mr. BARTLETT. I yield to the Senator from Nevada.

Mr. LAXALT. The Senator from Nevada compliments the Senator from Oklahoma for bringing to the attention and consideration of this body a very worthwhile matter.

Essentially, what the Senator is attempting to do by virtue of this reservation is to assure not only the political situation in reference to the people of Panama, in the sense he wants them to participate in this decision, but, moreover, the Senator from Oklahoma is attempting also to remove what may be serious legal obstacles.

It is true, is it not, that if these articles are ratified by the Senate and if the appropriate exchange procedures are engaged in by the President and Mr. Torrijos, under international law they probably would be binding? But there is a serious question, under the domestic law of Panama, as the Senator has indicated, under the terms of their constitution, if there are changes, substantial changes, within the terms of the treaty, that that would be in violation of the Panamanian Constitution. Is that not the Senator's concern, basically?

Mr. BARTLETT. Yes, that is correct. I think that also in connection with international law, it seems to violate it.

Mr. LAXALT. In either case.

Mr. BARTLETT. In either case.

Mr. LAXALT. If that be the case, and we had a problem later, and the Panamanians chose, for whatever reason, to reject the terms of these treaties by utilizing the device of the Supreme Court of Panama, Panama could avoid any obligations under the terms of this treaty. Is that not correct?

Mr. BARTLETT. Yes. The treaty could fall completely; because what is really taking place is that the Panamanians have submitted to us a treaty which we have altered, with substantive changes, and more substantive changes will be made. We are resubmitting that to them. They saw fit to follow their constitution by having a plebiscite on the treaty they submitted to us.

But if they did not see fit to have a plebiscite—if it were the desire of President Torrijos not to have a plebiscite—on the second submission, or the submission by us to them, which is a change in what they submitted to us, it clearly would be a violation of their constitution, and it would be a matter of their accepting one version, we accepting another, and this could fall very quickly, according to their law and according to international law.

Mr. LAXALT. So, in the absence of a reservation of this kind, requiring a plebiscite on the part of the Panamanians with respect to the ratification of these treaties, the treaties would be under a rather serious legal cloud, would they not?

Mr. BARTLETT. Yes; that is entirely correct.

It is interesting to me that the administration originally opposed any amendments, because they might embarrass President Torrijos and might require a plebiscite, which could threaten both President Torrijos and the ratification of the treaties. But now that there are amendments, substantive changes as amendments, and substantive changes as reservations, the administration is saying that it will not be necessary to have a second Panamanian plebiscite, and that to press for one will embarrass Torrijos, because the people of Panama might reject this man and his treaty at the polls.

Yesterday, Senator BROOKE pointed out that the administration seems more concerned about not embarrassing President Torrijos than it is about respecting the views of the American people or in making sure that the treaty negotiated with Panama is exactly the same—both versions that have been accepted—and is sound.

Mr. LAXALT. I thought Senator BROOKE made a very strong and valid point yesterday, when he indicated in no uncertain terms that what has occurred here during the last few weeks of this debate is having General Torrijos with the literal power of veto over the considerations of this body. Is that not essentially what he said?

Mr. BARTLETT. Yes. That is, in essence, a summary of what I just mentioned, and it is a very succinct way of putting the actions that have taken place here.

Mr. LAXALT. I was only quoting Senator BROOKE on it.

Mr. BARTLETT. Yes; I understand.

Mr. LAXALT. Because we have had action here during the last several weeks to consider what we considered to be several worthwhile strengthening amendments to these treaties; but time after time, we literally have been stonewalled on those amendments. Is that not true?

Mr. BARTLETT. That is true. They have been rejected as amendments; but so far, one, and I think perhaps others—so far, several—have been accepted as reservations, and undoubtedly there will be additional ones.

Mr. LAXALT. They originally were rejected here—at least, they were opposed—on the ground that to change materially the terms of the treaties by an amendment would require a future plebiscite. Is that not correct?

Mr. BARTLETT. That is correct.

Mr. LAXALT. Yet that is precisely what has been accomplished here by the device of a reservation, so that a reservation changes the terms of the treaty but theoretically does away with a plebiscite.

Mr. BARTLETT. That is the contention.

Mr. LAXALT. So what the Senator from Oklahoma is attempting to do is to require, under the terms of this reservation, that that plebiscite be conducted.

Mr. BARTLETT. Yes. I think this is very straightforward. It requires that prior to the Resolution of Ratification, because of substantive changes in the treaty, there would have to be a finding on the part of the President to the effect that the Panamanian constitutional processes have been followed.

Mr. LAXALT. It is also true, is it not, separate and aside from the legal aspects of this, that at the time the plebiscite was conducted on the original treaties, the vote was roughly 2 to 1?

Mr. BARTLETT. Yes; that is correct.

Mr. LAXALT. That meant that one-third of the Panamanians who participated in that plebiscite objected to the treaties as they then found them. Is that not correct?

Mr. BARTLETT. That is correct.

Mr. LAXALT. So, would it not be in the interests of equity and justice to the Panamanian people, recognizing that this is a dictatorship, which it is? I do not think anybody questions that.

Mr. BARTLETT. I do not think anybody questions that.

Mr. LAXALT. And it has been for the last 10 years. But it is only right and just that these material changes in this treaty, from every standpoint—legally, politically, morally, and otherwise—be resubmitted to the Panamanian people for another plebiscite.

Mr. BARTLETT. Yes. I think it is also a matter of justice to the citizens of the United States that the treaty we accept from the Panamanians is going to be the same one they accept from us, so that we have a clear understanding that our Government is making exactly the same commitments and has the same understandings as their government.

Certainly, one of the arguments in favor of the treaties is that all this will lead to better understandings and better relations between our country and Panama. But if there are ambiguities and misunderstandings that arise out of these treaties, it is going to be the other way around.

I would expect that the President, in following the requirements of this reservation, would have to certify formally to the Senate that article 274 had been complied with fully.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 15 minutes remaining.

Mr. BARTLETT. I thank the Chair.

Mr. President, I yield to the distinguished Senator from Michigan.

Mr. GRIFFIN. I thank the Senator from Oklahoma.

Mr. President, I merely rise to commend the Senator for offering this very, very important and essential amendment. I do not see any reason why the Senate would not adopt it, but I expect that I know what the results will be.

Frankly, this Senator has taken the view all along, in the committee and on the floor, that we should not adopt substantive changes in the treaty. I have argued that; and although I have voted against tabling motions, I have tried to make it clear throughout that on the merits I would oppose any changes in the treaty on the Senate floor.

The reason I have taken that position is that I am concerned that General Torrijos, the temporary ruler of Panama, will not follow the Constitution of that country; that he will accept whatever deals are made here in order to get the requisite number of votes. Despite the fact that there are changes made in the treaty, he will say those are all right, and if he does this he will be in violation of the Constitution of Panama.

And then we will have the kind of an arrangement with Panama that would be an open invitation to Mr. Torrijos' successor—which is a situation that may develop at any time considering the history of what happens in that part of the world—to say that this is not a valid treaty. His successor would have good grounds for saying so, not only under the law of Panama but under international law as well.

As I documented yesterday and in earlier statements, we cannot be oblivious to the constitutional requirements of Panama for the ratification of a treaty.

Insofar as Panama is concerned, its constitution has a fundamental requirement with respect to any treaty affecting the Panama Canal; that is, that the treaty be approved by the people in a plebiscite.

It has been very obvious and very clear, of course, why the administration started out resisting any amendments: Because they did not want a new plebiscite. Now, despite that clear requirement in Panama's Constitution, we have seen that resistance erode in order to get a vote here and a vote there. The two leadership amendments now have been adopted and other modifications have been adopted, and we are going to see still more this afternoon that will be accepted by the Senate in order to get that magic 67 votes. Then we will have a treaty that will not be valid under the Panamanian Constitution.

I do not want to be a part of that deal. I have never wanted to be and I will not be, and I would hope that we could assure that the Senate as an institution will not be, by adopting the amendment that is now before the Senate, offered by the Senator from Oklahoma.

It ought to be supported. It would be a way for the Senate to protect itself and to protect the people of the United States to be sure we are going to end up not with a temporary agreement with a dictator but with a treaty with the people of Panama, which is what we ought to want.

The PRESIDING OFFICER. Who yields time?

Mr. BARTLETT. I thank the distinguished Senator from Michigan for his comments, which were apropos, and in line with his statement it comes to my mind that with the passage of amendments and reservations that do have substantive meaning, and changes in the treaty that we received from Panama, there is no way to understand how the Panamanians can agree to those changes unless they have a plebiscite and express by their constitutional process their support of those changes. Otherwise, it seems to me that we have rejected the treaty that they have passed and offered them another treaty, which, if they do not take action by their legal process of a plebiscite, they are rejecting.

So I think that the confusion that is added by the apparent desire of the proponents of the treaty to bypass, to circumvent the requirements of Panama's constitution, is going to invalidate the treaty and make it subject to many interpretations and certainly make it a matter of misunderstanding.

We are not telling Panama to have a plebiscite. We are telling the President of the United States that he cannot exchange the instruments of ratification if he determines that they have not followed their constitutional processes and had a plebiscite vote on the treaty with the changes made by the U.S. Senate.

Mr. GRIFFIN. Mr. President, will the Senator yield for one further comment?

Mr. BARTLETT. I yield further to the distinguished Senator from Michigan.

Mr. GRIFFIN. I think we might look at this question in light of how it would look if the situation were reversed.

Of course, in our country under our Constitution a vote of the people is not required. A treaty is negotiated by the President and is then ratified with the advice and consent of the Senate under our representative form of government. But under the Government of Panama, of course, their ratification procedure is different. Suppose that the United States had acted first in this situation and the treaty had gone down to Panama, and that the Government of Panama in some way or other had attached an amendment relating to the right of the United States to use military force. They might very well, for example, have adopted a reservation or an amendment spelling out their interpretation of the Neutrality Treaty, to the effect that the United States cannot use military force to defend the neutrality of the canal after the year 2000 without the express consent of the Republic of Panama. I wonder where we would be if they were to change the treaty in some way and then it were to come back. I wonder if we would not insist that the Senate would have to consent to that revised or new treaty just as we would now expect Panama to follow its constitutional procedures for ratification of the Neutrality Treaty since it has been changed.

It seems to me that if we were to just turn the thing around and look at it from their point of view, we would see why there would be concern in Panama if we are going to, here on the Senate floor, in order to get a vote here or there, change the substance of the treaty.

It is no wonder that the Ambassador of Panama went to the White House yesterday, as reported on CBS this morning, and registered serious concern about what the Senate has been doing to the treaty and what I think they expect will happen here on the Senate floor this afternoon.

It is understandable, especially since the last thing General Torrijos wants to do, I suspect, is to have another plebiscite.

I thank the Senator from Oklahoma.

Mr. BARTLETT. I think the point raised by the distinguished Senator from Michigan is a very valid one. If the shoe were on the other foot, my own opinion is that every single Senator in this body, all 100, would insist that the constitutional processes of this Nation be followed, and that the altered treaty would be before the Senate for ratification or for a decision to not ratify.

Mr. President, I yield the floor. But I first ask how much time I have remaining.

The PRESIDING OFFICER. The Senator has 4 minutes remaining.

Who yields time?

Mr. BARTLETT. I retain the remainder of my time.

Mr. CHURCH. Mr. President, I shall take just a moment or two to reply to the arguments that have been made on behalf of this reservation.

First of all, it should be pointed out that the reservation would add nothing to the treaty or the ratification process. In article VIII, the treaty already contains the provision:

> This Treaty shall be subject to ratification in accordance with the constitutional procedures of the two parties.

Moreover, it is the constitutional duty of the President of the United States to determine, to the best of his ability, that any treaty will be legally ratified by both parties and binding on both parties before he exchanges or deposits the instruments of ratification on behalf of the United States. So this reservation is entirely unnecessary.

But I want to say something to the people of Panama who may be listening to this debate, since I am told that the debate is being broadcast in Panama in Spanish day after day from gravel to gravel. I am quite certain that the arguments made on behalf of this reservation, though they may be the opinion of those who have spoken on behalf of it, do not reflect, in my judgment, the opinion of the great majority of Senators.

This reservation calls upon the President of the United States to certify that the Government of Panama has complied with Panamanian law. Now, what would we think if the Panamanian Gov-

ernment were to attach a reservation to this treaty requiring the President of Panama to certify that the United States Government had complied with American law? Why, we would be so indignant at the presumption that we would scorn it.

I am so tired of this double standard, Mr. President. Can we not leave it to Panama to determine whether Panamanian law has been complied with? Is that not their business? How on earth can we presume to know more about the requirements of the constituion of Panama than the people of that country?

The reservation calls upon the President to act as the ultimate judge of Panamanian law, which is the height of presumption. Never before in connection with any treaty ever considered by the Senate has such a reservation even been proposed.

So it is my intention to move to table this reservation. I have no need to use the remainder of my time. I am prepared to relinquish whatever time is remaining to me in order to make that motion. But before I do so, out of courtesy to the distinguished Senator from Oklahoma, I will withhold the motion.

Mr. BARTLETT addressed the Chair.

Mr. ALLEN. Mr. President, will the Senator yield 2 minutes to me, please?

Mr. BARTLETT. Yes, I yield 2 minutes to the distinguished Senator from Alabama.

Mr. ALLEN. Mr. President, I was somewhat intrigued by the statement of the distinguished Senator from Idaho (Mr. CHURCH) that we should leave to the Panamanians to determine whether or not Panamanian law had been followed in the approval by Panama of this treaty.

That is a far cry, Mr. President, from the argument which the leadership, including the distinguished Senator from Idaho (Mr. CHURCH), has been making on this floor day after day after day as amendments were offered here on the floor.

Each amendment that came up the statement would be made if this amendment is adopted it will kill the treaty, and the ridiculous statement was made that an eight-word amendment by the distinguished Senator from Kansas (Mr. DOLE) would kill the treaty, and that the addition of six words, four words, or two words would kill the treaty.

Well, now, why is that not an interpretation of what Panama law requires? In this instance he says, "Leave to Panama the decision of what Panama law required."

Yet time after time they quoted here on the floor the statement that any amendment, any amendment at all, would kill the treaty.

Why would that be true? I have maintained all along, and have stated here on the floor, that if we passed 100 amendments it would not necessarily kill the treaty because Torrijos, being a 1-man government, could accept those amendments. It has been pointed out time and time again here on the floor that collateral attack cannot be made on the action by Panama.

To say, on the one hand, to interpret Panamanian law, as the leadership has been doing time after time——

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. ALLEN. May I have an additional 2 minutes?

Mr. BARTLETT. I yield 1 minute.

Mr. ALLEN. I thank the Senator.

To say time after time than an amendment will kill the treaty, thereby interpreting Panamanian law, and then saying to the distinguished Senator from Oklahoma, "Let us leave to the Panamanians what will be required to comply with Panamanian law," it seems we have a double standard of requirement.

Mr. BARTLETT. Mr. President, I thank the distinguished Senator from Alabama.

The Senator from Idaho is saying it is none of our business what the Panamanians think the unilateral action of the Senate is. Certainly the Panamanians are bound by what the Senate has added as substantive changes in the treaty. We are only going to know whether or not they have agreed with our pronouncements, with our changes, with our amendments, with our reservations if they are submitted according to their legal processes in their Constitution. So it is of concern to us.

We are not telling the Panamanians what to do, but we are telling the President of the United States that we want to know that we have a valid treaty, that this is a treaty on which there is agreement on both sides, and it is not just a one-way treaty which has no meaning and which falls because the Panamanians do not agree to it.

We want to know that we have a treaty or we do not have a treaty, and we want to know what it means. The only way we are going to find this out is if the President insists that their constitutional processes be followed, and if they are not followed then there is not an exchange of the instruments of ratification.

Mr. President, do I have some time remaining?

The PRESIDING OFFICER. The Senator has 15 seconds left.

Mr. BARTLETT. Well, I will——

Mr. CHURCH addressed the Chair.

Mr. BARTLETT. I will yield back my 15 seconds, and I yield to the Senator from Idaho.

Mr. CHURCH. Mr. President, it is the constitutional responsibility of a President of the United States to determine that the instruments of ratification are in good order. Any conditions the Senate attaches to its consent to this treaty must be accepted by the Government of Panama if the treaty is to take effect.

Let us leave it to normal constitutional procedure. The President will do his duty, the Panamanian Government will comply with its law, and this matter can be handled as all other treaties are handled, without the insult of requiring formal certification by our President that the Panamanian Government has complied with its law.

Mr. President, I am now prepared to make the motion to table, and I am prepared to relinquish back the remainder of my time.

Mr. BARTLETT. Mr. President, if the Senator will let me have the 15 seconds I yielded back, I would just say then——

Mr. CHURCH. Certainly.

Mr. BARTLETT. Certainly the No. 1 requirement of the President of the United States here is to guarantee that our understanding of this treaty is also the understanding that the Panamanians have. That is the purpose of this reservation. It would insist that the processes be followed so that we would know we have a binding treaty to which both sides agree. Otherwise we will not know.

Mr. CHURCH. Mr. President, I yield back the remainder of my time. I move to table the reservation and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the motion to lay on the table the reservation of the Senator from Oklahoma (Mr. BARTLETT). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

The result was announced—yeas 60, nays 37, as follows:

[Rollcall Vote No. 61 Ex.]

YEAS—60

Abourezk	Hatfield, Mark O.	Moynihan
Anderson	Hatfield, Paul G.	Muskie
Bayh	Hathaway	Nelson
Bentsen	Hayakawa	Packwood
Biden	Heinz	Pearson
Bumpers	Hodges	Pell
Byrd, Robert C.	Hollings	Percy
Cannon	Huddleston	Proxmire
Case	Humphrey	Ribicoff
Chafee	Inouye	Riegle
Chiles	Jackson	Sarbanes
Church	Javits	Sasser
Clark	Kennedy	Sparkman
Cranston	Leahy	Stafford
Culver	Long	Stevenson
Danforth	Magnuson	Stone
Durkin	McGovern	Talmadge
Eagleton	McIntyre	Weicker
Gravel	Metzenbaum	Williams
Hart		Zorinsky
Haskell		

NAYS—37

Allen	Ford	Nunn
Baker	Garn	Randolph
Bartlett	Goldwater	Roth
Bellmon	Griffin	Schmitt
Brooke	Hansen	Schweiker
Burdick	Hatch	Scott
Byrd, Harry F., Jr.	Helms	Stennis
Curtis	Johnston	Stevens
DeConcini	Laxalt	Thurmond
Dole	Lugar	Tower
Domenici	McClure	Wallop
Eastland	Melcher	Young
	Morgan	

NOT VOTING—3

Glenn	Mathias	Matsunaga

So the motion to lay on the table was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at some point between 1 p.m. and 1:30 p.m. today, the distinguished junior Senator from Montana (Mr. PAUL G. HATFIELD) be recognized for not to exceed 15 minutes, and that he be followed by the distinguished majority whip for not to exceed 5 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. GRIFFIN. Mr. President, reserving the right to object, will there be any opportunity to respond to whatever statement the Senator from Montana makes?

Mr. ROBERT C. BYRD. If he should yield.

Mr. GRIFFIN. How long will he be recognized?

Mr. ROBERT C. BYRD. Not to exceed 15 minutes.

I do not think we have been getting time for responses to statements of Senators who wish to state their position on the treaties. He does not intend to offer any reservation.

Mr. LAXALT. Is that acceptable to the Senator from Michigan?

Mr. GRIFFIN. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senator from Arizona (Mr. DECONCINI) is recognized.

Mr. DECONCINI. Mr. President, before moving to call up my amendment No. 83 as modified, I wish to make my position on the Neutrality Treaty as clear as possible.

For the last 3 months, I have argued that the treaties, as drafted, did not appear to contain sufficient safeguards for the United States.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER (Mr. ABOUREZK). Yes. The Senator's point is well taken. The Senator from Arizona will suspend until we get order in the Senate.

I ask all Senators who are conversing and all staff members who are conversing to please stop, including the Senator from Arkansas.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. DECONCINI. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limitation on this amendment to the resolution of 15 minutes.

Mr. DECONCINI. That is quite satisfactory.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I thank the Chair.

Mr. DOMENICI. Will the Senator yield for a unanimous-consent request?

Mr. DECONCINI. I yield.

Mr. DOMENICI. Mr. President, I ask unanimous consent that Kay Davies of my staff may have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I thank the Chair for his indulgence in calling the Senate to order.

For the last three 3 months, I have argued that the treaties as drafted did not appear to contain sufficient safeguards for the United States. But I have also stated publicly that I believed a new treaty with Panama was essential; that history had bypassed the era of simple colonialism when large powers bullied the small. Until recently, I believed that it would be possible for the Senate to make some constructive amendments to the treaty that would satisfy the needs of Panama—but not at the sole expense of the American people. However, as every member of this Chamber knows, the administration was unwilling to accept the slightest changes in the text of the agreement.

Because of this recalcitrance, I suspect that a number of potential supporters of the treaty were lost. Together with Senator Ford, I offered a number of amendments to the treaty. When it became clear that no amendments except the so-called leadership amendments would be accepted, I began to search for alternatives that would accomplish the desired objectives.

After extensive consultations with experts from the executive, Congress, and the academic community, I became convinced that it would be possible to achieve a clearer understanding of American rights and responsibilities under the treaty through the device of an amendment to the resolution of ratification in the nature of a condition precedent to American acceptance of the treaty itself. Such a condition will be binding on the Republic of Panama.

Therefore, I have recast my amendments in this form. I have assured the President that if my amendment No. 83 to the resolution of ratification is accepted by the Senate that I will vote in favor of the Neutrality Treaty. In turn, the President assured me yesterday in a meeting we had at the White House that he would accept and support my amendment. To the best of my knowledge, that is how things stand as of this moment.

I would like to stress that I am offering this amendment in the name of the people of Arizona. Like Senator FORD, I too have crossed my State and spoken personally to hundreds, perhaps thousands of concerned citizens. As a whole, my constituents do not approve of the Panama Canal treaties. However, they are willing to accept their necessity if American rights to insure open and free access to the canal are clearly spelled out. That is all my amendment intends—but that much at least is essential.

AMENDMENT NO. 83, AS FURTHER MODIFIED

Mr. DECONCINI. Mr. President, I would like to call up my amendment No. 83, as modified. I would ask, Mr. President, to further modify such amendment. A few of these changes are purely technical and drafting changes.

The PRESIDING OFFICER. The Senator will suspend until the clerk states the amendment.

Mr. DECONCINI. Mr. President, I have the clarified drafted change amendment that I would ask the clerk to state.

The PRESIDING OFFICER. The clerk will state the amendment.

The second legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI) and Mr. FORD propose amendment numbered 83, as further modified, as follows:

Before the period at the end of the resolution of ratification, insert the following: "subject to the condition, to be included in the instrument of ratification of the Treaty to be exchanged with the Republic of Panama, that, notwithstanding the provisions of Article V or any other provision of the Treaty, if the Canal is closed, or its operations are interfered with, the United States of America and the Republic of Panama shall each independently have the right to take such steps as it deems necessary, in accordance with its constitutional processes, including the use of military force in Panama, to reopen the Canal or restore the operations of the Canal, as the case may be".

Mr. DECONCINI. Mr. President, the changes are technical and draft changes. The one substantive change is to include the phrase "according to its constitutional processes," after the words "to take such steps as it deems necessary" and before the words "including the use of military forces."

I send to the desk a clean copy and I thank the Chair and the clerk for reporting same.

I also would like to ask that Senator CANNON, Senator CHILES, Senator NUNN, Senator LONG, Senator TALMADGE, Senator PAUL HATFIELD, and Senator HAYAKAWA be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. The purpose of this amendment is quite simple, Mr. President. It is designed to establish a precondition to American acceptance of the Neutrality Treaty. That precondition states that regardless of the reason and regardless of what any other provision of the Neutrality Treaty might say or what interpretation it might be subject to, if the Panama Canal is closed, the United States has the right to enter Panama, using whatever means are necessary, to reopen the canal. There are no conditions, no exceptions, and no limitations on this right. By the terms of the amendment, the United States interprets when such a need exists, and exercises its own judgment as to the means necessary to insure that the canal remains open and accessible.

A good deal of the discussion involving the Panama Canal treaties has centered upon threats to the canal which might come from third parties—more specifically—the Communist countries. While this concern is certainly justified, I have been equally bothered by the possibility that internal Panamanian activities might also be a threat to the waterway, should we give it up. Labor unrest and strikes; the actions of an unfriendly government; political riots or upheavals—each of these alone or in combination might cause a closure of the canal. In February 1975, for example, there was a "sickout" which disrupted the efficient operation of the canal. Yet as I read the treaties, there does not appear to be any specific guarantee that

a disruption of the canal arising out of internal Panamanian activities can be swiftly and adequately dealt with.

Although General Torrijos has brought a welcome degree of stability to Panama in recent years, it can be argued that the history of Panama is one of substantial political instability and turmoil. Under normal circumstances, the United States would not or should not contemplate intervening in the internal affairs of another nation. However, there are extremely unique and special circumstances surrounding the relationship between the United States and Panama. Since the beginning of this century, the United States has exercised de facto sovereignty over the Panama Canal Zone, and has been responsible for the defense and operation of the canal. We have maintained this control over the canal for one very simple reason: The Panama Canal is vital to the security, economic and military, of the United States. This fact must be recognized in any treaty which contemplates a fundamental change in the American-Panamanian relationship.

The amendment contains a very specific reference to the use of military force in Panama. I believe these words are absolutely crucial because they establish the American right—which I am not convinced is adequately provided for either in the body of the treaty or the leadership amendment—to take military action if the case so warrants. It further makes it clear that the United States can take military action on Panamanian soil without the consent of the Panamanian Government.

The question of consent is also crucial. Since the main thrust of this amendment is directed toward situations in which the canal is closed because of internal difficulties in Panama—difficulties like a general strike, a political uprising, or other similar events, the consent of the Panamanians to take action would not make sense. If America is to have any rights at all under this treaty, it must have the right to act independently to protect the canal and to keep it open.

I believe that the question of an attack on the canal by a third party aggressor is adequately dealt with in the treaty. There seems to be little question that under such circumstances the United States does have the right to act with the Panamanians to protect and defend the canal. Thus, my concerns have centered around two problems. The first is the one expressed in the amendment now on the floor. The other is the question of a continued military presence.

We have just adopted an amendment by Senator NUNN that I had the privilege of cosponsoring. It provides that the United States and Panama may conclude an agreement providing for a continued American military presence in Panama after the year 2000. This change is important because it may be vital to both countries to provide for such presence while at the same time not disrupting the regime of neutrality that is established.

It was my desire, and the desire of Senator NUNN, to allow for a continued presence without a new treaty that would, by its very nature, call into question the regime of neutrality. It is much more appealing to have that right embodied in the very document that creates the regime of neutrality.

Therefore, I compliment the Senator from Georgia in his efforts to gain acceptance of the military presence reservation.

I hope the Senate will support the amendment I offer to the resolution of ratification providing for America's right to keep the canal open. I am also happy to announce that the President of the United States has endorsed this change, and has indicated that he believes it to be a constructive step in fulfilling the goals of the Neutrality Treaty.

I believe I speak for all Senators in stating that it is not our expectation that this change gives to the United States the right to interfere in the sovereign affairs of Panama. The United States will continue to respect the territorial integrity of that Nation. My amendment to the resolution of ratification is precautionary only; and it is based on the long history of American stewardship of the canal. It recognizes the very special relationship that the Panama Canal has to American security.

I certainly hope, Mr. President, that if this right is attached to the treaty it will never need to be exercised. Yet, it is important that the American people know that should the need arise, the United States has sufficient legal sanction to act.

Mr. President, I commend this change to my colleagues and urge their support.

Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER (Mr. CANNON). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ALLEN. Will the Senator yield?

Mr. DECONCINI. In just a moment.

Mr. President, I ask unanimous consent to add Senator BROOKE as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. I am glad to yield to the Senator from Alabama.

Mr. ALLEN. I would like to ask the distinguished Senator if his amendment to the resolution of ratification does not, in fact, effect a major change in the provisions of the treaty itself?

Mr. DECONCINI. It is my interpretation and judgment it does not affect a major change in the treaty, but it is a condition precedent to the treaty taking effect, which means it has to be accepted or not contradicted by the Panamanians before the treaty is effective.

That is my understanding.

Mr. ALLEN. Prior to the agreement on the amendment to the resolution of ratification, the United States would have certain rights to intervene in Panama and, under the Senator's amendment, they would have additional rights, would they not, affecting major change in the treaty itself?

Mr. DECONCINI. The Senator from Alabama makes a very persuasive argument, as he always does, very eloquent, indeed.

My amendment is to clarify the leadership amendment.

Mr. ALLEN. Well, it needed quite a bit. I appreciate the Senator's effort.

Mr. DECONCINI. I felt that amendment did not go far enough as to our right to exercise independently the decision when we can take action, and from whatever binding effect the leadership amendment has, and I think it is binding, as this is, this stands as a clarification or expansion of that.

Mr. ALLEN. But we do not have these rights under the treaty as it now stands and yet would have these rights of intervention if the Senator's amendment is agreed to.

Why would that not change the treaty and why would that not, in fact, make of the Senator's amendment, the resolution of artification, in fact, a major amendment to the treaty itself?

Mr. DECONCINI. I do not know if the Senator from Alabama is asking what the relationship or response from the Government of Panama is to their necessity to have a plebiscite.

I cannot answer, and that is not my No. 1 concern.

They have to respond——

The PRESIDING OFFICER. The Senator's time has expired. The question is on agreeing to the amendment. The yeas and nays have been ordered and the clerk will call the roll.

Mr. METZENBAUM addressed the Chair.

Mr. CHURCH. Mr. President, the time allocated to me has not yet expired.

The PRESIDING OFFICER. There was no allocation of time to any Senator. It was simply a Senate agreement for 15 minutes, and 15 minutes have expired.

Mr. HELMS. I think the Senator ought to be heard. I ask unanimous consent we allow the Senator 5 minutes.

Mr. CHURCH. I am prepared to go——

The PRESIDING OFFICER. Is there objection?

Mr. DECONCINI. Mr. President, I ask unanimous consent there be an additional 5 minutes permitted for Senator HATFIELD to enter his remarks

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. METZENBAUM. I had indicated earlier I may want to be heard on the DeConcini amendment.

Is it my understanding now that there has been a time limit with respect to this amendment and that that time has practically all expired?

The PRESIDING OFFICER. It has not only practically, it has all expired; and there are two pending unanimous-consent requests on the floor, one is the unanimous-consent request that Senator CHURCH be given an additional 5 minutes time, and the request that Senator HATFIELD be granted an additional 5 minutes.

Is there objection?

Mr. CHURCH. Mr. President, I rose to take the floor on the assumption that 5 minutes were allocated to me. Since my assumption is in error, I do not press the Chair for 5 minutes. I am happy to relinquish any further time.

The PRESIDING OFFICER. Is there objection to the request for 5 minutes to Senator HATFIELD?

Mr. ALLEN. Reserving the right to object, Mr. President, I ask that my name be included in the allocation of an additional 5 minutes, as well.

Mr. HANSEN. Mr. President, I ask unanimous consent that my name may be included.

The PRESIDING OFFICER. For an additional 5 minutes?

Mr. HANSEN. Yes.

Mr. BUMPERS. Reserving the right to object, are we talking about 5 minutes for each person?

Mr. ALLEN. Yes.

Mr. BUMPERS. Or that all share 5 minutes?

The PRESIDING OFFICER. That is the request, 5 minutes for each of three persons.

Mr. METZENBAUM. I also ask for an additional 5 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. SARBANES. Reserving the right to object——

The PRESIDING OFFICER. Objection is heard.

All time has expired and the clerk will call the roll.

Mr. ALLEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. I am going to ask for the very first quorum call that I have requested during this debate, but I believe we will consume as much time on the quorum call as we would in giving these Senators an opportunity to be heard.

Mr. President, I suggest the absence of a quorum.

Mr. BUMPERS. If the Senator will withhold his objection for just a moment, I do not know who objected, perhaps it will be withdrawn, because it is this Senator's hope that we will not get into that.

The PRESIDING OFFICER. A quorum has been called for, that is not debatable.

Mr. BUMPERS. Did the Senator withhold his request on my request?

Mr. ALLEN. I will withhold it—I have not withheld the request, Mr. President. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I seek recognition.

I ask unanimous consent that the order for the quorum call be rescinded.

Mr. ALLEN. I object.

The PRESIDING OFFICER. Objection is heard.

The second assistant legislative clerk continued to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Now, I renew the unanimous-consent request involving all of the Senators that spoke for the requested time, the Senator from Alabama, the Senator from Wyoming, that they each be given 5 minutes.

Mr. SARBANES. Mr. President, could I make a parliamentary inquiry?

The PRESIDING OFFICER. Is there objection to the rescinding of the quorum call?

Mr. ABOUREZK. Objection.

Mr. SARBANES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. ABOUREZK. I object.

The PRESIDING OFFICER. Objection is heard.

The second assistant legislative clerk continued to call the roll.

Mr. SARBANES. Mr. President, I renew the request, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. SARBANES. Mr. President, it is not my understanding——

The PRESIDING OFFICER. Debate is not in order. All time has expired on the amendment.

Mr. DOLE. Regular order.

Mr. ALLEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. I move to table the pending amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Arizona, as modified. The yeas and nays have been ordered and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

The result was announced—yeas 13, nays 86, as follows:

[Rollcall Vote No. 62 Ex.]

YEAS—13

Abourezk	Kennedy	Riegle
Durkin	McClure	Scott
Garn	McGovern	Stevens
Gravel	Metzenbaum	
Hatch	Moynihan	

NAYS—86

Allen	Case	Glenn
Anderson	Chafee	Goldwater
Baker	Chiles	Griffin
Bartlett	Church	Hansen
Bayh	Clark	Hart
Bellmon	Cranston	Haskell
Bentsen	Culver	Hatfield,
Biden	Curtis	Mark O.
Brooke	Danforth	Hatfield,
Bumpers	DeConcini	Paul G.

Lugar	Ribicoff	Weicker
Magnuson	Roth	Williams
Matsunaga	Sarbanes	Young
McIntyre	Sasser	Zorinsky
Melcher	Schmitt	

NOT VOTING—1

Mathias

So the motion to table Mr. DECONCINI's amendment was rejected.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER (Mr. HODGES). The Senator from West Virginia (Mr. ROBERT C. BYRD).

Mr. ROBERT C. BYRD. Mr. President, under the order previously entered, Mr. PAUL G. HATFIELD is to be recognized between the hour of 1 p.m. and 1:30 p.m. today.

A problem has arisen with respect to the reservation offered by Mr. DECONCINI. I think that problem can be resolved if the following request would be favorably acted upon.

I ask unanimous consent that on the reservation Mr. ALLEN may have 15 minutes under his control and Mr. CHURCH may have 5 minutes under his control, after which the Senate vote, and upon the disposition of that amendment Mr. PAUL G. HATFIELD then be recognized, and that should put us up to about 1:30 p.m. if that is agreeable.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Objection.

The PRESIDING OFFICER. Objection is heard.

Mr. METZENBAUM. Mr. President, I indicated previously that I wish to be heard. I ask unanimous consent that I may have 5 minutes to be heard on the subject.

The PRESIDING OFFICER. Is there objection?

Mr. JAVITS. Mr. President, reserving the right to object, that is what I would wish, that is, to have 5 minutes. Could I have it tacked on?

The PRESIDING OFFICER. Is there objection?

Mr. BROOKE. Mr. President, reserving the right to object, how much time is that?

Mr. JAVITS. Ten minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank those Senators for objecting because they were very generous in their requests.

I ask unanimous consent that Mr. PAUL G. HATFIELD, if he wishes to be recognized prior to the expiration of this time and that vote, have his order because he is entitled to first consideration here. He was to be recognized between the hour of 1 p.m. and 1:30 p.m., and I would hope that if he wishes to be recognized right now we would let him proceed and then let the time begin running on the amendment.

Mr. ALLEN. Mr. President, that is perfectly all right.

Mr. ROBERT C. BYRD. Is this agreeable?

Mr. METZENBAUM. I have no objection.

Mr. ROBERT C. BYRD. Very well. I thank my colleagues.

The PRESIDING OFFICER. Without objection, the Senator from Montana (Mr. PAUL G. HATFIELD) is recognized.

Mr. PAUL G. HATFIELD. Mr. President, I thank the Chair.

Mr. President, I am announcing my decision today regarding ratification of the Panama Canal Neutrality Treaty. This is the first of two treaties to be considered by the Senate.

My support of this treaty is absolutely contingent upon approval of the reservation which I am cosponsoring to provide the United States the right to act independently, including the use of military force, if the operations of the canal are interfered with.

This was an extremely difficult decision, but I believe it will be confirmed by the critical judgment of time. The overriding responsibility of the Senate during the consideration of this treaty was to protect the vital security interests of the United States by assuring the neutrality, accessibility, and defense of the Panama Canal for the future. I believe this treaty with the changes already adopted by the Senate and acceptance of the reservations I have just indicated will honor this responsibility.

From the beginning of this debate, I have agreed with the need for a new treaty, spelling out a new relationship between the United States and Panama. However, I did have serious reservations about this treaty as presented to the Senate, because of its lack of assurances that the vital security interests of the United States in the canal would be adequately protected. In my view, it is essential that the United States have:

First, the right to defend the canal—against any threat of aggression, or any threat to its neutrality, or to the peaceful transit of vessels;

Second, the right to act independently, including the use of military force, if the operations of the canal are interfered with;

Third, the right of priority passage for U.S. vessels of war and auxiliary vessels and head-of-the-line privileges in case of need; and

Fourth, the right of the United States to make arrangements to reach agreement with Panama for stationing military forces or the maintenance of defense sites in Panama after 1999.

Accordingly, I cosponsored changes to the treaty which:

First, guarantee the United States the right to defend the canal against any threat of aggression to its neutrality, or threat to peaceful transit of vessels;

Second, provide U.S. vessels of war and auxiliary vessels the right of priority passage, head-of-the-line privileges in case of need, and the right of intervention to assure continued operation of the canal;

Third, provide the United States the right to act independently, including the use of military forces, in the event the canal's operations are interfered with; and

Fourth, clarify the treaty to enable the United States and Panama to make arrangements for stationing U.S. military forces or maintenance of defense sites in Panama after 1999.

Inclusion of these changes in the treaty, in my judgment, will significantly strengthen the position of the United States, and together with other parts of the treaty assure the protection of the U.S. vital security interests in Panama.

Yesterday I met with the Secretary of Defense and the Acting Chairman of the Joint Chiefs of Staff to really nail down the military consequences of the treaty. I was advised that the Joint Chiefs of Staff have been involved in the treaty negotiations over a long period of time. Originally, the U.S. negotiation efforts were directed toward a single treaty with Panama. However, the Secretary of Defense advised me that at the initiative of the Joint Chiefs of Staff, the U.S. negotiation efforts were changed to secure two treaties, and this Neutrality Treaty before us was prepared based upon the JCS recommendations as the best means of assuring the United States vital security interests after 1999 when the Panama Canal Treaty expires.

I was assured by Secretary Brown and General Jones that in the "professional opinion of the Joint Chiefs of Staff, these treaties are in the best national security interests of the United States."

The proposed treaties are the logical culmination of diplomatic negotiations spanning 14 years and conducted under four Presidents—Johnson, Nixon, Ford, and Carter—in recognition of the need for a new relationship between the United States and Panama. The treaties will provide for the operation and defense of the canal and provide a basis for a better understanding between the people of the United States and Panama. These are the reasons I support ratification of the neutrality agreement with the changes I have listed.

Passage of the Neutrality Treaty alone will not determine the relationship between the United States and Panama.

Any new relationship between the United States and Panama is also contingent on the action which the Senate takes regarding the Panama Canal Treaty itself. That treaty covers the transition period from now through 1999, and is yet to be considered by the Senate. However, it has been clear from the start that these two treaties will stand or fall together.

My favorable vote on this Neutrality Treaty does not in any way commit me regarding the remaining treaty.

How I will vote on the treaty covering the transition period is yet an open question.

I have several concerns about the remaining treaty. A number of amendments have been introduced to change it. I will continue to participate in the debate, carefully study the issues and proposed changes, and make my decision on the remaining treaty only after I have the necessary information to do so.

I thank the Chair.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. PAUL G. HATFIELD. Yes.

Mr. CRANSTON. I want to compliment the very distinguished Senator from Montana on a very courageous, incredibly courageous, and very wise decision. The Senator has shown himself to be a great Member of this body.

Mr. President, I believe I am recognized for 5 minutes?

The PRESIDING OFFICER (Mr. ANDERSON). Five minutes.

Mr. CRANSTON. Mr. President, we Americans are a patriotic people. We love our country, and with good cause. We not only are emotionally dedicated to our land, we are dedicated—intellectually and spiritually—to our heritage of democracy and freedom.

Ours was a hard-won freedom, fought for and achieved through bloody revolution against a vastly superior military power that imposed its colonial will upon us from thousands of miles away.

We know what it is like to be the object of colonialism. We know the resentments, and sometimes the unreasonable hostilities, it can arouse. And we know—as witness our riotous Boston Tea Party and the children's rock throwing that led to the Boston massacre—how easily a seemingly minor patriotic incident can erupt into violence and bloodshed. With far-reaching, wholly unforeseen consequences.

The people of Panama also have their pride of patriotism. We understand and respect it. They see themselves, as we once did, as unwilling objects of colonialism. And they wish, as we once did, to unify their country and to rid it of foreign economic domination.

Back in our raw, rash revolutionary days, our young people were in the forefront in patriotic fervor. The youth of today are no different. The youth of Panama in particular.

We must face up to the consequences rejection of these treaties might have on a people, especially the young people, who yearn for freedom and true national identity.

And we must recognize how easily blood can flow from a simple, patriotic spark.

Recall what happened in Panama 14 years ago. Many are not familiar with those events. Here is how a retired Navy commander described it in a letter to the editor, published recently in the Miami Herald:

> In 1964, the flags of both countries were ordered to be flown side by side at appropriate Canal Zone civilian buildings; and, because there was a single flagpole at the Balboa High School, it was decided not to fly any flag until a second flagpole could be erected. However, several U.S. students decided they would hoist the flag regardless of the consequences.
>
> Inasmuch as the flagpole had two halyards, the Panamanian students asked the Canal Zone governor to hoist their flag on the same pole. Permission was granted, the school authorities were advised, and the Balboa Police Force (U.S.) stood by outside the school to prevent trouble.
>
> Three Panamanian students approached bravely but apprehensively to the flagpole, reverently carrying a special flag (a patriotic relic from previous student demonstrations),

watched by a crowd of U.S. students. The three Panamanians were almost at the flagpole when the U.S. students, egged on by the adults behind them, rushed across the lawn yelling with glee as the Panamanians fled.

Thus, a handful of willful U.S. high school boys managed to provide the spark which provoked a riot.

When the incident was over, 4 Americans and more than 20 Panamanians lay dead. More than 200 others suffered serious injury.

That is the bloody background of the negotiations that led to the treaties we are considering today.

Mr. President, if the Senate fails to ratify these treaties—the result of 13 years of negotiations under four U.S. Presidents—we would face a situation where Panamanian resentment and anti-Americanism would grow increasingly susceptible to exploitation by our adversaries both inside and outside of Panama. A spontaneous student demonstration could lead on to the spilling of far, far more blood—American blood and Panamanian blood—than did the violent student outbreak of 14 years ago, that began so innocently. If the Panama Canal treaties are rejected and the Canal Zone is surrounded by an increasingly frustrated and hostile population, our ability to defend and protect the canal and to keep it open and operating becomes much more difficult. Our top military experts agree.

I ask:

Would it help or hurt U.S. national interests for the full brunt of frustrated Panamanian nationalism to be directed against us instead of acting in cooperative concert with us? I say it would hurt our interests.

Would it help or hurt U.S. national interests to create in Panama an adverse political climate our adversaries could exploit to their own advantage? I say it would hurt our interests.

Would it help or hurt U.S. national interests to risk the loss of more American lives, more Panamanian lives, more U.S. defense dollars to maintain the status quo against the wishes of the people of Panama and the expressed sentiment of other nations throughout Latin America and the world—especially other nations even more dependent on the canal than we?

I say it would hurt our interests.

I believe approval of these treaties is clearly in our best and highest national interest and urge my fellow Senators to support them.

Mr. President, as one looks back on the extensive debate leading to our decisive vote this week, it is apparent that the debate has centered around two principal issues:

First. The security of the Panama Canal, especially in time of crisis.

Second. The economic significance of the Panama Canal, especially the fair, efficient, and economical running of the canal.

The distinguished chairman of the Budget Committee, Senator MUSKIE, has presented a detailed account of the overall economic effect and benefit of the Panama Canal treaties to the United States. And, as I have noted in prior floor statements, the economic benefits of over $40 million per year from the outset of the treaties exceed the estimated economic "cost" of the treaties of $27.7 million per year to the United States.

The distinguished majority leader, Senator ROBERT BYRD of West Virginia, has discussed the economic perspective of the canal it world seaborne trade.

The Senator noted that approximately 3.5 to 4 percent of all international seaborne shipping went through the Panama Canal. The effect on the United States, the Senator correctly noted, is more substantial with some 7 percent of U.S. seaborne trade going through the canal, and as much as 20 percent of all farm exports going through the canal.

Thus, although the canal no longer is the vital economic lifeline link to seaborne international trade of the United States that it once was in the past, it does remain important to the United States both militarily and economically. I join in the concern of all members of the Senate that we should consider carefully the consequences of ratifying the Panama Canal treaties and turning the control of the Panama Canal back to Panama.

Much of the debate by those opposed to the Panama Canal treaties has been centered on the two concerns for the securitiy of the canal and the ability of the Panamanians to run the canal fairly, efficiently, and effectively.

Perhaps some insight can be gained if we were to focus our attention on the views of other countries in the Western Hemisphere to the Panama Canal Treaty. For example, there are countries who have more than 50 percent of their international seaborne trade going through the Panama Canal. These countries include Nicaragua with a high of 76.8 percent, El Salvador, 66.4 percent, and Ecuador with 51.4 percent. Similarly, there are countries which have from 25 percent to 50 percent of their international seaborne shipping transversing the Panama Canal. These include Chile, 34.3 percent, Colombia, 34.3 percent, Costa Rica, 27.2 percent. Guatemala, 30.9 percent, Panama itself, 29.4 percent, and Peru, 41.3 percent.

Several other countries have as much or more of their international seaborne shipping going through the Panama Canal than the United States. These countries include Canada, 6.8 percent, Honduras, 9.4 percent, Mexico, 16.6 percent, and Venezuela, 7.4 percent. All of these figures are for the fiscal year 1973, but have not changed significantly and may be deemed a reflection of the current amount of international seaborne trade going through the Panama Canal by our neighbors in the Western Hemisphere.

It is apparent from these figures that most of our neighboring countries have a greater economic interest in the security and operation of the Panama Canal than does the United States. Indeed, several of these countries, such as El Salvador, Nicaragua, and Ecuador, have over half their international seaborne commerce dependent upon the canal.

Certainly those countries such as Chile, Colombia, Costa Rica, Guatemala, Panama itself, and Peru with from 25 percent to 50 percent of their international seaborne shipping traveling through the canal have a vital interest in the continuous operation and defense of the canal and that the canal be operated at fair, just, and equitable rates.

Given these economic facts, one would expect that if the economic, management, and defense concerns of the opponents to the Panama Canal treaties are, in fact, well founded, these countries would be the leaders in opposing the ratification of the treaties. In fact, of course, virtually every country in the Western Hemisphere, has signed a declaration favoring the Panama Canal treaties. The following 26 countries in September 1977, signed a declaration favoring the Panama Canal treaties: Argentina, Bahamas, Barbados, Bolivia, Brazil, Canada, Colombia, Costa Rica, Chile, Dominican Republic, Ecuador, El Salvador, Granada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Peru, Paraguay, Surinam, Trinidad and Tobago, Uruguay, and Venezuela.

I direct these questions to the opponents of the treaties and particularly to those Senators who have doubts concerning the management and defense of the canal:

If the treaty did not provide for the continued and effective operation of the Panama Canal on a fair, just, and equitable basis, and if the treaties did not provide for adequate defense of the canal under a U.S. military umbrella, would not each and all of these other countries in the Western Hemisphere be opposed to the treaties?

And would not those who are so very dependent upon the canal as a lifeline to their international seaborne shipping particularly be opposed to the treaties?

Would these countries not consider it much safer for their economies that the operation of the canal continue in the hands of the United States?

Would these countries not be besieging the President of the United States and this Senate to repudiate these treaties because of fear of what would happen when the canal was turned over to Panama for operation and ownership by Panamanians?

The answers are obvious. These governments have the same legitimate concern and self-interest in the well-being of their economies as does the United States. These governments have the same legitimate concerns and self-interest in the management of the canal as does the United States. And these governments have the same legitimate concerns and self-interest in the defense of the canal as does the United States. These governments, without exception, approve the ratification of the treaties, have confidence in Panama running the canal, and have confidence that the canal will remain an open, international waterway under the protection of the United States.

When we look at other countries using the canal, we also find a unanimity. Several countries outside the Western Hemisphere have as much or more of their international shipping going through the Panama Canal than the United States.

These include New Zealand, 15.7 percent; South Korea, 11.9 percent; Japan, 10.7 percent; Taiwan, 9.8 percent; and the Philippines, 8.8 percent. And the commodities going through the canal to these countries are essential to keeping their entire economics strong and healthy.

These countries have a vital concern in the security of the canal and in the fair and efficient operation of the canal. Again, without exception, these countries all favor the Panama Canal treaties.

Gentlemen, if there were a valid argument to be made concerning either the economic effect on international shipping through the Panama Canal or the security of the Panama Canal, would not these arguments be advanced by many of these countries who have a much greater stake even than the United States in the Panama Canal treaties?

I believe the views of our neighbors in the Western Hemisphere and our trading partners in the Pacific should be considered by this Senate. I will vote with great confidence for ratification of the treaties knowing of the support of our 26 neighboring countries in the Western Hemisphere and all of the other major users of the Panama Canal.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. I yield 4 minutes to the distinguished Senator from Wyoming (Mr. HANSEN), followed by 3 minutes which I yield to the distinguished Senator from Montana (Mr. MELCHER).

Mr. LAXALT. Will the Senator yield for a unanimous-consent request?

Mr. HANSEN. I yield.

Mr. LAXALT. Mr. President, I ask unanimous consent that Casimir Yost, of Senator MATHIAS' staff, be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, the striking thing about this resolution is that it would seek to accomplish, by way of an amendment to the resolution of ratification, what earlier had been denied those of us who wanted to insure that the United States would be able to take action to restore the canal to operation if those operations were interfered with, or to reopen the canal if it were closed.

I cannot see how we can have it both ways, and yet it appears to me that is precisely what the administration is attempting to do. When earlier this same concept was offered as an amendment to the treaty, it was roundly condemned by the administration as bringing on so much trouble for Panama that it would not be acceptable and would throw the whole treaty operation into total disarray.

Now we are told that by taking this particular tack we can give the assurance to Americans that, I submit, and most Americans submit, is absolutely vital to the continued operation and the neutrality of the canal, and yet, for some reason which escapes me, and a reason which I suspect will escape most Panamanians, this does not really constitute any significant amendment to the treaty itself.

I think those are essentially the words of the sponsor of the amendment, for whom I have great respect and admiration, the Senator from Arizona, who says it does not constitute a major amendment to the treaty.

If it does not constitute a major amendment to the treaty, then I submit that all of the rhetoric we heard earlier from the administration was pure hogwash, or this particular tack which is now being taken, I suspect in order to insure 67 favorable votes for the treaty, is a charade.

I submit that the people of the United States are going to hold the Senate accountable as they ask us what are we doing.

It seems to me it has to be perfectly clear that either what was being said earlier was not true, or what is being told us now brings about certain guarantees is not true. I am not satisfied. I support the philosophy of the amendment, but I want to be sure that it accomplishes what the administration seemingly, impliedly, says it does.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, I support this condition to the instrument of ratification of this treaty. Several amendments to article V which were offered and which were defeated were to do exactly what this condition asserts should be the right of the United States. The amendments to article V were defeated because the floor managers and, indeed, the White House, warned that such amendments would require a new plebiscite in Panama and, therefore, strengthening clarifying amendments were rejected.

The constitution of Panama requires that all treaties concerning the Panama Canal will be submitted to the people of Panama in a plebiscite, and will not become effective unless agreed to by a majority of the Panamanians voting in that plebiscite.

This proposal being considered now to the article of ratification is a condition. It has the backing of the White House, the President himself, and is done in this way to avoid a plebiscite in Panama.

On that basis this condition, even though accepted by the Senate, clouds the issue. What will a government of Panama after 1999 view as their responsibility concerning this condition attached to the articles of ratification? If it had not been voted upon in a plebiscite in Panama, will a government in Panama after 1999, observing their constitutional requirement, believe that it is binding?

Mr. President and Members of the Senate, while in support of this condition, I cannot place the same value or the same results as if an amendment to article V within the body of the treaty to accomplish the same thing had been adopted by the Senate.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. ALLEN. I yield two additional minutes.

Mr. MELCHER. In fact, though we in the United States feel that the treaty in this regard, with this condition attached at this point, with our firm intention to exercise that right under this condition, is a completely honorable treaty, will it be understood, accepted, and endorsed by the people of Panama? We have been advised that it would require a plebiscite in Panama on this important issue for it to become binding in the treaty for Panama.

I support it, but I do so understanding that I may not be firmly enunciating, that the Senate and the United States may not be firmly enunciating, that the right we describe here is a pertinent and a real right that is necessary—that requires an actual amendment to article V in the body of the treaty, where it properly belongs. This condition attached to the article of ratification does not accomplish that needed part of the treaty.

I thank the Senator from Alabama for yielding.

The PRESIDING OFFICER. Who yields time?

Mr. ALLEN. I thank the distinguished Senator from Montana.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time? The Senator from Ohio.

Mr. METZENBAUM. Mr. President, this amendment gives me great concern. I know that adopting it would be the expedient thing to do in order to get the votes needed to ratify the treaty. This morning, I expressed my strong support for ratification. I believe that ratification is the right thing to do, that it is in the best interests of our country.

But the fact is that this amendment bothers me. As I read it, the amendment provides that notwithstanding any other provisions in the treaty, the United States would have the right to take such unilateral steps as it deems necessary in the event of interference with or closing of canal operations. We could, in other words, use military force in Panama, not only to reopen the canal but also to restore its operation.

That reads to me as if we were saying that if the canal is not operating properly, if there is some mechanical breakdown, for example, we can and should send in the troops in order to make it operate.

I think that is wrong. I think it violates all of the concepts that we have been talking about for days on end with respect to ratification of the treaty. I think it violates the respect we owe the people and the Government of Panama, now and after the year 2000.

I know that the amendment will be adopted. I voted to table it earlier. If there is a rollcall, I shall vote against it. But I must also say quite frankly that if passage of this amendment were the price of ratification of the treaties and if my vote were needed to secure passage, I would vote for the amendment. I would do so because I believe that ratification, even with this amendment, is of overriding national importance.

I have great respect for the author of the amendment and for those others who support it, but I feel bound to state my reservations, my concerns and my feeling that these are conditions that our great Nation should not impose.

Mr. President, I yield back the remainder of my time.

Mr. GRIFFIN. Will the Senator from Ohio yield?

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. I yield to the Senator from Michigan.

Mr. GRIFFIN. Will the Senator agree that if the Senate changes the treaty in this way by adopting this amendment or reservation, we would then, in effect, be offering back to Panama a different treaty which would have to be ratified by Panama in accordance with its constitutional requirement?

Mr. METZENBAUM. I am not certain that I am prepared to address myself to that question. I think, though, that the Senator from Michigan raises an interesting point. It may have validity and require an affirmative answer. But again, I am not prepared at this time to respond to that question.

I am advised by the Presiding Officer that we are under tight constraints of time, and if others could use the remainder of my 5 minutes, that would be appreciated.

I yield back my time.

Mr. GRIFFIN. I thank the Senator.

The PRESIDING OFFICER. Who yields time?

Mr. JAVITS. Mr. President, I should like the Chair to advise me when I have consumed 3 minutes.

To me, the most critical aspect of why we ought to act to approve the ratification of this treaty and of the Panama Canal treaty is the 22 years transition period for U.S. departure. The lessons of history are clear. France discovered them in Algeria, Belgium in the Congo, Portugal in Angola. Legalisms of the past are an untenable basis for perpetuating the status quo in the face of 20th century nationalism.

Conventional military superiority, and we certainly have it, over Panama cannot keep the canal open and usable in the face of a determined nationalistic campaign to deny us an open and usable canal. That is not just the judgment of civilians, Mr. President. That is the judgment of the Joint Chiefs of Staff and of the man who has the responsibility now in Panama, General McAuliffe. As to the canal's value to the United States and to the world as an artery of trade, we ran military supplies up the Mekong River to Phnom Penh, Mr. President, but it will do us no good to be able to run military ships through the Panama Canal if world commercial traffic will not use it because of snipers and saboteurs.

Therefore, Mr. President, this is not a matter of choice, it is a matter of necessity and a matter of wisdom. I believe we have made the best conditions that we reasonably can. We have 23 years, an extremely fortuitous period of time in these situations—to work out all the bugs and all the details and, if necessary, to reorient our own traffic and the traffic of other nations.

Despite all the thunder and lightning, the Senate debate has shown an overwhelming recognition of the need for a new treaty arrangement with Panama. Implicit, and often explicit has been the acknowledgment that the U.S. position under the 1903 treaty is essentially a colonialist position, achieved by classic colonial methods of the 19th century. Undoubtedly, the United States has been the world's most enlightened colonial power in respect of its operation of the Panama Canal and administration of the Canal Zone.

The essential difference between the opponents and the supporters of the new treaties has been one of perspective. The opponents look backward at the 75-year history of our stewardship of the canal and take justifiable pride in the history they see. On this basis they oppose change. The supporters look ahead rather than behind, and they see these treaties as the opportunity for the United States to protect and advance its national interest respecting the canal over the years ahead, in an atmosphere of consent.

All the criticisms I have heard of these treaties on the Senate floor have had as their unspoken assumption the premise that we could have made a better deal—but they all have been presented as though we only had ourselves to negotiate with—and nobody has bothered to temper his criticisms with reflection as to whether Panama would agree to the "improvements" so easily suggested. These treaties are two party deals. We just do not have the luxury in the real world of negotiating unilaterally—that is, one group of U.S. Senators negotiating with another group of U.S. Senators, as though this were domestic legislation.

On the merits, I believe that the treaties as negotiated constitute not only the best possible deal for the United States under the circumstances, but in fact they constitute a good deal for the United States in absolute terms. All we are really doing is bidding a fond and nostalgic adieu to Teddy Roosevelt.

There is much at stake in these treaties beyond the canal management. Our relations with all of Latin America are certain to be affected, for good or ill, by the action taken by the Senate.

Also, each Senator must also weigh the impact which rejection of these treaties would have upon the international credibility of the United States of America. I am not a "President's man," as those familiar with the great war powers struggle here will remember. But I am a constitutionalist. And, in foreign relations, in our advise and consent role we have to show great responsibility. So we must weigh carefully, and patriotically, in the balance the effect on our world role which could result from a repudiation of these treaties.

Mr. President, these are the considerations which make this a sound proposition, which could not be gotten in any other way than by an agreement. That is fundamentaly why the Senate ought to approve these treaties.

I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. ALLEN. Mr. President, through an unfortunate circumstance, 15 minutes was allotted for the consideration of this amendment. The author of the amendment (Mr. DECONCINI) very properly was given the floor and he spoke some 13 minutes; then he used about 2 minutes in answering questions that I propounded to him.

The thrust of the questions that I propounded was to show that this reservation to the resolution of ratification, if it means anything at all, as its sponsors say that it does, would effect a tremendous change in the intent and in the wording of the treaty. Therefore, would it not be an amendment, which, of course, would be improper to add to the resolution of ratification?

Would it not have to be an amendment to be effective? As has been pointed out here on the floor a number of times, the Constitution of Panama does not require a plebiscite except in cases where the body of the treaty has been changed. These reservations that are being added can be approved by Mr. Torrijos, Dictator Torrijos; therefore, we would not have a valid compact with the people of Panama.

The distinguished majority leader, recognizing that he had not given others who wish to speak on this amendment any time, very graciously requested a sufficient amount of time for Senators to speak with respect to the amendment. For that, I am grateful to the distinguished majority leader.

The only possible good that this reservation can accomplish, because it is not going to be submitted to a plebiscite—we are quite sure of that—is that it is being used unquestionably as a vehicle to get the 2 or 3 needed votes to reach the 67 level.

If I were opposed to the treaty—as I am—I would certainly not feel that the addition of this little reservation would remove my objections to the treaty.

The only possible good that this reservation could serve would be that, in the event it is necessary for the United States to take these steps to keep the canal open, we could, at least, be able to point to this reservation as we take the action.

The distinguished Senator from New York (Mr. MOYNIHAN), a few days ago, said we are going to take whatever action is necessary to take to protect our interests, no matter what is in the treaty. At least this reservation would serve as justification, a moral vindication for our action. On that theory, Mr. President, I am going to support the reservation, or the amendment to the reservation—not because I believe it gives any real additional power, but for the sole purpose of feeling that it would give us some support at the bar of public opinion if it is necessary for us to take these actions.

It has been stated as to these various reservations that have been added that it is easy to get a reservation adopted, but remember how the leadership bucked at any change whatsoever in the language of the treaty. But reservations come pretty easily at this time, unless they mean something. Then, of course, they do not have any support.

It has been stated on the floor as to some of these reservations, and I rather think as to this one, that it will have the same effect as an amendment, that this is a condition precedent to the note

of ratification be exchanged. Has all my time expired, Mr. President?

I do have an amendment that I wish to offer to this amendment. I hope the Chair will recognize me before ordering the rollcall to be commenced, in order that I may offer this amendment. It will not be debatable but it will state that this reservation shall have the same force and effect as if it were an amendment.

I reserve the balance of my time, Mr. President.

The PRESIDING OFFICER. All of the time of the Senator from Alabama has expired.

The Senator from Idaho.

Mr. CHURCH. Mr. President, when the distinguished Senator from Alabama moves to amend the proposed reservation by the able Senator from Arizona (Mr. DECONCINI), I ask the Chair to recognize me to make a motion to lay that amendment on the table before we proceed to vote.

Now, Mr. President, this reservation restricts the use of American military force, should that ever be necessary in the future, to two purposes: The reservation clearly reads "If the canal is closed or its operations are interfered with."

In either of those two cases, Mr. President, the regime of neutrality, the objective of keeping the canal open, neutral, accessible, and safe obviously would be thwarted.

When the leadership amendment to the treaty was adopted, the United States reserved the right to act unilaterally, in accordance with its constitutional processes, to defend the canal against any threat to the regime of neutrality and, consequently, to act against any aggression or threat directed against the canal or against the peaceful transit of vessels through the canal.

Any interference with the operation of the canal, any stoppage, any closure, would clearly prevent the peaceful transit of vessels through the canal and clearly contradict the regime of neutrality to which both the United States and Panama are committed.

Therefore, this reservation must be considered, in my view, in part as a restatement, in part as an elaboration of the amendment already adopted by the Senate to article IV of the Neutrality Treaty.

As such, it is acceptable and I hope that the Senate will adopt it.

Now, Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Alabama.

All time has been yielded back.

UP AMENDMENT NO. 12

Mr. ALLEN. Very well. I have sent my amendment to the desk and I ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

This provision shall have the same effect as an amendment to the treaty.

Mr. CHURCH. Mr. President, I move to lay the amendment offered by the Senator from Alabama on the table.

Mr. ALLEN. I call for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK) is necessarily absent.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

The result was announced—yeas 62, nays 36, as follows:

[Rollcall Vote No. 63 Ex.]

YEAS—62

Anderson	Haskell	Morgan
Baker	Hatfield,	Moynihan

NOT VOTING—2

Abourezk	Mathias

So the motion to lay on the table unprinted amendment No. 12 was agreed to.

MILITARY INTERVENTION IN PANAMA

● Mr. KENNEDY. Mr. President, we have before us an amendment to the resolution of ratification of the Panama Canal Neutrality Treaty which would permit the "use of military force in Panama" by either party, "if the canal is closed or its operations interfered with."

I am opposed to this amendment. It stirs up what is already an emotional issue in Panama, without adding to rights of the United States already recognized by the treaty.

From the outset, the people of Panama—and all of Latin America—have rightly opposed U.S. military intervention in their internal affairs. That is why the negotiators, the administration, and the Senate leadership have all carefully defined and limited the expression of our military rights to the defense of the neutrality of the Panama Canal. Even the reservation on defense arrangements, adopted by the Senate yesterday, provided that Panama and the United States could jointly—I emphasize jointly—agree to American military deployments, after the year 1999, which facilitate performance of "responsibilities to maintain the regime of neutrality" over the Panama Canal.

Now we have an amendment which starkly insists on our right to use military force in Panama—always the most sensitive issue from its standpoint as a small, proud, sovereign state.

Now we have an amendment which makes no reference to the regime of neutrality which it is our responsibility to defend.

Now we have an amendment which could—but must not—be construed, instead, to permit the United States to intervene militarily on almost any pretext. A strike, a slowdown, even inefficient operation of the canal could—but must not—be used as a pretext to use force, in order to "restore the operations of the canal."

Mr. President, Panama has waited 75 years since its independence to end American occupation of its heartland. It must wait another 22 years before it achieves full control over its national territory. Now we are asking Panama to accept an amendment which has the ring of military interventionism—not just during this century, but for all time.

I recognize that acceptance of this amendment may facilitate ratification of the Panama Canal Treaties. If the amendment is accepted, I believe that our Nation is honorbound to strictly limit its interpretation and not, as General Torrijos warned in Washington last October, to allow the treaties to "become an instrument of permanent intervention" in Panama.

Fortunately, our right of military action continues to be defined by article IV of the Neutrality Treaty, as amended by the Senate.

This is our right "to act against any aggression or threat directed against the canal or against the peaceful transit of vessels through the canal."

This is our right to assure "that the canal will remain open, secure and accessible."

This is not a right to take action "against the territorial integrity or political independence of Panama," prohibited under article IV of the treaty.

This must not be a right to intervene in the Panama Canal on any pretext labeled as interference with canal operations.

With these understandings, Mr. President, we can hope to avoid continuing confrontation between Panama and the United States. Without them, we can look forward to a continuation of the unfairness and the resentment which has characterized our treaty relationship since 1903.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona (Mr. DECONCINI). On this question the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK) is necessarily absent.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS) is necessarily absent.

The result was announced—yeas 75, nays 23, as follows:

[Rollcall Vote No. 64 Ex.]

YEAS—75

Allen	Glenn	Muskie
Anderson	Hansen	Nelson
Baker	Haskell	Nunn

NOT VOTING—2

Abourezk	Mathias

So Mr. DECONCINI's amendment (No. 83), as modified, was agreed to.

Mr. SARBANES. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. HATHAWAY). Under the previous order the Senator from Pennsylvania (Mr. HEINZ) is recognized.

Mr. ROBERT C. BYRD. Mr. President, will the Senator call up his amendment first?

Mr. HEINZ. I yield.

Mr. ROBERT C. BYRD. Will the Senator call up his amendment first?

RESERVATION NO. 6

Mr. HEINZ. Mr. President, I call up my printed reservation No. 6 and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the reservation.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ), for himself, Mr. DANFORTH, and Mr. ROTH, proposes reservation No. 6.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the reservation be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The reservation is as follows:

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the reservation, which is to be made a part of the instrument of ratification, that to carry out the purposes of Article III of the Treaty of assuring the security, efficiency, and proper maintenance of the Panama Canal, the United States of America and the Republic of Panama, during their respective periods of responsibility for Canal operation and maintenance, shall, unless the amount of the operating revenues of the Canal exceeds the amount needed to carry out the purposes of such article, use such revenues of the Canal only for purposes consistent with the purposes of Article III".

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. HEINZ. I yield to the majority leader.

TIME LIMITATIONS AGREEMENTS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limitation on this amendment to the resolution of 10 minutes, to be equally divided in accordance with the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, if the Senator will yield further, I ask unanimous consent that there be a time limitation on the amendment by Mr. HAYAKAWA of 5 minutes to be equally divided in accordance with the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limitation on the amendment by Mr. CHAFEE of 5 minutes, to be equally divided in accordance with the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limitation on the amendment by Mr. BROOKE of 5 minutes, to be equally divided in accordance with the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that any rollcall vote during the remainder of the day, with the exception of the rollcall vote on the resolution of ratification, be limited to 10 minutes, with the warning bells to sound after 2½ minutes.

Mr. BAKER. Mr. President, reserving the right to object——

Mr. SCOTT. I object, Mr. President.

The PRESIDING OFFICER. Objection is heard.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, if rollcall votes are requested and seconded on the amendments of Mr. HEINZ, Mr. HAYAKAWA, Mr. CHAFEE, and Mr. BROOKE, those rollcall votes occur at the conclusion of 1 hour of debate which would begin at 3 p.m. today and close at 4 p.m.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, do I understand that also includes any motion that may be made by the distinguished Senator from Michigan, that that vote would also occur in the same sequence of rollcalls?

Mr. ROBERT C. BYRD. I would include that.

The PRESIDING OFFICER. Is there objection?

Mr. McCLURE. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, did I understand the effect of the unanimous-consent request to be that all of these votes, if there be votes, would be back-to-back starting at 4 p.m.?

Mr. ROBERT C. BYRD. That is correct.

Mr. McCLURE. I understand the Senator from Virginia would not object to shortening those rollcalls if they are indeed back to work, and I wonder if he would include that in his request.

Mr. SCOTT. Mr. President, if the Senator will yield, I have no objection, after the initial vote of 15 minutes for the initial vote, for any subsequent votes being 10 minutes. But I have had the experience of missing votes because they have been 10 minutes. I would want to protect myself and other Senators against that possibility. So if the Senator cares to renew his request with that understanding I would be glad to withdraw my objection.

Mr. McCLURE. Mr. President, reserving the right to object, I wonder if the Senator from Virginia might reverse that order, the first votes that would occur at 4 o'clock would be on amendments.

Mr. ROBERT C. BYRD. That is correct.

Mr. McCLURE. The final vote would be on the resolution of ratification.

Mr. ROBERT C. BYRD. Exactly.

Mr. McCLURE. I wonder if under the circumstances the Senator from Virginia would agree to the unanimous-consent request that says all of the rollcall votes on amendments starting at 4 o'clock would be 10-minute rollcalls but the final rollcall, being on the resolution of ratification, would be 15 minutes?

Mr. ROBERT C. BYRD. I did not include the resolution of ratification in the 10-minute rollcalls, since every Senator would be on notice, and they would be here, and I hope the Senator would let the first rollcall vote be 10 minutes under those circumstances.

Mr. SCOTT. Mr. President, let me see if I understand the distinguished majority leader. The first vote would occur at 4 o'clock?

Mr. ROBERT C. BYRD. Yes.

Mr. SCOTT. And the Senator is speaking of votes subsequent to the 4 o'clock vote would be 10-minute rollcalls?

Mr. ROBERT C. BYRD. No. All rollcall votes beginning with the 4 o'clock vote would be 10-minute votes, with the exception of the vote on the resolution of ratification, which would be 15 minutes, and I hope it would be extended to 20 minutes.

Mr. BAKER. Mr. President, reserving my right to object, I would hope, while we are on this subject, that we discuss it a little. I agree with the majority leader that the vote on the resolution of ratification should be 20 minutes, and I would hope in that case the legislative clerk would repeat the response of each Senator from the beginning as the roll is called. This is an important, historic event, and I think an exact tallying

would be in order, and I would hope that would occur. So I wonder if we could take 10 minutes on amendments beginning at 4 o'clock and 20 minutes for the resolution of ratification.

Mr. ROBERT C. BYRD. Well, of course, the 20-minute vote was my suggestion. I discussed it with the distinguished minority leader, and he and I were in accord on it. I was hoping we could get agreement on all other rollcall votes beginning at 4 o'clock to be 10 minutes, and that the resolution of ratification be 20 minutes, with the understanding that the clerk repeat the vote after each Senator is called.

Mr. SCOTT. Mr. President, if the Senator will yield——

Mr. ROBERT C. BYRD. We have already taken 5 minutes to discuss it.

UNANIMOUS-CONSENT REQUEST ON THE ROLLCALL VOTES AT 4 P.M.

Mr. President, I ask unanimous consent that the first vote be a 15-minute rollcall vote; that the rest of the votes be 10-minute rollcall votes, with the exception of the vote on the resolution of ratification, and that be a 20-minute vote; that warning bells on the 20-minute vote sound after 12½ minutes; that the clerk be authorized to repeat after each Senator votes that Senator's vote; and that the well be kept clear.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. HEINZ. Mr. President, how much time do I have?

The PRESIDING OFFICER. The time of the Senator from Pennsylvania has expired. [Laughter.]

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time not be charged against the distinguished Senator from Pennsylvania.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I ask unanimous consent to add the name of Mr. HAYAKAWA as cosponsor to my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield further? With the understanding that it should not come out of his time, let me say that Senators should be on notice that the vote on the amendment by Mr. SCHMITT will occur prior to the hour of 3 o'clock.

Mr. President, I take back everything I said. [Laughter.]

The PRESIDING OFFICER. The Senator from Pennsylvania.

RESERVATION NO. 6

Mr. HEINZ. Mr. President, for some 5 weeks the Senate has been debating the Panama Canal Treaties. It has been my position from the beginning that we need a treaty which insures open, efficient, and secure operation of the canal and which maintains both hemispheric security and good relations with the nations of Latin America.

The present treaties, of course, mandate several of these objectives, and we can also assume that the act of ratification itself will do more to strengthen our relations with Latin America than anything else we might do. However, saying that the canal must be efficiently operated does not insure that it will be so, and it is to this point that my reservation speaks.

As I stated on Tuesday, Mr. President, I am concerned about the problem of the continued efficient operation and maintenance of the canal after the year 2000. Panama is an underdeveloped country with a stagnant economy and tremendous social needs. It is unlikely these needs can be fully met in the next 22 years. Upon taking over the canal, the Panamanian Government will no doubt find itself under considerable pressure to use canal revenue for social welfare purposes rather than for canal maintenance or capital equipment replacement. Such a policy, well intended though it may be, would ultimately render the canal inoperable, perhaps in a short time. The treaties provide no means for insulating canal revenues and expenses from other Panamanian budget priorities once the property reverts to them.

This problem is similar to that which plagued the Penn Central Railroad in my own State. Its management could not resist the temptation to defer maintenance and modernization expenses in favor of other kinds of expenditures. As a result, the railroad ran into serious financial difficulties, a sad story that is familiar to all of us. These difficulties are realities, but they did not occur because of ill will, malign intentions, or any other deliberate effort to destroy the railroad. They occurred because management—with what they thought were good intentions—made wrong decisions at critical times.

In the same vein, I am not predicting that the Panamanians will ruin the Panama Canal intentionally, or that they will mismanage it through incompetence. But I am suggesting that, in 2000 and beyond, the Panamanian Government will be faced with pressing social needs that will demand large budget expenditures. The pressure to use available funds for these purposes will be great. The obvious conclusion we should draw is that there is a risk that the canal will end up being shortchanged on maintenance and capital equipment replacement, and that as a consequence it will become inefficient, expensive, hazardous to navigation or, at worst, unable to operate.

Let me make clear that the concern about the adequate maintenance of the canal is not only something we worry about. It is two sided. The Panamanians have some worries about our willingness to properly maintain the canal and plan for its future as the date for giving up day-to-day control over it comes closer. The Panamanians are aware that possibly, by 1993 or thereabouts, we may be inclined to forego needed maintenance in an effort to keep tolls lower, or for some other purpose.

Obviously, we may feel such fears are unrealistic, given our past record. Similarly, the Panamanians undoubtedly feel our reservations about their management intentions and abilities are unfounded, given the economic importance of the canal to their future. The fact is, however, that both sides continue to share these concerns, and the best way to take care of them is with this reservation which will be a part of the ratification document the Panamanians must accept.

I have written the substance of the reservation from a financial point of view to circumscribe the spending of canal income because I believe that the best way to protect canal revenues for future maintenance purposes is to insulate the money from other priorities.

I do not think we need to specify a particular institutional segregation, and I have not required one.

It would not be wise in my opinion, because it would lock both parties into an institutional structure which may not be appropriate or best in the many decades ahead. For example we would not want to create a structure that could only be changed by treaty—such an arrangement, for example, might make it unnecessarily more difficult to cover canal deficits from other sources should they occur after 2000.

Instead I have adopted the approach set forth in reservation No. 6 as follows:

> . . . to carry out the purposes of Article III of the Treaty of assuring the security, efficiency, and proper maintenance of the Panama Canal, the United States of America and the Republic of Panama, during their respective periods of responsibility for Canal operation and maintenance, shall, unless the amount of the operating revenues of the Canal exceeds the amount needed to carry out the purposes of such article, use such revenues of the Canal only for purposes consistent with the purposes of Article III.

Instead the language of my reservation clearly specifies the primary purpose for which the money raised by tolls—the canal revenues—are to be used. In short my reservation creates a binding responsibility to segregate these revenues from other budgetary needs and priorities so that the purposes of article III—namely security, efficiency, and proper maintenance—can and will be completely met. While reservation does not preclude Panama from using excess revenue for other purposes, nonetheless it leaves no question that such excess will be available only after maintenance needs have been fully satisfied. During the life of the Panama Canal Treaty, of course, the use of revenues for purposes of security, efficiency, and proper maintenance would include all expenses for operation and maintenance, including the various payments to Panama stipulated in the treaty.

Mr. President, I would also like to say a word at this point about amendments, reservations, and understandings. This issue has been the subject of much debate here in the past few weeks with no final resolution, and I can only add my point of view.

The most useful commentary I have seen on this subject is the memorandum prepared by Mike Glennon, Foreign Relations Committee legal counsel, which appeared in the March 9 CONGRESSIONAL RECORD.

That document deals with the question

of different legal effects of reservations or amendments quite succinctly:

International legal effect. The act of ratification is not complete until "instruments of ratification" are exchanged. In order to be given international legal effect, amendments made by the Senate, or reservations, understandings, or declarations, etc., added by the Senate, must be incorporated in the instrument of ratification given to Panama. If they are so incorporated they will, as noted above, be of identical legal force and effect; the particular demonination attached to each by the United States will be legally irrelevant, since the substance of each will have been accepted by Panama.

In short, if the Senate elects to alter the substantive effect of the treaties, the label under which it chooses to do so—and there are many possibilities—will under domestic and international law be immaterial; each modification, if accepted by Panama, will have the same force and effect as the treaty itself. Whether Panama accepts is, of course, entirely within its discretion and the designation used by the Senate may be taken into account.

It seems to me that this is a most useful and authoritative observation. The most important characteristic of these various forms of changing the treaties is not what they are labeled, but rather whether or not Panama accepts them. If they are accepted, then they are binding, no matter what they are called.

It is for this reason that most of the understandings, reservations, and so forth, being offered will stipulate in the beginning that they be attached to the resolution of ratification, in effect making them amendments to that resolution. Such attachment forces Panama to explicitly accept or reject them, which is the critical issue.

Mr. President, the reservation I have offered deals with a serious problem in a fair, equitable, and restrained manner. I urge its addition to the resolution of ratification.

I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, I commend the distinguished Senator from Pennsylvania for the reservation he has offered.

It would, as he has indicated, insure a first priority for operation and maintenance of the canal, which is, of course, important both to Panama and to the United States, and it places a reciprocal burden, as he says, on the United States of America and the Republic of Panama during their respective periods of responsibility.

It is in that sense even-handed in its application, and it insures that this very important asset to Panama, to the United States and, indeed, to the entire world will be operated and maintained at the level which is necessary for it to meet effectively its functions.

I think it responds in a legitimate fashion to some concerns that have been raised, and we are pleased to indicate that we will accept the amendment to the articles of ratification offered by the able Senator from Pennsylvania.

Mr. HEINZ. I thank the Senator from Maryland.

Mr. SARBANES. Mr. President, I yield to the Senator from Idaho who wishes to bring to the attention of the Senate an additional understanding which has not been mentioned, which he will offer and of which Members should be aware. We believe it is not controversial in any way, and it will be before us for a vote at the appropriate time.

UNDERSTANDING NO. 9

Mr. CHURCH. Mr. President, I call up understanding No. 9, which is the only understanding recommended by the Committee on Foreign Relations to the Neutrality Treaty.

Mr. President, the understanding would require that all material added by the Senate to both this treaty and the resolution of ratification be included in the instrument of ratification given Panama.

After the Senate gave its advice and consent to the treaty with Spain in 1975, the State Department claimed that the executive branch had the authority to transmit separately to Spain certain material added by the Senate. This understanding would make clear that such exclusion will not be permissible in the case of this treaty. Its rationale is elaborated in the committee report; I ask unanimous consent that the pertinent portion of the report be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

F. Understanding requiring the inclusion of Senate actions in the instrument of ratification of the Panama Canal Treaty.

The Committee recommends that the resolution of ratification of the Panama Canal Treaty be amended by striking out the period at the end thereof and inserting in lieu thereof a comma and the following: "subject to the following understanding;

The President shall include all amendments, reservations, understandings, declarations and other statements incorporated by the Senate in its resolution of ratification respecting this Treaty in the instrument of ratification exchanged with the Government of the Republic of Panama.

Mr. HEINZ. Mr. President, I had reserved the remainder of my time.

Mr. SARBANES. Does the Senator wish a rollcall vote on his amendment?

Mr. HEINZ. The Senator is prepared to accept a voice vote.

Mr. SARBANES. We are prepared——

Mr. CHURCH. One moment, Mr. President, I have a unanimous consent. I will change the unanimous consent to a request, which has been asked by the minority leader.

I ask unanimous consent that the order be vitiated that Senator SCHMITT be recognized at the hour of 2:30, and that following the recognition of Senator BROOKE, Senator GRIFFIN then be recognized.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Will the Senator yield for one second, if there is time remaining?

Mr. SARBANES. Is there time remaining?

The PRESIDING OFFICER. The Senator from Pennsylvania has 2 minutes. The Senator from Idaho has 1 minute remaining.

Mr. HEINZ. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HEINZ. My understanding is that a vote on this will take place at 4 o'clock.

Mr. CHURCH. Only if there is a rollcall.

Mr. HEINZ. Could we have a voice vote right now? Could everyone yield back his time?

The PRESIDING OFFICER. Is there objection?

Mr. CHURCH. Mr. President, I would like to move the adoption of the understanding recommended by the Committee on Foreign Relations, with the hope and expectation that that can be done by a voice vote at this time.

Mr. McCLURE. Will the Senator yield for one question? I do not mean to delay it at all. I am a little concerned about the effect of the DeConcini reservation as affected by the Senate rejection of the Allen amendment to it.

Mr. CHURCH. I yield.

Mr. McCLURE. I would not want anyone to understand that the Senate has now taken action by rejecting the Allen amendment, in effecting, saying that the DeConcini reservation means any less than the sponsors of the amendment said it meant at the outset.

In other words, the binding nature of the DeConcini reservation has not been lessened by our rejection of the Allen amendment.

Mr. CHURCH. I think that is understood by all.

Mr. McCLURE. I think that merges into the resolution which the Senator is now asking.

Mr. CHURCH. I concur with the Senator. I ask that the Senate now adopt the understanding recommended by the Committee on Foreign Relations.

The PRESIDING OFFICER. Is there objection to its immediate consideration? Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho, Mr. CHURCH, proposes an understanding No. 9.

The PRESIDING OFFICER. Without objection, further reading will be dispensed with.

The understanding is as follows:

Before the period at the end of the resolution of ratification insert a comma and the following: "subject to the following understanding:

"The President shall include amendments, reservations, understandings, declarations, and other statements incorporated by the Senate in its resolution of ratification respecting this Treaty in the instrument of ratification exchanged with the Government of the Republic of Panama".

The PRESIDING OFFICER. Without objection, the understanding is agreed to.

Is all time yielded back?

Mr. SARBANES. We are prepared to yield back our time and to vote on the

reservation of the Senator from Pennsylvania at this point.

The PRESIDING OFFICER. Is all time yielded back?

Mr. CHURCH. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the reservation of the Senator from Pennsylvania.

The reservation was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the understanding was agreed to.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order the Senator from California (Mr. HAYAKAWA) is recognized for not to exceed 5 minutes.

UNDERSTANDING NO. 11

Mr. HAYAKAWA. Mr. President, I call up my understanding No. 11, which is cosponsored by Senator DECONCINI and Senator HEINZ, and ask for its immediate consideration.

The PRESIDING OFFICER. The understanding will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA), for himself, Mr. DECONCINI, and Mr. HEINZ, proposes understanding numbered 11:

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the following understanding, which is to be made a part of the instrument of ratification, that—

"(1) the agreement to 'maintain the regime of neutrality established in this Treaty' in Article IV of the Treaty means that either of the two Parties to the Treaty may, in accordance with its constitutional processes, take unilateral action to defend the Panama Canal against any threat, as determined by the Party taking such action".

Mr. GRIFFIN. Will the Senator yield?

Mr. HAYAKAWA. I will yield for a unanimous-consent request.

Mr. GRIFFIN. Mr. President, on behalf of Senator HATFIELD, of Oregon, I ask that a member of his staff, Jack Robertson, have access to the floor during the debate and votes on this treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Will the Senator yield to me?

Mr. HAYAKAWA. I yield.

Mr. JAVITS. I would like to say I have read this understanding and I thoroughly agree with it.

Mr. HAYAKAWA. I thank the distinguished Senator from New York.

The language of my understanding is clear and simple. It says that the American Government can come to the defense of the canal whenever in its own judgment such action is necessary. The question may arise: Why should the resolution authorizing ratification be subject to this understanding? In my judgment, the understanding is necessary because it clearly reflects a fundamental intent of the Senate. I believe there is general agreement that the original language of article IV is ambiguous. The President of the United States and General Torrijos evidently also agreed that some clarification was needed and they issued their communique. The Byrd-Baker amendment reiterated the text of the communique, and it was incorporated into the treaty by the vote of the Senate. However, there is one clause in the amended text which causes me concern. I am referring to the clause:

Any United States action will never be directed against the territorial integrity or political independence of Panama.

Looking at the historical record, I cannot help thinking of the possibility of camouflaged or indirect aggression. It is true that the same language can be found in article II of the United Nations Charter. But it is also true that this did not prevent Chairman Brezhnev in an act of naked aggression from sending troops into Czechoslovakia. As Soviet propagandists explained at that time, Russia was only complying with an invitation from Czechoslovakian workers. It appears to me that a comparable situation could possibly arise. A future unfriendly Panamanian Government, in cooperation with a power hostile to the national interests of the United States, could invite, for example, Soviet technicians and so-called military advisors. It could then turn around and use the prohibition against interference with "the territorial integrity and political independence of Panama" to oppose a legitimate intervention by the United States.

The DeConcini amendment, which the Senate has just accepted, pertains to article V and refers only to the closing of the canal or to any interference with its operations. On the other hand, my understanding pertains to article IV and covers any threat to the canal as perceived by the United States. In other words, it complements the DeConcini amendment, which I was happy to vote for.

It therefore seems to me that my understanding should be supported by all the Senators supporting the Neutrality Treaty as well as by those who oppose it. I think it represents a common denominator on which we all can agree; namely, whenever the interests of the United States in this area are endangered, we will have the right to intervene. We shall have the right to decide for ourselves whether intervention is called for. Mr. President, it is my intention to ask you for the yeas and nays. Thank you, Mr. President.

The PRESIDING OFFICER. Does the Senator request the yeas and nays?

Mr. CHURCH. Mr. President, since this understanding is acceptable to the managers of the treaty, I wonder if it would be possible to settle this by a voice vote.

Mr. HAYAKAWA. I would be happy to do so.

Mr. CHURCH. If the Senator will withhold his request, Mr. President, let me simply say——

Mr. HAYAKAWA. I withdraw my request.

Mr. CHURCH. Let me simply say that this understanding conforms with the interpretation placed upon the leadership amendment to article IV of the treaty. To my knowledge, both the Government of the United States and the Government of Panama interpret the amendment in this fashion. Therefore, we have no objection to it. I am prepared to yield back the remainder of my time.

Mr. GRIFFIN. Mr. President——

The PRESIDING OFFICER. Who yields time? Does the Senator from Idaho yield time?

Mr. CHURCH. How much time remains to the Senator from Idaho?

The PRESIDING OFFICER. One-and-a-half minutes.

Mr. CHURCH. Yes, I am happy to yield the remainder of my time.

Mr. GRIFFIN. Mr. President, I cannot remain silent and indicate that I agree that there would be agreement with the statement just made by the Senator from Idaho. As I have stated and documented earlier in this debate, the spokesmen and representatives of the Republic of Panama do not construe and interpret the Neutrality Treaty in the way indicated here by the Hayakawa amendment. I will not force a rollcall on this, because I know what the result will be. We have had enough votes here today; namely, on the DeConcini amendment, to know what the will of the Senate is.

I want to make it clear that what the Senator from Idaho has stated is not the view of the Senator from Michigan. This does make a significant change in the treaty. It goes contrary to the interpretations of the spokesmen for the Republic of Panama. This, like the DeConcini amendment and like the leadership amendments, will result in the rejection of the treaty by the Senate and, in effect, the submission by the Senate of a counter offer to the Republic of Panama which should then be ratified in accordance with their constitutional processes.

The difficulty that the Senator from Michigan has with this whole procedure is that that is not what is going to happen. We already know what the arrangement is. Dictator Torrijos may approve of this, but he will not submit it to the people for a vote as is required by the constitution.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the understanding. (Putting the question.)

The understanding was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the understanding was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNDERSTANDING NO. 13

The PRESIDING OFFICER. Under the previous order, the Senator from Rhode Island (Mr. CHAFEE) is recognized for 5 minutes, the time to be equally divided.

Mr. CHAFEE. Mr. President, I call up my understanding No. 13 and ask for its immediate consideration.

The PRESIDING OFFICER. The understanding will be stated.

The legislative clerk read as follows:

The Senator from Rhode Island (Mr. CHAFEE), for himself, Mr. BELLMON, Mr. BROOKE, Mr. DECONCINI, and Mr. HEINZ, proposes an understanding numbered 13.

Mr. CHAFEE. Mr. President, I ask unanimous consent that further reading of the understanding be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The understanding is as follows:

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the understanding, which is to be made a part of the instrument of ratification, that the determination of 'need or emergency' for the purpose of any vessel of war or auxiliary vessel of the United States or Panama going to the head of the line of vessels in order to transit the Panama Canal rapidly shall be made by the nation operating such vessel".

Mr. CHAFEE. Mr. President, this understanding deals with article VI of the Neutrality Treaty, which provides for warships and auxiliary vessels to go to the head of the line, so-called. They shall go to the head of the line in case of need or emergency This is a clarifying understanding to make clear that the determination of whether there is an emergency or need shall be made by the nation which is operating the vessel; namely, in the case of U.S. vessels, by the United States, or in the case of Panamanian war vessels, by the Government of Panama.

It does not specifically say which representative of the appropriate government shall determine what is an emergency which requires it to go to the head of the line. We thought it better to have some flexibility on that specific point.

The real purpose of this understanding to to make absolutely clear that it does not require both nations to make a determination that there is an emergency. It can be done unilaterally. In the case of the nation we are concerned with, of course, the United States, we wish the United States to be able to say that there is an emergency, and thus our vessels can go to the head of the line.

I am prepared to yield back the remainder of my time, Mr. President, and shall be glad to answer any questions.

Mr. CHURCH Mr President I yield to myself such time as I may need.

It is my understanding that, today, the vessel operator is the only person qualified to determine an emergency. Therefore, the United States determines when its naval vessels should transit the canal expeditiously. Under current practice, our naval ships are expedited at the request of the fleet commander. So the understanding proposed by the distinguished Senator from Rhode Island, first of all, conforms with present practice. Second, it conforms to the interpretation placed upon article VI of the pending treaty by both the Governments of the United States and of Panama. Therefore, we have no objection to the understanding.

I am prepared to yield back the remainder of my time.

Mr. THURMOND. Mr. President, will the distinguished Senator yield?

Mr. CHAFEE. Yes.

How much time do I have, Mr President?

The PRESIDING OFFICER. The Senator has a minute and a half.

Mr. CHAFEE. Yes, I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I want to propound a question to the able Senator from Rhode Island. Suppose Panama said, "We have an emergency," and the United States said, "We have an emergency." Which vessel would go to the head of the line?

Mr. CHAFEE. That is a difficult question. If you get two vessels up there they can both go through very quickly. I guess the situation is rather helped by the fact that Panama does not have any war vessels. Therefore, this is something that is solely beneficial to the United States.

Mr. THURMOND. I thank the Senator. That is his view, but I am not too sure I can concur with that.

Mr. CHURCH. Mr. President, this question came up earlier in the debate. It is hard to conceive of such an eventuality in the future, for presently, Panama has no navy except for six coastal patrol boats. I do not believe they will clog up the canal in such a way as to interfere with the expeditious passage of the U.S. Navy. If any attempt were made to do so, I should not want to be the commander of one of those patrol boats. We are prepared to accept the understanding.

I yield back the remainder of my time.

Mr. GRIFFIN. Mr. President, does the Senator yield?

Mr. CHURCH. I yield for a question.

How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 1 minute.

Mr. CHAFEE. I have some time. I shall be glad to yield the remainder of my time.

Mr. GRIFFIN. I shall be glad to ask for a rollcall vote on this.

Mr. CHURCH. I shall yield, if the Senator wants a minute.

How much time does the Senator from Rhode Island have?

Mr. CHAFEE. Whatever time I have, I yield to the Senator.

The PRESIDING OFFICER. The Senator from Michigan has 2 minutes.

Mr. GRIFFIN. I do not want the record to be left implying, as the Senator from Idaho has indicated, that both nations have agreed to this interpretation. That is not the fact.

The reason the Senator from Rhode Island is concerned about this matter and has offered the reservation is that under the treaty, after the year 2000, it is the Republic of Panama that would have the authority to determine when there was an emergency and whether or not U.S. vessels would go to the head of the line. I am sure that is still the interpretation in the Republic of Panama.

Now we are about to adopt a so-called reservation to put into the Resolution of Ratification our interpretation. That does not mean we have an agreement with the Republic of Panama. That is just another statement of what we think it should mean.

This is one more change in the treaty that would have to be approved by Panama. Under their constitutional procedures, it will require approval by a vote in a plebiscite of the people of Panama.

I thank the Senator from Idaho for yielding.

Mr. SARBANES. Mr. President, I think the record ought to reflect the fact that, while that is the construction which the Senator from Michigan has chosen to place on certain comments, many of us disagree very strongly with the interpretations he has made with respect to the understandings that the two governments have reached in respect to the statement.

I have followed the Senator's presentations with respect to this matter very carefully and, as I have indicated previously on this floor, I differ with the conclusion which he reaches. He has his perception of the situation. Many of us differ with it strongly, and think that the reasonable grounds are on our side for the understandings that have been reached.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator's time has expired. All time has expired.

The question is on agreeing to the understanding. (Putting the question.)

The understanding was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the understanding was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNDERSTANDING NO. 3

The PRESIDING OFFICER. Under the previous order, the Senator from Massachusetts (Mr. BROOKE) is recognized. The time on his undertsanding is 5 minutes, to be equally divided.

Mr. CRANSTON. Mr. President, I call up the amendment of the Senator from Massachusetts.

The PRESIDING OFFICER. The amendment of the Senator from Massachusetts will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON), for the Senator from Massachusetts (Mr. BROOKE), proposes understanding numbered 3:

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the understanding, which is to be made a part of the instrument of ratification, that nothing in the Treaty, in the annexes or the Protocol relating to the Treaty, or in any other agreement relating to the Treaty obligates the United States to provide any economic assistance, military grant assistance, security supporting assistance, foreign military credit sales, national military education and training to the Republic of Panama".

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SPARKMAN. I ask unanimous consent that the order for the quorum call be rescinded.

I will ask Senator CHURCH if he would yield me 2 minutes.

Mr. CHURCH. I am happy to yield 2 minutes to the distinguished chairman of the Foreign Relations Committee.

Mr. SPARKMAN. Mr. President, we are nearing the end on this debate. It has been a long time, and those of us who are members of the Foreign Relations Committee know how long the debate ran before it ever reached the floor of the Senate. I think it was certainly one of the longest series of hearings and markup sessions that we have ever had. It was not an easy thing to work out the language to these treaties, but we did and we reported it 14 to 1, after weeks and months of listening to exactly the same complaints that we have heard here on the floor.

I think the Senate has done a great job in bringing this almost to the end, and I commend not only the members of the Foreign Relations Committee, but all of the Senators and their staffs for the tremendous work that has been done in connection with this presentation to the Senate.

When it came time to bring it to the floor, I asked Senator CHURCH and Senator SARBANES to be on the floor. I hoped that at all times certainly one of them would be here, and they have been.

Senator CHURCH, my friend and esteemed colleague, did a great job in the committee, in helping to work out the language. My colleague from Idaho has further distinguished himself by his management of the Treaty on the floor.

Senator SARBANES, who is also my friend and distinguished colleague, is chairman of the Latin American Subcommittee and likewise did a great job in the committee. Senator SARBANES worked tirelessly and with great ability here on the Senate floor.

I do not know how we would have gotten along without Norvill Jones, the staff director of the Foreign Relations Committee, and Robert Dockery, who is an expert in Latin American matters, and Ralph McMurphy, my fellow Alabamian, who has done a great job all the time he has been on the committee staff.

I pay my respects to the entire committee.

I will remind you again that the committee finally voted, with only one dissenting vote, 14 to 1.

I just wanted to pay my respects to these gentlemen who have labored so hard, so long, and so well.

I think the Senate as a whole owes them a great debt of gratitude.

Mr. CHURCH. Thank you, Senator.

Mr. BROOKE. Mr. President.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. BROOKE. Mr. President, I send to the desk a perfected version of understanding No. 3 and ask for its immediate consideration.

The PRESIDING OFFICER. The understanding will be so modified.

UNDERSTANDING NO. 3—AS MODIFIED

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the understanding, which is to be made a part of the instrument of ratification, that nothing in the Treaty in the annexes or the Protocol relating to the Treaty, or in any other agreement relating to the Treaty obligates the United States to provide any economic assistance, military grant assistance, security supporting assistance, foreign military sales credits, or international military education and training to the Republic of Panama".

Mr. BROOKE. Mr. President, the correction merely changes the term "foreign military credit sales" to read "foreign military sales credits."

Mr. President, I do not intend to take more than a few minutes to discuss the pending understanding. It is a simple understanding that will make explicit that the question of any foreign assistance relationship with Panama will be considered completely independent of decisions on the Panama Canal treaties.

This understanding is necessary to reduce the expectation in Panama that they will automatically receive at least $345 million in foreign assistance if the treaties are ratified. That is the amount the President, in what I believe to be an unwise gesture, promised he would seek for Panama.

This understanding and a change in relevant legislation is needed to forestall a unilateral Presidential decision to provide assistance to Panama. Unknown to many, $340 million of the $345 million the President has indicated he would seek for Panama, can be provided without prior congressional approval. This is unacceptable to me and I believe to the majority of the Congress. It would be, without a doubt, a further affront to the sensibilities of the American people. Therefore, I urge acceptance of this understanding.

Mr. CHURCH. Mr. President, I yield myself such time as I may require.

The PRESIDING OFFICER. There is no time remaining.

Mr. CHURCH. Then the understanding is acceptable. I urge the Senate to adopt.

The PRESIDING OFFICER. The question is on agreeing to the understanding.

(Putting the question.)

The understanding was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the understanding was agreed to.

Mr. SARBANES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BROOKE. I thank the Chair and the distinguished Senator from Idaho.

The PRESIDING OFFICER. Under the previous order, the Senator from Michigan (Mr. GRIFFIN) is recognized for 12 minutes, equally divided.

AMENDMENT NO. 71

Mr. GRIFFIN. Mr. President, on behalf of Senator SCHMITT, Senator WALLOP, Senator ROTH, Senator HANSEN, and myself I send an amendment to the desk in the nature of a substitute for the resolution of ratification.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk stated the amendment.

Resolved, That the Senate return to the President of the United States the Treaty Concerning the Permanent Neutrality and Operation of The Panama Canal, together with the annexes and the Protocol relating thereto, done at Washington on September 7, 1977 (Ex. N, Ninety-fifth Congress, first session), with the advice of the Senate that negotiations to develop a new treaty relationship with the Republic of Panama be resumed and continued until a treaty is agreed upon that better serves the interests of both nations.

Mr. GRIFFIN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GRIFFIN. Mr. President——

The PRESIDING OFFICER. Under the previous order, the vote will occur at 4 p.m.

Mr. GRIFFIN. As the only and lonely Senator on the Committee on Foreign Relations who voted against reporting these treaties, I was impressed when the author David McCullough, who wrote the book "The Path Between the Seas," appeared before our committee and testified. Perhaps, because of his great knowledge of the history of the canal or perhaps in spite of it, he found it very difficult as a personal decision to decide what to do about these treaties, whether to support them or to oppose them.

Although, he indicated that he finally came to the personal decision to support them, on balance he made a statement before our committee which I think is worthy of our attention.

David McCullough said that if we say yes to these treaties in a grudging way because we think we have painted ourselves into a corner and we have to get out, that will be unfortunate and would be just as wrong. And in some ways a greater mistake than to say no in the spirit of saying no because it should be done right, because we do not want to have to come back in 15 or 25 years and have to go through this again.

Mr. President, I know that, although the administration and the proponents may now have finally eked out the 67 votes as a result of certain maneuvers and appeals, there are Senators in this body who know that the right course to take would be not to reject the treaty outright, but to advise the President of the United States to send the negotiators back to the drawing board.

Unfortunately, in the process that we have been engaged in, we are in a grudging way rejecting the treaty. We are rejecting it by adopting substantive amendments.

Now, there have been a number of them in addition to the leadership amendments, and under the established international law we are, in effect, rejecting the treaty and submitting to the Republic of Panama a counteroffer.

We are doing it on a take-it-or-leave-it basis, which is something of an affront to the Republic of Panama.

It would be a much better way to do it if we were to go back and negotiate with them as equals at the bargaining table and take these proposals to them.

Of course, the dangerous part of this course is that the Dictator Torrijos, for his own political purposes, may not follow the constitutional processes of the Republic of Panama. He may agree to these changes and then we will have an invalid treaty which can be challenged by his successor in office.

Mr. President, our time is very limited and I have colleagues who want to speak on this subject.

I yield to the distinguished Senator from New Mexico.

Mr. SCHMITT. I thank the Senator from Michigan and compliment him on his further initiative in this matter.

Mr. President, I call up amendment No. 81 for consideration as an amendment to the Senator from Michigan's amendment.

The PRESIDING OFFICER. The Chair advises that an amendment to an amendment is not in order until all time has been consumed on this amendment.

Mr. SCHMITT. I thank the Chair.

At the appropriate time, I believe the Senator from Michigan will accept the wording of this amendment.

Mr. GRIFFIN. If the Senator will yield to me, it would be in order, would it not, if the Senator from Michigan were to modify his amendment to include the amendment of the Senator?

The PRESIDING OFFICER. It would require unanimous consent. Does the Senator seek unanimous consent to so modify his amendment?

Mr. GRIFFIN. I ask unanimous consent that I may so modify my amendment after the clerk reads it.

Mr. CHURCH. After the clerk reads it.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

On line 8, after "Panama", insert, ", involving all the nations of North and South America who wish to participate,".

On line 9, after "nations", add ", and all the nations of the Western Hemisphere."

Mr. SCHMITT addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan requests unanimous consent to so modify his amendment.

Is there objection?

Without objection, the amendment is so modified.

The amendment, as modified, is as follows:

Resolved, That the Senate return to the President of the United States the Treaty Concerning the Permanent Neutrality and Operation of The Panama Canal, together with the annexes and the Protocol relating thereto, done at Washington on September 7, 1977 (Ex. N, Ninety-fifth Congress, first session), with the advice of the Senate that negotiations to develop a new treaty relationship with the Republic of Panama, involving all the nations of North and South America who wish to participate be resumed and continued until a treaty is agreed upon that better serves the interests of both nations, and all the nations of the Western Hemisphere.

Mr. SCHMITT. Mr. President, this now modified amendment would merely require the participation of nations in the hemisphere in any future negotiations. It is very simple, but I think very important.

Mr. President, I am supporting this change and the amendment that is offered by the Senator from Michigan, not because I do not believe some change is necessary in our relationships with the Republic of Panama relative to the Panama Canal, but I am supporting it because the change we would make with the Neutrality Treaty is the wrong change, for the reasons outlined by the Senator from Michigan, and many others. The opportunity for a far nobler treaty is so unique that we must grasp it or possibly never see it again. My amendment suggests the international direction of this opportunity.

The PRESIDING OFFICER. The time of the Senator from Michigan has expired.

Mr. SCHMITT. My previous statements about the intersea concept provide the basis which I think we can grasp at this time.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. CHURCH. Mr. President, I support the treaty before us because it is a fair bargain that has been negotiated at arm's length between the United States and Panama. I support it because it will preserve the good feeling that presently exists between Panamanians and Americans.

I have every expectation that the reservation and the understandings that have been attached by the Senate to the instrument of ratification will prove acceptable to the Government of Panama. But if we were to adopt this proposal, if we were to scrap these treaties and send the two governments back to the negotiating table again, I have no doubt whatever that we would never consummate a subsequent agreement more favorable to the United States than the treaty now before us.

In fact, Mr. President, I have very serious doubts, should the Senate act so foolishly, that we would even get negotiations underway again.

We would have missed the moment because these treaties accomplish the earnest desire of the Panamanian people to have their honor and dignity restored to them; to have jurisdiction over their own soil returned to them, for this has been their objective for the past 75 years.

If we lose this opportunity, I do not think we will go back to the negotiating table. I think we will have to hold the Canal Zone by bayonets, by force of arms. We will cling to it while our relationship with that small country deteriorates to the point where their indignation finally bursts into hot flame, until violence and bloodshed become the hallmark of our relations, until harassment degenerates into guerilla war. We will cling to it until finally the American people lose patience with the needless, endless, senseless bloodletting. In the end, Mr. President, we will have to settle for what is right, without the benefit of any credit, without dignity, without the respect of the world that we will garner if we only show the wisdom now to support these treaties.

I strongly urge the Senate to reject this proposal by the Senator from Michigan.

In the time remaining to me, I yield to the able Senator from Maryland.

Mr. SARBANES. I thank the distinguished Senator from Idaho for yielding and I thank him for the extraordinary leadership which he has shown during the consideration of this important matter.

Mr. President, the Senator from Michigan quoted David McCullough, who wrote that marvelous book, "The Path Between the Seas."

David McCullough also said before our committee:

I wholeheartedly support the treaties because I support the canal. I know its importance; I know our interest in it is vital.

The Panama Canal is expressive of one of the oldest, noblest desires in the human heart, to bridge the divide and to bring people closer together. These treaties are expressive of that same desire. They are a progressive step, an act of strength and confidence and of good will.

Mr. President, we have come a long way to reach this point—not just the 36 days here in the U.S. Senate, but a long way as a nation and as a people. Now the American people, and those of us who represent them here in the Senate of the United States, have the opportunity with these treaties to reflect a maturity of judgment and a wisdom of understanding that will protect our interests and give us a relationship with the people of Panama which can stand as a positive and constructive example to the entire world. We have now the opportunity to bring might and right into harmony. We should not lose that opportunity.

The PRESIDING OFFICER. The time on the amendment has expired.

PROPOSED PANAMA CANAL TREATIES UNWORTHY OF FAVORABLE ACTION IN THE SENATE

● Mr. ALLEN. Mr. President, I have spent much time over past months examining in detail the proposed Panama Canal treaty and the proposed treaty concerning the permanent neutrality and operation of the Panama Canal. I have also reviewed each of the many associated annexes, agreed minutes protocols, implementing agreements, annexes to implementing agreements, appendixes to annexes to implementing agreements, notes, exchanged letters, statements of understanding, messages and so-called clarifying communiques, all with the result that I have reached the judgment that the fabric of this proposed new arrangement with Panama is inherently defective, poorly drafted, ambiguous, and dangerous to the security and commerce of our country.

The defects in these proposed arrangements are legion, and during the debate held thus far of executive N, the proposed Panama Canal treaties, many of these deficiencies have been illuminated and examined, but unfortunately none have been corrected.

But, Mr. President, amid these myriad defects there are five major flaws, each of which on its own ground warrants complete rejection of the arrangements negotiated, inasmuch as each would independently damage the national interests of our country to such extent as to render it improper for the Senate or the Congress to give its consent. The five major defects, at least as I see it, are: First, the failure of the canal treaties to require congressional authorization for

the proposed grant to Panama of U.S. property; second, the decision embodied in the canal treaties and related loan agreements to pay to Panama some $2.262 billion by means of various devices cynically designed to circumvent the role of the House of Representatives or the Congress in appropriating funds from the Treasury of the United States; third, the failure of the canal treaty to provide for an adequate defense of the canal during its proposed 22-year term; fourth, the failure of the neutrality treaty to provide for an adequate defense of the canal thereafter; and finally fifth, the astonishing provision of the canal treaties which forbids the United States even to negotiate with another nation for the construction of any interoceanic canal, either sea level or locks, anywhere in the Western Hemisphere without the express consent of the Panamanian dictatorship.

THE CONSTITUTION IGNORED

The first major flaw in the treaties is perhaps the most significant since it represents a direct assault by the executive branch on the prerogatives of the Congress and since it would set a new precedent extending the authority of the executive branch far beyond the bounds contemplated by the framers of the Constitution of the United States.

As the Senate well knows, article IV, section 3 of the Constitution provides quite clearly that Congress, that is, the Senate and the House of Representatives acting together, "shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States." Mr. President, the Attorney General has advised that the proposed treaties do not in any respect violate this clause, but with all due deference to him as a very able lawyer, in this instance he is serving a client, and I cannot share his rationalization of the clear, unambiguous language of the Constitution on this subject, nor can I agree with his faulty characterization of consistent past practice in our dealings with Panama in matters of property transfer.

In 1936 and again in 1955, cessions of U.S. territory or property to Panama were made expressly contingent on congressional authorization. Yet now that a truly major cession of virtually all U.S. territory in the Isthmus of Panama is contemplated, the executive branch has seen fit to assert a novel theory by which the administration would circumvent the Congress. The reason for development of this novel theory of constitutional law is, I believe, a matter of practical politics rather than legal scholarship since public opposition to giving up the canal is so overwhelming, and continues to be so overwhelming, that any congressional authorization of a grant of U.S. territory in the Isthmus of Panama would be difficult, if not impossible, to obtain from the people's representatives in the Congress, particularly in the House of Representatives.

But beyond this immediate issue, if we in the Senate and in the Congress permit this circumvention of the role of the whole Congress in any cession of U.S. territory, we will be setting a very dangerous precedent which will surely be used again by this or future administrations to assert power in an area heretofore preserved exclusively to the Congress. My own guess is that we would next see this precedent applied to the Guantanamo Naval Base in Cuba, but perhaps other cessions of territory or property are also in the works. This new precedent would haunt us down through the years, and we cannot allow it to be established.

For that reason, Mr. President, I was particularly alarmed that the Committee on Foreign Relations saw fit to indicate in its report of executive N that the grant of property of the United States to a foreign country could be accomplished alone without prior authorization by the Congress. Frankly, I do not think the Committee on Foreign Relations gave adequate study to the issue, and I do not think the conclusion reached was appropriate for the committee, based as it was on limited testimony and a faulty understanding of the law and precedents.

So, Mr. President, the Congress, and particularly the Senate since the matter is now our responsibility, should not lightly endorse this proposed radical departure from sound constitutional principles simply for the perceived political expediency of the moment. The Senate should, instead, guard the prerogatives of the whole Congress by amending the proposed treaties to make any grant of territory or property of the United States envisioned by the treaties subject to the prior enactment of authorizing legislation by the whole Congress—in other words, if no authorizing statute, then no property transfer and a void treaty.

It is important to understand, Mr. President, that implementing legislation is not enough to satisfy the constitutional requirements. Authorizing legislation must be obtained before a legal transfer of property of the United States in the Isthmus of Panama can be effected. The Panamanians should be formally advised of this requirement, as they were in the treaty of 1955, by appropriate words making any grants of property contingent on enactment of authorizing legislation. To do otherwise would mislead the Panamanians and pervert the Constitution.

The Senate may be assured that, if necessary, I and other Senators will soon seek adoption of an amendment to preserve the constitutional role of the Congress, particularly the role of the House of Representatives, in disposing of U.S. territory or property. Such an amendment could appropriately appear in article I of the proposed Panama Canal Treaty by amending the language of that article to make the abrogation of the treaty of 1903 subject to authorizing legislation of the Congress inasmuch as that abrogation is itself the primary means by which the property and territory of the United States is alienated and transferred to Panama. Such an amendment could appropriately appear in other places in the Panama Canal Treaty, and additionally, any resolution of the Senate advising and consenting to ratification by the President of the Panama Canal Treaty should contain a specific reservation forbidding the President to exchange instruments of ratification with Panama until a statute is passed by the Congress authorizing the contemplated disposition of our territory and property in the Isthmus of Panama. Both of these procedures must be followed to insure that the Constitution is obeyed.

My own hope, of course, would be that such an authorizing statute would never pass, and I would certainly work to see its defeat. But notwithstanding a Member's position on the canal giveaway, we are all sworn to uphold the Constitution, and in this instance the Constitution is crystal clear and there can be no room for doubt but that the whole Congress must act before any transfer can legally occur.

Finally, Mr. President, I wish to emphasize that I have not reached this conclusion without study. As chairman of the Subcommittee on Separation of Powers of the Senate Committee on the Judiciary, I have heard the testimony of 36 witneses over 8 days of hearings dealing almost exclusively with this very question, and the overwhelming evidence both from the words of the Constitution and from past practice is that the administration position is devoid of any substantive legal support and ought to be rejected out of hand.

THE SUM OF $2.262 BILLION TO PANAMA FOR THE RIGHT TO CEDE THE CANAL ZONE TO PANAMA

I regret to say that the Constitution is ignored elsewhere in these treaties and related documents. Most citizens learn in eighth grade civics that bills for appropriation must originate in the House of Representatives and that the people's representatives in the House are charged with primary responsibility in matters regarding the Nation's pursestrings. Yet, Mr. Chairman, our negotiators have somehow figured out a means for bilking the users of the canal and the American taxpayers of at least $2.262 billion without any need to seek an appropriation from the Congress.

We are presented, then, with treaties which do not give the United States the right to guarantee its interests in the canal, which do not provide for an adequate defense of the canal, which do not allow the United States to initiate new canal projects except with Panama's consent, but which do, on the other hand, give the Canal Zone entirely to Panama, which do also eventually give the Panama Canal Company to Panama, which do immediately give the most lucrative operations of the Panama Canal Company to Panama, which do give immediately 10 U.S. military bases to Panama, which do give Panama immediately political jurisdiction over 37,000 U.S. citizens living in the Canal Zone, and which do, finally, give to Panama $2.262 billion in 1977 dollars. And this last I find the most incredible part of all.

You know, Mr. President, ordinarily the grantee pays the grantor, but our clever negotiators have figured out a way for us to give away the Canal Zone and

to pay the recipient at the same time. They have also figured out a way to make these payments without congressional approval. I will not insist now on going into great detail on how this $2.262 billion in 1977 dollars is to be paid to Panama, but during the course of this debate on which we have embarked I am certain that sooner or later it will be made even more fully apparent to the people of this country the shabby method by which they will be made to pay for this incredible arrangement. In the interim, I recommend to Senators a careful reading of a speech given on August 19, 1977, before the Panamanian National Assembly by Panamanian Planning and Economic Policy Minister, Nicolas Ardito Barletta. Minister Barletta's analysis of the cash flow to Panama proposed by these arrangements is, in my judgment, highly accurate, and it is from his work, rather than from the highly misleading Department of State estimates, that I have drawn the figure $2.262 billion.

I first raised this issue, Mr. President, in a speech I gave on the floor of the Senate on September 16, 1977, and finally only in recent weeks have the newspapers here in Washington, for the first time, given any attention at all to the matter. But that overdue attention is not too late, and if this debate continues beyond the vote today, perhaps, in fact certainly, it will be made clear to the people just what is involved in these cash transactions.

Why are we proposing to pay these tremendous sums to Panama? Why would we permit these proposed toll increases which will surely burden commerce and inflate consumer prices in the United States? The only reason I can ascertain is a desire to provide Panama with funds to repay outstanding loans from the large multinational banks. These banks already receive direct from the Department of State nearly all of the present annual annuity to Panama. Representatives of the banks, representing bondholders, directly participated in our negotiations with Panama. The banks did, but the Senate did not. Obviously, these big banks have an interest in seeing these disastrous treaties ratified just as they had an interest in the New York City bailout.

The Library of Congress did a study at my request which indicates that the external public debt of Panama is some $1.7 billion. Interest alone on that sum is a tremendous burden on this small country of only 1.5 million inhabitants, and already 40 percent of current revenues in Panama go to carrying present indebtedness. Stating the matter bluntly, Panama is on the verge of bankruptcy and many of the large multinational banks hold loans which may soon be bad debts, that is, of course, unless the U.S. Senate rescues the banks by consenting to these treaties to provide the funds to Panama for repayment.

Mr. President, sooner or later the Congress must draw the line and stop robbing the American taxpayers to extend funds to bankrupt Third World countries so that international banks can collect principal and interest on shaky loans. In my judgment, the international banks should be required to write off their bad debts, to write off at least some portion of the loans they made in error, and the international banks should be put on notice that the American taxpayer and the Congress will not always guarantee a profit in any loan transaction with unstable governments. Perhaps, rejection of the Panama Canal treaties would be a good method to send that message.

And another message ought to be sent. That message ought to be sent to the executive branch, and it ought to be that Congress will not permit its prerogatives to be trampled by clever devices cynically designed to circumvent the power of Congress over appropriations. The plain fact is that we plan to give to Panama $2.262 billion in cash flow and untold billions in assets. That being the case, the whole Congress needs to say either "yea" or "nay," as the people may wish. But the executive branch has structured these arrangements in a manner to prevent congressional authorization or appropriation.

The executive branch proposes to establish a Panama Canal Commission which would be a U.S. Government corporation structured much as is the present Panama Canal Company. This new proposed Panama Canal Commission would replace the Panama Canal Company and would acquire back from Panama for a term of years, until year 2000, the management only of the principal assets now owned by the Panama Canal Company.

Certain lucrative, highly profitable assets also immediately transferred to Panama will not even be managed by the United States but go to Torrijos on day one. But this new Commission would operate the canal, serving up off the top, so to speak, Panama's slice of the pie. And that slice is a pretty big slice which all admit would require immediate toll increases and no doubt later new borrowings from the U.S. Treasury to enable the Commission to pay this proposed average $100 million annual payment to Panama.

But under this plan what happens to the existing Panama Canal Company? This question is one of the many not yet answered satisfactorily by the administration. Also unanswered and more importantly, what happens to the existing $319 million debt of the Panama Canal Company to the Treasury—a sum which apparently would not be transferred to the proposed new Commission? What happens to the approximately $16 million in annual interest payments the United States receives on this debt? The answer is the same answer the people have gotten down through the years here in the Congress—the American taxpayer, as usual, will pick up the tab.

That's right, Mr. President, this section setting up this proposed Panama Canal Commission is a shell game fit for any carnival huckster. and it is going to cost our Treasury $319 million right off the bat and is going to deprive our taxpayers of some $16 to $17 million in annual interest payments that have amounted so far to over $600 million in payments into the Treasury.
